1.1 – Overview

NukeZone is a free, strategic text-based online game. The game is optimized for Internet Explorer 5.0 and above with a screen resolution of 800x600 or higher. The game will also work in newer versions of other browsers such as Opera and Firefox; however, while some features may not operate properly, the game engine functions correctly. It is strongly recommended that you use Internet Explorer 7.0 and above.

NukeZone is played in rounds lasting approximately 2 months each. Round dates can be found on the login page. At the end of each round, winners in various categories are given medals and all provinces are reset and the game starts over.

If you find any bugs or any other errors in the game, please report them ASAP in the *Technical Support and Bug Reports* forum. Sensitive information should be reported directly to Customer Support.

1.2 - Getting Started

You start with 125 turns and \$250,000, then the first time you login for the round you get awarded with an extra 175 turns and \$500,000 (totaling 300 turns and \$750,000). The extra bonus is only available for provinces created before the start of the round and those created in the first 48 hours of a round. It is up to you to determine what to purchase, while some prefer to use a more offensive strategy, others will choose to adopt a more defensive strategy. Money is required to purchase buildings and units. Turns are required to purchase buildings (jump to [3.1 - Buildings](#) for more info), increase research (jump to [3.10 - Research](#) for more info), or attack (jump to [4.1 – General Attack Information](#) for more info). You need buildings to survive – when all your buildings are destroyed you will die. When you have died you spend 6 hours dead before starting over in 18 hours of forced nuke protection again, with an additional 30 hours after that, which can be removed manually if you are ready early. Death results in a loss of all units, land, research, money (including in the bank) and turns except for the starting defaults.

There are several ways to get more money although you get a fixed number of turns:

- ☐ By default you receive 1 turn every 20th minute and \$15,000 each hour. You can research Money Production to increase your income up to a maximum \$45,000/hour.
- ☐ Join/create a clan and fight other clans (that your clan is at war with) in order to receive clan bonuses of up to 300 turns and \$1,500,000. (jump to [6.2 - Clan Points](#) for more info)
- ☐ Tell your friends about this game (you receive a bonus of 15 turns and 50 community points for each friend that signs up and plays for a while). Please note that to receive the bonus your friend must sign up with the same email as the invitation was sent to.

Note: You will not receive any additional turns every 20 minutes if you already have more than 300 turns. However, you can receive the clan bonus during this time but may have a maximum of 600 turns at a time no matter what. Please use some of your turns in order to start receiving turns every 20 minutes again.

1.3 - Starting Bonus

You can select a starting bonus from the following list, which you must claim within 48 hours after your first log in. You will receive a random chosen starting bonus if you do not take one in the first 48 hours.

☐ **Offensive**

Gain twice the land and money during attacks, plus 75 turns.

☐ **Defensive**

Constructing 10 buildings per turn by default (to a maximum of 20 with full research), plus 20% default Anti-Missile System defense (max 70% with AMS buildings), plus 10% time deduction when researching, plus 5 000 m2 of land.

☐ **Finance**

Hourly income increased by 10%, bank capacity is raised by 50% and \$400,000 money.

☐ **Shipping**

Missile orders ship 50% faster, plus ability to choose exact arrival time for units (up to 6 hours delayed), plus 10% default market discount (max 40% with research), 2,500 m² land and \$250,000 money.

The starting bonus you receive after you die is based on your networth 72 hours before you were killed. The bonus will increase gradually between \$100 000 and \$1 500 000 reaching a maximum increase of 300% at \$1 500 000. The increase will improve more dramatically at lower networth and more slowly as you approach \$1 500 000. The increases will not be in effect if you reset your account.

2.1 – Game

Overview - Province info, power status, news, current server time, nuke protection options, starting bonus

Attack - Regular attack, ground attack, air and sea attack, launch missile, send spy/spy plane, send thief, send sniper

Research - Research sciences

Explore - Explore or Sell additional land.

Market - Buy/sell merchandise.

Bank – Deposit/withdraw money. All deposited money is automatically withdrawn at the start of the second last day.

Clan - Join/create clan, clan properties, invite/kick players, manage clan wars, leave/delete clan, recruiting system etc.

2.2 - Build

Buildings - Build/demolish buildings

Sea Units - Build sea units

Air Units - Build air units

Vehicles - Build vehicles

Infantries - Train infantries

Missiles - Order missiles, view arrival dates

Satellites - Build/use Satellites

2.3 – Show

Local Events - Shows local events

Global Events - Shows global events, can be filtered by incoming, outgoing or internal.

Attack Events – Shows local outgoing events (Gold Users only).

Search Events – Allows a search of local and global events.

Enemy List – Links to enemy list (Gold Users only).

Status - Information, military info, military settings, history graphs (including Gold User only info) and several province statistics, rank from previous round

All Provinces - Shows all provinces within your attack range

All Clans - Shows all clans

Top List - Top Provinces, Top Networth Clans, Top Points Clans, Top Combo Clans

Search - Search for provinces by province id or province name, search for clans by clan id or clan name/tag

Clan Forum - A direct link to your private clan forum (only visible if you're a member of a clan)

Forum - NukeZone forums

Online Shop – Purchase a Gold user or Gold/Platinum clan

2.4 - NZ Portal

NukeZone Portal was once used as a news outlet and medium for important announcements. The portal has been discontinued and all announcements are now made in the forums.

2.5 – Other

Inbox - Display your inbox (private messages that have been sent to you)

New Message - Compose a new message

Help – Display Help documents and report forms

Invite Friends – Invite your friends to join NukeZone

Preferences - Options, edit profile, change colors, change password, delete province, reset province, create/edit your NZ Portal profile etc

About Us – Crew contact information, credits

Logout - Logout from NukeZone

3.1 – Buildings

Land is nice to have, but without buildings and infrastructure it is of little use. NukeZone offers a variety of buildings to place on your land. Each building has some inherent benefits that allow your province to grow or specialize. It is up to you to determine how to fill your land, and there is no perfect or ideal balance for growth. As well, each building uses a specific amount of power, and power can only be provided by power plants. If you have low power, your defensive buildings, missile silos, research labs and command centers won't work, meaning you will be more susceptible to attack, will not be able to launch missiles or be able to perform scientific research. The defense values of your buildings drop by 40% when you are low on power and you will be unable to use spy planes, spies, thieves, snipers and satellites. If you are short on land, either explore for more or attack someone to try and steal some. The amount of unused land improves the defense of your buildings by up to a 40% boost for 25% unused land. It takes 20 m² to build. If you have excess land, you can choose to sell up to 20,000m² per day for \$50 per m² (except for the first 72 hours of a game and 36 hours after dying).

Available Buildings in NZ or AO:

Name	Price	Networth	Description
Research Lab	\$4,500	\$270	Every 50 Research Labs will deduct 10% from the time it will take to complete your research (to a maximum of 200 RL or 40%). Attack: 0, Life: 300 Power usage: 4000
Missile Silo	\$22,000	\$1,320	Houses 1 missile. Attack: 0, Life: 500 Power usage: 10000
Command Centre	\$2,200	\$132	Supports 5 special units†. Attack: 0, Life: 120 Power Usage: 1800
Shipyards	\$1,100	\$66	Houses 5 sea units. Attack: 0, Life: 90 Power usage: 700
Airfield	\$900	\$54	Houses 10 air units. Attack: 0, Life: 85 Power usage: 600
War Factory	\$1,200	\$72	Houses 10 vehicles. Attack: 0, Life: 80 Power usage: 900
Barracks	\$700	\$42	Houses 20 infantries. Attack: 0, Life: 65 Power usage: 550
Power Plant	\$550	\$33	Produces 3000 power units. Attack: 0, Life: 85
Advanced Power Plant	\$1,300	\$78	Produces 15000 power units. Attack: 0, Life: 40
Torpedo launcher	\$1,900	\$190	Gives you a sea defense. Attack: 400, Life: 310 Power usage: 350
SAM Site	\$1,400	\$140	Gives you an air defense. Attack: 290, Life: 240 Power usage: 400
Missile Turret	\$1,500	\$150	Gives you a vehicle defense. Attack: 330, Life: 265 Power usage: 550
Machinegun Turret	\$1,450	\$145	Gives you an infantry defense. Attack: 300, Life: 245 Power usage: 425
Anti-Missile System	\$5,000	\$300	Gives you a missile defense††. Attack: 0, Life: 320 Power usage: 1700. Each AMS covers 200m ² of your built land

† Special units are: Spy Plane, Spy, Thief and Sniper.

†† Anti-Missile System defense varies based on the amount of used land. Anti-Missile Systems provide a maximum of 50% protection (70% with the Defensive starting bonus). 750 Anti-Missile Systems will provide 50% protection, no matter the amount of used land you have.

3.2 - Sea Units

To build sea units, you need shipyards, which house 5 sea units. Sea units can only be combined with air units in an "Air and Sea Attack". Sea units receive a +10% attack damage boost when attacking or defending Infantries.

Available Units in NZ:

Name	Price	Networth	Description
Submarine	\$1,875	\$206.25	Attack: 140, Life: 90 Can attack: Sea Units, Buildings
Stealth Boat	\$1,600	\$176	Attack: 150, Life: 75 Can attack: Infantries
Destroyer	\$1,900	\$209	Attack: 120, Life: 90 Can attack: Air, Infantries, Buildings
Cruiser	\$1,700	\$187	Attack: 125, Life: 75 Can attack: Air Units, Vehicles
Battleship	\$1,675	\$234.5	Attack: 210, Life: 80 Can attack: Buildings

Available Units in AO:

Name	Price	Networth	Description
Submarine	\$1,350		Attack: 110, Life: 70 Can attack: Sea Units
Zumwalt	\$900		Attack: 65, Life: 55 Can attack: Infantries
Destroyer	\$1,125		Attack: 65, Life: 50 Can attack: Vehicles, Infantries, Buildings
Cruiser	\$1,895		Attack: 110, Life: 110 Can attack: Air Units, Sea Units
Battleship	\$1,705		Attack: 90, Life: 85 Can attack: Buildings
RIM-7 Sea sparrow	\$1050		Attack: 90, Life: 50 Can attack: Air units

3.3 - Air Units

To build air units, you need airfields, which house 10 air units. Air units can be combined with all other units when attacking. Air units receive a +10% attack damage boost when attacking or defending Sea units.

Available Units in NZ:

Name	Price	Networth	Description
F-22 Raptor	\$1,025	\$112.75	Attack: 70, Life: 45 Can attack: Sea Units, Buildings
F-35 JSF	\$775	\$85.25	Attack: 50, Life: 40 Can attack: Air Units, Vehicles
SH-60 Sea Hawk	\$800	\$88	Attack: 70, Life: 30 Can attack: Sea Units
B-2 Stealth Bomber	\$1,050	\$147	Attack: 125, Life: 50 Can attack: Buildings
RAH-66 Comanche	\$950	\$104.5	Attack: 60, Life: 40 Can attack: Vehicles, Infantries, Buildings
Aurora Spy Plane	\$15,000	\$900	Spies on enemy buildings. Attack: 0, Life: 200 Can attack: None

Available Units in AO:

Name	Price	Networth	Description
SR-71 Spyplane	\$15000		Attack: 0, Life: 200 Spies on enemy Buildings Can attack: None
U-2 Dragon Lady	\$780		Attack: 0, Life: 75 Each unit sent to battle supports up to 100 Vehicles and/or Infantries, providing a 25% attack boost
F-22 Raptor	\$875		Attack: 55, Life: 40 Can attack: Air
A-10 Thunderbolt II	\$725		Attack: 35, Life: 35 Can attack: Vehicles, Infantries, Buildings
SH-60 Sea Hawk	\$800		Attack: 70, Life: 30 Can attack: Sea Units
B-2 Stealth Bomber	\$1,040		Attack: 60, Life: 40 Can attack: Buildings
V-22 Osprey	\$840		Attack: 65, Life: 40 Can attack: Sea Units
AV-8B Harrier I	\$690		Attack: 40, Life: 35 Can attack: Air Units, Sea Units
MH-60 Black Hawk	\$675		Attack: 65, Life: 30 Can attack: Vehicles, Buildings

3.4 – Vehicles

To build vehicles you need war factories, which house 10 vehicles. Vehicles can be combined with air units and infantries when attacking. Receive a +10% attack damage boost when attacking or defending Air units.

Available Units in NZ:

Name	Price	Networth	Description
Humvee	\$925	\$101.75	Attack: 65, Life: 35 Can attack: Air Units, Infantries, Buildings
M270 MLRS Tank	\$725	\$79.75	Attack: 50, Life: 30 Can attack: Sea Units, Infantries
Heavy Artillery	\$1,000	\$140	Attack: 110, Life: 45 Can attack: Buildings
SAM Tank	\$775	\$85.25	Attack: 70, Life: 35 Can attack: Air Units
M1 Abrams Tank	\$1,000	\$110	Attack: 60, Life: 50 Can attack: Vehicles, Buildings

Available Units in AO:

Name	Price	Networth	Description
LAV-Anti Tank	\$520		Attack: 45, Life: 20 Can attack: Vehicles
M-70 MLRS Tank	\$735		Attack: 50, Life: 30 Can attack: Air Units, Sea Units
M2 Bradley	\$965		Attack: 65, Life: 40 Can attack: Infantries, Buildings
M109 Howitzer	\$1245		Attack: 90, Life: 30 Can attack: Buildings
M1 Abrams Tank	\$1,195		Attack: 65, Life: 50 Can attack: Vehicles, Infantries, Buildings
M270 Rocket system	\$680		Attack: 55, Life: 30 Can attack: Sea Units

3.5 – Infantries

To train infantries you need barracks, which house 20 infantries. Infantries can be combined with air units and vehicles when attacking. Infantries receive a +10% attack damage boost when attacking or defending vehicles.

Available Units in NZ:

Name	Price	Networth	Description
Thief	\$5,000	\$550	Steals money from the enemy base and protects your base from possible enemy thieves. Attack: 0, Life: 250 Can attack: none
Spy	\$3,000	\$180	Spies on enemy units, protects your base from possible enemy spies. Attack: 0, Life: 250 Can attack: none
Sniper	\$5,000	\$300	Attack: 125, Life: 250 Can attack: Spies, Thieves, Snipers Note: Snipers have 5 times less defense against other snipers
Navy Seal	\$550	\$60.5	Attack: 30, Life: 30 Can attack: Sea Units, Infantries
Armoured Infantry	\$475	\$52.25	Attack: 30, Life: 20 Can attack: Air Units, Buildings
Paratrooper	\$625	\$87.5	Attack: 65, Life: 25 Can attack: Buildings
Grenade Soldier	\$475	\$52.25	Attack: 45, Life: 20 Can attack: Vehicles
Rocket Soldier	\$550	\$60.5	Attack: 30, Life: 25 Can attack: Sea Units, Vehicles, Buildings

Available Units in AO:

Name	Price	Networth	Description
Thief	\$5,000		Steals money from the enemy base and protects your base from possible enemy thieves. Attack: 0, Life: 60 Can attack: none
Spy	\$4,000		Spies on enemy units, protects your base from possible enemy spies. Attack: 0, Life: 250 Can attack: none
Sniper	\$10,000		Attack: 140, Life: 50 Can attack: Spies, Thieves, Snipers Note: Snipers have 5 times less defense against other snipers
Navy Seal	\$825		Attack: 45, Life: 35 Can attack: Sea Units, Buildings
Assault infantry	\$525		Attack: 20, Life: 30 Can attack: Air Units, Vehicles, Buildings
Paratrooper	\$935		Attack: 50, Life: 30 Can attack: Buildings
Grenade Soldier	\$720		Attack: 45, Life: 35 Can attack: Vehicles
Rifle infantry	\$415		Attack: 20, Life: 20 Can attack: Infantries, Buildings
FIM-92 stinger	\$525		Attack: 35, Life: 20 Can attack: Air Units

3.6 - Special Units

Special units are the spy plane, spy, thief and sniper. In order to own these units you must have Command Centers. You can have a maximum of 200 Command Centers meaning you are limited to no more than 1000 special units. Special units cannot be used when you have low power. You may only buy or sell 100 special units per day in all market transactions; e.g. buying 50 and selling 50 would be the maximum special unit transactions for that day.

3.7 – Market

The market allows you to buy units without using turns to build them. However, units on the market are 2.5 times more expensive to buy and because they are not built in your province, they take time to arrive. Depending on the research you have and how much you are willing to pay you can get units from the market in between 3 and 12 hours. You can research Market Discount to reduce the cost of buying units on the market. (jump to [3.10 - Research](#)) You can cancel an incoming order, which returns 75% of the regular market price (money spent on accelerated shipping will not be returned after canceling an order).

You can pay extra to reduce the time it takes for your units to be delivered – paying 1.5 times the price allows your units to arrive in half the time. Accelerated shipping for missiles costs 1.5 times the price. You can also research Market Shipping Time so you get units from the market faster. The market also allows you to sell your units to recoup some of their cost if you no longer want them.

It is important to know that the market does not work on the last day of a round. So, make sure your orders are placed in time.

3.8 – Bank

The bank allows you to make security deposits for a maximum time of 15 days, minimum of 5, that gain value from interest. This money is safe from anything except death, dying makes you lose your banked money. While your deposit is maturing, it will gain interest that compounds daily. Your money will be locked in the bank for the number of days that you select and can only be withdrawn early if you have researched Bank Management. The default interest is 4.5%, the maximum amount of deposits is 10 and \$2,500,000 is the maximum amount of money that you can store. All of these can be improved by researching Bank Management. (jump to [3.10 - Research](#)) Choosing the finance bonus increases the maximum storage capacity of your bank by 50%. It is important to know that all deposits are auto-withdrawn at the start of the day before the last day of the round, interest included.

3.9 – Missiles

To build missiles you need missile silos, which house 1 missile. A missile is an expensive but very powerful attack option. The chance of hitting the enemy base depends on three things: your missile accuracy research, power used to fire the missile, and your enemy's missile defense. Missiles cost 4 turns to build and 4 turns to launch. They make use of their own Missile Power (5% received per half hour) and do not use morale. Missiles can be fired with any amount of Missile Power (minimum of 30%) but more Missile Power used gives better accuracy on a linear scale. Accelerated Shipping mode for missiles cost 1.5 times the standard price. The default chance of tracking who sent a missile is 75%.

Available Missiles in NZ:

Name	Price	Networth	Description
Nuclear Missile	\$100,000	\$6,000	Attack: 500,000 Can attack: All Buildings and Units
Chemical Missile	\$35,000	\$2,100	Attack: 250,000 Can attack: Sea Units, Air Units, Vehicles
Biochemical Missile	\$30,000	\$1,800	Attack: 200,000 Can attack: Infantries
EMP Missile*	\$20,000	\$1,200	The EMP Missile initially disables 20% of the enemy's power supply decreasing 5% per hour over a 4 hour period. You do not receive clan points for using this missile.

* You do not receive points for using this missile. EMP damage is removed from the target province by 5% each hour. 2 EMP missiles will disable 40% of the targets power if they hit and the effect on the province will then reduce by 5% each hour. It would therefore take 8 hours before all EMP damage was removed. The maximum

total EMP effect on a target is 75%, additional EMP damage will only extend the duration of the effect, not the magnitude.

Available Missiles in AO:

Name	Price	Networth	Description
Nuclear Missile	\$100,000		Attack: 25,000 Can attack: All Buildings and Units
Chemical Missile	\$50,000		Attack: 15,000 Can attack: Sea Units, Air Units, Vehicles
Biochemical Missile	\$35,000		Attack: 10,000 Can attack: Infantries
MOAB	\$20,000		Attack: 8,000 Can attack: Buildings

3.10 – Satellites

There are 6 different satellites available for you to build. All satellites require level 1 in Satellite Technology before they can be built. Each satellite costs 20 turns and takes 48 hours to construct. After you have built the satellite, you must launch it into space. It takes 1 hour for a satellite to reach earth's orbit, and it can then stay up for 14 days until it crashes down and burns up in earth's atmosphere. You can increase the time your satellite stays in orbit by five days by researching the second level of Satellite Technology. A satellite will stay in orbit for the period researched at the time of launch, research while in orbit will not effect that satellite.

Your satellite power increases by 10% each hour and all satellites cost 5 turns to use. Satellites are not operational when you have low power although a previously launched Stealth Satellite will continue to function if it was activated while you had power. If you need to launch another satellite and your current satellite has not yet crashed, you can demolish your satellite for 20% of its original cost.

Available Satellites in NZ:

Name	Price	Networth	Description
EMP Satellite*	\$600,000	\$36,000	The EMP Satellite disables X% of the enemy's power supply over X amount of hours. Requires at least 25% satellite power, 100% satellite power = max effect damage (the more power, the more damage). Max effect: 30%, 6 hours
Laser Beam Satellite	\$1,000,000	\$60,000	Requires at least 25% satellite power, 100% satellite power = max attack damage (the more power, the more damage). 95% hit rate. Max Attack: 9000 Can attack: Buildings
Orbital Research Laboratory	\$350,000	\$21,000	Deducts 20% from the time it will take to complete your research and reduces the turn cost for researching down to 20 turns (to a maximum of 60% with full Research Labs).
Spy Satellite	\$500,000	\$30,000	Spies on the enemy base. Requires 100% satellite power. You will receive this information: - Number of enemy buildings and units. - Unused enemy land and power status. - All values will be within $\pm 15\%$
Stealth Satellite	\$450,000	\$27,000	When activated, your base will be hidden from enemy spies, thieves, snipers, laser beam satellites and EMP satellites. It hides your base for 7 hours. Requires 100% satellite power.
Anti-Missile Satellite	\$700,000	\$42,000	Gives you instant 100% protection. Each time it shoots down a missile 25% satellite power is used. If you don't have enough satellite power, the satellite will not be able to shoot down any missiles until you get more satellite power.

*EMP damage is removed from the target province by 5% each hour. 1 hit at full power with the EMP satellite will disable 30% of the targets power and the effect on the province will then reduce by 5% each hour. It would

therefore take 6 hours before all EMP damage was removed. The maximum total EMP effect on a target is 75%, additional EMP damage will only extend the duration of the effect, not the magnitude.

3.11 – Research

There are 9 different sciences available for you to research. Researching sciences requires time. The time needed is based on your amount of *Research Labs*, and the more you own, the faster it goes. You can get up to 40% deduction, depending on how many *Research Labs* you own. You can get up to 60% deducted by getting an Orbital Research Laboratory. You can only research one science at a time and each level costs 25 turns. Every completed science will add \$950 to your networth for every hour it takes to complete - networth will not be unaffected by increased research speed, it will be calculated only based on these default values.
Available Research:

Bank Management:

Level 1 (5 hours) – Bank Stores Up to \$3 500 000 and Bank Interest Increased by 0,5%.

Level 2 (5 hours) – Bank Stores Up to \$4 500 000 and Bank Interest Increased by 0,75% + option to withdraw money after 24 hours with no interest but with a 25% fee.

Level 3 (5 hours) – Bank Stores Up to \$5 000 000 and Bank Interest Increased by 1,0% + the 25% fee for early withdrawals is removed + the fee of 1/4 the money is removed when sending aid.

* Engineer Effectiveness:

Level 1 (10 hours) – 10 buildings built per turn.

Level 2 (10 hours) – 15 buildings built per turn.

* Market Discount:

Level 1 (5 hours) – 15% discount on all units purchased from the market.

Level 2 (5 hours) – 30% discount on all units purchased from the market.

* Market Shipping Time:

Level 1 (5 hours) – Shipping time reduced to 9 hours.

Level 2 (5 hours) – Shipping time reduced to 6 hours.

* Missile Accuracy:

Level 1 (12 hours) – Chance to hit target raised from 20% to 90%.

Level 2 (12 hours) – Chance to hit target raised to 95% and cost of missiles reduced to 3 turns.

* Money Production:

Level 1 (18 hours) – \$30 000 income per hour.

Level 2 (18 hours) – \$45 000 income per hour.

* Power Plant Efficiency:

Level 1 (5 hours) – Power Plants life and power produced increased by 50%.

* Satellite Technology:

Level 1 (10 hours) – Allows you to build satellites.

Level 2 (10 hours) – Extends the maximum orbit time of the satellite by 5 days.

Level 3 (10 hours) – Construction cost of satellites reduced by 20% and each use of a satellite will cost 4 turns instead of 5.

* Thief Education:

Level 1 (5 hours) – Thieves steal two times the amount of money.

Level 2 (5 hours) – Thieves steal three times the amount of money.

Level 3 (5 hours) – Thieves steal four times the amount of money.

4.1 - General Attack Information

Each attack is unique in some way and all attacks cost a different amount of turns. Launch Missile costs 4 turns and 75% missile power. Regular Attack, Ground Attack and Air Attack cost 3 turns. Send Spy/Spy Plane costs 1 turn. Send Thief costs 2 turns and 10% morale. Send Sniper costs 2 turns and 5% morale. The maximum amount of morale your army can have is 100% (50% morale pool)†, and each attack uses a different amount of morale. An attack may “cost” as low as 20% of your morale and as high as 35%. When you attack an enemy that is smaller than yourself, you will lose 5% more morale. You will lose additional 10% of morale if you use an aggressive attack type. However, your morale increases by 5% every 15 minutes. Missiles have their own Missile Power (5% received per half hour) and does not use morale.

Our Anti-Attack Abuse (AAA) system is in place to keep track of attacks made against other provinces you are not at war against. AAA tracks the number of attacks made by you against this target for the past 2 weeks. As the number increases, your attacks against this target will cost more morale and turns and your missile accuracy against this target will decrease.

Target ID is the target province id.

Attack Method is the option on how you want to attack your enemy.

Main Target specifies the target your troops will focus on.

Attack Type specifies how the attack should be made; normal or aggressive.

† You receive 5% morale every 15 minutes as usual. When you reach your morale capacity at 100%, instead of losing out on new morale, the lost morale will instead be added to your morale pool at the same 5% rate every 15 minutes until both your morale and pool are maxed out (at 100% morale and 50% pool). After that, you will start losing out on new morale because both your morale and your pool are maxed out. Once you use your morale, and it goes below 100%, you will once again have your new morale added to your morale at the same rate, instead of being added to your pool, until you are maxed out again. If you at this point also have morale in your pool, you will not only get 5% new morale added, but also 5% morale moved over from your pool at the same time. This means that in order for this to happen you must have 90% OR LESS morale (because if you have 95%, you will be maxed out at 100% after you receive your new 5% morale, and the pool will be untouched). You can only use your morale for attacking/etc. You cannot directly use the morale in your pool. You must wait for it to be moved over to your morale.

4.2 - Regular Attack

Regular attack can consist of air units, vehicles and infantries. This attack method costs 3 turns.

4.3 - Ground Attack

Ground attack can only consist of ground units. Using this method makes the vehicles and infantries slightly more powerful than a Regular attack. This attack method costs 3 turns.

4.4 - Air and Sea Attack

Air and Sea attack can only consist of air units and sea units. Using this method makes these units slightly more powerful than a Regular attack. This attack method costs 3 turns.

4.5 - Launch Missile

Use this option to send your missiles to enemy targets. This attack method costs 4 turns, and uses up to 75% of available Missile Power. EMP missiles will not award points but all other successful missiles will. Points for successful missile attacks are based upon the war status and networth level of the target, not on the amount of damage done.

4.6 - Send Spy/Spy Plane

When you send out your spy, his job is to spy on your enemy's army or base. You can choose between an infantry spy for army intelligence or a spy plane to gather info on your enemy's buildings. However, there is no guarantee either will succeed. You may send up to 5 Spies at once for the same amount of turns, for up to 5x the details of your results (chance of being caught increases by up to 10x). Opposing snipers and spies can kill infantry spies. If he does fail, your enemy is informed that you sent the spy. If your spy is successful, it is hard to count to an exact number of units or buildings in such a short period of time, so your spy works with special codenames. Below are the translations of those codenames. This attack method costs 1 turn.

Spy Codenames: The numbers on the table below are based on the sending of 1 Spy, and can be made more detailed depending on how many Spies are sent, up to a total of 5.

Codename	Amount of Units
Few	0-99
Several	100-249
Pack	250-499
Lots of	500-1,499
Many	1,500-4,999
Crowd	5,000-9,999
Legion	10,000-19,999
Super Legion	20,000+

When sending more spies, you have an increased risk of failure and loss of spy units, but get more detailed information on units as follows:

2 spies:

0-49 | 50-99

100-174 | 175-249

250-374 | 375-499

500-999 | 1000-1499

1500-3249 | 3250-4999

5000-7499 | 7500-9999
10000-14999 | 15000-19999
20000-26999 | 27000+

3 spies:

0-33 | 34-66 | 67-99
100-149 | 150-199 | 200-249
250-333 | 334-416 | 417-499
500-833 | 834-1166 | 1167-1499
1500-2667 | 2668-3833 | 3834-4999
5000-6666 | 6667-8333 | 8334-9999
10000-13333 | 13334-16666 | 16667-19999
20000-25999 | 26000-31999 | 32000+

4 spies:

0-24 | 25-49 | 50-74 | 75-99
100-137 | 138-175 | 176-212 | 213-249
250-312 | 313-375 | 376-437 | 438-499
500-749 | 750-999 | 1000-1249 | 1250-1499
1500-2374 | 2375-3249 | 3250-4124 | 4125-4999
5000-6249 | 6250-7499 | 7500-8749 | 8750-9999
10000-12499 | 12500-14999 | 15000-17499 | 17500-19999
20000-26999 | 27000-33999 | 34000-40999 | 41000+

5 spies:

0-19 | 20-39 | 40-59 | 60-79 | 80-99
100-129 | 130-159 | 160-189 | 190-219 | 220-249
250-299 | 300-349 | 350-399 | 400-449 | 450-499
500-699 | 700-899 | 900-1099 | 1100-1299 | 1300-1499
1500-2199 | 2200-2899 | 2900-3599 | 3600-4299 | 4300-4999
5000-5999 | 6000-6999 | 7000-7999 | 8000-8999 | 9000-9999
10000-11999 | 12000-13999 | 14000-15999 | 16000-17999 | 18000-19999
20000-27499 | 27500-34999 | 35000-42499 | 42500-49999 | 50000+

When you send in a spy plane, there are three possible results: successfully gathering information, failure with your plane shot down, or failure to gather data but the plane does return to your base. There is no way to build defense against enemy spy planes, except for the stealth satellite. Below, is a chart showing the accuracy of data returned by a single spy plane. These ranges can be improved only with help from your clan mates. If a clan mate spy planes the same target within 15 minutes of you, then accuracy will be doubled. A second clan mate can then triple the accuracy. However, if more than 15 minutes has passed, then the new report will contain the most basic data ranges.

Spy Plane Codenames:

Codename	Amount of Buildings
Few	0-49
Several	50-124
Pack	125-249
Lots of	250-499
Many	500-999
Crowd	1,000-2,499
Legion	2,500-4,999
Super Legion	5,000+

4.7 - Send Thief

When you send out your thief, his job is to steal money from the selected enemy. However, there is no guarantee that your thief will succeed. If he does fail, your enemy is informed that you sent the thief. This attack method costs 2 turns and 10% morale.

You can send up to 10 thieves at once for the same turns and morale as one. This allows you to get up to 5 times the return but the chance of being caught increases by up to 10 times – times 1 extra for each additional thief. Therefore an attack with 5 thieves could get you up to 2.5 times as much money but you would be 5 times as likely to be caught. If caught you lose all attacking thieves.

4.8 - Sniper

A sniper can both attack and defend. They can attack spies, thieves and snipers. They can defend against spies, thieves, and snipers. They are five times better at defending than spies and thieves are. However, snipers have 5 times less defense against other snipers. This attack method costs 2 turns and 5% morale.

You can send up to 10 snipers at once for the same turns and morale as one. This allows you to do up to 5 times the damage but the chance of being caught increases by up to 10 times – times 1 extra for each additional sniper. Therefore an attack with 5 snipers could inflict up to 2.5 times as much damage but you would be 5 times as likely to be caught. If caught you lose all attacking snipers. Attacks with snipers do not earn clan points.

5.1 - Province Status and History

You can get access to a wealth of information about your province and your past performance from the status page. The history page shows statistics for the following items:

History statistic	Explanation
Attack Success	The number of successful attacks made expressed as a percentage
Defend Success	The number of times successfully defended expressed as a percentage
Highest Networth	The peak networth you have achieved in the current round
Highest Land Area	Greatest land area you owned in the current round
Land Gained in Combat	Area of land gained by attacking other provinces
Land Lost in Combat	Area of land lost to other provinces attacking you
Money Gained in Combat	Sum of money gained by attacking other provinces
Money Lost in Combat	Sum of money lost to other provinces attacking you
Money Lost in Thievery	Sum of money you lost to thievery
Most Money Gained in Thievery	Highest amount of money stolen by one thief (GU only)
Kills	Number of provinces you killed
Kills (during clan wars)	Number of provinces you killed during clan wars
Times Killed	Number of times your province has been killed
Missiles Sent	Number of nuclear, chemical and biochemical missiles you have sent
NW Damage Made by Missiles	Cumulative sum of the damage* your missiles have dealt this round
Enemy Missiles Received	Count of enemy missiles that have been fired at your province
Enemy Missiles Hit	Enemy missiles that have not missed or been shot down by anti-missile-systems
Enemy Missiles Missed	Enemy missiles that have missed your province
Enemy Missiles Shot Down	Enemy missiles that your anti-missile-systems have shot down

* damage in kill shots is not calculated

Attacks Made	Total attacks made, not including missiles sent
Attacks Made (during clan wars)	Total attacks made during clan wars, not including missiles sent
Wins	Successful attacks made (percentage in brackets)
Attacks Suffered	Total attacks suffered from other

	provinces
Defeats	Number of times the enemy successfully penetrated your defenses (percentage in brackets)
Clan Points Gained (current clan)	Total clan points gained in the current clan - every time you successfully attack a province your clan is at war with, you will be awarded clan points depending on the damage
Clan Points Gained (total)	Total clan points gained for the whole round
Aid Sent (current clan)	Amount of aid you have sent in current clan
Aid Received (current clan)	Amount of aid you have received in current clan
Targets Spied	Amount of targets spied in current clan
Time to Complete All Sciences	Total time to complete research on all sciences
Morale used	Total morale used in attacks
Morale lost	Amount of morale lost during the round

Enhanced History: There are more History Statistics but these are for Gold User only.

You can also view graphs plotting the history of your province over the last 14 days in certain key areas:

- *Networth*
- *Land (Gold users only)*
- *Total Buildings (Gold users only)*
- *Total Units (Gold users only)*

5.2 – Military Info

A full breakdown of your current military force is provided here for quick reference. You can choose to share certain military information with your clan mates from the preferences menu.

Extended Military Information is available to those who are currently in a Gold Clan. This feature allows Gold Clan members to view additional Military Information that is normally hidden. There are 6 sections visible: -

Overview - allows clan mates to view your status page.

Military - quickly shows clan mates all the units you have and how many are on order.

Buildings - this permits clan mates to see what type and volume of buildings you have as well as whether or not you have a satellite in orbit.

Research - this lets clan mates look at what research you have done.

Orders - A detailed list of all market and missile orders pending.

If you are Gold User your clan mates can also see the following Info. The dropdown list shows GU's as a darker color

History Graphs – allows clan mates to see you graphs (networth, land, buildings, units, attacks made, attacks received and clan points gained)

Statistic Breakdown – Allows clan mates to see your Networth and Turns Breakdown.

5.3 – Province Preferences

The Preferences menu allows you to change many options specific to your province including province details, account details, account password, as well as many speed round & gold user only options. This is also where you go to put your account into vacation mode or reset your account; as well as creating/editing your NZ Portal Profile.

The Options page allows you to change certain details about your province, including your province name and email address. If you are a Gold User you are able to change your province name at any time, however there is

a minimum waiting time of 7 days between name changes. If you are a Normal User you may only change your province name when you are dead (i.e. straight after you have been killed or resetting your account) and the minimum waiting time between province name changes is 14 days. Please be aware that you are only dead for 6 hours so if you intend to change your province name you must log into your account during this time in order to change it. All players are able to perform 1 name change during NukeProtection at the beginning of a round.

Vacation mode puts your province into nuke protection for a specified period of time while you are away. During vacation mode you cannot login to your province and can not be attacked by any players, but will receive no cash or turns. However, other timers such as bank deposits, market orders, and satellite life, will continue to process during your vacation. To prevent abuse, the vacation mode will take effect 24 hours after you have activated it and then last for the specified number of days, so please be sure to request it at least 24 hours in advance. Also, when vacation mode is requested you will receive an email with a confirmation code that must be entered any time before your vacation begins or else it will never begin. Vacations must be a minimum of 4 days, maximum of 30 days, and you cannot be in vacation mode during the last 3 days of a round.

The Preferences menu is also where you go to activate any Gold User memberships, Gold/Platinum Clan memberships and Speed Round passes you may have purchased; or to transfer them to another province. To do this please go to the Gold User Management section. Gold User memberships that have been used cannot be transferred, even if there are one or more rounds left.

5.4.1 – Community Score

What is it?

This is a good way to encourage users to get more involved with the community. This system is not based on quantity alone, but it is also highly based on quality. More posts does not mean more score, the higher quality posts will get higher score. This means getting the community involved in helping beginners out, posting ideas and suggestions, reporting bugs, and so on.

How is Community Score awarded?

Community Score is awarded based on your activity and actions. Creating topics, posting replies, and so on will give you score while deleting a post will remove the score for that post. However, in order to prevent both abuse and spam we have made it so that if you get a forum ban, you will lose score based on the amount of days banned for. You will also lose score for getting warned. Additionally, if you have your forum topic or post removed by a moderator you will lose more score than you gained posting it. This means that spamming will affect you in a negative way and not just remove the score gained from posting.

5.4.2 - Community Levels

Your Community Score will not be visible to other users. It will only be visible for yourself; however, a Community Level will be publicly shown based on your score.

Level	Description	Score
10	Be the first to find out ¹ (plus the first person to reach Lvl 10 will receive an additional one-of-a-kind special reward)	95,000+
9	Elite status user type given ² , option to host a fully customizable private NukeZone ELITE round ³	60,000 to 94,999
8	Eligible to purchase a Gold User+ ⁴ , and ability to create topics in The Zone forum	40,000 to 59,999
7	Invitation to private rounds of NZ, ability to post two polls per round in the Off Topic Forum	27,500 to 39,999
6	Veteran status given, ability to post one poll per round in the Off Topic Forum	17,500 to 27,499
5	Ability to vote for popular topics on the forums	10,000 to 17,499
4	Ability to claim you are cooler than the level 3 players	5,000 to 9,999
3	Ability to use colors, fonts and images on the forums	2,500 to 4,999
2	Congratulations for reaching Level 2	1,000 to 2,499
1	Standard access to all forums and features	999 and less

- 1) The features for this level will be announced once the first user reaches it.
- 2) Elite status will be prefixed to your user type (Normal User becomes Elite User, Gold User becomes Elite Gold User and Gold User+ becomes Elite Gold User+).
- 3) NukeZone ELITE is a fully customizable mini round. You have the ability to invite players and [completely customize](#) the gaming experience (anything from round start date to unit stats).
- 4) A Gold User+ membership is a Gold User membership for All Rounds. It is non-transferable.

5.4.3 - Community Score Point System

Score is awarded based on the following table.

Action	Score
Create a topic (not including the Off Topic Forum/Getting Started)	5
Post a reply (not including the Off Topic Forum)	2
Delete a post (not including the Off Topic Forum)	Points lost: -2 or -5
Have your topic selected as popular	25
Special community activity, based on votes by the NZ Crew	25 to 500
Invite a friend to NukeZone (with a limit of 15)	Per friend: 50
Linking your IRC auth with your NukeZone account	Once: 50
Logging into NukeZone	Once daily: 1
Activity in IRC channel #NukeZone	Once daily: 1 to 10
Winning a medal or clan top list as first place	200
For each dollar spent in the online shop	Per dollar: 15
For each dollar donated to NukeZone using the online shop	Per dollar: 30
Have your topic deleted	-10
Have your post deleted	-4
Receive a forum warning	-25
Receive a temporarily forum ban	Per day banned: -50
Receive a permanent forum ban	Reset to: -1000

Popular Topics

This is unrelated to the amount of replies to the topic there are and solely based on the quality, relevancy and creativity of the topic. NZ Crew members and Level 5+ users may vote in favor or oppose popular topic status for topics. A topic is marked as popular if 80% of the votes are in favor, with a minimum requirement 20 user votes (with at least two being favor votes by NZ Crew members). There is no way for any user, including Level 5+ users, to view the amount of votes for a topic.

The NZ Crew may choose to immediately mark a topic as popular without requiring any votes. This is useful for important announcements concerning the game. When a topic is selected as popular, its topic name will be displayed in bold on the forums, and the topic will be included in the (new) "Popular Forum Topics" list on the front page, next to the recent news. Most important official announcements made on the forum will be marked as popular when created.

Special Community Activity

This includes, but not limited to: Arranging an unofficial contest with or without prizes, participating in the creators hour event, suggesting ideas that gets implemented into the game, participating in an official contest or applying for forum moderator position when applicable.

IRC Activity Chart

Community Score for IRC activity will be based on the following chart. Please note that */me actions* are not included. Please note that in order for score to be awarded, you must first link your auth with your NukeZone account. Also, your activity is only tracked while the NukeServ bot is present.

No. of Lines Written	Score
330+	10
270 to 329	9
220 to 269	8
180 to 219	7
140 to 179	6
100 to 139	5
70 to 99	4
40 to 69	3
20 to 39	2
1 to 19	1

6.1 - General Clan Information

Clans are a vital element in NukeZone, and if you're not in a clan, join or create one immediately (see the Find Clan section for help joining a clan). Clans can provide protection to their provinces. A clan can have up to 15 members. There are four different types of clan members: Clan Leader (CL), Co-Leader (CO), Clan Trustee (CT), and Normal Member. The clan leader controls everything, and can select up to 4 clan trustees. These CT's can help the CL to control the clan by declaring war/peace, or by editing the clan message. If the CL gets banned or deleted due to inactivity, the CO will become CL, if there is no CO the first CT will become CL. If no CT is available, the province who has been in the clan the longest will become CL. Once a province leaves or is kicked from their clan, that province will no longer be allowed to return to that clan until the next round unless he left within the first 48 hours of the round. Close to the end of a round you are no longer able to join or create clans - this comes into force in the final 7 days.

Clan Leaders

Clan Leaders are the key to success for all clans. A clan must have an excellent leader to keep control and become unstoppable.

Clan Co-Leaders

Available only in a Platinum clan, the Co-Leader has all the same abilities as the Clan Leader except for: Change Clan Leader, Delete Clan.

Clan Trustees

Clan Trustees are almost like the clan leader. They exist to help the clan leader. In a Platinum Clan, the first CT can use the All Clan Message option to instantly send private messages to all clan members. If you are in a Platinum Clan, the CL and CO can set the rights for each single CT.

6.2 - Clan Points

In NukeZone, a Clan has three goals: Increase network, increase clan points and/or increase combo points. Clan points are only gained by attacking in a clan war. You must be in a clan for your province to earn Clan points. Clan points for attacking with units are awarded based on the total damage inflicted and the percentage of network damage done to the enemy. The more damage you do, the more points your clan will receive. Points are also awarded for attacks during war by nuclear, chemical and biological missiles - these points are earned based solely upon the network of the target before the missile hits him. Attacks during war with a laser satellite also earn points, but is based upon the relative size of the target province and the amount of power used to fire the satellite.

When your clan declares war on another clan, you will receive 1-20 points depending on the damage inflicted for the first 48 hours. Then the maximum points you can gain drops by 2 points and continues to reduce by 2 points every subsequent 24 hours to a maximum of 4 points.

If another clan declares on your clan, you will receive 1-10 points when attacking them, again depending on the damage inflicted. In order to gain 1-20 points by attacking them you must declare back - this is known as a mutual war. Once your clan declares back you will have 48 hours of being able to get 1-20 points before the maximum points you can get begin to drop as described above.

If your clan does not declare back you will always get 1-10 points per attack. Note: different rules apply on the size of provinces you can attack depending on the type of war; mutual or one-sided. See 6.4 - Clan Wars for details.

When you kill a province in a one sided war you receive 25 clan points, when you kill a province in a mutual war you receive 50 clan points. Clan points gained from satellites, including for kills, are based on the amount of satellite power used.

You do not gain any clan points when attacking a province of \$10,000 networth or lower. When you kill a province of \$10,000 networth or lower, you do not gain any clan points. You still gain 1 kill on your stats record, however this kill does not count towards the Medal of Death.

When your clan first reaches 2500 points, each member will receive a mini bonus of 75 turns and \$375,000. At every multiple of 5000 afterwards, up to 100,000 total points, you each receive a normal bonus of 150 turns and \$750,000. After 100,000 points your bonuses will be 100 turns and \$500,000 each. Your clan can also earn a mega bonus of 300 turns and \$1,500,000 for every 50,000 clan points earned. To receive a bonus your clan has earned, use the link on the [clan page](#).

6.3 - Combo Points

Combo points will be awarded daily as of midnight CET to the top 100 clan rankings for points and for networth. Clans will gain 1-100 points (rank #1 giving 100 points and rank #100 giving 1 point - anything beyond the rank of #100 receives zero points). If the clan is in both top lists, they will receive an additional 10% more points. So, the maximum combo points a clan can obtain each day is 220 Combo points (100 for being number 1 in the Points-toplist, and 100 for being number 1 in the NW toplist + the 10% they get for being in both toplist = 20). Clans lose 25% of the average combo points per member gained for the duration a member have been in the clan when leaving or getting kicked.

6.4 - Clan Wars

In NukeZone, when a clan is mad and wants vengeance over another clan, or the members just simply want to earn clan points, they declare war on the other clan. It can be fun and sometimes even be hard. This is why all clans must be at their prime and be prepared for a war at all times. After a CL or CT has declared war, they cannot declare peace for the next 24 hours. In addition, if one clan declares war against another clan, the networth attack restrictions are still in place. However, if both sides declare war on each other, the networth attack restrictions are removed in what is called a "mutual war." Networth restrictions always apply the first 24 hours after joining a new clan and if you are using a thief or sniper, even in a mutual war.

If war against a clan is resumed within 10 days of declaring peace, it will be treated as a resumed war. The age, and therefore max possible points, of the resumed war will be based on the original declare time. Clans may resume a war at any time after declaring peace as long as they don't already have 3 current war declarations against other clans; if they do then they must declare peace with at least 1 clan before they are able to resume the war. Once a war is resumed it must last a minimum of 24 hours before peace can be declared again.

6.5 - Clan Forum

Clan Forums are an excellent form of communication for a clan. You and your clan mates can discuss anything you want in there. You can post things like target provinces, ask for help, etc. It is the only forum not moderated by the Administrators and Moderators. The CL and CTs may edit/lock/delete whichever message they want on the Clan Forum.

Gold clans have the additional benefit of the Forum Management tool. This allows the clan leader to organize the clan forums and to give them custom names. It is possible to make a forum that only clan trustees can visit or a read-only forum.

6.6 - Clan Tag

Clan tags are used to represent what clan a province is in. This is what it looks like: [TAG]Province.

6.7 - Clan Pages

By clicking the Clan link, you come to a page with several links dealing with your clan. Depending on if you are the CL, CO or a CT, some links might be crossed out. This means you do not have access to these areas. Here is all the information about each Clan Page.

Properties

Only the Clan Leader or CO can adjust the clan properties. In the properties page, the CL or CO can add or edit the clan name, clan tag, clan password and the location of the clan logo. The CL or CO may also choose to restrict shared military information for all new members for a period of time. Valid settings for this option are: None (no restrictions), 12 hours, 24 hours, 36 hours, 48 hours and 72 hours.

Clan Co-Leader/Trustee Management

Only the Clan Leader or CO can adjust the Trustee Management. Clan Leaders can choose their Clan Co Leader. Clan Leaders and CO's can choose up to 5 CT's from this page and enable or disable certain privileges for each CT individually.

Send Aid

All members of the clan may access this page. Before you can send aid you must specify the receiver, enter the amount of money to send, and then press the Send Aid button. You can only send 1/3 of your available amount of money 4 times a day. Target province network may not be larger than yours. You cannot send or receive aid when in nuke protection. Sending aid also costs you a 'tax' of 1 turn and 25% of the money sent, unless you have level 3 Bank Management, where the 25% charge is removed. Provinces must be in the clan at least 72 hours before they can send aid.

Invite Player

Only the CL, CO and CT's can invite other provinces to join the clan. The network of the other province does not matter. Mass inviting is not accepted. A clan can have a limit of 15 players including the CL. The CL or CO can create a short custom message which is included with the invitation sent to a province.

Clan Information

All members of the clan may access this area. On this page you can find a list of all members of the clan and their respective clan points acquired. Everything you see on the clan page is what everyone else sees except the amount of clan points a member has acquired.

Statistics Central (Platinum Clans only)

All clan members can access this page. This displays useful statistics including a Clan Overview, Military Overview, Research Overview, Clan Statistics and Clan Graphs. The Clan Overview is updated on a real time basis and includes Last Login, Last Attack, Turns, Logins Per Day (LPD), Attacks Per Day (APD), Points Per Day (PPD). The Clan Statistics are updated every 6 hours and displays the province with most/least of the following: attacks made, attacks suffered, missiles sent, kills, times killed, clan points, aid sent, land, network, units, buildings. The War History provides information about the clan's previous wars.

Spy Reports (Platinum Clans only)

All clan members have access to this page. The Spy Report page is separated into clans and clanless provinces. Only the CL, CO and CT's are able to delete the reports.

Clan Wars

All members have access to this area. This page displays a list of the clans that yours has currently declared war against; as well as the clans that have currently declared war against yours. This page also displays all clans you have declared peace on in the last 10 days.

Declare War/Peace

Only the CL, CO and CT's may access this page. They can declare war against another clan by entering the Clan ID of the clan they want to go to war with (must be in Network Range of entire Clan Network). If your clan has declared war against another clan more than 24 hours ago, your clan's CL, CO or CT can declare peace with the other clan by typing in the other Clan's ID in the text box provided.

Clan Message

Only the CL, CO and CT may access this page. They can post Clan Messages, which appear in the main page when a clan member logs in to NukeZone. If you have a gold clan, the CL, CO or CT can preview the message before posting it to check for errors. This is a great way to say something important and assure it reaches all clan members immediately. You can use certain G-Codes in the clan message – gold clans have additional G-Codes that they can use. G-Codes are explained further in section 7.2.

Clan Poll (Gold/Platinum Clans only)

Only the CL, CO and/or a CT's can access this page. They are able to create or edit the clan polls from here. Only one clan poll can be created within a 24 hour period.

Clan Poll Archive (Gold/Platinum Clans only)

All members can access this page. This is where the archive of previous clan polls is stored.

Clan Forum Management (Gold/Platinum Clans only)

Only the CL and CO can access this area. This allows the CL or CO to change clan the forum settings and create new clan forums. The CL and CO of a Platinum Clan can give CT's the ability to access this area.

Domain Management (Platinum Clans only)

Only the CL or CO has access to this area. Here the CL or CO can request a custom NukeZone domain (tag.nukezone.info – where 'tag' is the clan's existing tag) and sub-domains for their clan homepage.

Receive Clan Bonus

All members can click on this to receive the Clan. This link is enabled not instantly, but within 30 minutes after your clan has reached the Clan Bonus. You will receive a local event when this page has been enabled. If you do not go to this page to receive the bonus within 3 days of it being enabled, you will automatically receive it. If you are in vacation mode at the time your clan earns a bonus then you will not receive a share of it. You need to be in the clan for 36 or more hours to be able to receive the bonus. A bonus can give you over 300 total turns but remember that you can only receive turns every 20 minutes when you have less than 300. So, if a clan bonus gives you more than 300, be sure to spend some to get below 300 again. Also, there is a limit of 600 turns available at a time no matter how many bonuses you take.

Clan Recruiting

Only the CL, CO and CT's have access to this area. This is where a clan can look for new members and specify the criteria which potential members must meet.

Find New Clan

Everyone has access to this area. This is where members can look for a new clan and specify the criteria which a potential new clan must meet.

Change Clan Leader

Only the CL may access this page. If a CL wants to give up the leadership, he can appoint a new leader of the clan. The old CL will then take over the new CL's old position.

Leave Clan

All members may access this page. If a member of a clan chooses to leave the clan, they can leave the clan immediately. However, The amount of time that provinces must wait after leaving a clan before joining another now increases based on how many clans they have already joined during that round. For 1-3 clans it remains at 24h and 4-5 clans is now 48h; then for 6+ clans the amount of time will increase at regular intervals.

Delete Clan

Only the CL may access this page. If the CL chooses to delete the clan, he may do so by clicking on Delete Clan.

6.8 - Clan Invitations

The CL, CO and CTs can view a complete list of pending clan invitations. They may also cancel any of these invitations; however invitations automatically expire after 7 days.

6.9 - Extended Military Information

Members of Gold Clans can choose to share their Extended Military Information, giving their clan mates the opportunity to view additional information about their province.

6.10 - War Status

Clan wars have a Status rating of: Brave, Fearless, Neutral, Fearful or Cowardly. War Status is calculated upon declaration of a war, is used for that individual war only, and is based on the following: total clan network, total clan members and clan points rank difference between yours and the enemy clan. The larger the clan they declare war on, the more their status will rise to the positive end of the scale. Adversely, the smaller the clan that is declared upon, the more their status will fall to the negative end of the scale. When a clan war declaration creates a mutual war, the war would be guaranteed a War Status of either "Fearless" or "Brave". The war status will affect the points you gain in a clan war: Brave (+20%), Fearless (+10%), Neutral (0%), Fearful (-10%) and Cowardly (-20%).

7.1 – Medals and Clan Awards

At the end of each round, 11 different medals are given out to the leaders of each area.

Medal of Honor - Most clan points gained by a province

Medal of Growth - Highest network

Medal of Death - Killed most provinces during clan wars (excluding provinces with a Network below \$10,000 at the time of being killed)

Medal of Earth - Highest Land Area

Medal of Courage - Performed most attacks (counts all attacks except for EMPs)

Medal of Thievery - Most money stolen

Medal of Devastation – Biggest amount of damage done with units in one single attack during a clan war.

Medal of Mass Destruction - Most total NW damage made using missiles

Medal of Superiority - Province who first reaches 2500 clan points, counting from the beginning of the round and based on Clan Points Gained (total).

Medal of Development - Province who first reaches \$2,500,000 network and keeps it for 48 hours. †

Medal of Accomplishment - Province who wins both the Medal of Honor and Medal of Superiority in the same round.

United Boundaries – Clan with the highest amount of land overall

United Arms – Clan with the most attacks made during clan wars

Golden Shotgun – First clan to reach 10000 points.

Golden Growth – First clan to reach 20 million \$ Network.* †

Points Champion – Awarded to the first 3 clans in the points toplist (Gold, Silver and bronze)

Network Champion – Awarded to the first 3 clans in the Network toplist (Gold, Silver and Bronze)

Combo Champion – Awarded for the first 3 clans in the Combo toplist (Gold, Silver and Bronze)

**Golden Growth: First clan to reach 20,000,000 Network and stays there for 24 hours. Only if no new provinces have joined the clan in the last 72 hours.*

† Time spent in Vacation Mode does not count towards Medal of Development or Golden Growth.

7.2 - Badges

Badges are very similar to medals in that they are individual achievements that are based on your round accomplishments. However, unlike medals, they can be won by any number of players per round as long as you meet the minimum requirements. Badges earned will be displayed on your status page. There are four levels of difficulty for each badge: Novice, Bronze, Silver and Gold.

Here are the minimum requirements for each badge level:

Honor Badge (1500, 3000, 7000, 11000 clan points)

Growth Badge (1.25, 2, 2.75, 3.75 million network)

Courage Badge (500, 800, 1100, 1500 attacks)

Earth Badge (50k, 100k, 150k, 250k land)

Death Badge (5, 10, 20, 35 kills in clan wars)

Devastation Badge (25k, 75k, 125k, 175k damage)

Mass Destruction Badge (500k, 800k, 1.2mil, 1.6mil)

For more detailed information, please see the Badges FAQ topic in the Getting Started Forum.

7.3 - G-Code and Auto-Linking

The following G-Codes can be used in private messages, clan messages and on the forums. Please note that all G-Codes are case sensitive, except the G-Codes used in Clan Messages. If auto-linking is enabled all your entered URLs will automatically be transformed into clickable hyperlinks. Easy and simple link creation, simply enter the URL! However your URL must start with one of the following: <http://>, <https://>, <ftp://> or www.

Available Tags in Private Messages:

Tag	Output
[USERPROVINCE]	Inserts the reader's province name. Works in both subject and message body.
[USERID]	Inserts the reader's province id. Works in both subject and message body.
[NAME]	Inserts the reader's name. Works in both subject and message body.
[B] [/B]	Text between these tags is displayed in bold. Works only in message body.
[I] [/I]	Text between these tags is displayed in italic. Works only in message body.
[U] [/U]	Text between these tags is displayed underlined. Works only in message body.

Available Tags in all Clan Messages:

Tag	Output
[B] [/B]	Text between these tags is displayed in bold.#
[I] [/I]	Text between these tags is displayed in italic.#
[U] [/U]	Text between these tags is displayed underlined.#

Available Tags in Clan Messages exclusively for Gold/Platinum Clans:

Tag	Output
[S] [/S]	Text between these tags is displayed with a line through the middle the text.
[HR]	Inserts a horizontal line.
[CENTER] [/CENTER]	Text between these tags is displayed center aligned.
[LEFT] [/LEFT]	Text between these tags is displayed left aligned.
[RIGHT] [/RIGHT]	Text between these tags is displayed right aligned.
[COLOR=name] [/COLOR]	Text between these tags is displayed in specific color. See below for available font colors.
[FONT=name] [/FONT]	Text between these tags is displayed in specific font. See below for available fonts.
[SIZE=number] [/SIZE]	Text between these tags is displayed in specific size. See below for available font sizes.
[LAST_EDITED]	Example output: October 5th, 2008 01:45 CET
[EDITED_BY]	Name of CT/CL who edited the message.
[CLAN_POINTS]	Inserts total amount of current clan points. *
[NEXT_BONUS]	Inserts amount of points required to reach next bonus. *
[NW_RANK]	Inserts the current Networth rank of your clan. **
[PTS_RANK]	Inserts the current Points rank of your clan. **
[CBO_POINTS]	Inserts the Combo Points of your clan.
[CBO_RANK]	Inserts the current Combo Points rank of your clan.
[24H_CLAN_POINTS]	Inserts clan points gained over 24 hours.
[24H_PTS_RANK]	Inserts ranking over 24 hours in clan points gained.

* Note: With the [CLAN_POINTS] and [NEXT_BONUS] tags, if you wish to have a "p" after the points (e.g. "We have this many clan points: 2500p"), the "p" must be added following the tag [CLAN_POINTS]p. You can enter anything after the tag, not just the "p", so could for example enter "[CLAN_POINTS] points".

** These values are updated once every 6 hours.

Also available for Normal Clans.

Available Tags on the Forums:

Tag	Output
[B] [/B]	Text between these tags is displayed in bold. This tag does not work in the topic name.
[I] [/I]	Text between these tags is displayed in italic. This tag does not work in the topic name.
[U] [/U]	Text between these tags is displayed underlined. This tag does not work in the topic name.

Available Special Tags on the Clan Forums (Only available for Gold/Platinum Clans) *:

Tag	Output
-----	--------

[S] [/S]	Text between these tags is displayed with a line through the middle of text. This tag does not work in the topic name.
[IMG]url[/IMG]	Inserts an image. Specify the image source by entering the full url between these tags.
[COLOR=name] [/COLOR]	Text between these tags is displayed in specific color. (see below for valid colors)
[FONT=name] [/FONT]	Text between these tags is displayed in specific font. (see below for valid names)
[SIZE=number] [/SIZE]	Text between these tags is displayed in specific size. (see below for valid sizes)

** Only available if your CL has enabled it on the Clan Forum Management page.*

Available Font Colors:

Aqua, black, blue, fuchsia, gray, green, lime, maroon, navy, olive, pink, purple, red, silver, teal, white, yellow. In addition, you may also enter any hexadecimal color code. Please note that the # sign is required when doing so.

Available Fonts:

Arial, Comic Sans, Courier New, Georgia, Helvetica, Impact, Times New Roman, Verdana

Available Font Sizes:

The number argument can still be any number between 0-6, but you may now also specify any custom size you want by adding "pt" after the number. So 16pt means size 16. The old style 0-6 is translated as follows: size 0=8pt, size 1=10pt, size 2=12pt, size 3=14pt, size 4=16pt, size 5=18pt, size 6=20pt.

7.4 - Extended G-Codes

As a Gold Clan, not only do you have the ability to use the regular G-Codes, you also get an extended version of it. It can only be used in the clan message and can be used by Gold Clans and Platinum Clans only. A CL/CT can easily target a province and/or a clan by using these codes. The Extended G-Codes are not case-sensitive. A clan message can contain a maximum of 25 Extended G-Codes.

Available Extended G-Codes in Clan Messages (Only available for Gold/Platinum Clans):

Tag	Output
[P=id]	Creates a link to the specified province..
[C=id]	Creates a link to the specified clan.
[A=id]	Creates a link to the aid page for the specified province
[R=id]	Creates a link to the specified enemy province's spy report.
[CR=id]	Creates a link to all of the specified clan's spy reports.
[PNW=id]	Inserts the specified province's name and network and creates a link to the attack page. The network will be made bold if the enemy is within the viewer's attack range.
[NW=number]	The number must be a valid network value. The network is formatted and will be made bold if the enemy is within the viewers attack range.
[URL=link]text[/URL]	Turns the "text" into a hyperlink to click on. Valid "link" types are http, https, ftp, irc
[TIMER=YYYY-MM-DD hh:mm]	Turns the time into a countdown timer.

Using this feature is fairly simple. While typing a message, a CL/CT can target a province by typing:

[P=ProvinceID] or [C=ClanID]. By doing so, this converts the ID Number into your target's Province or Clan Name and ID Number as well as creating a clickable link to the province/clan information page.

Example: A CL/CT types in, "...War. Everyone attack this guy, [P=123]!" The G-Code converts this to, "...War. Everyone Attack This Guy, FakeProvince (#123)!", where the "FakeProvince (#123)" part is a clickable link that brings you to this enemies province information page. The same is done with clan targets.

8.1 - Technical Support

If you need technical support please contact our Customer Support by sending an in-game message to *Customer Support* (found in your contact list when you write a message) or simply post a message in the *Technical Support and Bug Reports* forum. Links to the multi report system, the EULAs and other important resources can be found by clicking the *help* link in the top right.

Another fast way to receive answers to questions is our new IRC Live Support feature located on the help page. There are IRC Operators available nearly 24 hours a day to answer any game related questions you may have. No special knowledge or software is required to use this feature.

8.2 - Ideas and Suggestions

If you have an idea or a suggestion, please post it in the *Suggestions and Ideas* forum.

8.3 - Bug Reporting

Please report all bugs in the *Technical Support and Bug Reports* forum. Bugs that might affect the security or integrity of NukeZone and the server should NOT be posted in public; please inform the Customer Support directly by using one of the above-mentioned ways.

8.4 - IRC

NukeZone has its own IRC channel on the QuakeNet network. This is the place where the NZ Crew and the most experienced players hang around. Everyone is welcome!

Network: QuakeNet

Server: irc.quakenet.org

Channel: #NukeZone (for general NukeZone chat)

#NZSupport (for any game related problems/questions you might have)

A quick IRC guide to get you online can be found here:

<http://www.nukezone.nu/forum/nukeforum.asp?Action=Display&ID=101440>

A guide for installing IRC as an Add-on for FireFox can be found here:

<http://www.nukezone.nu/forum/nukeforum.asp?Action=Display&ID=119331>

Also, if you don't have or want to install any chat software, there is a browser-based app on the help page called Live Support:

<http://www.nukezone.nu/help.asp?LiveSupport>

8.5 - Rules

The Game Rules can be found at: <http://www.nukezone.nu/gameRules.asp>

The Forum Rules can be found at: <http://www.nukezone.nu/forumRules.asp>

8.6 - Credits

The NZ Crew:

Stefan Karlström (aka Guffy) – CEO, Lead Developer, Chief Administrator

Anthony Wiezoreck (aka EhpeX) – Chief of Operations, Administrator

Steve Brown (aka Primal) – Assistant Director of Operations, Administrator

Christian Anderstedt (aka glamDring) – Administrator

Keith Hodge (aka Pappahodge) – Director of Customer Relations, Administrator

Chris Twine (aka Aqua) – Game Moderator+

Tim Bos (aka Bosje) – Chief of Information, Game Moderator

Steve Jacks (aka Ambius) – Game Moderator

Tom Soetaert (aka Gondor) - Moderator

Stephanie Vanden Boer (aka Acardi) - Moderator

Danny Groenen (aka The Hero) – Forum Moderator, Assistant Chief of Information

Rick van Beerendonk (aka ElNino) - Forum Moderator

Anders Viktor Helin (aka Rah) – Forum Moderator

Tom Henderson (aka Tommy) – Forum Moderator

Donald MacLean (aka Donald) – Forum Moderator

Tom Green (aka Hotdog) - Forum Moderator

Remco Strijdonk (aka ReM) - Forum Moderator

Special Thanks To:

David (aka Riker) – Ex Forum Moderator
Lars Haglund (aka Zuckuss) – Ex Forum Moderator
Rob Parker (aka Ethiaa) – Ex Administrator
Tim Cheng (aka Timbos the Mod) – Ex Game Moderator
David Wahlqvist (aka Nakith) – Ex Game Moderator+
Erik Samuelsson Lantto (aka Rotis) – Ex Game Moderator+
Mark Maguth (aka KriM) – Ex Game Moderator+
Jay FooShang (aka FooShang) – Ex Game Moderator+
Joynal Rab (aka mOrph) – Ex Game Moderator+
Dave St.Onge (aka Greyhound) – Ex Game Moderator
José Alberto (aka Taco) – Ex Game Moderator
Jordan Schaefer (aka Taurus) – Ex Game Moderator
Andreas Kalin (aka Andy) – Ex Game moderator
Charly Romanowski (aka Fortitudo) – Ex Game Moderator
Peter Sandham (aka Psycho) – Ex Game Moderator
Paul Siddall (aka Dakeyras) – Ex Game Moderator
Chris Norton (aka FireHawk) – Ex Game Moderator
Torsten Krüger (aka Gexter) – Ex Forum Moderator
David Nebl (aka Soulless) – Ex Forum Moderator
Matthew Siddall (aka Zelazny) – Ex Forum Moderator
Ronald Visser (aka Ivan) – Ex Forum Moderator
Natalie Krywionek (aka NaL) – Ex Forum Moderator
Danny McCarthy (aka Augustus) – Ex Forum Moderator
Deron Poisson (aka Balance) – Ex Forum Moderator
Malte Scheidegger (aka Mocha) – Ex Forum Moderator
Martyn Skolt (aka Nickel Coated) – Ex Forum Moderator
Chris Knight (aka Cyrris) – Ex Forum Moderator
Dave Hayward (aka MEGAginge) – Ex Forum Moderator
Jeremy Genrich (aka Talion) – Ex Forum Moderator
Jurgen Gaeremyn (aka White Flag) – Ex Forum Moderator
Tresja Potts (aka Melone) – Ex Forum moderator
Robert Thibblin (aka Neoterra) – Ex Forum Moderator
Ronald Trozzo (aka Flying Swordsmen) – Ex Forum Moderator
Robin Erdal (aka Highwind II) – Ex Forum Moderator
Bonnie Malmström (aka thAw) – Ex Forum Moderator
Martin Nilsson (aka Stoot) – Ex Forum Moderator
Maxime Daigneault (aka Drask) – Ex Forum Moderator
John Straka (aka Gigiya) – Ex Forum Moderator
Glenn Clugston (aka Blue) – Ex Forum Moderator
Maarten Raaijmakers (aka BladiN) – Ex Forum Moderator
Nicola Carter - Barnes (aka Penna) – Ex Forum Moderator
Val McCubbin (aka Valkyrie) – Ex Forum Moderator
Rik Hagens (aka Logi) – Ex Forum Moderator
Jon Anzalone (aka ncb) – Ex NZ Portal Chief of Staff, Ex Forum Moderator
Alves Santana (aka FutileRageX) – Ex Forum Moderator
Jinxed – Ex Forum Moderator
Jarrad Franco (aka DoC) – Ex Forum Moderator
Jonaton Desmyter (aka Jupke) – Ex Forum Moderator
Clayton Nash (aka Kombu) – Ex Forum Moderator
Duane Waldman (aka Waldo) – Ex Forum Moderator
Wim Wauters (aka GranDaddy) – Ex Forum Moderator
Joan Lindblad – Creator of the local/global event icons

A very special thanks to Eivind Olafsen for his continued support, donations and patience.

Large Donators:

Erik Isaksson, Eric Olson, Miranda Fransen, Trevor Douglas, R. de Rijk and Philippe Pappaert.

Medium Donators:

Andreas Kalin, Rich Thorne, Joakim Bergman, Peter Byrne, Oscar Wissinger, Jaimy Manneveld, Pip Gowsell, Erwin Manders and Robert Crooks.

Manual written by Stefan Karlström, Anthony Wiezoreck, Steve Brown, Tim Bos, Steve Jacks and Keith Hodge.
Manual last updated on June 27th, 2010.
