1.1 - Overview

NukeZone is a free, strategic text-based online game. The game is optimized for Internet Explorer 5.0 and above with a screen resolution of 800x600 or higher. The game will also work in newer versions of other browsers such as Opera and Netscape Navigator; however, while some features may not operate properly, the game engine functions correctly. It is strongly recommended that you use Internet Explorer 5.0 and above. Please click [here](#) to download the latest Internet Explorer from Microsoft's homepage.

NukeZone is played in rounds lasting approximately 3 months each. Round dates can be found on the login page. At the end of each round, winners in various categories are given medals and all provinces are reset and the game starts over.

If you find any bugs or any other errors in the game, please report them ASAP in the *Technical Support and Bug Reports* forum.

1.2 - Getting Started

You start with 125 turns and \$250,000, then the first time you login for the round you get awarded with an extra 175 turns and \$500,000 (totaling in 300 turns and \$750,000), the extra bonus is only available for provinces created before the start of the round and those created in the first 48 hours of a round. It is up to you to determine what to purchase, while some prefer to use a more offensive strategy, others will choose to adopt a more defensive strategy. Money is required to purchase buildings and units. Turns are required to purchase buildings (jump to *3.1 - Buildings* for more info), increase research (jump to *3.10 - Research* for more info), or attack (jump to *4.1 - General Attack Information* for more info). You need buildings to survive – when all your buildings are destroyed you will die. When you have died you spend 24 hours dead before starting over in nuke protection again – death results in a loss of all units, land, research, money (including in the bank) and turns except for the starting defaults.

There are several ways to get more money although you get a fixed number of turns:

- By default you receive 1 turn every 20th minute and \$2000 each hour. You can research Money Production to increase your income up to a maximum \$26,000/hour.
- Join/create a clan and fight other clans (that your clan is at war with) in order to receive clan bonuses (300 turns and \$25,000,000 for each 10,000 points; the clan bonus money is divided evenly among all clan members).
- Tell your friends about this game (you receive a 10 turn bonus for each friend that signs up and plays for a while). Please note that to receive the bonus your friend must sign up with the same email as the invitation was sent to.

Note: You will not receive any additional turns every 20 minutes if you already have more than 300 turns. However, you can receive the clan bonus during this time. Please use some of your turns in order to start receiving turns every 20 minutes again.

1.3 - Starting Bonus

You can select a starting bonus from the following list, which you must claim while in Nuke Protection.

- **Offensive**
Max morale capacity changes to 110%, plus an additional 45 turns.
- **Defensive**
All buildings get a 15% life boost, plus 2 extra sciences per turn, plus 5,000 m2 land.
- **Finance**
Hourly income increased by 10%, bank capacity is raised by 50% and \$250,000 money.
- **Shipping**
Market and missile orders ship 25% faster, plus ability to choose exact arrival time (up to 12 hours delayed), plus 3,000 m2 land and \$150,000 money.

The starting bonus you receive after you die is based on your networth 72 hours before you were killed. The bonus will increase gradually between \$100 000 and \$1 500 000 reaching a maximum increase of 300% at \$1 500 000. The increase will improve more dramatically at lower networth and decrease slowly as you approach \$1 500 000. The increases will not be in effect if you reset your account.

2.1 - Game

Main - Province info, power status, news, current server time, nuke protection options, starting bonus

Attack - Regular attack, ground attack, air and sea attack, launch missile, send spy/spy plane, send thief, send sniper

Research - Research sciences

Headquarters - View your Headquarters bonuses, manage Headquarters Operations and your army's General

Explore - Explore or Sell additional land.

Market - Buy/sell merchandise

Bank - Deposit/withdraw money

Clan - Join/create clan, clan properties, invite/kick players, manage clan wars, leave/delete clan, recruiting system etc

2.2 - Build

Buildings - Build/demolish buildings

Sea Units - Build sea units

Air Units - Build air units

Vehicles - Build vehicles

Infantries - Train infantries

Missiles - Order missiles, view arrival dates

Satellites - Build/use Satellites

2.3 - Show

Local Events - Shows local events

Global Events - Shows global events, can be filtered by incoming, outgoing or internal.

Attack Events - Shows local outgoing events (Gold Users only).

Search Events - Allows a search of local and global events.

Enemy List - Links to enemy list (Gold Users only).

Status - Information, military info, military settings, history graphs (including Gold User only info) and several province statistics, rank from previous round

All Provinces - Shows all provinces within your attack range

All Clans - Shows all clans

Top List - Top Provinces, Top Clans (Networth), Top Clans (Points)

Search - Search for provinces by province id or province name, search for clans by clan id or clan name/tag

Clan Forum - A direct link to your private clan forum (only visible if you're a member of a clan)

Forum - NukeZone forums

Online Shop - Purchase a Gold user or Gold/Platinum clan

2.4 - NZ Portal

News - Displays current news items

Articles - Displays current articles

Profiles - Displays player profiles

2.5 - Other

Inbox - Display your inbox (private messages that have been sent to you)

New Message - Compose a new message

Preferences - Options, edit profile, change colors, change password, delete province, reset province, create/edit your NZ Portal profile etc

Contact Us - Crew contact information, credits

Logout - Logout from NukeZone

3.1 - Buildings and Walls

Land is nice to have, but without buildings and infrastructure it is of little use. NukeZone offers a variety of buildings to place on your land. Each building has some inherent benefits that allow your province to grow or specialize. It is up to you to determine how to fill your land, and there is no perfect or ideal balance for growth. As well, each building uses a specific amount of power, and power can only be provided by power plants. If you have low power, your defensive buildings, missile silos, research labs, command centres and headquarters buildings won't work, meaning you will be more susceptible to attack, will not be able to launch missiles or be able to perform scientific research. The defense values of your buildings drop by 25% when you are low on power and you will be unable to use spy planes, spies, thieves, snipers and satellites. If you are short on land, either explore for more or attack someone to try and steal some. The amount of unused land improves the defense of your buildings by up to a 40% boost for 25% unused land. It takes 20 m² to build each building with the exception of Headquarters which take 1000 m².

Available Buildings:

Name	Price	Description
Research Lab	\$2,000	Gives 1 extra science/turn to research for each 50

		research labs. Attack: 0, Life: 200 Power usage: 2000
Missile Silo	\$22,000	Houses 1 missile. Attack: 0, Life: 500 Power usage: 10000
Headquarters	\$250,000 25 turns and 1000 m2 of land	Improves various abilities for your province† Attack: 0, Life: 5000 Power Usage: HQ1: 25,000; HQ2: 50,000; HQ3: 100,000; HQ4: 150,000; HQ5: 250,000
Command Centre	\$2,200	Supports 5 special units††. Attack: 0, Life: 120 Power Usage: 1800
Shipyards	\$1,100	Houses 5 sea units. Attack: 0, Life: 90 Power usage: 700
Airfield	\$900	Houses 5 air units. Attack: 0, Life: 85 Power usage: 600
War Factory	\$1,200	Houses 10 vehicles. Attack: 0, Life: 80 Power usage: 900
Barracks	\$700	Houses 20 infantrymen. Attack: 0, Life: 60 Power usage: 650
Power Plant	\$450	Produces 4500 power units. Attack: 0, Life: 85
Advanced Power Plant	\$1,400	Produces 15000 power units. Attack: 0, Life: 40
Torpedo launcher	\$1,850	Gives you a sea defense. Attack: 350, Life: 280 Power usage: 700
SAM Site	\$1,400	Gives you an air defense. Attack: 265, Life: 240 Power usage: 600
Missile Turret	\$1,500	Gives you a vehicle defence. Attack: 300, Life: 265 Power usage: 400
Machinegun Turret	\$1,200	Gives you an infantry defence. Attack: 190, Life: 290 Power usage: 275
Anti-Missile System	\$5,000	Gives you a missile defense†††. Attack: 0, Life: 400 Power usage: 1700

† Headquarters Building - You may only own 5 Headquarter buildings at any time and you may only build one per 72 hour period. The Headquarter building cannot be main targeted in an attack, but can be destroyed. The power usage is per building and is cumulative, therefore if you own 2 buildings you will use 25,000 + 50,000 for a total power usage of 75,000. Headquarters abilities are cumulative and in the order listed. For example, when you have three headquarters, you will have ALL of the bonuses provided by numbers 1, 2, and 3.

Headquarters #1

- * 75% chance of tracking origin of missiles
- * 10% attack boost to attacking units
- * 1 additional science per turn when researching

Headquarters #2

- * 25% increase to land exploration
- * Implements the Coastal Defense System (5% increased protection against air and sea attack)
- * 1 additional science per turn when researching
- * Gives an additional \$1000/hour

Headquarters #3

- * 50% increase to land exploration
- * Unlocks the sabotage missions for the Spy unit giving a 50% chance of success.
- * 1 additional science per turn when researching

- * Gives an additional \$1000/hour
- * Ability to Main Target individual defense buildings.

Headquarters #4

- * Unlocks the Headquarter Operations
- * Unlocks the General unit with 1 life/hour regeneration rate.
- * Missile accuracy improved with 10%
- * Increases the Coastal Defense System to 15% protection.
- * 1 additional science per turn when researching
- * Improves sabotage missions chance of success to 65%
- * Gives an additional \$1000/hour
- * Improved accuracy for Main Targeting by 2x.

Headquarters #5

- * Enables you to own and utilize two satellites simultaneously
- * 1 additional science per turn when researching
- * Improves sabotage missions chance of success to 80%
- * 10% defense boost for defending units when attacked
- * Increases the General unit to 4 life/hour regeneration rate.
- * Gives an additional \$1000/hour
- * 75% land exploration bonus.

Headquarter Operations

Four Headquarter buildings are required to run Headquarter Operations. Headquarter Operations cost 2 turns and two hourly fees to activate, and then cost a fixed fee per hour, automatically taken from your income. A maximum of half your income may be used for HQ Operations. If your fourth Headquarters is destroyed, the operation will cease functioning. HQ Operations auto deactivate if your account remains inactive for more than 5 days(when you stop receiving your hourly income).

- * \$1000/hour: 100% chance of tracking origin of missiles and special units
- * \$2000/hour: Increased defense against incoming sabotage missions by 50%
- * \$3000/hour: Increased defense against incoming EMP attacks by 50%
- * \$4000/hour: 2 additional life per hour for the General unit.
- * \$5500/hour: Defense buildings do 25% additional damage.
- * \$6000/hour: Increased defense against incoming missile attacks by 25%
- * \$10000/hour: 5% additional satellite power per hour

General Unit

Four Headquarter buildings are required to get access to the General unit. The unit arrives 72 hours after the fourth HQ building is constructed and starts with 100 life. It gains 1-6 life per hour depending on number of headquarters and HQ Operations active. The General can be sent in battle and can be killed in action, and a new one then arrives 72 hours later. When the General unit arrives you will choose a name for it from a list and get to choose one of the following enhancements listed below. Whenever you include the General unit with an attack you get the chosen enhancement. The General unit is idle when defending and does not provide enhancements for defending units or buildings.

Enhancements:

- * 10% additional attack
- * 10% additional defense
- * Avoids walls and the Coastal Defense System provided by the Headquarters 2 and 4.

General Abilities:

- * 10% attack boost (cost: 50 life)
- * 10% defense boost (cost: 50 life)
- * Double money/land gained in combat (cost: 50 life)
- * 50% improved main targeting (cost: 75 life)
- * Spy Report units after-attack information (cost: 100 life)
- * Spy Report buildings after-attack information (cost: 100 life)
- * Double damage in combat (cost: 500 life).
- * Last Stand: Requires at least 200 life, and doubles the attack of your defending units and buildings. It can not be activated during the last 3 days of the round.

†† Special units are; Spy Plane, Spy, Thief and Sniper.

††† Anti-Missile System defense varies based on the amount of used land. Anti-Missile Systems provide a maximum of 50% protection without HQ Operation. 750 Anti-Missile Systems will provide 50% protection,

no matter the amount of used land you have.

Available Walls:

Name	Price	Description
Barbed Wire	\$0	Provides 0% vehicle and infantry defense. Requires: none
Sandbag Wall	\$50,000*	Provides 5% vehicle and infantry defense. Requires: Barbed Wire
Concrete Wall	\$250,000*	Provides 10% vehicle and infantry defense. Requires: Sandbag Wall
Laser Fence	\$500,000*	Provides 15% vehicle and infantry defense. Requires: Concrete Wall

* Lowest price (the price increases with the more land you own). Walls reduce the strength of the attacking force by a certain percentage, based on the type of wall.

3.2 - Sea Units

To build sea units, you need shipyards, which house 5 sea units. Sea units can only be combined with air units in an "Air and Sea Attack".

Available Units:

Name	Price	Description
Submarine	\$2,300	Attack: 180, Life: 170 Can attack: Sea Units Can carry: 2 Tomahawk Missiles
Stealth Boat	\$700	Attack: 50, Life: 70 Can attack: Sea Units, Infantries
Destroyer	\$1,500	Attack: 70, Life: 60 Can attack: Vehicles, Infantries, Buildings
Cruiser	\$2,000	Attack: 85, Life: 105 Can attack: Sea Units, Air Units, Buildings
T-2000 Hovercraft	\$800	Attack: 70, Life: 35 Can attack: Air Units, Buildings

3.3 - Air Units

To build air units, you need airfields, which house 5 air units. Air units can be combined with all other units when attacking.

Available Units:

Name	Price	Description
F-22 Raptor	\$1,075	Attack: 65, Life: 55 Can attack: Sea Units, Air Units
F/A-18 Super Hornet	\$750	Attack: 55, Life: 25 Can attack: Air Units, Buildings
F-35 JSF	\$925	Attack: 55, Life: 45 Can attack: Air Units, Vehicles
B-2 Stealth Bomber	\$1,500	Attack: 130, Life: 55 Can attack: Buildings
RAH-66 Comanche	\$800	Attack: 35, Life: 40 Can attack: Vehicles, Infantries, Buildings
SH-60 Sea Hawk	\$700	Attack: 70, Life: 40 Can attack: Sea Units
Aurora Spy Plane	\$15,000	Spies on enemy buildings. Attack: 0, Life: 200 Can attack: None
CH-46 Sea Knight	\$1,000	Enables you to transport 15 infantry per unit in a Sea and Air attack, while boosting transported infantries attack by 50% and lowering their life by 15%. Attack: 25, Life: 135 Can attack: Buildings

3.4 - Vehicles

To build vehicles you need war factories, which house 10 vehicles. Vehicles can be combined with air units and infantries when attacking.

Available Units:

Name	Price	Description
Humvee	\$500	Attack: 60, Life: 20 Can attack: Infantries
Hover Tank	\$600	Attack: 35, Life: 20 Can attack: Sea Units, Infantries, Buildings
Heavy Artillery	\$1,000	Attack: 95, Life: 40 Can attack: Buildings
SAM Tank	\$700	Attack: 60, Life: 30 Can attack: Air Units
M1 Abrams Tank	\$1,250	Attack: 65, Life: 60 Can attack: Vehicles, Buildings

3.5 - Infantries

To train infantries you need barracks, which house 20 infantries. Infantries can be combined with air units and vehicles when attacking.

Available Units:

Name	Price	Description
Thief	\$5,000	Steals money from the enemy base and protects your base from possible enemy thieves. Attack: 0, Life: 5 Can attack: none
Spy	\$3,000	Spies on enemy units, protects your base from possible enemy spies and carries out Sabotage Missions*. Attack: 0, Life: 5 Can attack: none
Sniper	\$5,000	Attack: 125, Life: 65 Can attack: Spies, Thieves, Snipers Note: Snipers have 5 times less defense against other snipers
Navy Seal	\$900	Attack: 45, Life: 25 Can attack: Sea Units, Buildings
Heavy Infantry	\$400	Attack: 20, Life: 15 Can attack: Air Units, Infantries, Buildings
Machine Gunner	\$350	Attack: 25, Life: 15 Can attack: Infantries
Grenade Soldier	\$425	Attack: 35, Life: 10 Can attack: Vehicles

***Sabotage Missions** - Spies have the option to sabotage missiles, power plants, and satellites. The sabotage option is unlocked and has a 50% chance of success with 3 Headquarters, 65% with 4 Headquarters and 80% with 5 Headquarters.

Missiles: Sabotages 1 missile and may be in effect for up to 10 days or until the missile is launched. If the missile is launched within the 10 day period and the sabotage is successful, it will blow up in the enemy's base prior to launch causing 20% damage. The enemy will still be charged full turns and morale for the attempted launch. The maximum amount of missiles that may be sabotaged for any enemy is 5 at any one time.

Power Plants: If the power plant sabotage option is chosen and the spy is successful it will disable 10% of the enemies' power plants for 48 hours. The maximum amount of power plants that may be sabotaged for any enemy is 50% at any one time.

Satellites: If sabotage is successful the enemies' satellite power is reset to 0% for 10 hours before power begins the 10% hourly increase.

3.6 - Special Units

Special units are the spy plane, spy, thief and sniper. In order to own these units you must have Command Centres. You can have a maximum of 200 Command Centres meaning you are limited to no

more than 1000 special units. Special units cannot be used when you have low power. You may only buy or sell 100 special units per day in all market transactions; e.g. buying 50 and selling 50 would be the maximum special unit transactions for that day.

3.7 - Market

The market allows you to buy units without using turns to build them. However, units on the market are more expensive to buy and because they are not built in your province, they take time to arrive. Depending on the research you have and how much you are willing to pay you can get units from the market in between 3 and 12 hours. You can cancel an incoming order, which returns 75% of the regular market price (money spend on accelerated shipping will not be returned after canceling an order).

You can pay extra to reduce the time it takes for your units to be delivered – paying double the price allows your units to arrive in half the time. Accelerated shipping for missiles costs 1.5x the price. You can also research the Shipping Time Science so you get units from the market faster.

The market also allows you to sell your units to recoup some of their cost if you no longer want them.

3.8 - Missiles

To build missiles you need missile silos, which house 1 missile. A missile is an expensive but very powerful attack option. The chance of hitting the enemy base depends on two things: your missile accuracy and your enemy's missile defense. Missiles cost 5 turns to build and 4 turns to launch. They make use of their own Missile Power (5% received per half hour) and do not use morale. 100% Missile Power is required to launch missiles. Accelerated Shipping mode for missiles cost 1.5 times the standard price.

Tomahawk Missiles do not require a missile silo to build or to launch. Submarines are required to both house and launch the Tomahawk Missiles. As such you must send them with an air and sea attack with the appropriate amount of submarines. Tomahawks are not affected by your missile accuracy although 50% is needed before you may build them but they can be shot down. A submarine can hold 2 Tomahawk Missiles. 3 Tomahawks may be built for every turn and take 6 hours to build. You can send 4 Tomahawk missiles for every \$10,000 Networth you send in the attack.

Anti-Missile Systems, SAM Sites, SAM Tanks and Cruisers can defend against Tomahawk Missiles. Sam Tanks and Cruisers provide equal protection against Tomahawks while SAM Sites provide 3 times the protection of SAM Tanks and Cruisers, and Anti-Missile Systems provide 5 times the protection. The default chance of tracking missiles is 25%, however this is raised to 75% when 1 or more Headquarters Building is owned.

Available Missiles:

Name	Price	Description
Nuclear Missile	\$60,000	Attack: 500,000 Can attack: All Buildings and Units
Chemical Missile	\$35,000	Attack: 250,000 Can attack: Sea Units, Air Units, Vehicles
Biochemical Missile	\$30,000	Attack: 165,000 Can attack: Infantries
EMP Missile*	\$20,000	The EMP Missile initially disables 20% of the enemy's power supply decreasing 5% per hour over a 4 hour period. You do not receive clan points for using this missile.
Tomahawk 250C Missile	\$4,000	Attack: 5000 Can attack: Buildings
Tomahawk 500C Missile	\$8,000	Attack: 8000 Can attack: Buildings and Vehicles

* EMP damage is removed from the target province by 5% each hour. 2 EMP missiles will disable 40% of the targets power if they hit and the effect on the province will then reduce by 5% each hour. It would therefore take 8 hours before all EMP damage was removed.

3.9 - Satellites

There are 6 different satellites available for you to build. All satellites require 50% in *Satellite Technology* before they can be built. Each satellite costs 20 turns and takes 48 hours to construct. After you have built the satellite, you must launch it into space. It takes 1 hour for a satellite to reach earth's orbit, and it can then stay up for 14 days until it crashes down and burns up in earth's atmosphere. You can increase the time your satellite stays in orbit by continuing to research satellite technology over 50%. You get an extra days orbit for every additional 10% research. A satellite will stay in orbit for the period researched at the

time of launch, research while in orbit will not effect that satellite.

Your satellite power increases by 10% each hour and all satellites cost 5 turns to use. Satellites are not operational when you have low power although a previously launched Stealth Satellite will continue to function if it was activated while you had power. You can own any two satellites concurrently, even two of the same kind providing you have all 5 Headquarters. However, you may only have one satellite from each group (offensive and defensive*) in orbit at any one time. If you need to launch another satellite and your current satellite(s) have not yet crashed, you can demolish your satellite(s) for 20% of its/their original cost.

Available Satellites:

Name	Price	Description
EMP Satellite**	\$600,000	The EMP Satellite disables X% of the enemy's power supply over X amount of hours. Requires at least 25% satellite power, 100% satellite power = max effect damage (the more power, the more damage). Max effect: 30%, 6 hours
Laser Beam Satellite	\$1,000,000	Requires at least 25% satellite power, 100% satellite power = max attack damage (the more power, the more damage). 95% hit rate. Max Attack: 9000 Can attack: Buildings
Orbital Research Laboratory	\$350,000	Gives you 5 additional sciences per turn when researching. The 5 additional sciences are given in addition to the current number of sciences per turn you may be receiving from your research labs.
Spy Satellite	\$500,000	Spies on the enemy base. Requires 100% satellite power. You will receive this information: - Approximate number of enemy buildings and units. - Unused enemy land and power status.
Stealth Satellite	\$450,000	When activated, your base will be hidden from enemy spies, thieves, snipers, laser beam satellites and EMP satellites. It hides your base for 7 hours. Requires 100% satellite power.
Anti-Missile Satellite	\$700,000	Gives you instant 100% protection. Each time it shoots down a missile 50% satellite power is used. If you don't have enough satellite power, the satellite will not be able to shoot down any missiles until you get more satellite power.

*

Offensive Satellites:

Laser Beam Satellite
EMP Satellite
Spy Satellite

Defensive Satellites:

Orbital Research Laboratory
Stealth Satellite
Anti-Missile Satellite

**EMP damage is removed from the target province by 5% each hour. 1 hit at full power with the EMP satellite will disable 30% of the targets power and the effect on the province will then reduce by 5% each hour. It would therefore take 6 hours before all EMP damage was removed.

3.10 - Research

There are 10 different sciences available for you to research. Researching sciences requires turns. The number of turns needed is based on your amount of *Research Labs and HQs*, and the more you own, the more sciences per turn you get when researching. You will be able to research between 1 and 20 sciences per turn, depending on how many *Research Labs* and HQs you own. You can get up to 25 sciences per turn by getting an Orbital Research Laboratory.

Available Research:

Bank Management increases the amount of money you can deposit into the bank up to a total of \$5,000,000. Also, for every 10% of research the basic interest rate increases by 0.1%. When 50% of this research is completed the option to withdraw money after 24 hours with no interest and a 25% fee is enabled; when it is 100% complete the 25% fee is removed (2000 sciences). At 100% researched the fee of 1/4 the money is removed when sending aid.

Engineer Effectiveness increases the amount of buildings you can build per turn. The maximum limit is 15 buildings per turn (2500 sciences); default is 5 buildings per turn.

Market Shipping Time reduces the time taken for items ordered from the market to arrive. The maximum limit is 50% (1800 sciences).

Market Discount gives you discount on all market merchandise. The maximum limit is 30% (1200 sciences).

Missile Accuracy gives your missiles a better chance to hit the target. The maximum limit is 80% (800 sciences); default is 10% accuracy.

Money Production increases your income per hour. The maximum limit is \$26,000 per hour (3000 sciences), default is \$2000 per hour.

Power Plant Efficiency increases the amount of power each power plant produces and also increases their defense/life. The maximum limit is 50% above normal (1000 sciences).

Satellite Technology gives you the knowledge to construct satellites. 50% satellite technology is needed in order to construct any satellites. Additional research over 50% extends the maximum orbit time of the satellite with up to 5 days (making it a total of 19 days in orbit). The maximum limit is 100% (3000 sciences). Once the Satellite Technology research is 100% complete the construction cost of each satellite will be reduced by 20% and each use of a satellite will cost 4 turns instead of 5.

Security System improves your security. This makes enemy thieves steal less money from you. It will not protect you from enemy thieves in any other way. The maximum limit is 100% (2000 sciences).

Thief Education teaches your thieves to steal more money and also to be stealthier. The maximum limit is 300% (3000 sciences).

4.1 - General Attack Information

Each attack is unique in some way and all attacks cost a different amount of turns. Launch Missile costs 4 turns. Regular Attack, Ground Attack and Air Attack cost 3 turns. Send Spy/Spy Plane costs 1 turn and Send Thief and Send Sniper costs 2 turns and 5% morale. The maximum amount of morale your army can have is 100%, and each attack uses a different amount of morale. An attack may "cost" as low as 20% of your morale and as high as 35%. When you attack an enemy that is smaller than yourself, you will lose 5% more morale. You will lose additional 10% of morale if you use an aggressive attack type. However, your morale increases by 5% every 15 minutes. Missiles have their own Missile Power (5% received per half hour) and does not use morale.

Target ID is the target province id.

Attack Method is the option on how you want to attack your enemy.

Main Target specifies the target your troops will focus on. You may also main target individual defence buildings providing you own HQ #3.

Attack Type specifies how the attack should be made; normal or aggressive.

4.2 - Regular Attack

Regular attack can consist of air units, vehicles and infantries. This attack method costs 3 turns.

4.3 - Ground Attack

Ground attack can only consist of ground units. Using this method makes the vehicles and infantries slightly more powerful than a Regular attack. This attack method costs 3 turns.

4.4 - Air and Sea Attack

Air and Sea attack can only consist of air units and sea units. You may load certain sea units with Tomahawk missiles, which will then be launched during the attack. Using this method makes these units slightly more powerful than a Regular attack. This attack method costs 3 turns.

4.5 - Launch Missile

Use this option to send your missiles to enemy targets. This attack method costs 4 turns, and uses 100% Missile Power. This does not include Tomahawks.

4.6 - Send Spy/Spy Plane (intelligence)

When you send out your spy, his job is to spy on your enemy's army or base. You can choose between an infantry spy for army intelligence or a spy plane to gather info on your enemies buildings. However, there is no guarantee either will succeed. You may send up to 5 Spies at once for the same amount of turns, for up to 5x the details of your results (chance of being caught increases by up to 10x). Opposing snipers and spies can kill infantry spies. If he does fail, your enemy is informed that you sent the spy. If your spy is successful, it is hard to count to an exact number of units or buildings in such a short period of time, so your spy works with special codenames. Below are the translations of those codenames. This attack method costs 1 turn.

Spy Codenames: The numbers on the table below are based on the sending of 1 Spy, and can be made more detailed depending on how many Spies are sent up to a total of 5.

Codename	Amount of Units
Few	0-99
Several	100-249
Pack	250-499
Lots of	500-1,499
Many	1,500-4,999
Crowd	5,000-9,999
Legion	10,000-19,999
Super Legion	20,000+

Spy Plane Codenames:

Codename	Amount of Buildings
Few	0-49
Several	50-124
Pack	125-249
Lots of	250-499
Many	500-999
Crowd	1,000-2,499
Legion	2,500-4,999
Super Legion	5,000+

4.7 – Send Spy (sabotage)

Spies have the option to sabotage missiles, power plants, and satellites. This attack method costs 5 turns and 100% morale.

4.8 - Send Thief

When you send out your thief, his job is to steal money from the selected enemy. However, there is no guarantee that your thief will succeed. If he does fail, your enemy is informed that you sent the thief. This attack method costs 2 turns and 5% morale.

You can send up to 10 thieves at once for the same turns and morale as one. This allows you to get up to 5 times the return but the chance of being caught increases by up to 10 times – times 1 extra for each additional thief. Therefore an attack with 5 thieves could get you up to 2.5 times as much money but you would be 5 times as likely to be caught. If caught you lose all attacking thieves.

4.9 - Sniper

A sniper can both attack and defend. They can attack spies, thieves and snipers. They can defend against spies, thieves, and snipers. They are five times better at defending than spies and thieves are. However, snipers have 5 times less defense against other snipers. This attack method costs 2 turns and 5% morale.

You can send up to 10 snipers at once for the same turns and morale as one. This allows you to do up to 5 times the damage but the chance of being caught increases by up to 10 times – times 1 extra for each additional sniper. Therefore an attack with 5 snipers could inflict up to 2.5 times as much damage but you would be 5 times as likely to be caught. If caught you lose all attacking snipers.

5.1 - Province Status and History

You can get access to a wealth of information about your province and you past performance from the status page. The history page shows statistics for the following items: -

History statistic	Explanation
Attack Success	The number of successful attacks made expressed as a percentage
Defend Success	The number of times successfully defended expressed as a percentage
Highest Networkh	The peak networkh you have achieved in the current round
Highest Land Area	Greatest land area you owned in the current round
Land Gained in Combat	Area of land gained by attacking other provinces
Land Lost in Combat	Area of land lost to other provinces attacking you
Money Gained in Combat	Sum of money gained by attacking other provinces
Money Lost in Combat	Sum of money lost to other provinces attacking you
Money Lost in Thievery	Sum of money you lost to thievery
Most Money Gained in Thievery	Highest amount of money stolen by one thief (GU only)
Kills	Number of provinces you killed
Kills (during clan wars)	Number of provinces you killed during clan wars
Times Killed	Number of times your province has been killed
Missiles Sent	Number of nuclear, chemical and biochemical missiles you have sent
NW Damage Made by Missiles	Cumulative sum of the damage your missiles have dealt this round
Enemy Missiles Received	Count of enemy missiles that have been fired at your province
Enemy Missiles Hit	Enemy missiles that have not missed or been shot down by anti-missile-systems
Enemy Missiles Missed	Enemy missiles that have missed your province
Enemy Missiles Shot Down	Enemy missiles that your anti-missile-systems have shot down
Attacks Made	Total attacks made, not including missiles sent
Attacks Made (during clan wars)	Total attacks made during clan wars, not including missiles sent
Wins	Successful attacks made (percentage in brackets)
Attacks Suffered	Total attacks suffered from other provinces
Defeats	Number of times the enemy successfully penetrated your defenses (percentage in brackets)
Clan Points Gained (current clan)	Total clan points gained in the current clan - every time you successfully attack a province your clan is at war with, you will be awarded clan points depending on the damage
Clan Points Gained (total)	Total clan points gained for the whole round
Aid Sent (current clan)	Amount of aid you have sent in current clan
Aid Received (current clan)	Amount of aid you have received in current clan
Targets Spied	Amount of targets spied in current clan
Time to Complete All Sciences	Total time to complete research on all sciences

Enhanced History: There are more History Statistics but these are Gold Used only.

You can also view graphs plotting the history of your province over the last 14 days in certain key areas:
- *Networkh*

- Land (Gold users only)
- Total Buildings (Gold users only)
- Total Units (Gold users only)

5.2 – Military Info

A full breakdown of your current military force is provided here for quick reference. You can choose to share certain military information with your clan mates from the preferences menu.

Extended Military Information is available to those who are currently in a Gold Clan. This feature allows Gold Clan members to view additional Military Information that is normally hidden. There are 6 sections visible: -

General - allows clan mates to view your status page.

Buildings - this permits clan mates to see what type and volume of buildings you have as well as what type of wall if any and whether or not you have a satellite in orbit.

Research - this lets clan mates look at what research you have done.

If you are Gold User your clan mates can also see the following Info. The dropdown list shows GU's as a darker color

History Graphs – allows clan mates to see you graphs (networth, land, buildings, units, attacks made, attacks received and clan points gained)

Statistic Breakdown – Allows clan mates to see your Networth and Turns Breakdown.

5.3 – Province Preferences

The preferences page allows you to change many options specific to your province including color schemes, province details, account details, account password and many gold user only options. This is also where you go to put your account into vacation mode or reset your account; as well as creating/editing your NZ Portal Profile.

The Profile option allows you to change certain details about your province, including your province name which can be changed if you are dead, if the game is between rounds and during the first 48 hours of a round. You can only change province name once every 2 weeks during the round.

Vacation mode puts your province into nuke protection for a specified period of time while you are away. During this time you cannot login to your province. You cannot go into vacation mode in the last 3 days of a round.

Your preferences page is also where you go to activate any gold users you may have purchased or to transfer them to another province via the Gold User Management section. Gold Memberships that have been used cannot be transferred, even if there are one or more rounds left.

5.4 – Community Score

For information on how the Community Score system works, go to the following page:

http://files.nukezone.info/community_score.htm

6.1 - General Clan Information

Clans are a vital element in NukeZone, and if you're not in a clan, join or create one immediately (see the Find Clan section for help joining a clan). Clans can provide protection to their provinces. A clan can have up to 20 members. There are four different types of clan members: Clan Leader (CL), Co-Leader (CO), Clan Trustee (CT), and Normal Member. The clan leader controls everything, and can select up to 5 clan trustees. These CT's can help the CL to control the clan by declaring war/peace, or by editing the clan message. If the CL gets banned or deleted due to inactivity, the CO will become CL, if there is no CO the first CT will become CL. If no CT is available, the province who has been in the clan the longest will become CL. Once a province leaves or is kicked from their clan, that province will no longer be allowed to return to that clan until the next round unless he left within the first 48 hours of the round. Close to the end of a round you are no longer able to join or create clans - this comes into force in the final 7 days.

Clan Leaders

Clan Leaders are the key to success for all clans. A clan must have an excellent leader to keep control and become unstoppable.

Clan Co-Leaders

Available only in a Platinum clan, the Co-Leader has all the same abilities as the Clan Leader except for: Change Clan Leader, Delete Clan.

Clan Trustees

Clan Trustees are almost like the clan leader. They exist to help the clan leader. In a Platinum Clan, the first CT can use the All Clan Message option to instantly send private messages to all clan members. If you are in a Platinum Clan, the CL and CO can set the rights for each single CT.

6.2 - Clan Points

In NukeZone, a Clan has three goals: Increase network, increase clan points and/or increase combo points. Clan points are only gained by attacking in a clan war. You must be in a clan for your province to earn Clan points. Clan points are awarded based on the damage inflicted on the enemy by an attack. The more damage you do, the more points your clan will receive.

When your clan declares war on another clan, you will receive 1-20 points depending on the damage inflicted for the first 48 hours. Then the maximum points you can gain drops by 2 points and continues to reduce by 2 points every subsequent 24 hours to a minimum of 4 points.

If another clan declares on your clan, you will receive 1-10 points when attacking them, again depending on the damage inflicted. In order to gain 1-20 points by attacking them you must declare back - this is known as a mutual war. Once your clan declares back you will have 48 hours of being able to get 1-20 points before the maximum points you can get begin to drop as described above.

If your clan does not declare back you will always get 1-10 points per attack. Note: different rules apply on the size of provinces you can attack depending on the type of war; mutual or one-sided. See 6.3 - Clan Wars for details.

When you kill a province in a one sided war you receive 25 clan points, when you kill a province in a mutual war you receive 50 clan points. Clan points gained from satellites, including for kills, are based on the amount of satellite power used.

When you kill a province of \$10,000 network or lower you do not gain any clan points. However, you still gain 1 kill on your stats record. Each time a clan achieves a bonus level the clan receives a fixed bonus of 300 turns per province and \$25 000 000. The clan bonus money is divided evenly among all clan members, whether or not the clan members are dead or alive. You must be a member of the clan for at least 72 hours to receive a clan bonus.

After your clan's first 5000 points your clan receives a mini bonus worth half a normal bonus. A super clan bonus is awarded at 50 000 clan points, 150 000 clan points, 250 000 clan points and 350 000 clan points etc. and is 1.5 times the regular bonus. A mega clan Bonus is awarded in replacement for every 2nd Super Clan Bonus at 100,000 clan points, 200,000 clan points, 300 000 clan points etc. and is 2 times the regular bonus. Both the turns and the money are increased with these special bonuses.

6.3 - Clan Wars

In NukeZone, when a clan is mad and wants vengeance over another clan, or the members just simply want to earn clan points, they declare war on the other clan. It can be fun and sometimes even be hard. This is why all clans must be at their prime and be prepared for a war at all times. After a CL or CT has declared war, they cannot declare peace for the next 24 hours. In addition, if one clan declares war against another clan, the network attack restrictions are still in place. However, if both sides declare war on each other, the network attack restrictions are removed. Network restrictions always apply the first 24 hours after joining a new clan and if you are using a thief or sniper, even in a mutual war. Clans may resume a war at any time after declaring peace as long as they don't already have 3 current war declarations against other clans; if they do then they must declare peace with at least 1 clan before they are able to resume the war. Once a war is resumed it must last a minimum of 24 hours before peace can be declared again.

6.4 - Clan Forum

Clan Forums are an excellent form of communication for a clan. You and your clan mates can discuss anything you want in there. You can post things like target provinces, ask for help, etc. It is the only forum not moderated by the Administrators and Moderators. The CL and CTs may edit/lock/delete whichever message they want on the Clan Forum.

Gold clans have the additional benefit of the Forum Management tool. This allows the clan leader to organize the clan forums and to give them custom names. It is possible to make a forum that only clan

trustees can visit or a read-only forum.

6.5 - Clan Tag

Clan tags are used to represent what clan a province is in. This is what it looks like: [TAG]Province.

6.6 - Clan Pages

By clicking the Clan link, you come to a page with several links dealing with your clan. Depending on if you are the CL, CO or a CT, some links might be crossed out. This means you do not have access to these areas. Here is all the information about each Clan Page.

Properties

Only a Clan Leader or CO can adjust the clan properties. In the properties page, the CL or CO can add or edit the clan name, clan tag, clan password and the location of the clan logo. Up to five CT's may also be selected from this page. The CL or CO may also choose to restrict shared military information for all new members for a period of time. Valid settings for this option are: None (no restrictions), 12 hours, 24 hours, 36 hours, 48 hours and 72 hours.

Send Aid

All members of the clan may access this page. Before you can send aid you must specify the receiver and enter the amount of money to send, and then press the Send Aid button. You can only send 1/3 of your available amount of money 3 times a day. Target province networth may not be larger than yours. You cannot send or receive aid when in nuke protection. Sending aid also costs you a 'tax' of 1 turn and 25% of the money sent, unless you have 100% banking research, where the 25% charge is removed.

Invite Player

Only a CL, CO and CT can invite other provinces to join the clan. The networth of the other province does not matter. Mass inviting is not accepted. A clan can have a limit of 20 players including the CL. The CL or CO can create a short custom message which is included with the invitation sent to a province.

Clan Information

All members of the clan may access this area. On this page you can find a list of all members of the clan and their respective clan points acquired. Everything you see on the clan page is what everyone else sees except the amount of clan points a member has acquired.

Statistics Central (Platinum Clans only)

All clan members can access this page. This displays useful statistics including a Clan Overview, Clan Statistics and War History. The Clan Overview is updated on a real time basis and includes Last Login, Last Attack, Turns, Logins Per Day (LPD), Attacks Per Day (APD), Points Per Day (PPD). The Clan Statistics are updated every 6 hours and displays the province with most/least of the following: attacks made, attacks suffered, missiles sent, kills, times killed, clan points, aid sent, land, networth, units, buildings. The War History provides information about the clan's previous wars.

Spy Reports (Platinum Clans only)

All clan members have access to this page. The Spy Report page is separated into clans and clanless provinces. Only the CL, CO and CTs are able to delete the reports.

Clan Wars

All members have access to this area. This page displays a list of the clans that yours has currently declared war against; as well as the clans that have currently declared war against yours. This page also displays all clans you have declared peace on in the last 10 days.

Declare War/Peace

Only a CL, CO and CT may access this page. They can declare war against another clan by entering the Clan ID of the clan they want to go to war with (must be in Networth Range of entire Clan Networth). If your clan has declared war against another clan more than 24 hours ago, your clan's CL, CO or CT can declare peace with the other clan by typing in the other Clan's ID in the text box provided.

Clan Message

Only a CL, CO and CT may access this page. They can post Clan Messages, which appear in the main page when a clan member logs in to NukeZone. If you have a gold clan, the CL, CO or CT can preview the message before posting it to check for errors. This is a great way to say something important and assure it reaches all clan members immediately. You can use certain G-Codes in the clan message – gold clans have additional G-Codes that they can use. G-Codes are explained further in section 7.2.

Clan Poll (Gold/Platinum Clans only)

Only a CL, CO and/or a CT can access this page. They are able to create or edit the clan polls from here.

Only one clan poll can be created within a 24 hour period.

Clan Poll Archive (Gold/Platinum Clans only)

All members can access this page. This is where the archive of previous clan polls is stored.

Clan Forum Management (Gold/Platinum Clans only)

Only a CL and CO can access this area. This allows the CL or CO to change the clan forum settings and create new clan forums. The CL and CO of a Platinum Clan can give CT's the ability to access this area.

Domain Management (Platinum Clans only)

Only the CL or CO has access to this area. Here the CL or CO can request a custom NukeZone domain (tag.nukezone.info – where 'tag' is the clan's existing tag) and sub-domains for their clan homepage.

Receive Clan Bonus

All members can click on this to receive the Clan Bonus after the clan has reached 5,000, 10,000 and further multiples of 10,000 Clan Points. This link is enabled within 30 minutes after your clan has reached the Clan Bonus. You will receive a local event when this page has been enabled. If you do not go to this page to receive the bonus within 3 days of it being enabled you will automatically receive it. If you are in vacation mode at the time your clan receives a bonus then you will not receive a share of it. You need to be in the clan for 72 or more hours to be able to receive the bonus.

Clan Recruiting

Only a CL, CO and CT have access to this area. This is where a clan can look for new members and specify the criteria which potential members must meet.

Find New Clan

Everyone has access to this area. This is where members can look for a new clan and specify the criteria which a potential new clan must meet.

Change Clan Leader

Only a CL may access this page. If a CL wants to give up the leadership, he can appoint a new leader of the clan. The old CL will then take over the new CL's old position.

Leave Clan

All members may access this page. If a member of a clan chooses to leave the clan, they can leave the clan immediately. However, the amount of time that provinces must wait after leaving a clan before joining another now increases based on how many clans they have already joined during that round. For 1-3 clans it remains at 24h and 4-5 clans is now 48h; then for 6+ clans the amount of time will increase at regular intervals.

Delete Clan

Only the CL may access this page. If the CL chooses to delete the clan, he may do so by clicking on Delete Clan.

6.7 - Clan Invitations

The CL, CO and CTs can view a complete list of pending clan invitations. They may also cancel any of these invitations; however invitations automatically expire after 7 days.

6.8 - Extended Military Information

Members of Gold Clans can choose to share their Extended Military Information, giving their clan mates the opportunity to view additional information about their province.

6.9 - Clan Status

Clans have a Status rating of: Brave, Fearless, Neutral, Fearful or Cowardly depending on the size of the clan they are declaring on. The larger the clan they declare war on, the more their status will rise to the positive end of the scale. Adversely, the smaller the clan that is declared upon, the more their status will fall to the negative end of the scale. This system is not in effect when you declare back on a clan. However, it will have a small positive affect, hence declaring back is a brave action. The clan status will affect the points you gain in a clan war: Brave (+20%), Fearless (+10%), Neutral (0%), Fearful (-10%) and Cowardly (-20%). War declarations during the first 10 days of a round do not have an effect on clan status, only declarations after that time will cause the clan status to change.

7.1 - Medals and Clan Awards

At the end of each round, 11 different medals are given out to the leaders of each area.

Medal of Honor - Most clan points gained by a province
 Medal of Growth - Highest networkh
 Medal of Death - Killed most provinces during clan wars
 Medal of Earth - Highest Land Area
 Medal of Courage - Performed most attacks
 Medal of Thievery - Most money stolen
 Medal of Knowledge - Quickest to research all sciences
 Medal of Mass Destruction - Most total NW damage made using missiles (excluding Tomahawk Missiles)
 Medal of Superiority - Province who first reaches 2500 clan points, counting from the beginning of the round and based on Clan Points Gained (total).
 Medal of Development - Province who first reaches \$2,500,000 networkh and keeps it for 48 hours.
 Medal of Accomplishment - Province who wins both the Medal of Honor and Medal of Superiority in the same round.

United Boundaries – Clan with the highest amount of land overall
 United Arms – Clan with the most attacks made during clan wars
 Golden Shotgun – First clan to reach 10000 points.
 Points Champion – Awarded to the first 3 clans in the points toplist (Gold, Silver and bronze)
 Networkh Champion – Awarded to the first 3 clans in the Networkh toplist (Gold, Silver and Bronze)
 Combo Champion – Awarded for the first 3 clans in the Combo toplist (Gold, Silver and Bronze) **

***Combo list: Combo points will be awarded to the top 100 clan rankings for points and for networkh. Clans will gain 1-100 points (rank #1 giving 100 points and rank #100 giving 1 point - anything beyond the rank of #100 receives zero points). Points are awarded daily as of midnight CET (server time), if the clan is in both top lists they will receive an additional 10% more points. So the maximum combo points a clan can obtain each day is 220 Combo points (100 for being number 1 in the Points-toplist, and 100 for being number 1 in the NW toplist + the 10% they get for being in both toplist = 20).*

7.2 - G-Code and Auto-Linking

The following G-Codes can be used in private messages, clan messages and on the forums. Please note that all G-Codes are case sensitive, except the G-Codes used in Clan Messages. If auto-linking is enabled all your entered URLs will automatically be transformed into clickable hyperlinks. Easy and simple link creation, simply enter the URL! However your URL must start with one of the following: http://, https://, ftp:// or www.

Available Tags in Private Messages:

Tag	Output
[USERPROVINCE]	Inserts the reader's province name. Works in both subject and message body.
[USERID]	Inserts the reader's province id. Works in both subject and message body.
[NAME]	Inserts the reader's name. Works in both subject and message body.
[B] [/B]	Text between these tags is displayed in bold. Works only in message body.
[I] [/I]	Text between these tags is displayed in italic. Works only in message body.
[U] [/U]	Text between these tags is displayed underlined. Works only in message body.

Available Tags in Clan Messages (Only available for Gold/Platinum Clans):

Tag	Output
[B] [/B]	Text between these tags is displayed in bold.
[I] [/I]	Text between these tags is displayed in italic.
[U] [/U]	Text between these tags is displayed underlined.
[S] [/S]	Text between these tags is displayed with a line through the middle the text.
[HR]	Inserts a horizontal line.
[CENTER] [/CENTER]	Text between these tags is displayed center aligned.
[LEFT] [/LEFT]	Text between these tags is displayed left aligned.
[RIGHT] [/RIGHT]	Text between these tags is displayed right aligned.
[COLOR=name] [/COLOR]	Text between these tags is displayed in specific

	color. See below for available font colors.
[FONT=name] [/FONT]	Text between these tags is displayed in specific font. See below for available fonts.
[SIZE=number] [/SIZE]	Text between these tags is displayed in specific size. See below for available font sizes.
[LAST_EDITED]	Example output: October 5th, 2002 01:45 CET
[EDITED_BY]	Name of CT/CL who edited the message.
[CLAN_POINTS]	Inserts total amount of current clan points. *
[NEXT_BONUS]	Inserts amount of points required to reach next bonus. *
[NW_RANK]	Inserts the current Networth rank of your clan. **
[PTS_RANK]	Inserts the current Points rank of your clan. **
[CBO_POINTS]	Inserts the Combo Points of your clan.
[CBO_RANK]	Inserts the current Combo Points rank of your clan.
[24H_CLAN_POINTS]	Inserts clan points gained over 24 hours.
[24H_PTS_RANK]	Inserts ranking over 24 hours in clan points gained.

* Note: With the [CLAN_POINTS] and [NEXT_BONUS] tags, if you wish to have a "p" after the points (e.g. "We have this many clan points: 2500p"), the "p" must be added following the tag [CLAN_POINTS]p. You can enter anything after the tag, not just the "p", so could for example enter "[CLAN_POINTS] points".

** These values are updated once every 6 hours.

Available Tags on the Forums:

Tag	Output
[B] [/B]	Text between these tags is displayed in bold. This tag does not work in the topic name.
[I] [/I]	Text between these tags is displayed in italic. This tag does not work in the topic name.
[U] [/U]	Text between these tags is displayed underlined. This tag does not work in the topic name.

Available Special Tags on the Clan Forums (Only available for Gold/Platinum Clans) *:

Tag	Output
[S] [/S]	Text between these tags is displayed with a line through the middle of text. This tag does not work in the topic name.
[IMG]url[/IMG]	Inserts an image. Specify the image source by entering the full url between these tags.
[COLOR=name] [/COLOR]	Text between these tags is displayed in specific color. (see below for valid colors)
[FONT=name] [/FONT]	Text between these tags is displayed in specific font. (see below for valid names)
[SIZE=number] [/SIZE]	Text between these tags is displayed in specific size. (see below for valid sizes)

* Only available if your CL has enabled it on the Clan Forum Management page.

Available Font Colors:

Aqua, black, blue, fuchsia, gray, green, lime, maroon, navy, olive, pink, purple, red, silver, teal, white, yellow. In addition, you may also enter any hexadecimal color code. Please note that the # sign is required when doing so.

Available Fonts:

Arial, Comic Sans, Courier New, Georgia, Helvetica, Impact, Times New Roman, Verdana

Available Font Sizes:

The number argument can still be any number between 0-6, but you may now also specify any custom size you want by adding "pt" after the number. So 16pt means size 16. The old style 0-6 is translated as follows: size 0=8pt, size 1=10pt, size 2=12pt, size 3=14pt, size 4=16pt, size 5=18pt, size 6=20pt.

7.3 - Extended G-Codes

As a Gold Clan, not only do you have the ability to use the regular G-Codes, you also get an extended

version of it. It can only be used in the clan message and can be used by Gold Clans only. A CL/CT can easily target a province and/or a clan by using these codes. The Extended G-Codes are not case-sensitive. A clan message can contain a maximum of 25 Extended G-Codes.

Available Extended G-Codes in Clan Messages (Only available for Gold/Platinum Clans):

Tag	Output
[P=id]	Creates a link to the specified province..
[C=id]	Creates a link to the specified clan.
[A=id]	Creates a link to the aid page for the specified province
[R=id]	Creates a link to the specified enemy province's spy report.
[CR=id]	Creates a link to all of the specified clan's spy reports.
[PNW=id]	Inserts the specified province's name and network and creates a link to the attack page. The network will be made bold if the enemy is within the viewer's attack range.
[NW=number]	The number must be a valid network value. The network is formatted and will be made bold if the enemy is within the viewers attack range.
[URL=link]text[/URL]	Turns the "text" into a hyperlink to click on. Valid "link" types are http, https, ftp, irc

Using this feature is fairly simple. While typing a message, a CL/CT can target a province by typing: [P]ProvinceID [/P] or [C]ClanID [/C]. By doing so, this converts the ID Number into your target's Province or Clan Name and ID Number as well as creating a clickable link to the province/clan information page.

Example: A CL/CT types in, "...War. Everyone attack this guy, [P]123[/P]!" The G-Code converts this to, "...War. Everyone Attack This Guy, FakeProvince (#123)!", where the "FakeProvince (#123)" part is a clickable link that brings you to this enemies province information page. The same is done with clan targets.

8.1 - Technical Support

If you need technical support please contact our Customer Support by sending an in-game message to *Customer Support* (found in your contact list when you write a message) or simply post a message in the *Technical Support and Bug Reports* forum. Links to the multi report system, the EULAs and other important resources can be found by clicking the *help* link in the top right.

8.2 - Ideas and Suggestions

If you have an idea or a suggestion, please post it in the *Suggestions and Ideas* forum.

8.3 - Bug Reporting

Please report all bugs in the *Technical Support and Bug Reports* forum. Bugs that might affect the security or integrity of NukeZone and the server should NOT be posted in public; please inform the Customer Support directly by using one of the above-mentioned ways.

8.4 - IRC

NukeZone has its own IRC channel on the QuakeNet network. This is the place where the NZ Crew and the most experienced players hang around. Everyone is welcome!

Network: QuakeNet

Server: irc.quakenet.org

Channel: #NukeZone (for general NukeZone chat)

#NZSupport (for any game related problems/questions you might have)

#NZVeteran (must be veteran to join)

A quick IRC guide to get you online can be found here:

<http://www.nukezone.info/ircGuide.aspx>

8.5 - Rules

The Game Rules can be found at: <http://www.nukezone.info/gameRules.aspx>

The Forum Rules can be found at: <http://www.nukezone.info/forumRules.aspx>

8.6 - Credits

The NZ Crew:

Stefan Karlström (aka Guffy) – CEO, Lead Developer, Chief Administrator
Anthony Wiezoreck (aka EhpeX) – Chief of Operations, Administrator
Steve Brown (aka Primal) – Assistant Director of Operations, Administrator

1.1 - Overview

NukeZone is a free, strategic text-based online game. The game is optimized for Internet Explorer 5.0 and above with a screen resolution of 800x600 or higher. The game will also work in newer versions of other browsers such as Opera and Netscape Navigator; however, while some features may not operate properly, the game engine functions correctly. It is strongly recommended that you use Internet Explorer 5.0 and above. Please click [here](#) to download the latest Internet Explorer from Microsoft's homepage.

NukeZone is played in rounds lasting approximately 3 months each. Round dates can be found on the login page. At the end of each round, winners in various categories are given medals and all provinces are reset and the game starts over.

If you find any bugs or any other errors in the game, please report them ASAP in the *Technical Support and Bug Reports* forum.

1.2 - Getting Started

You start with 125 turns and \$250,000, then the first time you login for the round you get awarded with an extra 175 turns and \$500,000 (totaling in 300 turns and \$750,000), the extra bonus is only available for provinces created before the start of the round and those created in the first 48 hours of a round. It is up to you to determine what to purchase, while some prefer to use a more offensive strategy, others will choose to adopt a more defensive strategy. Money is required to purchase buildings and units. Turns are required to purchase buildings (jump to *3.1 - Buildings* for more info), increase research (jump to *3.10 - Research* for more info), or attack (jump to *4.1 - General Attack Information* for more info). You need buildings to survive – when all your buildings are destroyed you will die. When you have died you spend 24 hours dead before starting over in nuke protection again – death results in a loss of all units, land, research, money (including in the bank) and turns except for the starting defaults.

There are several ways to get more money although you get a fixed number of turns:

- By default you receive 1 turn every 20th minute and \$2000 each hour. You can research Money Production to increase your income up to a maximum \$26,000/hour.
- Join/create a clan and fight other clans (that your clan is at war with) in order to receive clan bonuses (300 turns and \$25,000,000 for each 10,000 points; the clan bonus money is divided evenly among all clan members).
- Tell your friends about this game (you receive a 10 turn bonus for each friend that signs up and plays for a while). Please note that to receive the bonus your friend must sign up with the same email as the invitation was sent to.

Note: You will not receive any additional turns every 20 minutes if you already have more than 300 turns. However, you can receive the clan bonus during this time. Please use some of your turns in order to start receiving turns every 20 minutes again.

1.3 - Starting Bonus

You can select a starting bonus from the following list, which you must claim while in Nuke Protection.

- **Offensive**
Max morale capacity changes to 110%, plus an additional 45 turns.
- **Defensive**
All buildings get a 15% life boost, plus 2 extra sciences per turn, plus 5,000 m2 land.
- **Finance**
Hourly income increased by 10%, bank capacity is raised by 50% and \$250,000 money.
- **Shipping**
Market and missile orders ship 25% faster, plus ability to choose exact arrival time (up to 12 hours delayed), plus 3,000 m2 land and \$150,000 money.

The starting bonus you receive after you die is based on your networth 72 hours before you were killed. The bonus will increase gradually between \$100 000 and \$1 500 000 reaching a maximum increase of 300% at \$1 500 000. The increase will improve more dramatically at lower networth and decrease slowly as you approach \$1 500 000. The increases will not be in effect if you reset your account.

2.1 - Game

Main - Province info, power status, news, current server time, nuke protection options, starting bonus

Attack - Regular attack, ground attack, air and sea attack, launch missile, send spy/spy plane, send thief, send sniper

Research - Research sciences

Headquarters - View your Headquarters bonuses, manage Headquarters Operations and your army's General

Explore - Explore or Sell additional land.

Market - Buy/sell merchandise

Bank - Deposit/withdraw money

Clan - Join/create clan, clan properties, invite/kick players, manage clan wars, leave/delete clan, recruiting system etc

2.2 - Build

Buildings - Build/demolish buildings

Sea Units - Build sea units

Air Units - Build air units

Vehicles - Build vehicles

Infantries - Train infantries

Missiles - Order missiles, view arrival dates

Satellites - Build/use Satellites

2.3 - Show

Local Events - Shows local events

Global Events - Shows global events, can be filtered by incoming, outgoing or internal.

Attack Events - Shows local outgoing events (Gold Users only).

Search Events - Allows a search of local and global events.

Enemy List - Links to enemy list (Gold Users only).

Status - Information, military info, military settings, history graphs (including Gold User only info) and several province statistics, rank from previous round

All Provinces - Shows all provinces within your attack range

All Clans - Shows all clans

Top List - Top Provinces, Top Clans (Networth), Top Clans (Points)

Search - Search for provinces by province id or province name, search for clans by clan id or clan name/tag

Clan Forum - A direct link to your private clan forum (only visible if you're a member of a clan)

Forum - NukeZone forums

Online Shop - Purchase a Gold user or Gold/Platinum clan

2.4 - NZ Portal

News - Displays current news items

Articles - Displays current articles

Profiles - Displays player profiles

2.5 - Other

Inbox - Display your inbox (private messages that have been sent to you)

New Message - Compose a new message

Preferences - Options, edit profile, change colors, change password, delete province, reset province, create/edit your NZ Portal profile etc

Contact Us - Crew contact information, credits

Logout - Logout from NukeZone

3.1 - Buildings and Walls

Land is nice to have, but without buildings and infrastructure it is of little use. NukeZone offers a variety of buildings to place on your land. Each building has some inherent benefits that allow your province to grow or specialize. It is up to you to determine how to fill your land, and there is no perfect or ideal balance for growth. As well, each building uses a specific amount of power, and power can only be provided by power plants. If you have low power, your defensive buildings, missile silos, research labs, command centres and headquarters buildings won't work, meaning you will be more susceptible to attack, will not be able to launch missiles or be able to perform scientific research. The defense values of your buildings drop by 25% when you are low on power and you will be unable to use spy planes, spies, thieves, snipers and satellites. If you are short on land, either explore for more or attack someone to try and steal some. The amount of unused land improves the defense of your buildings by up to a 40% boost for 25% unused land. It takes 20 m² to build each building with the exception of Headquarters which take 1000 m².

Available Buildings:

Name	Price	Description
Research Lab	\$2,000	Gives 1 extra science/turn to research for each 50

		research labs. Attack: 0, Life: 200 Power usage: 2000
Missile Silo	\$22,000	Houses 1 missile. Attack: 0, Life: 500 Power usage: 10000
Headquarters	\$250,000 25 turns and 1000 m2 of land	Improves various abilities for your province† Attack: 0, Life: 5000 Power Usage: HQ1: 25,000; HQ2: 50,000; HQ3: 100,000; HQ4: 150,000; HQ5: 250,000
Command Centre	\$2,200	Supports 5 special units††. Attack: 0, Life: 120 Power Usage: 1800
Shipyards	\$1,100	Houses 5 sea units. Attack: 0, Life: 90 Power usage: 700
Airfield	\$900	Houses 5 air units. Attack: 0, Life: 85 Power usage: 600
War Factory	\$1,200	Houses 10 vehicles. Attack: 0, Life: 80 Power usage: 900
Barracks	\$700	Houses 20 infantries. Attack: 0, Life: 60 Power usage: 650
Power Plant	\$450	Produces 4500 power units. Attack: 0, Life: 85
Advanced Power Plant	\$1,400	Produces 15000 power units. Attack: 0, Life: 40
Torpedo launcher	\$1,850	Gives you a sea defense. Attack: 350, Life: 280 Power usage: 700
SAM Site	\$1,400	Gives you an air defense. Attack: 265, Life: 240 Power usage: 600
Missile Turret	\$1,500	Gives you a vehicle defence. Attack: 300, Life: 265 Power usage: 400
Machinegun Turret	\$1,200	Gives you an infantry defence. Attack: 190, Life: 290 Power usage: 275
Anti-Missile System	\$5,000	Gives you a missile defense†††. Attack: 0, Life: 400 Power usage: 1700

† Headquarters Building - You may only own 5 Headquarter buildings at any time and you may only build one per 72 hour period. The Headquarter building cannot be main targeted in an attack, but can be destroyed. The power usage is per building and is cumulative, therefore if you own 2 buildings you will use 25,000 + 50,000 for a total power usage of 75,000. Headquarters abilities are cumulative and in the order listed. For example, when you have three headquarters, you will have ALL of the bonuses provided by numbers 1, 2, and 3.

Headquarters #1

- * 75% chance of tracking origin of missiles
- * 10% attack boost to attacking units
- * 1 additional science per turn when researching

Headquarters #2

- * 25% increase to land exploration
- * Implements the Coastal Defense System (5% increased protection against air and sea attack)
- * 1 additional science per turn when researching
- * Gives an additional \$1000/hour

Headquarters #3

- * 50% increase to land exploration
- * Unlocks the sabotage missions for the Spy unit giving a 50% chance of success.
- * 1 additional science per turn when researching

- * Gives an additional \$1000/hour
- * Ability to Main Target individual defense buildings.

Headquarters #4

- * Unlocks the Headquarter Operations
- * Unlocks the General unit with 1 life/hour regeneration rate.
- * Missile accuracy improved with 10%
- * Increases the Coastal Defense System to 15% protection.
- * 1 additional science per turn when researching
- * Improves sabotage missions chance of success to 65%
- * Gives an additional \$1000/hour
- * Improved accuracy for Main Targeting by 2x.

Headquarters #5

- * Enables you to own and utilize two satellites simultaneously
- * 1 additional science per turn when researching
- * Improves sabotage missions chance of success to 80%
- * 10% defense boost for defending units when attacked
- * Increases the General unit to 4 life/hour regeneration rate.
- * Gives an additional \$1000/hour
- * 75% land exploration bonus.

Headquarter Operations

Four Headquarter buildings are required to run Headquarter Operations. Headquarter Operations cost 2 turns and two hourly fees to activate, and then cost a fixed fee per hour, automatically taken from your income. A maximum of half your income may be used for HQ Operations. If your fourth Headquarters is destroyed, the operation will cease functioning. HQ Operations auto deactivate if your account remains inactive for more than 5 days(when you stop receiving your hourly income).

- * \$1000/hour: 100% chance of tracking origin of missiles and special units
- * \$2000/hour: Increased defense against incoming sabotage missions by 50%
- * \$3000/hour: Increased defense against incoming EMP attacks by 50%
- * \$4000/hour: 2 additional life per hour for the General unit.
- * \$5500/hour: Defense buildings do 25% additional damage.
- * \$6000/hour: Increased defense against incoming missile attacks by 25%
- * \$10000/hour: 5% additional satellite power per hour

General Unit

Four Headquarter buildings are required to get access to the General unit. The unit arrives 72 hours after the fourth HQ building is constructed and starts with 100 life. It gains 1-6 life per hour depending on number of headquarters and HQ Operations active. The General can be sent in battle and can be killed in action, and a new one then arrives 72 hours later. When the General unit arrives you will choose a name for it from a list and get to choose one of the following enhancements listed below. Whenever you include the General unit with an attack you get the chosen enhancement. The General unit is idle when defending and does not provide enhancements for defending units or buildings.

Enhancements:

- * 10% additional attack
- * 10% additional defense
- * Avoids walls and the Coastal Defense System provided by the Headquarters 2 and 4.

General Abilities:

- * 10% attack boost (cost: 50 life)
- * 10% defense boost (cost: 50 life)
- * Double money/land gained in combat (cost: 50 life)
- * 50% improved main targeting (cost: 75 life)
- * Spy Report units after-attack information (cost: 100 life)
- * Spy Report buildings after-attack information (cost: 100 life)
- * Double damage in combat (cost: 500 life).
- * Last Stand: Requires at least 200 life, and doubles the attack of your defending units and buildings. It can not be activated during the last 3 days of the round.

†† Special units are; Spy Plane, Spy, Thief and Sniper.

††† Anti-Missile System defense varies based on the amount of used land. Anti-Missile Systems provide a maximum of 50% protection without HQ Operation. 750 Anti-Missile Systems will provide 50% protection,

no matter the amount of used land you have.

Available Walls:

Name	Price	Description
Barbed Wire	\$0	Provides 0% vehicle and infantry defense. Requires: none
Sandbag Wall	\$50,000*	Provides 5% vehicle and infantry defense. Requires: Barbed Wire
Concrete Wall	\$250,000*	Provides 10% vehicle and infantry defense. Requires: Sandbag Wall
Laser Fence	\$500,000*	Provides 15% vehicle and infantry defense. Requires: Concrete Wall

* Lowest price (the price increases with the more land you own). Walls reduce the strength of the attacking force by a certain percentage, based on the type of wall.

3.2 - Sea Units

To build sea units, you need shipyards, which house 5 sea units. Sea units can only be combined with air units in an "Air and Sea Attack".

Available Units:

Name	Price	Description
Submarine	\$2,300	Attack: 180, Life: 170 Can attack: Sea Units Can carry: 2 Tomahawk Missiles
Stealth Boat	\$700	Attack: 50, Life: 70 Can attack: Sea Units, Infantries
Destroyer	\$1,500	Attack: 70, Life: 60 Can attack: Vehicles, Infantries, Buildings
Cruiser	\$2,000	Attack: 85, Life: 105 Can attack: Sea Units, Air Units, Buildings
T-2000 Hovercraft	\$800	Attack: 70, Life: 35 Can attack: Air Units, Buildings

3.3 - Air Units

To build air units, you need airfields, which house 5 air units. Air units can be combined with all other units when attacking.

Available Units:

Name	Price	Description
F-22 Raptor	\$1,075	Attack: 65, Life: 55 Can attack: Sea Units, Air Units
F/A-18 Super Hornet	\$750	Attack: 55, Life: 25 Can attack: Air Units, Buildings
F-35 JSF	\$925	Attack: 55, Life: 45 Can attack: Air Units, Vehicles
B-2 Stealth Bomber	\$1,500	Attack: 130, Life: 55 Can attack: Buildings
RAH-66 Comanche	\$800	Attack: 35, Life: 40 Can attack: Vehicles, Infantries, Buildings
SH-60 Sea Hawk	\$700	Attack: 70, Life: 40 Can attack: Sea Units
Aurora Spy Plane	\$15,000	Spies on enemy buildings. Attack: 0, Life: 200 Can attack: None
CH-46 Sea Knight	\$1,000	Enables you to transport 15 infantry per unit in a Sea and Air attack, while boosting transported infantries attack by 50% and lowering their life by 15%. Attack: 25, Life: 135 Can attack: Buildings

3.4 - Vehicles

To build vehicles you need war factories, which house 10 vehicles. Vehicles can be combined with air units and infantries when attacking.

Available Units:

Name	Price	Description
Humvee	\$500	Attack: 60, Life: 20 Can attack: Infantries
Hover Tank	\$600	Attack: 35, Life: 20 Can attack: Sea Units, Infantries, Buildings
Heavy Artillery	\$1,000	Attack: 95, Life: 40 Can attack: Buildings
SAM Tank	\$700	Attack: 60, Life: 30 Can attack: Air Units
M1 Abrams Tank	\$1,250	Attack: 65, Life: 60 Can attack: Vehicles, Buildings

3.5 - Infantries

To train infantries you need barracks, which house 20 infantries. Infantries can be combined with air units and vehicles when attacking.

Available Units:

Name	Price	Description
Thief	\$5,000	Steals money from the enemy base and protects your base from possible enemy thieves. Attack: 0, Life: 5 Can attack: none
Spy	\$3,000	Spies on enemy units, protects your base from possible enemy spies and carries out Sabotage Missions*. Attack: 0, Life: 5 Can attack: none
Sniper	\$5,000	Attack: 125, Life: 65 Can attack: Spies, Thieves, Snipers Note: Snipers have 5 times less defense against other snipers
Navy Seal	\$900	Attack: 45, Life: 25 Can attack: Sea Units, Buildings
Heavy Infantry	\$400	Attack: 20, Life: 15 Can attack: Air Units, Infantries, Buildings
Machine Gunner	\$350	Attack: 25, Life: 15 Can attack: Infantries
Grenade Soldier	\$425	Attack: 35, Life: 10 Can attack: Vehicles

***Sabotage Missions** - Spies have the option to sabotage missiles, power plants, and satellites. The sabotage option is unlocked and has a 50% chance of success with 3 Headquarters, 65% with 4 Headquarters and 80% with 5 Headquarters.

Missiles: Sabotages 1 missile and may be in effect for up to 10 days or until the missile is launched. If the missile is launched within the 10 day period and the sabotage is successful, it will blow up in the enemy's base prior to launch causing 20% damage. The enemy will still be charged full turns and morale for the attempted launch. The maximum amount of missiles that may be sabotaged for any enemy is 5 at any one time.

Power Plants: If the power plant sabotage option is chosen and the spy is successful it will disable 10% of the enemies' power plants for 48 hours. The maximum amount of power plants that may be sabotaged for any enemy is 50% at any one time.

Satellites: If sabotage is successful the enemies' satellite power is reset to 0% for 10 hours before power begins the 10% hourly increase.

3.6 - Special Units

Special units are the spy plane, spy, thief and sniper. In order to own these units you must have Command Centres. You can have a maximum of 200 Command Centres meaning you are limited to no

more than 1000 special units. Special units cannot be used when you have low power. You may only buy or sell 100 special units per day in all market transactions; e.g. buying 50 and selling 50 would be the maximum special unit transactions for that day.

3.7 - Market

The market allows you to buy units without using turns to build them. However, units on the market are more expensive to buy and because they are not built in your province, they take time to arrive. Depending on the research you have and how much you are willing to pay you can get units from the market in between 3 and 12 hours. You can cancel an incoming order, which returns 75% of the regular market price (money spend on accelerated shipping will not be returned after canceling an order).

You can pay extra to reduce the time it takes for your units to be delivered – paying double the price allows your units to arrive in half the time. Accelerated shipping for missiles costs 1.5x the price. You can also research the Shipping Time Science so you get units from the market faster.

The market also allows you to sell your units to recoup some of their cost if you no longer want them.

3.8 - Missiles

To build missiles you need missile silos, which house 1 missile. A missile is an expensive but very powerful attack option. The chance of hitting the enemy base depends on two things: your missile accuracy and your enemy's missile defense. Missiles cost 5 turns to build and 4 turns to launch. They make use of their own Missile Power (5% received per half hour) and do not use morale. 100% Missile Power is required to launch missiles. Accelerated Shipping mode for missiles cost 1.5 times the standard price.

Tomahawk Missiles do not require a missile silo to build or to launch. Submarines are required to both house and launch the Tomahawk Missiles. As such you must send them with an air and sea attack with the appropriate amount of submarines. Tomahawks are not affected by your missile accuracy although 50% is needed before you may build them but they can be shot down. A submarine can hold 2 Tomahawk Missiles. 3 Tomahawks may be built for every turn and take 6 hours to build. You can send 4 Tomahawk missiles for every \$10,000 Networth you send in the attack.

Anti-Missile Systems, SAM Sites, SAM Tanks and Cruisers can defend against Tomahawk Missiles. Sam Tanks and Cruisers provide equal protection against Tomahawks while SAM Sites provide 3 times the protection of SAM Tanks and Cruisers, and Anti-Missile Systems provide 5 times the protection. The default chance of tracking missiles is 25%, however this is raised to 75% when 1 or more Headquarters Building is owned.

Available Missiles:

Name	Price	Description
Nuclear Missile	\$60,000	Attack: 500,000 Can attack: All Buildings and Units
Chemical Missile	\$35,000	Attack: 250,000 Can attack: Sea Units, Air Units, Vehicles
Biochemical Missile	\$30,000	Attack: 165,000 Can attack: Infantries
EMP Missile*	\$20,000	The EMP Missile initially disables 20% of the enemy's power supply decreasing 5% per hour over a 4 hour period. You do not receive clan points for using this missile.
Tomahawk 250C Missile	\$4,000	Attack: 5000 Can attack: Buildings
Tomahawk 500C Missile	\$8,000	Attack: 8000 Can attack: Buildings and Vehicles

* EMP damage is removed from the target province by 5% each hour. 2 EMP missiles will disable 40% of the targets power if they hit and the effect on the province will then reduce by 5% each hour. It would therefore take 8 hours before all EMP damage was removed.

3.9 - Satellites

There are 6 different satellites available for you to build. All satellites require 50% in *Satellite Technology* before they can be built. Each satellite costs 20 turns and takes 48 hours to construct. After you have built the satellite, you must launch it into space. It takes 1 hour for a satellite to reach earth's orbit, and it can then stay up for 14 days until it crashes down and burns up in earth's atmosphere. You can increase the time your satellite stays in orbit by continuing to research satellite technology over 50%. You get an extra days orbit for every additional 10% research. A satellite will stay in orbit for the period researched at the

time of launch, research while in orbit will not effect that satellite.

Your satellite power increases by 10% each hour and all satellites cost 5 turns to use. Satellites are not operational when you have low power although a previously launched Stealth Satellite will continue to function if it was activated while you had power. You can own any two satellites concurrently, even two of the same kind providing you have all 5 Headquarters. However, you may only have one satellite from each group (offensive and defensive*) in orbit at any one time. If you need to launch another satellite and your current satellite(s) have not yet crashed, you can demolish your satellite(s) for 20% of its/their original cost.

Available Satellites:

Name	Price	Description
EMP Satellite**	\$600,000	The EMP Satellite disables X% of the enemy's power supply over X amount of hours. Requires at least 25% satellite power, 100% satellite power = max effect damage (the more power, the more damage). Max effect: 30%, 6 hours
Laser Beam Satellite	\$1,000,000	Requires at least 25% satellite power, 100% satellite power = max attack damage (the more power, the more damage). 95% hit rate. Max Attack: 9000 Can attack: Buildings
Orbital Research Laboratory	\$350,000	Gives you 5 additional sciences per turn when researching. The 5 additional sciences are given in addition to the current number of sciences per turn you may be receiving from your research labs.
Spy Satellite	\$500,000	Spies on the enemy base. Requires 100% satellite power. You will receive this information: - Approximate number of enemy buildings and units. - Unused enemy land and power status.
Stealth Satellite	\$450,000	When activated, your base will be hidden from enemy spies, thieves, snipers, laser beam satellites and EMP satellites. It hides your base for 7 hours. Requires 100% satellite power.
Anti-Missile Satellite	\$700,000	Gives you instant 100% protection. Each time it shoots down a missile 50% satellite power is used. If you don't have enough satellite power, the satellite will not be able to shoot down any missiles until you get more satellite power.

*

Offensive Satellites:

Laser Beam Satellite
EMP Satellite
Spy Satellite

Defensive Satellites:

Orbital Research Laboratory
Stealth Satellite
Anti-Missile Satellite

**EMP damage is removed from the target province by 5% each hour. 1 hit at full power with the EMP satellite will disable 30% of the targets power and the effect on the province will then reduce by 5% each hour. It would therefore take 6 hours before all EMP damage was removed.

3.10 - Research

There are 10 different sciences available for you to research. Researching sciences requires turns. The number of turns needed is based on your amount of *Research Labs and HQs*, and the more you own, the more sciences per turn you get when researching. You will be able to research between 1 and 20 sciences per turn, depending on how many *Research Labs* and HQs you own. You can get up to 25 sciences per turn by getting an Orbital Research Laboratory.

Available Research:

Bank Management increases the amount of money you can deposit into the bank up to a total of \$5,000,000. Also, for every 10% of research the basic interest rate increases by 0.1%. When 50% of this research is completed the option to withdraw money after 24 hours with no interest and a 25% fee is enabled; when it is 100% complete the 25% fee is removed (2000 sciences). At 100% researched the fee of 1/4 the money is removed when sending aid.

Engineer Effectiveness increases the amount of buildings you can build per turn. The maximum limit is 15 buildings per turn (2500 sciences); default is 5 buildings per turn.

Market Shipping Time reduces the time taken for items ordered from the market to arrive. The maximum limit is 50% (1800 sciences).

Market Discount gives you discount on all market merchandise. The maximum limit is 30% (1200 sciences).

Missile Accuracy gives your missiles a better chance to hit the target. The maximum limit is 80% (800 sciences); default is 10% accuracy.

Money Production increases your income per hour. The maximum limit is \$26,000 per hour (3000 sciences), default is \$2000 per hour.

Power Plant Efficiency increases the amount of power each power plant produces and also increases their defense/life. The maximum limit is 50% above normal (1000 sciences).

Satellite Technology gives you the knowledge to construct satellites. 50% satellite technology is needed in order to construct any satellites. Additional research over 50% extends the maximum orbit time of the satellite with up to 5 days (making it a total of 19 days in orbit). The maximum limit is 100% (3000 sciences). Once the Satellite Technology research is 100% complete the construction cost of each satellite will be reduced by 20% and each use of a satellite will cost 4 turns instead of 5.

Security System improves your security. This makes enemy thieves steal less money from you. It will not protect you from enemy thieves in any other way. The maximum limit is 100% (2000 sciences).

Thief Education teaches your thieves to steal more money and also to be stealthier. The maximum limit is 300% (3000 sciences).

4.1 - General Attack Information

Each attack is unique in some way and all attacks cost a different amount of turns. Launch Missile costs 4 turns. Regular Attack, Ground Attack and Air Attack cost 3 turns. Send Spy/Spy Plane costs 1 turn and Send Thief and Send Sniper costs 2 turns and 5% morale. The maximum amount of morale your army can have is 100%, and each attack uses a different amount of morale. An attack may "cost" as low as 20% of your morale and as high as 35%. When you attack an enemy that is smaller than yourself, you will lose 5% more morale. You will lose additional 10% of morale if you use an aggressive attack type. However, your morale increases by 5% every 15 minutes. Missiles have their own Missile Power (5% received per half hour) and does not use morale.

Target ID is the target province id.

Attack Method is the option on how you want to attack your enemy.

Main Target specifies the target your troops will focus on. You may also main target individual defence buildings providing you own HQ #3.

Attack Type specifies how the attack should be made; normal or aggressive.

4.2 - Regular Attack

Regular attack can consist of air units, vehicles and infantries. This attack method costs 3 turns.

4.3 - Ground Attack

Ground attack can only consist of ground units. Using this method makes the vehicles and infantries slightly more powerful than a Regular attack. This attack method costs 3 turns.

4.4 - Air and Sea Attack

Air and Sea attack can only consist of air units and sea units. You may load certain sea units with Tomahawk missiles, which will then be launched during the attack. Using this method makes these units slightly more powerful than a Regular attack. This attack method costs 3 turns.

4.5 - Launch Missile

Use this option to send your missiles to enemy targets. This attack method costs 4 turns, and uses 100% Missile Power. This does not include Tomahawks.

4.6 - Send Spy/Spy Plane (intelligence)

When you send out your spy, his job is to spy on your enemy's army or base. You can choose between an infantry spy for army intelligence or a spy plane to gather info on your enemies buildings. However, there is no guarantee either will succeed. You may send up to 5 Spies at once for the same amount of turns, for up to 5x the details of your results (chance of being caught increases by up to 10x). Opposing snipers and spies can kill infantry spies. If he does fail, your enemy is informed that you sent the spy. If your spy is successful, it is hard to count to an exact number of units or buildings in such a short period of time, so your spy works with special codenames. Below are the translations of those codenames. This attack method costs 1 turn.

Spy Codenames: The numbers on the table below are based on the sending of 1 Spy, and can be made more detailed depending on how many Spies are sent up to a total of 5.

Codename	Amount of Units
Few	0-99
Several	100-249
Pack	250-499
Lots of	500-1,499
Many	1,500-4,999
Crowd	5,000-9,999
Legion	10,000-19,999
Super Legion	20,000+

Spy Plane Codenames:

Codename	Amount of Buildings
Few	0-49
Several	50-124
Pack	125-249
Lots of	250-499
Many	500-999
Crowd	1,000-2,499
Legion	2,500-4,999
Super Legion	5,000+

4.7 – Send Spy (sabotage)

Spies have the option to sabotage missiles, power plants, and satellites. This attack method costs 5 turns and 100% morale.

4.8 - Send Thief

When you send out your thief, his job is to steal money from the selected enemy. However, there is no guarantee that your thief will succeed. If he does fail, your enemy is informed that you sent the thief. This attack method costs 2 turns and 5% morale.

You can send up to 10 thieves at once for the same turns and morale as one. This allows you to get up to 5 times the return but the chance of being caught increases by up to 10 times – times 1 extra for each additional thief. Therefore an attack with 5 thieves could get you up to 2.5 times as much money but you would be 5 times as likely to be caught. If caught you lose all attacking thieves.

4.9 - Sniper

A sniper can both attack and defend. They can attack spies, thieves and snipers. They can defend against spies, thieves, and snipers. They are five times better at defending than spies and thieves are. However, snipers have 5 times less defense against other snipers. This attack method costs 2 turns and 5% morale.

You can send up to 10 snipers at once for the same turns and morale as one. This allows you to do up to 5 times the damage but the chance of being caught increases by up to 10 times – times 1 extra for each additional sniper. Therefore an attack with 5 snipers could inflict up to 2.5 times as much damage but you would be 5 times as likely to be caught. If caught you lose all attacking snipers.

5.1 - Province Status and History

You can get access to a wealth of information about your province and you past performance from the status page. The history page shows statistics for the following items: -

History statistic	Explanation
Attack Success	The number of successful attacks made expressed as a percentage
Defend Success	The number of times successfully defended expressed as a percentage
Highest Networkh	The peak networkh you have achieved in the current round
Highest Land Area	Greatest land area you owned in the current round
Land Gained in Combat	Area of land gained by attacking other provinces
Land Lost in Combat	Area of land lost to other provinces attacking you
Money Gained in Combat	Sum of money gained by attacking other provinces
Money Lost in Combat	Sum of money lost to other provinces attacking you
Money Lost in Thievery	Sum of money you lost to thievery
Most Money Gained in Thievery	Highest amount of money stolen by one thief (GU only)
Kills	Number of provinces you killed
Kills (during clan wars)	Number of provinces you killed during clan wars
Times Killed	Number of times your province has been killed
Missiles Sent	Number of nuclear, chemical and biochemical missiles you have sent
NW Damage Made by Missiles	Cumulative sum of the damage your missiles have dealt this round
Enemy Missiles Received	Count of enemy missiles that have been fired at your province
Enemy Missiles Hit	Enemy missiles that have not missed or been shot down by anti-missile-systems
Enemy Missiles Missed	Enemy missiles that have missed your province
Enemy Missiles Shot Down	Enemy missiles that your anti-missile-systems have shot down
Attacks Made	Total attacks made, not including missiles sent
Attacks Made (during clan wars)	Total attacks made during clan wars, not including missiles sent
Wins	Successful attacks made (percentage in brackets)
Attacks Suffered	Total attacks suffered from other provinces
Defeats	Number of times the enemy successfully penetrated your defenses (percentage in brackets)
Clan Points Gained (current clan)	Total clan points gained in the current clan - every time you successfully attack a province your clan is at war with, you will be awarded clan points depending on the damage
Clan Points Gained (total)	Total clan points gained for the whole round
Aid Sent (current clan)	Amount of aid you have sent in current clan
Aid Received (current clan)	Amount of aid you have received in current clan
Targets Spied	Amount of targets spied in current clan
Time to Complete All Sciences	Total time to complete research on all sciences

Enhanced History: There are more History Statistics but these are Gold Used only.

You can also view graphs plotting the history of your province over the last 14 days in certain key areas:
- *Networkh*

- Land (Gold users only)
- Total Buildings (Gold users only)
- Total Units (Gold users only)

5.2 – Military Info

A full breakdown of your current military force is provided here for quick reference. You can choose to share certain military information with your clan mates from the preferences menu.

Extended Military Information is available to those who are currently in a Gold Clan. This feature allows Gold Clan members to view additional Military Information that is normally hidden. There are 6 sections visible: -

General - allows clan mates to view your status page.

Buildings - this permits clan mates to see what type and volume of buildings you have as well as what type of wall if any and whether or not you have a satellite in orbit.

Research - this lets clan mates look at what research you have done.

If you are Gold User your clan mates can also see the following Info. The dropdown list shows GU's as a darker color

History Graphs - allows clan mates to see you graphs (networth, land, buildings, units, attacks made, attacks received and clan points gained)

Statistic Breakdown - Allows clan mates to see your Networth and Turns Breakdown.

5.3 – Province Preferences

The preferences page allows you to change many options specific to your province including color schemes, province details, account details, account password and many gold user only options. This is also where you go to put your account into vacation mode or reset your account; as well as creating/editing your NZ Portal Profile.

The Profile option allows you to change certain details about your province, including your province name which can be changed if you are dead, if the game is between rounds and during the first 48 hours of a round. You can only change province name once every 2 weeks during the round.

Vacation mode puts your province into nuke protection for a specified period of time while you are away. During this time you cannot login to your province. You cannot go into vacation mode in the last 3 days of a round.

Your preferences page is also where you go to activate any gold users you may have purchased or to transfer them to another province via the Gold User Management section. Gold Memberships that have been used cannot be transferred, even if there are one or more rounds left.

5.4 – Community Score

For information on how the Community Score system works, go to the following page:

http://files.nukezone.info/community_score.htm

6.1 - General Clan Information

Clans are a vital element in NukeZone, and if you're not in a clan, join or create one immediately (see the Find Clan section for help joining a clan). Clans can provide protection to their provinces. A clan can have up to 20 members. There are four different types of clan members: Clan Leader (CL), Co-Leader (CO), Clan Trustee (CT), and Normal Member. The clan leader controls everything, and can select up to 5 clan trustees. These CT's can help the CL to control the clan by declaring war/peace, or by editing the clan message. If the CL gets banned or deleted due to inactivity, the CO will become CL, if there is no CO the first CT will become CL. If no CT is available, the province who has been in the clan the longest will become CL. Once a province leaves or is kicked from their clan, that province will no longer be allowed to return to that clan until the next round unless he left within the first 48 hours of the round. Close to the end of a round you are no longer able to join or create clans - this comes into force in the final 7 days.

Clan Leaders

Clan Leaders are the key to success for all clans. A clan must have an excellent leader to keep control and become unstoppable.

Clan Co-Leaders

Available only in a Platinum clan, the Co-Leader has all the same abilities as the Clan Leader except for: Change Clan Leader, Delete Clan.

Clan Trustees

Clan Trustees are almost like the clan leader. They exist to help the clan leader. In a Platinum Clan, the first CT can use the All Clan Message option to instantly send private messages to all clan members. If you are in a Platinum Clan, the CL and CO can set the rights for each single CT.

6.2 - Clan Points

In NukeZone, a Clan has three goals: Increase network, increase clan points and/or increase combo points. Clan points are only gained by attacking in a clan war. You must be in a clan for your province to earn Clan points. Clan points are awarded based on the damage inflicted on the enemy by an attack. The more damage you do, the more points your clan will receive.

When your clan declares war on another clan, you will receive 1-20 points depending on the damage inflicted for the first 48 hours. Then the maximum points you can gain drops by 2 points and continues to reduce by 2 points every subsequent 24 hours to a minimum of 4 points.

If another clan declares on your clan, you will receive 1-10 points when attacking them, again depending on the damage inflicted. In order to gain 1-20 points by attacking them you must declare back - this is known as a mutual war. Once your clan declares back you will have 48 hours of being able to get 1-20 points before the maximum points you can get begin to drop as described above.

If your clan does not declare back you will always get 1-10 points per attack. Note: different rules apply on the size of provinces you can attack depending on the type of war; mutual or one-sided. See 6.3 - Clan Wars for details.

When you kill a province in a one sided war you receive 25 clan points, when you kill a province in a mutual war you receive 50 clan points. Clan points gained from satellites, including for kills, are based on the amount of satellite power used.

When you kill a province of \$10,000 network or lower you do not gain any clan points. However, you still gain 1 kill on your stats record. Each time a clan achieves a bonus level the clan receives a fixed bonus of 300 turns per province and \$25 000 000. The clan bonus money is divided evenly among all clan members, whether or not the clan members are dead or alive. You must be a member of the clan for at least 72 hours to receive a clan bonus.

After your clan's first 5000 points your clan receives a mini bonus worth half a normal bonus. A super clan bonus is awarded at 50 000 clan points, 150 000 clan points, 250 000 clan points and 350 000 clan points etc. and is 1.5 times the regular bonus. A mega clan Bonus is awarded in replacement for every 2nd Super Clan Bonus at 100,000 clan points, 200,000 clan points, 300 000 clan points etc. and is 2 times the regular bonus. Both the turns and the money are increased with these special bonuses.

6.3 - Clan Wars

In NukeZone, when a clan is mad and wants vengeance over another clan, or the members just simply want to earn clan points, they declare war on the other clan. It can be fun and sometimes even be hard. This is why all clans must be at their prime and be prepared for a war at all times. After a CL or CT has declared war, they cannot declare peace for the next 24 hours. In addition, if one clan declares war against another clan, the network attack restrictions are still in place. However, if both sides declare war on each other, the network attack restrictions are removed. Network restrictions always apply the first 24 hours after joining a new clan and if you are using a thief or sniper, even in a mutual war. Clans may resume a war at any time after declaring peace as long as they don't already have 3 current war declarations against other clans; if they do then they must declare peace with at least 1 clan before they are able to resume the war. Once a war is resumed it must last a minimum of 24 hours before peace can be declared again.

6.4 - Clan Forum

Clan Forums are an excellent form of communication for a clan. You and your clan mates can discuss anything you want in there. You can post things like target provinces, ask for help, etc. It is the only forum not moderated by the Administrators and Moderators. The CL and CTs may edit/lock/delete whichever message they want on the Clan Forum.

Gold clans have the additional benefit of the Forum Management tool. This allows the clan leader to organize the clan forums and to give them custom names. It is possible to make a forum that only clan

trustees can visit or a read-only forum.

6.5 - Clan Tag

Clan tags are used to represent what clan a province is in. This is what it looks like: [TAG]Province.

6.6 - Clan Pages

By clicking the Clan link, you come to a page with several links dealing with your clan. Depending on if you are the CL, CO or a CT, some links might be crossed out. This means you do not have access to these areas. Here is all the information about each Clan Page.

Properties

Only the Clan Leader or CO can adjust the clan properties. In the properties page, the CL or CO can add or edit the clan name, clan tag, clan password and the location of the clan logo. Up to five CT's may also be selected from this page. The CL or CO may also choose to restrict shared military information for all new members for a period of time. Valid settings for this option are: None (no restrictions), 12 hours, 24 hours, 36 hours, 48 hours and 72 hours.

Send Aid

All members of the clan may access this page. Before you can send aid you must specify the receiver and enter the amount of money to send, and then press the Send Aid button. You can only send 1/3 of your available amount of money 3 times a day. Target province networth may not be larger than yours. You cannot send or receive aid when in nuke protection. Sending aid also costs you a 'tax' of 1 turn and 25% of the money sent, unless you have 100% banking research, where the 25% charge is removed.

Invite Player

Only the CL, CO and CT's can invite other provinces to join the clan. The networth of the other province does not matter. Mass inviting is not accepted. A clan can have a limit of 20 players including the CL. The CL or CO can create a short custom message which is included with the invitation sent to a province.

Clan Information

All members of the clan may access this area. On this page you can find a list of all members of the clan and their respective clan points acquired. Everything you see on the clan page is what everyone else sees except the amount of clan points a member has acquired.

Statistics Central (Platinum Clans only)

All clan members can access this page. This displays useful statistics including a Clan Overview, Clan Statistics and War History. The Clan Overview is updated on a real time basis and includes Last Login, Last Attack, Turns, Logins Per Day (LPD), Attacks Per Day (APD), Points Per Day (PPD). The Clan Statistics are updated every 6 hours and displays the province with most/least of the following: attacks made, attacks suffered, missiles sent, kills, times killed, clan points, aid sent, land, networth, units, buildings. The War History provides information about the clan's previous wars.

Spy Reports (Platinum Clans only)

All clan members have access to this page. The Spy Report page is separated into clans and clanless provinces. Only the CL, CO and CT's are able to delete the reports.

Clan Wars

All members have access to this area. This page displays a list of the clans that yours has currently declared war against; as well as the clans that have currently declared war against yours. This page also displays all clans you have declared peace on in the last 10 days.

Declare War/Peace

Only the CL, CO and CT's may access this page. They can declare war against another clan by entering the Clan ID of the clan they want to go to war with (must be in Networth Range of entire Clan Networth). If your clan has declared war against another clan more than 24 hours ago, your clan's CL, CO or CT can declare peace with the other clan by typing in the other Clan's ID in the text box provided.

Clan Message

Only the CL, CO and CT may access this page. They can post Clan Messages, which appear in the main page when a clan member logs in to NukeZone. If you have a gold clan, the CL, CO or CT can preview the message before posting it to check for errors. This is a great way to say something important and assure it reaches all clan members immediately. You can use certain G-Codes in the clan message - gold clans have additional G-Codes that they can use. G-Codes are explained further in section 7.2.

Clan Poll (Gold/Platinum Clans only)

Only the CL, CO and/or a CT's can access this page. They are able to create or edit the clan polls from

here. Only one clan poll can be created within a 24 hour period.

Clan Poll Archive (Gold/Platinum Clans only)

All members can access this page. This is where the archive of previous clan polls is stored.

Clan Forum Management (Gold/Platinum Clans only)

Only the CL and CO can access this area. This allows the CL or CO to change the clan forum settings and create new clan forums. The CL and CO of a Platinum Clan can give CT's the ability to access this area.

Domain Management (Platinum Clans only)

Only the CL or CO has access to this area. Here the CL or CO can request a custom NukeZone domain (tag.nukezone.info – where 'tag' is the clan's existing tag) and sub-domains for their clan homepage.

Receive Clan Bonus

All members can click on this to receive the Clan Bonus after the clan has reached 5,000, 10,000 and further multiples of 10,000 Clan Points. This link is enabled within 30 minutes after your clan has reached the Clan Bonus. You will receive a local event when this page has been enabled. If you do not go to this page to receive the bonus within 3 days of it being enabled you will automatically receive it. If you are in vacation mode at the time your clan receives a bonus then you will not receive a share of it. You need to be in the clan for 72 or more hours to be able to receive the bonus.

Clan Recruiting

Only the CL, CO and CT's have access to this area. This is where a clan can look for new members and specify the criteria which potential members must meet.

Find New Clan

Everyone has access to this area. This is where members can look for a new clan and specify the criteria which a potential new clan must meet.

Change Clan Leader

Only the CL may access this page. If a CL wants to give up the leadership, he can appoint a new leader of the clan. The old CL will then take over the new CL's old position.

Leave Clan

All members may access this page. If a member of a clan chooses to leave the clan, they can leave the clan immediately. However, The amount of time that provinces must wait after leaving a clan before joining another now increases based on how many clans they have already joined during that round. For 1-3 clans it remains at 24h and 4-5 clans is now 48h; then for 6+ clans the amount of time will increase at regular intervals.

Delete Clan

Only the CL may access this page. If the CL chooses to delete the clan, he may do so by clicking on Delete Clan.

6.7 - Clan Invitations

The CL, CO and CTs can view a complete list of pending clan invitations. They may also cancel any of these invitations; however invitations automatically expire after 7 days.

6.8 - Extended Military Information

Members of Gold Clans can choose to share their Extended Military Information, giving their clan mates the opportunity to view additional information about their province.

6.9 - Clan Status

Clans have a Status rating of: Brave, Fearless, Neutral, Fearful or Cowardly depending on the size of the clan they are declaring on. The larger the clan they declare war on, the more their status will rise to the positive end of the scale. Adversely, the smaller the clan that is declared upon, the more their status will fall to the negative end of the scale. This system is not in effect when you declare back on a clan. However, it will have a small positive affect, hence declaring back is a brave action. The clan status will affect the points you gain in a clan war: Brave (+20%), Fearless (+10%), Neutral (0%), Fearful (-10%) and Cowardly (-20%). War declarations during the first 10 days of a round do not have an effect on clan status, only declarations after that time will cause the clan status to change.

7.1 – Medals and Clan Awards

At the end of each round, 11 different medals are given out to the leaders of each area.

Medal of Honor - Most clan points gained by a province
 Medal of Growth - Highest networkh
 Medal of Death - Killed most provinces during clan wars
 Medal of Earth - Highest Land Area
 Medal of Courage - Performed most attacks
 Medal of Thievery - Most money stolen
 Medal of Knowledge - Quickest to research all sciences
 Medal of Mass Destruction - Most total NW damage made using missiles (excluding Tomahawk Missiles)
 Medal of Superiority - Province who first reaches 2500 clan points, counting from the beginning of the round and based on Clan Points Gained (total).
 Medal of Development - Province who first reaches \$2,500,000 networkh and keeps it for 48 hours.
 Medal of Accomplishment - Province who wins both the Medal of Honor and Medal of Superiority in the same round.

United Boundaries - Clan with the highest amount of land overall
 United Arms - Clan with the most attacks made during clan wars
 Golden Shotgun - First clan to reach 10000 points.
 Points Champion - Awarded to the first 3 clans in the points toplist (Gold, Silver and bronze)
 Networkh Champion - Awarded to the first 3 clans in the Networkh toplist (Gold, Silver and Bronze)
 Combo Champion - Awarded for the first 3 clans in the Combo toplist (Gold, Silver and Bronze) **

***Combo list: Combo points will be awarded to the top 100 clan rankings for points and for networkh. Clans will gain 1-100 points (rank #1 giving 100 points and rank #100 giving 1 point - anything beyond the rank of #100 receives zero points). Points are awarded daily as of midnight CET (server time), if the clan is in both top lists they will receive an additional 10% more points. So the maximum combo points a clan can obtain each day is 220 Combo points (100 for being number 1 in the Points-toplist, and 100 for being number 1 in the NW toplist + the 10% they get for being in both toplist = 20).*

7.2 - G-Code and Auto-Linking

The following G-Codes can be used in private messages, clan messages and on the forums. Please note that all G-Codes are case sensitive, except the G-Codes used in Clan Messages. If auto-linking is enabled all your entered URLs will automatically be transformed into clickable hyperlinks. Easy and simple link creation, simply enter the URL! However your URL must start with one of the following: http://, https://, ftp:// or www.

Available Tags in Private Messages:

Tag	Output
[USERPROVINCE]	Inserts the reader's province name. Works in both subject and message body.
[USERID]	Inserts the reader's province id. Works in both subject and message body.
[NAME]	Inserts the reader's name. Works in both subject and message body.
[B] [/B]	Text between these tags is displayed in bold. Works only in message body.
[I] [/I]	Text between these tags is displayed in italic. Works only in message body.
[U] [/U]	Text between these tags is displayed underlined. Works only in message body.

Available Tags in Clan Messages (Only available for Gold/Platinum Clans):

Tag	Output
[B] [/B]	Text between these tags is displayed in bold.
[I] [/I]	Text between these tags is displayed in italic.
[U] [/U]	Text between these tags is displayed underlined.
[S] [/S]	Text between these tags is displayed with a line through the middle the text.
[HR]	Inserts a horizontal line.
[CENTER] [/CENTER]	Text between these tags is displayed center aligned.
[LEFT] [/LEFT]	Text between these tags is displayed left aligned.
[RIGHT] [/RIGHT]	Text between these tags is displayed right aligned.
[COLOR=name] [/COLOR]	Text between these tags is displayed in specific

	color. See below for available font colors.
[FONT=name] [/FONT]	Text between these tags is displayed in specific font. See below for available fonts.
[SIZE=number] [/SIZE]	Text between these tags is displayed in specific size. See below for available font sizes.
[LAST_EDITED]	Example output: October 5th, 2002 01:45 CET
[EDITED_BY]	Name of CT/CL who edited the message.
[CLAN_POINTS]	Inserts total amount of current clan points. *
[NEXT_BONUS]	Inserts amount of points required to reach next bonus. *
[NW_RANK]	Inserts the current Networth rank of your clan. **
[PTS_RANK]	Inserts the current Points rank of your clan. **
[CBO_POINTS]	Inserts the Combo Points of your clan.
[CBO_RANK]	Inserts the current Combo Points rank of your clan.
[24H_CLAN_POINTS]	Inserts clan points gained over 24 hours.
[24H_PTS_RANK]	Inserts ranking over 24 hours in clan points gained.

* Note: With the [CLAN_POINTS] and [NEXT_BONUS] tags, if you wish to have a "p" after the points (e.g. "We have this many clan points: 2500p"), the "p" must be added following the tag [CLAN_POINTS]p. You can enter anything after the tag, not just the "p", so could for example enter "[CLAN_POINTS] points".

** These values are updated once every 6 hours.

Available Tags on the Forums:

Tag	Output
[B] [/B]	Text between these tags is displayed in bold. This tag does not work in the topic name.
[I] [/I]	Text between these tags is displayed in italic. This tag does not work in the topic name.
[U] [/U]	Text between these tags is displayed underlined. This tag does not work in the topic name.

Available Special Tags on the Clan Forums (Only available for Gold/Platinum Clans) *:

Tag	Output
[S] [/S]	Text between these tags is displayed with a line through the middle of text. This tag does not work in the topic name.
[IMG]url[/IMG]	Inserts an image. Specify the image source by entering the full url between these tags.
[COLOR=name] [/COLOR]	Text between these tags is displayed in specific color. (see below for valid colors)
[FONT=name] [/FONT]	Text between these tags is displayed in specific font. (see below for valid names)
[SIZE=number] [/SIZE]	Text between these tags is displayed in specific size. (see below for valid sizes)

* Only available if your CL has enabled it on the Clan Forum Management page.

Available Font Colors:

Aqua, black, blue, fuchsia, gray, green, lime, maroon, navy, olive, pink, purple, red, silver, teal, white, yellow. In addition, you may also enter any hexadecimal color code. Please note that the # sign is required when doing so.

Available Fonts:

Arial, Comic Sans, Courier New, Georgia, Helvetica, Impact, Times New Roman, Verdana

Available Font Sizes:

The number argument can still be any number between 0-6, but you may now also specify any custom size you want by adding "pt" after the number. So 16pt means size 16. The old style 0-6 is translated as follows: size 0=8pt, size 1=10pt, size 2=12pt, size 3=14pt, size 4=16pt, size 5=18pt, size 6=20pt.

7.3 - Extended G-Codes

As a Gold Clan, not only do you have the ability to use the regular G-Codes, you also get an extended

version of it. It can only be used in the clan message and can be used by Gold Clans only. A CL/CT can easily target a province and/or a clan by using these codes. The Extended G-Codes are not case-sensitive. A clan message can contain a maximum of 25 Extended G-Codes.

Available Extended G-Codes in Clan Messages (Only available for Gold/Platinum Clans):

Tag	Output
[P=id]	Creates a link to the specified province..
[C=id]	Creates a link to the specified clan.
[A=id]	Creates a link to the aid page for the specified province
[R=id]	Creates a link to the specified enemy province's spy report.
[CR=id]	Creates a link to all of the specified clan's spy reports.
[PNW=id]	Inserts the specified province's name and network and creates a link to the attack page. The network will be made bold if the enemy is within the viewer's attack range.
[NW=number]	The number must be a valid network value. The network is formatted and will be made bold if the enemy is within the viewers attack range.
[URL=link]text[/URL]	Turns the "text" into a hyperlink to click on. Valid "link" types are http, https, ftp, irc

Using this feature is fairly simple. While typing a message, a CL/CT can target a province by typing: [P=ProvinceID] or [C=ClanID]. By doing so, this converts the ID Number into your target's Province or Clan Name and ID Number as well as creating a clickable link to the province/clan information page.

Example: A CL/CT types in, "...War. Everyone attack this guy, [P=123]!" The G-Code converts this to, "...War. Everyone Attack This Guy, FakeProvince (#123)!", where the "FakeProvince (#123)" part is a clickable link that brings you to this enemies province information page. The same is done with clan targets.

8.1 - Technical Support

If you need technical support please contact our Customer Support by sending an in-game message to *Customer Support* (found in your contact list when you write a message) or simply post a message in the *Technical Support and Bug Reports* forum. Links to the multi report system, the EULAs and other important resources can be found by clicking the *help* link in the top right.

8.2 - Ideas and Suggestions

If you have an idea or a suggestion, please post it in the *Suggestions and Ideas* forum.

8.3 - Bug Reporting

Please report all bugs in the *Technical Support and Bug Reports* forum. Bugs that might affect the security or integrity of NukeZone and the server should NOT be posted in public; please inform the Customer Support directly by using one of the above-mentioned ways.

8.4 - IRC

NukeZone has its own IRC channel on the QuakeNet network. This is the place where the NZ Crew and the most experienced players hang around. Everyone is welcome!

Network: QuakeNet

Server: irc.quakenet.org

Channel: #NukeZone (for general NukeZone chat)

#NZSupport (for any game related problems/questions you might have)

#NZVeteran (must be veteran to join)

A quick IRC guide to get you online can be found here:

<http://www.nukezone.info/ircGuide.aspx>

8.5 - Rules

The Game Rules can be found at: <http://www.nukezone.info/gameRules.aspx>

The Forum Rules can be found at: <http://www.nukezone.info/forumRules.aspx>

8.6 - Credits

The NZ Crew:

Stefan Karlström (aka Guffy) – CEO, Lead Developer, Chief Administrator
Anthony Wiezoreck (aka EhpeX) – Chief of Operations, Administrator
Steve Brown (aka Primal) – Assistant Director of Operations, Administrator

1.1 - Overview

NukeZone is a free, strategic text-based online game. The game is optimized for Internet Explorer 5.0 and above with a screen resolution of 800x600 or higher. The game will also work in newer versions of other browsers such as Opera and Netscape Navigator; however, while some features may not operate properly, the game engine functions correctly. It is strongly recommended that you use Internet Explorer 5.0 and above. Please click [here](#) to download the latest Internet Explorer from Microsoft's homepage.

NukeZone is played in rounds lasting approximately 3 months each. Round dates can be found on the login page. At the end of each round, winners in various categories are given medals and all provinces are reset and the game starts over.

If you find any bugs or any other errors in the game, please report them ASAP in the *Technical Support and Bug Reports* forum.

1.2 - Getting Started

You start with 125 turns and \$250,000, then the first time you login for the round you get awarded with an extra 175 turns and \$500,000 (totaling in 300 turns and \$750,000), the extra bonus is only available for provinces created before the start of the round and those created in the first 48 hours of a round. It is up to you to determine what to purchase, while some prefer to use a more offensive strategy, others will choose to adopt a more defensive strategy. Money is required to purchase buildings and units. Turns are required to purchase buildings (jump to *3.1 - Buildings* for more info), increase research (jump to *3.10 - Research* for more info), or attack (jump to *4.1 - General Attack Information* for more info). You need buildings to survive – when all your buildings are destroyed you will die. When you have died you spend 24 hours dead before starting over in nuke protection again – death results in a loss of all units, land, research, money (including in the bank) and turns except for the starting defaults.

There are several ways to get more money although you get a fixed number of turns:

- By default you receive 1 turn every 20th minute and \$2000 each hour. You can research Money Production to increase your income up to a maximum \$26,000/hour.
- Join/create a clan and fight other clans (that your clan is at war with) in order to receive clan bonuses (300 turns and \$25,000,000 for each 10,000 points; the clan bonus money is divided evenly among all clan members).
- Tell your friends about this game (you receive a 10 turn bonus for each friend that signs up and plays for a while). Please note that to receive the bonus your friend must sign up with the same email as the invitation was sent to.

Note: You will not receive any additional turns every 20 minutes if you already have more than 300 turns. However, you can receive the clan bonus during this time. Please use some of your turns in order to start receiving turns every 20 minutes again.

1.3 - Starting Bonus

You can select a starting bonus from the following list, which you must claim while in Nuke Protection.

- **Offensive**
Max morale capacity changes to 110%, plus an additional 45 turns.
- **Defensive**
All buildings get a 15% life boost, plus 2 extra sciences per turn, plus 5,000 m2 land.
- **Finance**
Hourly income increased by 10%, bank capacity is raised by 50% and \$250,000 money.
- **Shipping**
Market and missile orders ship 25% faster, plus ability to choose exact arrival time (up to 12 hours delayed), plus 3,000 m2 land and \$150,000 money.

The starting bonus you receive after you die is based on your networth 72 hours before you were killed. The bonus will increase gradually between \$100 000 and \$1 500 000 reaching a maximum increase of 300% at \$1 500 000. The increase will improve more dramatically at lower networth and decrease slowly as you approach \$1 500 000. The increases will not be in effect if you reset your account.

2.1 - Game

Main - Province info, power status, news, current server time, nuke protection options, starting bonus

Attack - Regular attack, ground attack, air and sea attack, launch missile, send spy/spy plane, send thief, send sniper

Research - Research sciences

Headquarters - View your Headquarters bonuses, manage Headquarters Operations and your army's General

Explore - Explore or Sell additional land.

Market - Buy/sell merchandise

Bank - Deposit/withdraw money

Clan - Join/create clan, clan properties, invite/kick players, manage clan wars, leave/delete clan, recruiting system etc

2.2 - Build

Buildings - Build/demolish buildings

Sea Units - Build sea units

Air Units - Build air units

Vehicles - Build vehicles

Infantries - Train infantries

Missiles - Order missiles, view arrival dates

Satellites - Build/use Satellites

2.3 - Show

Local Events - Shows local events

Global Events - Shows global events, can be filtered by incoming, outgoing or internal.

Attack Events - Shows local outgoing events (Gold Users only).

Search Events - Allows a search of local and global events.

Enemy List - Links to enemy list (Gold Users only).

Status - Information, military info, military settings, history graphs (including Gold User only info) and several province statistics, rank from previous round

All Provinces - Shows all provinces within your attack range

All Clans - Shows all clans

Top List - Top Provinces, Top Clans (Networth), Top Clans (Points)

Search - Search for provinces by province id or province name, search for clans by clan id or clan name/tag

Clan Forum - A direct link to your private clan forum (only visible if you're a member of a clan)

Forum - NukeZone forums

Online Shop - Purchase a Gold user or Gold/Platinum clan

2.4 - NZ Portal

News - Displays current news items

Articles - Displays current articles

Profiles - Displays player profiles

2.5 - Other

Inbox - Display your inbox (private messages that have been sent to you)

New Message - Compose a new message

Preferences - Options, edit profile, change colors, change password, delete province, reset province, create/edit your NZ Portal profile etc

Contact Us - Crew contact information, credits

Logout - Logout from NukeZone

3.1 - Buildings and Walls

Land is nice to have, but without buildings and infrastructure it is of little use. NukeZone offers a variety of buildings to place on your land. Each building has some inherent benefits that allow your province to grow or specialize. It is up to you to determine how to fill your land, and there is no perfect or ideal balance for growth. As well, each building uses a specific amount of power, and power can only be provided by power plants. If you have low power, your defensive buildings, missile silos, research labs, command centres and headquarters buildings won't work, meaning you will be more susceptible to attack, will not be able to launch missiles or be able to perform scientific research. The defense values of your buildings drop by 25% when you are low on power and you will be unable to use spy planes, spies, thieves, snipers and satellites. If you are short on land, either explore for more or attack someone to try and steal some. The amount of unused land improves the defense of your buildings by up to a 40% boost for 25% unused land. It takes 20 m² to build each building with the exception of Headquarters which take 1000 m².

Available Buildings:

Name	Price	Description
Research Lab	\$2,000	Gives 1 extra science/turn to research for each 50

		research labs. Attack: 0, Life: 200 Power usage: 2000
Missile Silo	\$22,000	Houses 1 missile. Attack: 0, Life: 500 Power usage: 10000
Headquarters	\$250,000 25 turns and 1000 m2 of land	Improves various abilities for your province† Attack: 0, Life: 5000 Power Usage: HQ1: 25,000; HQ2: 50,000; HQ3: 100,000; HQ4: 150,000; HQ5: 250,000
Command Centre	\$2,200	Supports 5 special units††. Attack: 0, Life: 120 Power Usage: 1800
Shipyards	\$1,100	Houses 5 sea units. Attack: 0, Life: 90 Power usage: 700
Airfield	\$900	Houses 5 air units. Attack: 0, Life: 85 Power usage: 600
War Factory	\$1,200	Houses 10 vehicles. Attack: 0, Life: 80 Power usage: 900
Barracks	\$700	Houses 20 infantries. Attack: 0, Life: 60 Power usage: 650
Power Plant	\$450	Produces 4500 power units. Attack: 0, Life: 85
Advanced Power Plant	\$1,400	Produces 15000 power units. Attack: 0, Life: 40
Torpedo launcher	\$1,850	Gives you a sea defense. Attack: 350, Life: 280 Power usage: 700
SAM Site	\$1,400	Gives you an air defense. Attack: 265, Life: 240 Power usage: 600
Missile Turret	\$1,500	Gives you a vehicle defence. Attack: 300, Life: 265 Power usage: 400
Machinegun Turret	\$1,200	Gives you an infantry defence. Attack: 190, Life: 290 Power usage: 275
Anti-Missile System	\$5,000	Gives you a missile defense†††. Attack: 0, Life: 400 Power usage: 1700

† Headquarters Building - You may only own 5 Headquarter buildings at any time and you may only build one per 72 hour period. The Headquarter building cannot be main targeted in an attack, but can be destroyed. The power usage is per building and is cumulative, therefore if you own 2 buildings you will use 25,000 + 50,000 for a total power usage of 75,000. Headquarters abilities are cumulative and in the order listed. For example, when you have three headquarters, you will have ALL of the bonuses provided by numbers 1, 2, and 3.

Headquarters #1

- * 75% chance of tracking origin of missiles
- * 10% attack boost to attacking units
- * 1 additional science per turn when researching

Headquarters #2

- * 25% increase to land exploration
- * Implements the Coastal Defense System (5% increased protection against air and sea attack)
- * 1 additional science per turn when researching
- * Gives an additional \$1000/hour

Headquarters #3

- * 50% increase to land exploration
- * Unlocks the sabotage missions for the Spy unit giving a 50% chance of success.
- * 1 additional science per turn when researching

- * Gives an additional \$1000/hour
- * Ability to Main Target individual defense buildings.

Headquarters #4

- * Unlocks the Headquarter Operations
- * Unlocks the General unit with 1 life/hour regeneration rate.
- * Missile accuracy improved with 10%
- * Increases the Coastal Defense System to 15% protection.
- * 1 additional science per turn when researching
- * Improves sabotage missions chance of success to 65%
- * Gives an additional \$1000/hour
- * Improved accuracy for Main Targeting by 2x.

Headquarters #5

- * Enables you to own and utilize two satellites simultaneously
- * 1 additional science per turn when researching
- * Improves sabotage missions chance of success to 80%
- * 10% defense boost for defending units when attacked
- * Increases the General unit to 4 life/hour regeneration rate.
- * Gives an additional \$1000/hour
- * 75% land exploration bonus.

Headquarter Operations

Four Headquarter buildings are required to run Headquarter Operations. Headquarter Operations cost 2 turns and two hourly fees to activate, and then cost a fixed fee per hour, automatically taken from your income. A maximum of half your income may be used for HQ Operations. If your fourth Headquarters is destroyed, the operation will cease functioning. HQ Operations auto deactivate if your account remains inactive for more than 5 days(when you stop receiving your hourly income).

- * \$1000/hour: 100% chance of tracking origin of missiles and special units
- * \$2000/hour: Increased defense against incoming sabotage missions by 50%
- * \$3000/hour: Increased defense against incoming EMP attacks by 50%
- * \$4000/hour: 2 additional life per hour for the General unit.
- * \$5500/hour: Defense buildings do 25% additional damage.
- * \$6000/hour: Increased defense against incoming missile attacks by 25%
- * \$10000/hour: 5% additional satellite power per hour

General Unit

Four Headquarter buildings are required to get access to the General unit. The unit arrives 72 hours after the fourth HQ building is constructed and starts with 100 life. It gains 1-6 life per hour depending on number of headquarters and HQ Operations active. The General can be sent in battle and can be killed in action, and a new one then arrives 72 hours later. When the General unit arrives you will choose a name for it from a list and get to choose one of the following enhancements listed below. Whenever you include the General unit with an attack you get the chosen enhancement. The General unit is idle when defending and does not provide enhancements for defending units or buildings.

Enhancements:

- * 10% additional attack
- * 10% additional defense
- * Avoids walls and the Coastal Defense System provided by the Headquarters 2 and 4.

General Abilities:

- * 10% attack boost (cost: 50 life)
- * 10% defense boost (cost: 50 life)
- * Double money/land gained in combat (cost: 50 life)
- * 50% improved main targeting (cost: 75 life)
- * Spy Report units after-attack information (cost: 100 life)
- * Spy Report buildings after-attack information (cost: 100 life)
- * Double damage in combat (cost: 500 life).
- * Last Stand: Requires at least 200 life, and doubles the attack of your defending units and buildings. It can not be activated during the last 3 days of the round.

†† Special units are; Spy Plane, Spy, Thief and Sniper.

††† Anti-Missile System defense varies based on the amount of used land. Anti-Missile Systems provide a maximum of 50% protection without HQ Operation. 750 Anti-Missile Systems will provide 50% protection,

no matter the amount of used land you have.

Available Walls:

Name	Price	Description
Barbed Wire	\$0	Provides 0% vehicle and infantry defense. Requires: none
Sandbag Wall	\$50,000*	Provides 5% vehicle and infantry defense. Requires: Barbed Wire
Concrete Wall	\$250,000*	Provides 10% vehicle and infantry defense. Requires: Sandbag Wall
Laser Fence	\$500,000*	Provides 15% vehicle and infantry defense. Requires: Concrete Wall

* Lowest price (the price increases with the more land you own). Walls reduce the strength of the attacking force by a certain percentage, based on the type of wall.

3.2 - Sea Units

To build sea units, you need shipyards, which house 5 sea units. Sea units can only be combined with air units in an "Air and Sea Attack".

Available Units:

Name	Price	Description
Submarine	\$2,300	Attack: 180, Life: 170 Can attack: Sea Units Can carry: 2 Tomahawk Missiles
Stealth Boat	\$700	Attack: 50, Life: 70 Can attack: Sea Units, Infantries
Destroyer	\$1,500	Attack: 70, Life: 60 Can attack: Vehicles, Infantries, Buildings
Cruiser	\$2,000	Attack: 85, Life: 105 Can attack: Sea Units, Air Units, Buildings
T-2000 Hovercraft	\$800	Attack: 70, Life: 35 Can attack: Air Units, Buildings

3.3 - Air Units

To build air units, you need airfields, which house 5 air units. Air units can be combined with all other units when attacking.

Available Units:

Name	Price	Description
F-22 Raptor	\$1,075	Attack: 65, Life: 55 Can attack: Sea Units, Air Units
F/A-18 Super Hornet	\$750	Attack: 55, Life: 25 Can attack: Air Units, Buildings
F-35 JSF	\$925	Attack: 55, Life: 45 Can attack: Air Units, Vehicles
B-2 Stealth Bomber	\$1,500	Attack: 130, Life: 55 Can attack: Buildings
RAH-66 Comanche	\$800	Attack: 35, Life: 40 Can attack: Vehicles, Infantries, Buildings
SH-60 Sea Hawk	\$700	Attack: 70, Life: 40 Can attack: Sea Units
Aurora Spy Plane	\$15,000	Spies on enemy buildings. Attack: 0, Life: 200 Can attack: None
CH-46 Sea Knight	\$1,000	Enables you to transport 15 infantry per unit in a Sea and Air attack, while boosting transported infantries attack by 50% and lowering their life by 15%. Attack: 25, Life: 135 Can attack: Buildings

3.4 - Vehicles

To build vehicles you need war factories, which house 10 vehicles. Vehicles can be combined with air units and infantries when attacking.

Available Units:

Name	Price	Description
Humvee	\$500	Attack: 60, Life: 20 Can attack: Infantries
Hover Tank	\$600	Attack: 35, Life: 20 Can attack: Sea Units, Infantries, Buildings
Heavy Artillery	\$1,000	Attack: 95, Life: 40 Can attack: Buildings
SAM Tank	\$700	Attack: 60, Life: 30 Can attack: Air Units
M1 Abrams Tank	\$1,250	Attack: 65, Life: 60 Can attack: Vehicles, Buildings

3.5 - Infantries

To train infantries you need barracks, which house 20 infantries. Infantries can be combined with air units and vehicles when attacking.

Available Units:

Name	Price	Description
Thief	\$5,000	Steals money from the enemy base and protects your base from possible enemy thieves. Attack: 0, Life: 5 Can attack: none
Spy	\$3,000	Spies on enemy units, protects your base from possible enemy spies and carries out Sabotage Missions*. Attack: 0, Life: 5 Can attack: none
Sniper	\$5,000	Attack: 125, Life: 65 Can attack: Spies, Thieves, Snipers Note: Snipers have 5 times less defense against other snipers
Navy Seal	\$900	Attack: 45, Life: 25 Can attack: Sea Units, Buildings
Heavy Infantry	\$400	Attack: 20, Life: 15 Can attack: Air Units, Infantries, Buildings
Machine Gunner	\$350	Attack: 25, Life: 15 Can attack: Infantries
Grenade Soldier	\$425	Attack: 35, Life: 10 Can attack: Vehicles

***Sabotage Missions** - Spies have the option to sabotage missiles, power plants, and satellites. The sabotage option is unlocked and has a 50% chance of success with 3 Headquarters, 65% with 4 Headquarters and 80% with 5 Headquarters.

Missiles: Sabotages 1 missile and may be in effect for up to 10 days or until the missile is launched. If the missile is launched within the 10 day period and the sabotage is successful, it will blow up in the enemy's base prior to launch causing 20% damage. The enemy will still be charged full turns and morale for the attempted launch. The maximum amount of missiles that may be sabotaged for any enemy is 5 at any one time.

Power Plants: If the power plant sabotage option is chosen and the spy is successful it will disable 10% of the enemies' power plants for 48 hours. The maximum amount of power plants that may be sabotaged for any enemy is 50% at any one time.

Satellites: If sabotage is successful the enemies' satellite power is reset to 0% for 10 hours before power begins the 10% hourly increase.

3.6 - Special Units

Special units are the spy plane, spy, thief and sniper. In order to own these units you must have Command Centres. You can have a maximum of 200 Command Centres meaning you are limited to no

more than 1000 special units. Special units cannot be used when you have low power. You may only buy or sell 100 special units per day in all market transactions; e.g. buying 50 and selling 50 would be the maximum special unit transactions for that day.

3.7 - Market

The market allows you to buy units without using turns to build them. However, units on the market are more expensive to buy and because they are not built in your province, they take time to arrive. Depending on the research you have and how much you are willing to pay you can get units from the market in between 3 and 12 hours. You can cancel an incoming order, which returns 75% of the regular market price (money spend on accelerated shipping will not be returned after canceling an order).

You can pay extra to reduce the time it takes for your units to be delivered – paying double the price allows your units to arrive in half the time. Accelerated shipping for missiles costs 1.5x the price. You can also research the Shipping Time Science so you get units from the market faster.

The market also allows you to sell your units to recoup some of their cost if you no longer want them.

3.8 - Missiles

To build missiles you need missile silos, which house 1 missile. A missile is an expensive but very powerful attack option. The chance of hitting the enemy base depends on two things: your missile accuracy and your enemy's missile defense. Missiles cost 5 turns to build and 4 turns to launch. They make use of their own Missile Power (5% received per half hour) and do not use morale. 100% Missile Power is required to launch missiles. Accelerated Shipping mode for missiles cost 1.5 times the standard price.

Tomahawk Missiles do not require a missile silo to build or to launch. Submarines are required to both house and launch the Tomahawk Missiles. As such you must send them with an air and sea attack with the appropriate amount of submarines. Tomahawks are not affected by your missile accuracy although 50% is needed before you may build them but they can be shot down. A submarine can hold 2 Tomahawk Missiles. 3 Tomahawks may be built for every turn and take 6 hours to build. You can send 4 Tomahawk missiles for every \$10,000 Networth you send in the attack.

Anti-Missile Systems, SAM Sites, SAM Tanks and Cruisers can defend against Tomahawk Missiles. Sam Tanks and Cruisers provide equal protection against Tomahawks while SAM Sites provide 3 times the protection of SAM Tanks and Cruisers, and Anti-Missile Systems provide 5 times the protection. The default chance of tracking missiles is 25%, however this is raised to 75% when 1 or more Headquarters Building is owned.

Available Missiles:

Name	Price	Description
Nuclear Missile	\$60,000	Attack: 500,000 Can attack: All Buildings and Units
Chemical Missile	\$35,000	Attack: 250,000 Can attack: Sea Units, Air Units, Vehicles
Biochemical Missile	\$30,000	Attack: 165,000 Can attack: Infantries
EMP Missile*	\$20,000	The EMP Missile initially disables 20% of the enemy's power supply decreasing 5% per hour over a 4 hour period. You do not receive clan points for using this missile.
Tomahawk 250C Missile	\$4,000	Attack: 5000 Can attack: Buildings
Tomahawk 500C Missile	\$8,000	Attack: 8000 Can attack: Buildings and Vehicles

* EMP damage is removed from the target province by 5% each hour. 2 EMP missiles will disable 40% of the targets power if they hit and the effect on the province will then reduce by 5% each hour. It would therefore take 8 hours before all EMP damage was removed.

3.9 - Satellites

There are 6 different satellites available for you to build. All satellites require 50% in *Satellite Technology* before they can be built. Each satellite costs 20 turns and takes 48 hours to construct. After you have built the satellite, you must launch it into space. It takes 1 hour for a satellite to reach earth's orbit, and it can then stay up for 14 days until it crashes down and burns up in earth's atmosphere. You can increase the time your satellite stays in orbit by continuing to research satellite technology over 50%. You get an extra days orbit for every additional 10% research. A satellite will stay in orbit for the period researched at the

time of launch, research while in orbit will not effect that satellite.

Your satellite power increases by 10% each hour and all satellites cost 5 turns to use. Satellites are not operational when you have low power although a previously launched Stealth Satellite will continue to function if it was activated while you had power. You can own any two satellites concurrently, even two of the same kind providing you have all 5 Headquarters. However, you may only have one satellite from each group (offensive and defensive*) in orbit at any one time. If you need to launch another satellite and your current satellite(s) have not yet crashed, you can demolish your satellite(s) for 20% of its/their original cost.

Available Satellites:

Name	Price	Description
EMP Satellite**	\$600,000	The EMP Satellite disables X% of the enemy's power supply over X amount of hours. Requires at least 25% satellite power, 100% satellite power = max effect damage (the more power, the more damage). Max effect: 30%, 6 hours
Laser Beam Satellite	\$1,000,000	Requires at least 25% satellite power, 100% satellite power = max attack damage (the more power, the more damage). 95% hit rate. Max Attack: 9000 Can attack: Buildings
Orbital Research Laboratory	\$350,000	Gives you 5 additional sciences per turn when researching. The 5 additional sciences are given in addition to the current number of sciences per turn you may be receiving from your research labs.
Spy Satellite	\$500,000	Spies on the enemy base. Requires 100% satellite power. You will receive this information: - Approximate number of enemy buildings and units. - Unused enemy land and power status.
Stealth Satellite	\$450,000	When activated, your base will be hidden from enemy spies, thieves, snipers, laser beam satellites and EMP satellites. It hides your base for 7 hours. Requires 100% satellite power.
Anti-Missile Satellite	\$700,000	Gives you instant 100% protection. Each time it shoots down a missile 50% satellite power is used. If you don't have enough satellite power, the satellite will not be able to shoot down any missiles until you get more satellite power.

*

Offensive Satellites:

Laser Beam Satellite
EMP Satellite
Spy Satellite

Defensive Satellites:

Orbital Research Laboratory
Stealth Satellite
Anti-Missile Satellite

**EMP damage is removed from the target province by 5% each hour. 1 hit at full power with the EMP satellite will disable 30% of the targets power and the effect on the province will then reduce by 5% each hour. It would therefore take 6 hours before all EMP damage was removed.

3.10 - Research

There are 10 different sciences available for you to research. Researching sciences requires turns. The number of turns needed is based on your amount of *Research Labs and HQs*, and the more you own, the more sciences per turn you get when researching. You will be able to research between 1 and 20 sciences per turn, depending on how many *Research Labs* and HQs you own. You can get up to 25 sciences per turn by getting an Orbital Research Laboratory.

Available Research:

Bank Management increases the amount of money you can deposit into the bank up to a total of \$5,000,000. Also, for every 10% of research the basic interest rate increases by 0.1%. When 50% of this research is completed the option to withdraw money after 24 hours with no interest and a 25% fee is enabled; when it is 100% complete the 25% fee is removed (2000 sciences). At 100% researched the fee of 1/4 the money is removed when sending aid.

Engineer Effectiveness increases the amount of buildings you can build per turn. The maximum limit is 15 buildings per turn (2500 sciences); default is 5 buildings per turn.

Market Shipping Time reduces the time taken for items ordered from the market to arrive. The maximum limit is 50% (1800 sciences).

Market Discount gives you discount on all market merchandise. The maximum limit is 30% (1200 sciences).

Missile Accuracy gives your missiles a better chance to hit the target. The maximum limit is 80% (800 sciences); default is 10% accuracy.

Money Production increases your income per hour. The maximum limit is \$26,000 per hour (3000 sciences), default is \$2000 per hour.

Power Plant Efficiency increases the amount of power each power plant produces and also increases their defense/life. The maximum limit is 50% above normal (1000 sciences).

Satellite Technology gives you the knowledge to construct satellites. 50% satellite technology is needed in order to construct any satellites. Additional research over 50% extends the maximum orbit time of the satellite with up to 5 days (making it a total of 19 days in orbit). The maximum limit is 100% (3000 sciences). Once the Satellite Technology research is 100% complete the construction cost of each satellite will be reduced by 20% and each use of a satellite will cost 4 turns instead of 5.

Security System improves your security. This makes enemy thieves steal less money from you. It will not protect you from enemy thieves in any other way. The maximum limit is 100% (2000 sciences).

Thief Education teaches your thieves to steal more money and also to be stealthier. The maximum limit is 300% (3000 sciences).

4.1 - General Attack Information

Each attack is unique in some way and all attacks cost a different amount of turns. Launch Missile costs 4 turns. Regular Attack, Ground Attack and Air Attack cost 3 turns. Send Spy/Spy Plane costs 1 turn and Send Thief and Send Sniper costs 2 turns and 5% morale. The maximum amount of morale your army can have is 100%, and each attack uses a different amount of morale. An attack may "cost" as low as 20% of your morale and as high as 35%. When you attack an enemy that is smaller than yourself, you will lose 5% more morale. You will lose additional 10% of morale if you use an aggressive attack type. However, your morale increases by 5% every 15 minutes. Missiles have their own Missile Power (5% received per half hour) and does not use morale.

Target ID is the target province id.

Attack Method is the option on how you want to attack your enemy.

Main Target specifies the target your troops will focus on. You may also main target individual defence buildings providing you own HQ #3.

Attack Type specifies how the attack should be made; normal or aggressive.

4.2 - Regular Attack

Regular attack can consist of air units, vehicles and infantries. This attack method costs 3 turns.

4.3 - Ground Attack

Ground attack can only consist of ground units. Using this method makes the vehicles and infantries slightly more powerful than a Regular attack. This attack method costs 3 turns.

4.4 - Air and Sea Attack

Air and Sea attack can only consist of air units and sea units. You may load certain sea units with Tomahawk missiles, which will then be launched during the attack. Using this method makes these units slightly more powerful than a Regular attack. This attack method costs 3 turns.

4.5 - Launch Missile

Use this option to send your missiles to enemy targets. This attack method costs 4 turns, and uses 100% Missile Power. This does not include Tomahawks.

4.6 - Send Spy/Spy Plane (intelligence)

When you send out your spy, his job is to spy on your enemy's army or base. You can choose between an infantry spy for army intelligence or a spy plane to gather info on your enemies buildings. However, there is no guarantee either will succeed. You may send up to 5 Spies at once for the same amount of turns, for up to 5x the details of your results (chance of being caught increases by up to 10x). Opposing snipers and spies can kill infantry spies. If he does fail, your enemy is informed that you sent the spy. If your spy is successful, it is hard to count to an exact number of units or buildings in such a short period of time, so your spy works with special codenames. Below are the translations of those codenames. This attack method costs 1 turn.

Spy Codenames: The numbers on the table below are based on the sending of 1 Spy, and can be made more detailed depending on how many Spies are sent up to a total of 5.

Codename	Amount of Units
Few	0-99
Several	100-249
Pack	250-499
Lots of	500-1,499
Many	1,500-4,999
Crowd	5,000-9,999
Legion	10,000-19,999
Super Legion	20,000+

Spy Plane Codenames:

Codename	Amount of Buildings
Few	0-49
Several	50-124
Pack	125-249
Lots of	250-499
Many	500-999
Crowd	1,000-2,499
Legion	2,500-4,999
Super Legion	5,000+

4.7 – Send Spy (sabotage)

Spies have the option to sabotage missiles, power plants, and satellites. This attack method costs 5 turns and 100% morale.

4.8 - Send Thief

When you send out your thief, his job is to steal money from the selected enemy. However, there is no guarantee that your thief will succeed. If he does fail, your enemy is informed that you sent the thief. This attack method costs 2 turns and 5% morale.

You can send up to 10 thieves at once for the same turns and morale as one. This allows you to get up to 5 times the return but the chance of being caught increases by up to 10 times – times 1 extra for each additional thief. Therefore an attack with 5 thieves could get you up to 2.5 times as much money but you would be 5 times as likely to be caught. If caught you lose all attacking thieves.

4.9 - Sniper

A sniper can both attack and defend. They can attack spies, thieves and snipers. They can defend against spies, thieves, and snipers. They are five times better at defending than spies and thieves are. However, snipers have 5 times less defense against other snipers. This attack method costs 2 turns and 5% morale.

You can send up to 10 snipers at once for the same turns and morale as one. This allows you to do up to 5 times the damage but the chance of being caught increases by up to 10 times – times 1 extra for each additional sniper. Therefore an attack with 5 snipers could inflict up to 2.5 times as much damage but you would be 5 times as likely to be caught. If caught you lose all attacking snipers.

5.1 - Province Status and History

You can get access to a wealth of information about your province and you past performance from the status page. The history page shows statistics for the following items: -

History statistic	Explanation
Attack Success	The number of successful attacks made expressed as a percentage
Defend Success	The number of times successfully defended expressed as a percentage
Highest Networkh	The peak networkh you have achieved in the current round
Highest Land Area	Greatest land area you owned in the current round
Land Gained in Combat	Area of land gained by attacking other provinces
Land Lost in Combat	Area of land lost to other provinces attacking you
Money Gained in Combat	Sum of money gained by attacking other provinces
Money Lost in Combat	Sum of money lost to other provinces attacking you
Money Lost in Thievery	Sum of money you lost to thievery
Most Money Gained in Thievery	Highest amount of money stolen by one thief (GU only)
Kills	Number of provinces you killed
Kills (during clan wars)	Number of provinces you killed during clan wars
Times Killed	Number of times your province has been killed
Missiles Sent	Number of nuclear, chemical and biochemical missiles you have sent
NW Damage Made by Missiles	Cumulative sum of the damage your missiles have dealt this round
Enemy Missiles Received	Count of enemy missiles that have been fired at your province
Enemy Missiles Hit	Enemy missiles that have not missed or been shot down by anti-missile-systems
Enemy Missiles Missed	Enemy missiles that have missed your province
Enemy Missiles Shot Down	Enemy missiles that your anti-missile-systems have shot down
Attacks Made	Total attacks made, not including missiles sent
Attacks Made (during clan wars)	Total attacks made during clan wars, not including missiles sent
Wins	Successful attacks made (percentage in brackets)
Attacks Suffered	Total attacks suffered from other provinces
Defeats	Number of times the enemy successfully penetrated your defenses (percentage in brackets)
Clan Points Gained (current clan)	Total clan points gained in the current clan - every time you successfully attack a province your clan is at war with, you will be awarded clan points depending on the damage
Clan Points Gained (total)	Total clan points gained for the whole round
Aid Sent (current clan)	Amount of aid you have sent in current clan
Aid Received (current clan)	Amount of aid you have received in current clan
Targets Spied	Amount of targets spied in current clan
Time to Complete All Sciences	Total time to complete research on all sciences

Enhanced History: There are more History Statistics but these are Gold Used only.

You can also view graphs plotting the history of your province over the last 14 days in certain key areas:
- *Networkh*

- Land (Gold users only)
- Total Buildings (Gold users only)
- Total Units (Gold users only)

5.2 – Military Info

A full breakdown of your current military force is provided here for quick reference. You can choose to share certain military information with your clan mates from the preferences menu.

Extended Military Information is available to those who are currently in a Gold Clan. This feature allows Gold Clan members to view additional Military Information that is normally hidden. There are 6 sections visible: -

General - allows clan mates to view your status page.

Buildings - this permits clan mates to see what type and volume of buildings you have as well as what type of wall if any and whether or not you have a satellite in orbit.

Research - this lets clan mates look at what research you have done.

If you are Gold User your clan mates can also see the following Info. The dropdown list shows GU's as a darker color

History Graphs – allows clan mates to see you graphs (networth, land, buildings, units, attacks made, attacks received and clan points gained)

Statistic Breakdown – Allows clan mates to see your Networth and Turns Breakdown.

5.3 – Province Preferences

The preferences page allows you to change many options specific to your province including color schemes, province details, account details, account password and many gold user only options. This is also where you go to put your account into vacation mode or reset your account; as well as creating/editing your NZ Portal Profile.

The Profile option allows you to change certain details about your province, including your province name which can be changed if you are dead, if the game is between rounds and during the first 48 hours of a round. You can only change province name once every 2 weeks during the round.

Vacation mode puts your province into nuke protection for a specified period of time while you are away. During this time you cannot login to your province. You cannot go into vacation mode in the last 3 days of a round.

Your preferences page is also where you go to activate any gold users you may have purchased or to transfer them to another province via the Gold User Management section. Gold Memberships that have been used cannot be transferred, even if there are one or more rounds left.

5.4 – Community Score

For information on how the Community Score system works, go to the following page:

http://files.nukezone.info/community_score.htm

6.1 - General Clan Information

Clans are a vital element in NukeZone, and if you're not in a clan, join or create one immediately (see the Find Clan section for help joining a clan). Clans can provide protection to their provinces. A clan can have up to 20 members. There are four different types of clan members: Clan Leader (CL), Co-Leader (CO), Clan Trustee (CT), and Normal Member. The clan leader controls everything, and can select up to 5 clan trustees. These CT's can help the CL to control the clan by declaring war/peace, or by editing the clan message. If the CL gets banned or deleted due to inactivity, the CO will become CL, if there is no CO the first CT will become CL. If no CT is available, the province who has been in the clan the longest will become CL. Once a province leaves or is kicked from their clan, that province will no longer be allowed to return to that clan until the next round unless he left within the first 48 hours of the round. Close to the end of a round you are no longer able to join or create clans - this comes into force in the final 7 days.

Clan Leaders

Clan Leaders are the key to success for all clans. A clan must have an excellent leader to keep control and become unstoppable.

Clan Co-Leaders

Available only in a Platinum clan, the Co-Leader has all the same abilities as the Clan Leader except for: Change Clan Leader, Delete Clan.

Clan Trustees

Clan Trustees are almost like the clan leader. They exist to help the clan leader. In a Platinum Clan, the first CT can use the All Clan Message option to instantly send private messages to all clan members. If you are in a Platinum Clan, the CL and CO can set the rights for each single CT.

6.2 - Clan Points

In NukeZone, a Clan has three goals: Increase network, increase clan points and/or increase combo points. Clan points are only gained by attacking in a clan war. You must be in a clan for your province to earn Clan points. Clan points are awarded based on the damage inflicted on the enemy by an attack. The more damage you do, the more points your clan will receive.

When your clan declares war on another clan, you will receive 1-20 points depending on the damage inflicted for the first 48 hours. Then the maximum points you can gain drops by 2 points and continues to reduce by 2 points every subsequent 24 hours to a minimum of 4 points.

If another clan declares on your clan, you will receive 1-10 points when attacking them, again depending on the damage inflicted. In order to gain 1-20 points by attacking them you must declare back - this is known as a mutual war. Once your clan declares back you will have 48 hours of being able to get 1-20 points before the maximum points you can get begin to drop as described above.

If your clan does not declare back you will always get 1-10 points per attack. Note: different rules apply on the size of provinces you can attack depending on the type of war; mutual or one-sided. See 6.3 - Clan Wars for details.

When you kill a province in a one sided war you receive 25 clan points, when you kill a province in a mutual war you receive 50 clan points. Clan points gained from satellites, including for kills, are based on the amount of satellite power used.

When you kill a province of \$10,000 network or lower you do not gain any clan points. However, you still gain 1 kill on your stats record. Each time a clan achieves a bonus level the clan receives a fixed bonus of 300 turns per province and \$25 000 000. The clan bonus money is divided evenly among all clan members, whether or not the clan members are dead or alive. You must be a member of the clan for at least 72 hours to receive a clan bonus.

After your clan's first 5000 points your clan receives a mini bonus worth half a normal bonus. A super clan bonus is awarded at 50 000 clan points, 150 000 clan points, 250 000 clan points and 350 000 clan points etc. and is 1.5 times the regular bonus. A mega clan Bonus is awarded in replacement for every 2nd Super Clan Bonus at 100,000 clan points, 200,000 clan points, 300 000 clan points etc. and is 2 times the regular bonus. Both the turns and the money are increased with these special bonuses.

6.3 - Clan Wars

In NukeZone, when a clan is mad and wants vengeance over another clan, or the members just simply want to earn clan points, they declare war on the other clan. It can be fun and sometimes even be hard. This is why all clans must be at their prime and be prepared for a war at all times. After a CL or CT has declared war, they cannot declare peace for the next 24 hours. In addition, if one clan declares war against another clan, the network attack restrictions are still in place. However, if both sides declare war on each other, the network attack restrictions are removed. Network restrictions always apply the first 24 hours after joining a new clan and if you are using a thief or sniper, even in a mutual war. Clans may resume a war at any time after declaring peace as long as they don't already have 3 current war declarations against other clans; if they do then they must declare peace with at least 1 clan before they are able to resume the war. Once a war is resumed it must last a minimum of 24 hours before peace can be declared again.

6.4 - Clan Forum

Clan Forums are an excellent form of communication for a clan. You and your clan mates can discuss anything you want in there. You can post things like target provinces, ask for help, etc. It is the only forum not moderated by the Administrators and Moderators. The CL and CTs may edit/lock/delete whichever message they want on the Clan Forum.

Gold clans have the additional benefit of the Forum Management tool. This allows the clan leader to organize the clan forums and to give them custom names. It is possible to make a forum that only clan

trustees can visit or a read-only forum.

6.5 - Clan Tag

Clan tags are used to represent what clan a province is in. This is what it looks like: [TAG]Province.

6.6 - Clan Pages

By clicking the Clan link, you come to a page with several links dealing with your clan. Depending on if you are the CL, CO or a CT, some links might be crossed out. This means you do not have access to these areas. Here is all the information about each Clan Page.

Properties

Only the Clan Leader or CO can adjust the clan properties. In the properties page, the CL or CO can add or edit the clan name, clan tag, clan password and the location of the clan logo. Up to five CT's may also be selected from this page. The CL or CO may also choose to restrict shared military information for all new members for a period of time. Valid settings for this option are: None (no restrictions), 12 hours, 24 hours, 36 hours, 48 hours and 72 hours.

Send Aid

All members of the clan may access this page. Before you can send aid you must specify the receiver and enter the amount of money to send, and then press the Send Aid button. You can only send 1/3 of your available amount of money 3 times a day. Target province networth may not be larger than yours. You cannot send or receive aid when in nuke protection. Sending aid also costs you a 'tax' of 1 turn and 25% of the money sent, unless you have 100% banking research, where the 25% charge is removed.

Invite Player

Only the CL, CO and CT's can invite other provinces to join the clan. The networth of the other province does not matter. Mass inviting is not accepted. A clan can have a limit of 20 players including the CL. The CL or CO can create a short custom message which is included with the invitation sent to a province.

Clan Information

All members of the clan may access this area. On this page you can find a list of all members of the clan and their respective clan points acquired. Everything you see on the clan page is what everyone else sees except the amount of clan points a member has acquired.

Statistics Central (Platinum Clans only)

All clan members can access this page. This displays useful statistics including a Clan Overview, Clan Statistics and War History. The Clan Overview is updated on a real time basis and includes Last Login, Last Attack, Turns, Logins Per Day (LPD), Attacks Per Day (APD), Points Per Day (PPD). The Clan Statistics are updated every 6 hours and displays the province with most/least of the following: attacks made, attacks suffered, missiles sent, kills, times killed, clan points, aid sent, land, networth, units, buildings. The War History provides information about the clan's previous wars.

Spy Reports (Platinum Clans only)

All clan members have access to this page. The Spy Report page is separated into clans and clanless provinces. Only the CL, CO and CT's are able to delete the reports.

Clan Wars

All members have access to this area. This page displays a list of the clans that yours has currently declared war against; as well as the clans that have currently declared war against yours. This page also displays all clans you have declared peace on in the last 10 days.

Declare War/Peace

Only the CL, CO and CT's may access this page. They can declare war against another clan by entering the Clan ID of the clan they want to go to war with (must be in Networth Range of entire Clan Networth). If your clan has declared war against another clan more than 24 hours ago, your clan's CL, CO or CT can declare peace with the other clan by typing in the other Clan's ID in the text box provided.

Clan Message

Only the CL, CO and CT may access this page. They can post Clan Messages, which appear in the main page when a clan member logs in to NukeZone. If you have a gold clan, the CL, CO or CT can preview the message before posting it to check for errors. This is a great way to say something important and assure it reaches all clan members immediately. You can use certain G-Codes in the clan message – gold clans have additional G-Codes that they can use. G-Codes are explained further in section 7.2.

Clan Poll (Gold/Platinum Clans only)

Only the CL, CO and/or a CT's can access this page. They are able to create or edit the clan polls from

here. Only one clan poll can be created within a 24 hour period.

Clan Poll Archive (Gold/Platinum Clans only)

All members can access this page. This is where the archive of previous clan polls is stored.

Clan Forum Management (Gold/Platinum Clans only)

Only the CL and CO can access this area. This allows the CL or CO to change the forum settings and create new clan forums. The CL and CO of a Platinum Clan can give CT's the ability to access this area.

Domain Management (Platinum Clans only)

Only the CL or CO has access to this area. Here the CL or CO can request a custom NukeZone domain (tag.nukezone.info – where 'tag' is the clan's existing tag) and sub-domains for their clan homepage.

Receive Clan Bonus

All members can click on this to receive the Clan Bonus after the clan has reached 5,000, 10,000 and further multiples of 10,000 Clan Points. This link is enabled within 30 minutes after your clan has reached the Clan Bonus. You will receive a local event when this page has been enabled. If you do not go to this page to receive the bonus within 3 days of it being enabled you will automatically receive it. If you are in vacation mode at the time your clan receives a bonus then you will not receive a share of it. You need to be in the clan for 72 or more hours to be able to receive the bonus.

Clan Recruiting

Only the CL, CO and CT's have access to this area. This is where a clan can look for new members and specify the criteria which potential members must meet.

Find New Clan

Everyone has access to this area. This is where members can look for a new clan and specify the criteria which a potential new clan must meet.

Change Clan Leader

Only the CL may access this page. If a CL wants to give up the leadership, he can appoint a new leader of the clan. The old CL will then take over the new CL's old position.

Leave Clan

All members may access this page. If a member of a clan chooses to leave the clan, they can leave the clan immediately. However, The amount of time that provinces must wait after leaving a clan before joining another now increases based on how many clans they have already joined during that round. For 1-3 clans it remains at 24h and 4-5 clans is now 48h; then for 6+ clans the amount of time will increase at regular intervals.

Delete Clan

Only the CL may access this page. If the CL chooses to delete the clan, he may do so by clicking on Delete Clan.

6.7 - Clan Invitations

The CL, CO and CTs can view a complete list of pending clan invitations. They may also cancel any of these invitations; however invitations automatically expire after 7 days.

6.8 - Extended Military Information

Members of Gold Clans can choose to share their Extended Military Information, giving their clan mates the opportunity to view additional information about their province.

6.9 - Clan Status

Clans have a Status rating of: Brave, Fearless, Neutral, Fearful or Cowardly depending on the size of the clan they are declaring on. The larger the clan they declare war on, the more their status will rise to the positive end of the scale. Adversely, the smaller the clan that is declared upon, the more their status will fall to the negative end of the scale. This system is not in effect when you declare back on a clan. However, it will have a small positive affect, hence declaring back is a brave action. The clan status will affect the points you gain in a clan war: Brave (+20%), Fearless (+10%), Neutral (0%), Fearful (-10%) and Cowardly (-20%). War declarations during the first 10 days of a round do not have an effect on clan status, only declarations after that time will cause the clan status to change.

7.1 – Medals and Clan Awards

At the end of each round, 11 different medals are given out to the leaders of each area.

Medal of Honor - Most clan points gained by a province
 Medal of Growth - Highest network
 Medal of Death - Killed most provinces during clan wars
 Medal of Earth - Highest Land Area
 Medal of Courage - Performed most attacks
 Medal of Thievery - Most money stolen
 Medal of Knowledge - Quickest to research all sciences
 Medal of Mass Destruction - Most total NW damage made using missiles (excluding Tomahawk Missiles)
 Medal of Superiority - Province who first reaches 2500 clan points, counting from the beginning of the round and based on Clan Points Gained (total).
 Medal of Development - Province who first reaches \$2,500,000 network and keeps it for 48 hours.
 Medal of Accomplishment - Province who wins both the Medal of Honor and Medal of Superiority in the same round.

United Boundaries – Clan with the highest amount of land overall
 United Arms – Clan with the most attacks made during clan wars
 Golden Shotgun – First clan to reach 10000 points.
 Points Champion – Awarded to the first 3 clans in the points toplist (Gold, Silver and bronze)
 Network Champion – Awarded to the first 3 clans in the Network toplist (Gold, Silver and Bronze)
 Combo Champion – Awarded for the first 3 clans in the Combo toplist (Gold, Silver and Bronze) **

***Combo list: Combo points will be awarded to the top 100 clan rankings for points and for network. Clans will gain 1-100 points (rank #1 giving 100 points and rank #100 giving 1 point - anything beyond the rank of #100 receives zero points). Points are awarded daily as of midnight CET (server time), if the clan is in both top lists they will receive an additional 10% more points. So the maximum combo points a clan can obtain each day is 220 Combo points (100 for being number 1 in the Points-toplist, and 100 for being number 1 in the NW toplist + the 10% they get for being in both toplist = 20).*

7.2 - G-Code and Auto-Linking

The following G-Codes can be used in private messages, clan messages and on the forums. Please note that all G-Codes are case sensitive, except the G-Codes used in Clan Messages. If auto-linking is enabled all your entered URLs will automatically be transformed into clickable hyperlinks. Easy and simple link creation, simply enter the URL! However your URL must start with one of the following: http://, https://, ftp:// or www.

Available Tags in Private Messages:

Tag	Output
[USERPROVINCE]	Inserts the reader's province name. Works in both subject and message body.
[USERID]	Inserts the reader's province id. Works in both subject and message body.
[NAME]	Inserts the reader's name. Works in both subject and message body.
[B] [/B]	Text between these tags is displayed in bold. Works only in message body.
[I] [/I]	Text between these tags is displayed in italic. Works only in message body.
[U] [/U]	Text between these tags is displayed underlined. Works only in message body.

Available Tags in Clan Messages (Only available for Gold/Platinum Clans):

Tag	Output
[B] [/B]	Text between these tags is displayed in bold.
[I] [/I]	Text between these tags is displayed in italic.
[U] [/U]	Text between these tags is displayed underlined.
[S] [/S]	Text between these tags is displayed with a line through the middle the text.
[HR]	Inserts a horizontal line.
[CENTER] [/CENTER]	Text between these tags is displayed center aligned.
[LEFT] [/LEFT]	Text between these tags is displayed left aligned.
[RIGHT] [/RIGHT]	Text between these tags is displayed right aligned.
[COLOR=name] [/COLOR]	Text between these tags is displayed in specific

	color. See below for available font colors.
[FONT=name] [/FONT]	Text between these tags is displayed in specific font. See below for available fonts.
[SIZE=number] [/SIZE]	Text between these tags is displayed in specific size. See below for available font sizes.
[LAST_EDITED]	Example output: October 5th, 2002 01:45 CET
[EDITED_BY]	Name of CT/CL who edited the message.
[CLAN_POINTS]	Inserts total amount of current clan points. *
[NEXT_BONUS]	Inserts amount of points required to reach next bonus. *
[NW_RANK]	Inserts the current Networth rank of your clan. **
[PTS_RANK]	Inserts the current Points rank of your clan. **
[CBO_POINTS]	Inserts the Combo Points of your clan.
[CBO_RANK]	Inserts the current Combo Points rank of your clan.
[24H_CLAN_POINTS]	Inserts clan points gained over 24 hours.
[24H_PTS_RANK]	Inserts ranking over 24 hours in clan points gained.

* Note: With the [CLAN_POINTS] and [NEXT_BONUS] tags, if you wish to have a "p" after the points (e.g. "We have this many clan points: 2500p"), the "p" must be added following the tag [CLAN_POINTS]p. You can enter anything after the tag, not just the "p", so could for example enter "[CLAN_POINTS] points".

** These values are updated once every 6 hours.

Available Tags on the Forums:

Tag	Output
[B] [/B]	Text between these tags is displayed in bold. This tag does not work in the topic name.
[I] [/I]	Text between these tags is displayed in italic. This tag does not work in the topic name.
[U] [/U]	Text between these tags is displayed underlined. This tag does not work in the topic name.

Available Special Tags on the Clan Forums (Only available for Gold/Platinum Clans) *:

Tag	Output
[S] [/S]	Text between these tags is displayed with a line through the middle of text. This tag does not work in the topic name.
[IMG]url[/IMG]	Inserts an image. Specify the image source by entering the full url between these tags.
[COLOR=name] [/COLOR]	Text between these tags is displayed in specific color. (see below for valid colors)
[FONT=name] [/FONT]	Text between these tags is displayed in specific font. (see below for valid names)
[SIZE=number] [/SIZE]	Text between these tags is displayed in specific size. (see below for valid sizes)

* Only available if your CL has enabled it on the Clan Forum Management page.

Available Font Colors:

Aqua, black, blue, fuchsia, gray, green, lime, maroon, navy, olive, pink, purple, red, silver, teal, white, yellow. In addition, you may also enter any hexadecimal color code. Please note that the # sign is required when doing so.

Available Fonts:

Arial, Comic Sans, Courier New, Georgia, Helvetica, Impact, Times New Roman, Verdana

Available Font Sizes:

The number argument can still be any number between 0-6, but you may now also specify any custom size you want by adding "pt" after the number. So 16pt means size 16. The old style 0-6 is translated as follows: size 0=8pt, size 1=10pt, size 2=12pt, size 3=14pt, size 4=16pt, size 5=18pt, size 6=20pt.

7.3 - Extended G-Codes

As a Gold Clan, not only do you have the ability to use the regular G-Codes, you also get an extended

version of it. It can only be used in the clan message and can be used by Gold Clans only. A CL/CT can easily target a province and/or a clan by using these codes. The Extended G-Codes are not case-sensitive. A clan message can contain a maximum of 25 Extended G-Codes.

Available Extended G-Codes in Clan Messages (Only available for Gold/Platinum Clans):

Tag	Output
[P=id]	Creates a link to the specified province..
[C=id]	Creates a link to the specified clan.
[A=id]	Creates a link to the aid page for the specified province
[R=id]	Creates a link to the specified enemy province's spy report.
[CR=id]	Creates a link to all of the specified clan's spy reports.
[PNW=id]	Inserts the specified province's name and network and creates a link to the attack page. The network will be made bold if the enemy is within the viewer's attack range.
[NW=number]	The number must be a valid network value. The network is formatted and will be made bold if the enemy is within the viewers attack range.
[URL=link]text[/URL]	Turns the "text" into a hyperlink to click on. Valid "link" types are http, https, ftp, irc

Using this feature is fairly simple. While typing a message, a CL/CT can target a province by typing: [P=ProvinceID] or [C=ClanID]. By doing so, this converts the ID Number into your target's Province or Clan Name and ID Number as well as creating a clickable link to the province/clan information page.

Example: A CL/CT types in, "...War. Everyone attack this guy, [P=123]!" The G-Code converts this to, "...War. Everyone Attack This Guy, FakeProvince (#123)!", where the "FakeProvince (#123)" part is a clickable link that brings you to this enemies province information page. The same is done with clan targets.

8.1 - Technical Support

If you need technical support please contact our Customer Support by sending an in-game message to *Customer Support* (found in your contact list when you write a message) or simply post a message in the *Technical Support and Bug Reports* forum. Links to the multi report system, the EULAs and other important resources can be found by clicking the *help* link in the top right.

8.2 - Ideas and Suggestions

If you have an idea or a suggestion, please post it in the *Suggestions and Ideas* forum.

8.3 - Bug Reporting

Please report all bugs in the *Technical Support and Bug Reports* forum. Bugs that might affect the security or integrity of NukeZone and the server should NOT be posted in public; please inform the Customer Support directly by using one of the above-mentioned ways.

8.4 - IRC

NukeZone has its own IRC channel on the QuakeNet network. This is the place where the NZ Crew and the most experienced players hang around. Everyone is welcome!

Network: QuakeNet

Server: irc.quakenet.org

Channel: #NukeZone (for general NukeZone chat)

#NZSupport (for any game related problems/questions you might have)

#NZVeteran (must be veteran to join)

A quick IRC guide to get you online can be found here:

<http://www.nukezone.info/ircGuide.aspx>

8.5 - Rules

The Game Rules can be found at: <http://www.nukezone.info/gameRules.aspx>

The Forum Rules can be found at: <http://www.nukezone.info/forumRules.aspx>

8.6 - Credits

The NZ Crew:

Stefan Karlström (aka Guffy) – CEO, Lead Developer, Chief Administrator
Anthony Wiezoreck (aka EhpeX) – Chief of Operations, Administrator
Steve Brown (aka Primal) – Assistant Director of Operations, Administrator
Christian Anderstedt (aka glamDring) – Administrator
Chris Twine (aka Aqua) – Game Moderator+
Chris Norton (aka FireHawk) – Director of Community Development, Game Moderator

1.1 - Overview

NukeZone is a free, strategic text-based online game. The game is optimized for Internet Explorer 5.0 and above with a screen resolution of 800x600 or higher. The game will also work in newer versions of other browsers such as Opera and Netscape Navigator; however, while some features may not operate properly, the game engine functions correctly. It is strongly recommended that you use Internet Explorer 5.0 and above. Please click [here](#) to download the latest Internet Explorer from Microsoft's homepage.

NukeZone is played in rounds lasting approximately 3 months each. Round dates can be found on the login page. At the end of each round, winners in various categories are given medals and all provinces are reset and the game starts over.

If you find any bugs or any other errors in the game, please report them ASAP in the *Technical Support and Bug Reports* forum.

1.2 - Getting Started

You start with 125 turns and \$250,000, then the first time you login for the round you get awarded with an extra 175 turns and \$500,000 (totaling in 300 turns and \$750,000), the extra bonus is only available for provinces created before the start of the round and those created in the first 48 hours of a round. It is up to you to determine what to purchase, while some prefer to use a more offensive strategy, others will choose to adopt a more defensive strategy. Money is required to purchase buildings and units. Turns are required to purchase buildings (jump to *3.1 - Buildings* for more info), increase research (jump to *3.10 - Research* for more info), or attack (jump to *4.1 - General Attack Information* for more info). You need buildings to survive – when all your buildings are destroyed you will die. When you have died you spend 24 hours dead before starting over in nuke protection again – death results in a loss of all units, land, research, money (including in the bank) and turns except for the starting defaults.

There are several ways to get more money although you get a fixed number of turns:

- By default you receive 1 turn every 20th minute and \$2000 each hour. You can research Money Production to increase your income up to a maximum \$26,000/hour.
- Join/create a clan and fight other clans (that your clan is at war with) in order to receive clan bonuses (300 turns and \$25,000,000 for each 10,000 points; the clan bonus money is divided evenly among all clan members).
- Tell your friends about this game (you receive a 10 turn bonus for each friend that signs up and plays for a while). Please note that to receive the bonus your friend must sign up with the same email as the invitation was sent to.

Note: You will not receive any additional turns every 20 minutes if you already have more than 300 turns. However, you can receive the clan bonus during this time. Please use some of your turns in order to start receiving turns every 20 minutes again.

1.3 - Starting Bonus

You can select a starting bonus from the following list, which you must claim while in Nuke Protection.

- **Offensive**
Max morale capacity changes to 110%, plus an additional 45 turns.
- **Defensive**
All buildings get a 15% life boost, plus 2 extra sciences per turn, plus 5,000 m2 land.
- **Finance**
Hourly income increased by 10%, bank capacity is raised by 50% and \$250,000 money.
- **Shipping**
Market and missile orders ship 25% faster, plus ability to choose exact arrival time (up to 12 hours delayed), plus 3,000 m2 land and \$150,000 money.

The starting bonus you receive after you die is based on your networth 72 hours before you were killed. The bonus will increase gradually between \$100 000 and \$1 500 000 reaching a maximum increase of 300% at \$1 500 000. The increase will improve more dramatically at lower networth and decrease slowly as you approach \$1 500 000. The increases will not be in effect if you reset your account.

2.1 - Game

Main - Province info, power status, news, current server time, nuke protection options, starting bonus

Attack - Regular attack, ground attack, air and sea attack, launch missile, send spy/spy plane, send thief, send sniper

Research - Research sciences

Headquarters - View your Headquarters bonuses, manage Headquarters Operations and your army's General

Explore - Explore or Sell additional land.

Market - Buy/sell merchandise

Bank - Deposit/withdraw money

Clan - Join/create clan, clan properties, invite/kick players, manage clan wars, leave/delete clan, recruiting system etc

2.2 - Build

Buildings - Build/demolish buildings

Sea Units - Build sea units

Air Units - Build air units

Vehicles - Build vehicles

Infantries - Train infantries

Missiles - Order missiles, view arrival dates

Satellites - Build/use Satellites

2.3 - Show

Local Events - Shows local events

Global Events - Shows global events, can be filtered by incoming, outgoing or internal.

Attack Events - Shows local outgoing events (Gold Users only).

Search Events - Allows a search of local and global events.

Enemy List - Links to enemy list (Gold Users only).

Status - Information, military info, military settings, history graphs (including Gold User only info) and several province statistics, rank from previous round

All Provinces - Shows all provinces within your attack range

All Clans - Shows all clans

Top List - Top Provinces, Top Clans (Networth), Top Clans (Points)

Search - Search for provinces by province id or province name, search for clans by clan id or clan name/tag

Clan Forum - A direct link to your private clan forum (only visible if you're a member of a clan)

Forum - NukeZone forums

Online Shop - Purchase a Gold user or Gold/Platinum clan

2.4 - NZ Portal

News - Displays current news items

Articles - Displays current articles

Profiles - Displays player profiles

2.5 - Other

Inbox - Display your inbox (private messages that have been sent to you)

New Message - Compose a new message

Preferences - Options, edit profile, change colors, change password, delete province, reset province, create/edit your NZ Portal profile etc

Contact Us - Crew contact information, credits

Logout - Logout from NukeZone

3.1 - Buildings and Walls

Land is nice to have, but without buildings and infrastructure it is of little use. NukeZone offers a variety of buildings to place on your land. Each building has some inherent benefits that allow your province to grow or specialize. It is up to you to determine how to fill your land, and there is no perfect or ideal balance for growth. As well, each building uses a specific amount of power, and power can only be provided by power plants. If you have low power, your defensive buildings, missile silos, research labs, command centres and headquarters buildings won't work, meaning you will be more susceptible to attack, will not be able to launch missiles or be able to perform scientific research. The defense values of your buildings drop by 25% when you are low on power and you will be unable to use spy planes, spies, thieves, snipers and satellites. If you are short on land, either explore for more or attack someone to try and steal some. The amount of unused land improves the defense of your buildings by up to a 40% boost for 25% unused land. It takes 20 m² to build each building with the exception of Headquarters which take 1000 m².

Available Buildings:

Name	Price	Description
Research Lab	\$2,000	Gives 1 extra science/turn to research for each 50

		research labs. Attack: 0, Life: 200 Power usage: 2000
Missile Silo	\$22,000	Houses 1 missile. Attack: 0, Life: 500 Power usage: 10000
Headquarters	\$250,000 25 turns and 1000 m2 of land	Improves various abilities for your province† Attack: 0, Life: 5000 Power Usage: HQ1: 25,000; HQ2: 50,000; HQ3: 100,000; HQ4: 150,000; HQ5: 250,000
Command Centre	\$2,200	Supports 5 special units††. Attack: 0, Life: 120 Power Usage: 1800
Shipyards	\$1,100	Houses 5 sea units. Attack: 0, Life: 90 Power usage: 700
Airfield	\$900	Houses 5 air units. Attack: 0, Life: 85 Power usage: 600
War Factory	\$1,200	Houses 10 vehicles. Attack: 0, Life: 80 Power usage: 900
Barracks	\$700	Houses 20 infantries. Attack: 0, Life: 60 Power usage: 650
Power Plant	\$450	Produces 4500 power units. Attack: 0, Life: 85
Advanced Power Plant	\$1,400	Produces 15000 power units. Attack: 0, Life: 40
Torpedo launcher	\$1,850	Gives you a sea defense. Attack: 350, Life: 280 Power usage: 700
SAM Site	\$1,400	Gives you an air defense. Attack: 265, Life: 240 Power usage: 600
Missile Turret	\$1,500	Gives you a vehicle defence. Attack: 300, Life: 265 Power usage: 400
Machinegun Turret	\$1,200	Gives you an infantry defence. Attack: 190, Life: 290 Power usage: 275
Anti-Missile System	\$5,000	Gives you a missile defense†††. Attack: 0, Life: 400 Power usage: 1700

† Headquarters Building - You may only own 5 Headquarter buildings at any time and you may only build one per 72 hour period. The Headquarter building cannot be main targeted in an attack, but can be destroyed. The power usage is per building and is cumulative, therefore if you own 2 buildings you will use 25,000 + 50,000 for a total power usage of 75,000. Headquarters abilities are cumulative and in the order listed. For example, when you have three headquarters, you will have ALL of the bonuses provided by numbers 1, 2, and 3.

Headquarters #1

- * 75% chance of tracking origin of missiles
- * 10% attack boost to attacking units
- * 1 additional science per turn when researching

Headquarters #2

- * 25% increase to land exploration
- * Implements the Coastal Defense System (5% increased protection against air and sea attack)
- * 1 additional science per turn when researching
- * Gives an additional \$1000/hour

Headquarters #3

- * 50% increase to land exploration
- * Unlocks the sabotage missions for the Spy unit giving a 50% chance of success.
- * Increases the Coastal Defense System to 10% protection.

- * 1 additional science per turn when researching
- * Gives an additional \$1000/hour
- * Ability to Main Target individual defense buildings.

Headquarters #4

- * Unlocks the Headquarter Operations
- * Unlocks the General unit with 1 life/hour regeneration rate.
- * Missile accuracy improved with 10%
- * Increases the Coastal Defense System to 15% protection.
- * 1 additional science per turn when researching
- * Improves sabotage missions chance of success to 65%
- * Gives an additional \$1000/hour
- * Improved accuracy for Main Targeting by 2x.

Headquarters #5

- * Enables you to own and utilize two satellites simultaneously
- * 1 additional science per turn when researching
- * Improves sabotage missions chance of success to 80%
- * 10% defense boost for defending units when attacked
- * Increases the General unit to 4 life/hour regeneration rate.
- * Gives an additional \$1000/hour
- * 75% land exploration bonus.

Headquarter Operations

Four Headquarter buildings are required to run Headquarter Operations. Headquarter Operations cost 2 turns and two hourly fees to activate, and then cost a fixed fee per hour, automatically taken from your income. A maximum of half your income may be used for HQ Operations. If your fourth Headquarters is destroyed, the operation will cease functioning. HQ Operations auto deactivate if your account remains inactive for more than 5 days(when you stop receiving your hourly income).

- * \$1000/hour: 100% chance of tracking origin of missiles and special units
- * \$2000/hour: Increased defense against incoming sabotage missions by 50%
- * \$3000/hour: Increased defense against incoming EMP attacks by 50%
- * \$4000/hour: 2 additional life per hour for the General unit.
- * \$5500/hour: Defense buildings do 25% additional damage.
- * \$6000/hour: Increased defense against incoming missile attacks by 25%
- * \$10000/hour: 5% additional satellite power per hour

General Unit

Four Headquarter buildings are required to get access to the General unit. The unit arrives 72 hours after the fourth HQ building is constructed and starts with 100 life. It gains 1-6 life per hour depending on number of headquarters and HQ Operations active. The General can be sent in battle and can be killed in action, and a new one then arrives 72 hours later. When the General unit arrives you will choose a name for it from a list and get to choose one of the following enhancements listed below. Whenever you include the General unit with an attack you get the chosen enhancement. The General unit is idle when defending and does not provide enhancements for defending units or buildings.

Enhancements:

- * 10% additional attack
- * 10% additional defense
- * Avoids walls and the Coastal Defense System provided by the Headquarters 2-4.

General Abilities:

- * 10% attack boost (cost: 50 life)
- * 10% defense boost (cost: 50 life)
- * Double money/land gained in combat (cost: 50 life)
- * 50% improved main targeting (cost: 75 life)
- * Spy Report units after-attack information (cost: 100 life)
- * Spy Report buildings after-attack information (cost: 100 life)
- * Double damage in combat (cost: 500 life).
- * Last Stand: Requires at least 200 life, and doubles the attack of your defending units and buildings. It can not be activated during the last 3 days of the round.

†† Special units are; Spy Plane, Spy, Thief and Sniper.

††† Anti-Missile System defense varies based on the amount of used land. Anti-Missile Systems provide a

maximum of 50% protection without HQ Operation. 750 Anti-Missile Systems will provide 50% protection, no matter the amount of used land you have.

Available Walls:

Name	Price	Description
Barbed Wire	\$0	Provides 0% vehicle and infantry defense. Requires: none
Sandbag Wall	\$50,000*	Provides 5% vehicle and infantry defense. Requires: Barbed Wire
Concrete Wall	\$250,000*	Provides 10% vehicle and infantry defense. Requires: Sandbag Wall
Laser Fence	\$500,000*	Provides 15% vehicle and infantry defense. Requires: Concrete Wall

* Lowest price (the price increases with the more land you own). Walls reduce the strength of the attacking force by a certain percentage, based on the type of wall.

3.2 - Sea Units

To build sea units, you need shipyards, which house 5 sea units. Sea units can only be combined with air units in an "Air and Sea Attack".

Available Units:

Name	Price	Description
Submarine	\$2,300	Attack: 180, Life: 170 Can attack: Sea Units Can carry: 2 Tomahawk Missiles
Stealth Boat	\$700	Attack: 50, Life: 70 Can attack: Sea Units, Infantries
Destroyer	\$1,500	Attack: 70, Life: 60 Can attack: Vehicles, Infantries, Buildings
Cruiser	\$2,000	Attack: 85, Life: 105 Can attack: Sea Units, Air Units, Buildings
T-2000 Hovercraft	\$800	Attack: 70, Life: 35 Can attack: Air Units, Buildings

3.3 - Air Units

To build air units, you need airfields, which house 5 air units. Air units can be combined with all other units when attacking.

Available Units:

Name	Price	Description
F-22 Raptor	\$1,075	Attack: 65, Life: 55 Can attack: Sea Units, Air Units
F/A-18 Super Hornet	\$750	Attack: 55, Life: 25 Can attack: Air Units, Buildings
F-35 JSF	\$925	Attack: 55, Life: 45 Can attack: Air Units, Vehicles
B-2 Stealth Bomber	\$1,500	Attack: 130, Life: 55 Can attack: Buildings
RAH-66 Comanche	\$800	Attack: 35, Life: 40 Can attack: Vehicles, Infantries, Buildings
SH-60 Sea Hawk	\$700	Attack: 70, Life: 40 Can attack: Sea Units
Aurora Spy Plane	\$15,000	Spies on enemy buildings. Attack: 0, Life: 200 Can attack: None
CH-46 Sea Knight	\$1,000	Enables you to transport 15 infantry per unit in a Sea and Air attack, while boosting transported infantries attack by 50% and lowering their life by 15%. Attack: 25, Life: 135

		Can attack: Buildings
--	--	-----------------------

3.4 - Vehicles

To build vehicles you need war factories, which house 10 vehicles. Vehicles can be combined with air units and infantries when attacking.

Available Units:

Name	Price	Description
Humvee	\$500	Attack: 60, Life: 20 Can attack: Infantries
Hover Tank	\$600	Attack: 35, Life: 20 Can attack: Sea Units, Infantries, Buildings
Heavy Artillery	\$1,000	Attack: 95, Life: 40 Can attack: Buildings
SAM Tank	\$700	Attack: 60, Life: 30 Can attack: Air Units
M1 Abrams Tank	\$1,250	Attack: 65, Life: 60 Can attack: Vehicles, Buildings

3.5 - Infantries

To train infantries you need barracks, which house 20 infantries. Infantries can be combined with air units and vehicles when attacking.

Available Units:

Name	Price	Description
Thief	\$5,000	Steals money from the enemy base and protects your base from possible enemy thieves. Attack: 0, Life: 5 Can attack: none
Spy	\$3,000	Spies on enemy units, protects your base from possible enemy spies and carries out Sabotage Missions*. Attack: 0, Life: 5 Can attack: none
Sniper	\$5,000	Attack: 125, Life: 65 Can attack: Spies, Thieves, Snipers Note: Snipers have 5 times less defense against other snipers
Navy Seal	\$900	Attack: 45, Life: 25 Can attack: Sea Units, Buildings
Heavy Infantry	\$400	Attack: 20, Life: 15 Can attack: Air Units, Infantries, Buildings
Machine Gunner	\$350	Attack: 25, Life: 15 Can attack: Infantries
Grenade Soldier	\$425	Attack: 35, Life: 10 Can attack: Vehicles

**Sabotage Missions* - Spies have the option to sabotage missiles, power plants, and satellites. The sabotage option is unlocked and has a 50% chance of success with 3 Headquarters, 65% with 4 Headquarters and 80% with 5 Headquarters.

Missiles: Sabotages 1 missile and may be in effect for up to 10 days or until the missile is launched. If the missile is launched within the 10 day period and the sabotage is successful, it will blow up in the enemy's base prior to launch causing 20% damage. The enemy will still be charged full turns and morale for the attempted launch. The maximum amount of missiles that may be sabotaged for any enemy is 5 at any one time.

Power Plants: If the power plant sabotage option is chosen and the spy is successful it will disable 10% of the enemies' power plants for 48 hours. The maximum amount of power plants that may be sabotaged for any enemy is 50% at any one time.

Satellites: If sabotage is successful the enemies' satellite power is reset to 0% for 10 hours before power begins the 10% hourly increase.

3.6 - Special Units

Special units are the spy plane, spy, thief and sniper. In order to own these units you must have

Command Centres. You can have a maximum of 200 Command Centres meaning you are limited to no more than 1000 special units. Special units cannot be used when you have low power. You may only buy or sell 100 special units per day in all market transactions; e.g. buying 50 and selling 50 would be the maximum special unit transactions for that day.

3.7 - Market

The market allows you to buy units without using turns to build them. However, units on the market are more expensive to buy and because they are not built in your province, they take time to arrive. Depending on the research you have and how much you are willing to pay you can get units from the market in between 3 and 12 hours. You can cancel an incoming order, which returns 75% of the regular market price (money spend on accelerated shipping will not be returned after canceling an order).

You can pay extra to reduce the time it takes for your units to be delivered – paying double the price allows your units to arrive in half the time. Accelerated shipping for missiles costs 1.5x the price. You can also research the Shipping Time Science so you get units from the market faster.

The market also allows you to sell your units to recoup some of their cost if you no longer want them.

3.8 - Missiles

To build missiles you need missile silos, which house 1 missile. A missile is an expensive but very powerful attack option. The chance of hitting the enemy base depends on two things: your missile accuracy and your enemy's missile defense. Missiles cost 5 turns to build and 4 turns to launch. They make use of their own Missile Power (5% received per half hour) and do not use morale. 100% Missile Power is required to launch missiles. Accelerated Shipping mode for missiles cost 1.5 times the standard price.

Tomahawk Missiles do not require a missile silo to build or to launch. Submarines are required to both house and launch the Tomahawk Missiles. As such you must send them with an air and sea attack with the appropriate amount of submarines. Tomahawks are not affected by your missile accuracy although 50% is needed before you may build them but they can be shot down. A submarine can hold 2 Tomahawk Missiles. 3 Tomahawks may be built for every turn and take 6 hours to build. You can send 4 Tomahawk missiles for every \$10,000 Network worth you send in the attack.

Anti-Missile Systems, SAM Sites, SAM Tanks and Cruisers can defend against Tomahawk Missiles. Sam Tanks and Cruisers provide equal protection against Tomahawks while SAM Sites provide 3 times the protection of SAM Tanks and Cruisers, and Anti-Missile Systems provide 5 times the protection. The default chance of tracking missiles is 25%, however this is raised to 75% when 1 or more Headquarters Building is owned.

Available Missiles:

Name	Price	Description
Nuclear Missile	\$60,000	Attack: 500,000 Can attack: All Buildings and Units
Chemical Missile	\$35,000	Attack: 250,000 Can attack: Sea Units, Air Units, Vehicles
Biochemical Missile	\$30,000	Attack: 165,000 Can attack: Infantry
EMP Missile*	\$20,000	The EMP Missile initially disables 20% of the enemy's power supply decreasing 5% per hour over a 4 hour period. You do not receive clan points for using this missile.
Tomahawk 250C Missile	\$4,000	Attack: 5000 Can attack: Buildings
Tomahawk 500C Missile	\$8,000	Attack: 8000 Can attack: Buildings and Vehicles

* EMP damage is removed from the target province by 5% each hour. 2 EMP missiles will disable 40% of the targets power if they hit and the effect on the province will then reduce by 5% each hour. It would therefore take 8 hours before all EMP damage was removed.

3.9 - Satellites

There are 6 different satellites available for you to build. All satellites require 50% in *Satellite Technology* before they can be built. Each satellite costs 20 turns and takes 48 hours to construct. After you have built the satellite, you must launch it into space. It takes 1 hour for a satellite to reach earth's orbit, and it can then stay up for 14 days until it crashes down and burns up in earth's atmosphere. You can increase the time your satellite stays in orbit by continuing to research satellite technology over 50%. You get an extra

days orbit for every additional 10% research. A satellite will stay in orbit for the period researched at the time of launch, research while in orbit will not effect that satellite.

Your satellite power increases by 10% each hour and all satellites cost 5 turns to use. Satellites are not operational when you have low power although a previously launched Stealth Satellite will continue to function if it was activated while you had power. You can own any two satellites concurrently, even two of the same kind providing you have all 5 Headquarters. However, you may only have one satellite from each group (offensive and defensive*) in orbit at any one time. If you need to launch another satellite and your current satellite(s) have not yet crashed, you can demolish your satellite(s) for 20% of its/their original cost.

Available Satellites:

Name	Price	Description
EMP Satellite**	\$600,000	The EMP Satellite disables X% of the enemy's power supply over X amount of hours. Requires at least 25% satellite power, 100% satellite power = max effect damage (the more power, the more damage). Max effect: 30%, 6 hours
Laser Beam Satellite	\$1,000,000	Requires at least 25% satellite power, 100% satellite power = max attack damage (the more power, the more damage). 95% hit rate. Max Attack: 9000 Can attack: Buildings
Orbital Research Laboratory	\$350,000	Gives you 5 additional sciences per turn when researching. The 5 additional sciences are given in addition to the current number of sciences per turn you may be receiving from your research labs.
Spy Satellite	\$500,000	Spies on the enemy base. Requires 100% satellite power. You will receive this information: - Approximate number of enemy buildings and units. - Unused enemy land and power status.
Stealth Satellite	\$450,000	When activated, your base will be hidden from enemy spies, thieves, snipers, laser beam satellites and EMP satellites. It hides your base for 7 hours. Requires 100% satellite power.
Anti-Missile Satellite	\$700,000	Gives you instant 100% protection. Each time it shoots down a missile 50% satellite power is used. If you don't have enough satellite power, the satellite will not be able to shoot down any missiles until you get more satellite power.

*

Offensive Satellites:

Laser Beam Satellite
EMP Satellite
Spy Satellite

Defensive Satellites:

Orbital Research Laboratory
Stealth Satellite
Anti-Missile Satellite

**EMP damage is removed from the target province by 5% each hour. 1 hit at full power with the EMP satellite will disable 30% of the targets power and the effect on the province will then reduce by 5% each hour. It would therefore take 6 hours before all EMP damage was removed.

3.10 - Research

There are 10 different sciences available for you to research. Researching sciences requires turns. The number of turns needed is based on your amount of *Research Labs and HQs*, and the more you own, the more sciences per turn you get when researching. You will be able to research between 1 and 20 sciences per turn, depending on how many *Research Labs* and HQs you own. You can get up to 25 sciences per turn by getting an Orbital Research Laboratory.

Available Research:

Bank Management increases the amount of money you can deposit into the bank up to a total of \$5,000,000. Also, for every 10% of research the basic interest rate increases by 0.1%. When 50% of this research is completed the option to withdraw money after 24 hours with no interest and a 25% fee is enabled; when it is 100% complete the 25% fee is removed (2000 sciences). At 100% researched the fee

of 1/4 the money is removed when sending aid.

Engineer Effectiveness increases the amount of buildings you can build per turn. The maximum limit is 15 buildings per turn (2500 sciences); default is 5 buildings per turn.

Market Shipping Time reduces the time taken for items ordered from the market to arrive. The maximum limit is 50% (1800 sciences).

Market Discount gives you discount on all market merchandise. The maximum limit is 30% (1200 sciences).

Missile Accuracy gives your missiles a better chance to hit the target. The maximum limit is 80% (800 sciences); default is 10% accuracy.

Money Production increases your income per hour. The maximum limit is \$26,000 per hour (3000 sciences), default is \$2000 per hour.

Power Plant Efficiency increases the amount of power each power plant produces and also increases their defense/life. The maximum limit is 50% above normal (1000 sciences).

Satellite Technology gives you the knowledge to construct satellites. 50% satellite technology is needed in order to construct any satellites. Additional research over 50% extends the maximum orbit time of the satellite with up to 5 days (making it a total of 19 days in orbit). The maximum limit is 100% (3000 sciences). Once the Satellite Technology research is 100% complete the construction cost of each satellite will be reduced by 20% and each use of a satellite will cost 4 turns instead of 5.

Security System improves your security. This makes enemy thieves steal less money from you. It will not protect you from enemy thieves in any other way. The maximum limit is 100% (2000 sciences).

Thief Education teaches your thieves to steal more money and also to be stealthier. The maximum limit is 300% (3000 sciences).

4.1 - General Attack Information

Each attack is unique in some way and all attacks cost a different amount of turns. Launch Missile costs 4 turns. Regular Attack, Ground Attack and Air Attack cost 3 turns. Send Spy/Spy Plane costs 1 turn and Send Thief and Send Sniper costs 2 turns and 5% morale. The maximum amount of morale your army can have is 100%, and each attack uses a different amount of morale. An attack may "cost" as low as 20% of your morale and as high as 35%. When you attack an enemy that is smaller than yourself, you will lose 5% more morale. You will lose additional 10% of morale if you use an aggressive attack type. However, your morale increases by 5% every 15 minutes. Missiles have their own Missile Power (5% received per half hour) and does not use morale.

Target ID is the target province id.

Attack Method is the option on how you want to attack your enemy.

Main Target specifies the target your troops will focus on. You may also main target individual defence buildings providing you own HQ #3.

Attack Type specifies how the attack should be made; normal or aggressive.

4.2 - Regular Attack

Regular attack can consist of air units, vehicles and infantries. This attack method costs 3 turns.

4.3 - Ground Attack

Ground attack can only consist of ground units. Using this method makes the vehicles and infantries slightly more powerful than a Regular attack. This attack method costs 3 turns.

4.4 - Air and Sea Attack

Air and Sea attack can only consist of air units and sea units. You may load certain sea units with Tomahawk missiles, which will then be launched during the attack. Using this method makes these units slightly more powerful than a Regular attack. This attack method costs 3 turns.

4.5 - Launch Missile

Use this option to send your missiles to enemy targets. This attack method costs 4 turns, and uses 100% Missile Power. This does not include Tomahawks.

4.6 - Send Spy/Spy Plane (intelligence)

When you send out your spy, his job is to spy on your enemy's army or base. You can choose between an infantry spy for army intelligence or a spy plane to gather info on your enemies buildings. However, there is no guarantee either will succeed. You may send up to 5 Spies at once for the same amount of turns, for up to 5x the details of your results (chance of being caught increases by up to 10x). Opposing snipers and spies can kill infantry spies. If he does fail, your enemy is informed that you sent the spy. If your spy is successful, it is hard to count to an exact number of units or buildings in such a short period of time, so your spy works with special codenames. Below are the translations of those codenames. This attack method costs 1 turn.

Spy Codenames: The numbers on the table below are based on the sending of 1 Spy, and can be made more detailed depending on how many Spies are sent up to a total of 5.

Codename	Amount of Units
Few	0-99
Several	100-249
Pack	250-499
Lots of	500-1,499
Many	1,500-4,999
Crowd	5,000-9,999
Legion	10,000-19,999
Super Legion	20,000+

Spy Plane Codenames:

Codename	Amount of Buildings
Few	0-49
Several	50-124
Pack	125-249
Lots of	250-499
Many	500-999
Crowd	1,000-2,499
Legion	2,500-4,999
Super Legion	5,000+

4.7 - Send Spy (sabotage)

Spies have the option to sabotage missiles, power plants, and satellites. This attack method costs 5 turns and 100% morale.

4.8 - Send Thief

When you send out your thief, his job is to steal money from the selected enemy. However, there is no guarantee that your thief will succeed. If he does fail, your enemy is informed that you sent the thief. This attack method costs 2 turns and 5% morale.

You can send up to 10 thieves at once for the same turns and morale as one. This allows you to get up to 5 times the return but the chance of being caught increases by up to 10 times – times 1 extra for each additional thief. Therefore an attack with 5 thieves could get you up to 2.5 times as much money but you would be 5 times as likely to be caught. If caught you lose all attacking thieves.

4.9 - Sniper

A sniper can both attack and defend. They can attack spies, thieves and snipers. They can defend against spies, thieves, and snipers. They are five times better at defending than spies and thieves are. However, snipers have 5 times less defense against other snipers. This attack method costs 2 turns and 5% morale.

You can send up to 10 snipers at once for the same turns and morale as one. This allows you to do up to 5 times the damage but the chance of being caught increases by up to 10 times – times 1 extra for each additional sniper. Therefore an attack with 5 snipers could inflict up to 2.5 times as much damage but you would be 5 times as likely to be caught. If caught you lose all attacking snipers.

5.1 - Province Status and History

You can get access to a wealth of information about your province and you past performance from the status page. The history page shows statistics for the following items: -

History statistic	Explanation
Attack Success	The number of successful attacks made expressed as a percentage
Defend Success	The number of times successfully defended expressed as a percentage
Highest Networkh	The peak networkh you have achieved in the current round
Highest Land Area	Greatest land area you owned in the current round
Land Gained in Combat	Area of land gained by attacking other provinces
Land Lost in Combat	Area of land lost to other provinces attacking you
Money Gained in Combat	Sum of money gained by attacking other provinces
Money Lost in Combat	Sum of money lost to other provinces attacking you
Money Lost in Thievery	Sum of money you lost to thievery
Most Money Gained in Thievery	Highest amount of money stolen by one thief (GU only)
Kills	Number of provinces you killed
Kills (during clan wars)	Number of provinces you killed during clan wars
Times Killed	Number of times your province has been killed
Missiles Sent	Number of nuclear, chemical and biochemical missiles you have sent
NW Damage Made by Missiles	Cumulative sum of the damage your missiles have dealt this round
Enemy Missiles Received	Count of enemy missiles that have been fired at your province
Enemy Missiles Hit	Enemy missiles that have not missed or been shot down by anti-missile-systems
Enemy Missiles Missed	Enemy missiles that have missed your province
Enemy Missiles Shot Down	Enemy missiles that your anti-missile-systems have shot down
Attacks Made	Total attacks made, not including missiles sent
Attacks Made (during clan wars)	Total attacks made during clan wars, not including missiles sent
Wins	Successful attacks made (percentage in brackets)
Attacks Suffered	Total attacks suffered from other provinces
Defeats	Number of times the enemy successfully penetrated your defenses (percentage in brackets)
Clan Points Gained (current clan)	Total clan points gained in the current clan - every time you successfully attack a province your clan is at war with, you will be awarded clan points depending on the damage
Clan Points Gained (total)	Total clan points gained for the whole round
Aid Sent (current clan)	Amount of aid you have sent in current clan
Aid Received (current clan)	Amount of aid you have received in current clan
Targets Spied	Amount of targets spied in current clan
Time to Complete All Sciences	Total time to complete research on all sciences

Enhanced History: There are more History Statistics but these are Gold Used only.

You can also view graphs plotting the history of your province over the last 14 days in certain key areas:
- *Networkh*

- Land (Gold users only)
- Total Buildings (Gold users only)
- Total Units (Gold users only)

5.2 – Military Info

A full breakdown of your current military force is provided here for quick reference. You can choose to share certain military information with your clan mates from the preferences menu.

Extended Military Information is available to those who are currently in a Gold Clan. This feature allows Gold Clan members to view additional Military Information that is normally hidden. There are 6 sections visible: -

General - allows clan mates to view your status page.

Buildings - this permits clan mates to see what type and volume of buildings you have as well as what type of wall if any and whether or not you have a satellite in orbit.

Research - this lets clan mates look at what research you have done.

If you are Gold User your clan mates can also see the following Info. The dropdown list shows GU's as a darker color

History Graphs – allows clan mates to see you graphs (networth, land, buildings, units, attacks made, attacks received and clan points gained)

Statistic Breakdown – Allows clan mates to see your Networth and Turns Breakdown.

5.3 – Province Preferences

The preferences page allows you to change many options specific to your province including color schemes, province details, account details, account password and many gold user only options. This is also where you go to put your account into vacation mode or reset your account; as well as creating/editing your NZ Portal Profile.

The Profile option allows you to change certain details about your province, including your province name which can be changed if you are dead, if the game is between rounds and during the first 48 hours of a round. You can only change province name once every 2 weeks during the round.

Vacation mode puts your province into nuke protection for a specified period of time while you are away. During this time you cannot login to your province. You cannot go into vacation mode in the last 3 days of a round.

Your preferences page is also where you go to activate any gold users you may have purchased or to transfer them to another province via the Gold User Management section. Gold Memberships that have been used cannot be transferred, even if there are one or more rounds left.

5.4 – Community Score

For information on how the Community Score system works, go to the following page:

http://files.nukezone.info/community_score.htm

6.1 - General Clan Information

Clans are a vital element in NukeZone, and if you're not in a clan, join or create one immediately (see the Find Clan section for help joining a clan). Clans can provide protection to their provinces. A clan can have up to 20 members. There are four different types of clan members: Clan Leader (CL), Co-Leader (CO), Clan Trustee (CT), and Normal Member. The clan leader controls everything, and can select up to 5 clan trustees. These CT's can help the CL to control the clan by declaring war/peace, or by editing the clan message. If the CL gets banned or deleted due to inactivity, the CO will become CL, if there is no CO the first CT will become CL. If no CT is available, the province who has been in the clan the longest will become CL. Once a province leaves or is kicked from their clan, that province will no longer be allowed to return to that clan until the next round unless he left within the first 48 hours of the round. Close to the end of a round you are no longer able to join or create clans - this comes into force in the final 7 days.

Clan Leaders

Clan Leaders are the key to success for all clans. A clan must have an excellent leader to keep control and become unstoppable.

Clan Co-Leaders

Available only in a Platinum clan, the Co-Leader has all the same abilities as the Clan Leader except for: Change Clan Leader, Delete Clan.

Clan Trustees

Clan Trustees are almost like the clan leader. They exist to help the clan leader. In a Platinum Clan, the first CT can use the All Clan Message option to instantly send private messages to all clan members. If you are in a Platinum Clan, the CL and CO can set the rights for each single CT.

6.2 - Clan Points

In NukeZone, a Clan has three goals: Increase network, increase clan points and/or increase combo points. Clan points are only gained by attacking in a clan war. You must be in a clan for your province to earn Clan points. Clan points are awarded based on the damage inflicted on the enemy by an attack. The more damage you do, the more points your clan will receive.

When your clan declares war on another clan, you will receive 1-20 points depending on the damage inflicted for the first 48 hours. Then the maximum points you can gain drops by 2 points and continues to reduce by 2 points every subsequent 24 hours to a minimum of 4 points.

If another clan declares on your clan, you will receive 1-10 points when attacking them, again depending on the damage inflicted. In order to gain 1-20 points by attacking them you must declare back - this is known as a mutual war. Once your clan declares back you will have 48 hours of being able to get 1-20 points before the maximum points you can get begin to drop as described above.

If your clan does not declare back you will always get 1-10 points per attack. Note: different rules apply on the size of provinces you can attack depending on the type of war; mutual or one-sided. See 6.3 - Clan Wars for details.

When you kill a province in a one sided war you receive 25 clan points, when you kill a province in a mutual war you receive 50 clan points. Clan points gained from satellites, including for kills, are based on the amount of satellite power used.

When you kill a province of \$10,000 network or lower you do not gain any clan points. However, you still gain 1 kill on your stats record. Each time a clan achieves a bonus level the clan receives a fixed bonus of 300 turns per province and \$25 000 000. The clan bonus money is divided evenly among all clan members, whether or not the clan members are dead or alive. You must be a member of the clan for at least 72 hours to receive a clan bonus.

After your clan's first 5000 points your clan receives a mini bonus worth half a normal bonus. A super clan bonus is awarded at 50 000 clan points, 150 000 clan points, 250 000 clan points and 350 000 clan points etc. and is 1.5 times the regular bonus. A mega clan Bonus is awarded in replacement for every 2nd Super Clan Bonus at 100,000 clan points, 200,000 clan points, 300 000 clan points etc. and is 2 times the regular bonus. Both the turns and the money are increased with these special bonuses.

6.3 - Clan Wars

In NukeZone, when a clan is mad and wants vengeance over another clan, or the members just simply want to earn clan points, they declare war on the other clan. It can be fun and sometimes even be hard. This is why all clans must be at their prime and be prepared for a war at all times. After a CL or CT has declared war, they cannot declare peace for the next 24 hours. In addition, if one clan declares war against another clan, the network attack restrictions are still in place. However, if both sides declare war on each other, the network attack restrictions are removed. Network restrictions always apply the first 24 hours after joining a new clan and if you are using a thief or sniper, even in a mutual war. Clans may resume a war at any time after declaring peace as long as they don't already have 3 current war declarations against other clans; if they do then they must declare peace with at least 1 clan before they are able to resume the war. Once a war is resumed it must last a minimum of 24 hours before peace can be declared again.

6.4 - Clan Forum

Clan Forums are an excellent form of communication for a clan. You and your clan mates can discuss anything you want in there. You can post things like target provinces, ask for help, etc. It is the only forum not moderated by the Administrators and Moderators. The CL and CTs may edit/lock/delete whichever message they want on the Clan Forum.

Gold clans have the additional benefit of the Forum Management tool. This allows the clan leader to organize the clan forums and to give them custom names. It is possible to make a forum that only clan

trustees can visit or a read-only forum.

6.5 - Clan Tag

Clan tags are used to represent what clan a province is in. This is what it looks like: [TAG]Province.

6.6 - Clan Pages

By clicking the Clan link, you come to a page with several links dealing with your clan. Depending on if you are the CL, CO or a CT, some links might be crossed out. This means you do not have access to these areas. Here is all the information about each Clan Page.

Properties

Only the Clan Leader or CO can adjust the clan properties. In the properties page, the CL or CO can add or edit the clan name, clan tag, clan password and the location of the clan logo. Up to five CT's may also be selected from this page. The CL or CO may also choose to restrict shared military information for all new members for a period of time. Valid settings for this option are: None (no restrictions), 12 hours, 24 hours, 36 hours, 48 hours and 72 hours.

Send Aid

All members of the clan may access this page. Before you can send aid you must specify the receiver and enter the amount of money to send, and then press the Send Aid button. You can only send 1/3 of your available amount of money 3 times a day. Target province networth may not be larger than yours. You cannot send or receive aid when in nuke protection. Sending aid also costs you a 'tax' of 1 turn and 25% of the money sent, unless you have 100% banking research, where the 25% charge is removed.

Invite Player

Only the CL, CO and CT's can invite other provinces to join the clan. The networth of the other province does not matter. Mass inviting is not accepted. A clan can have a limit of 20 players including the CL. The CL or CO can create a short custom message which is included with the invitation sent to a province.

Clan Information

All members of the clan may access this area. On this page you can find a list of all members of the clan and their respective clan points acquired. Everything you see on the clan page is what everyone else sees except the amount of clan points a member has acquired.

Statistics Central (Platinum Clans only)

All clan members can access this page. This displays useful statistics including a Clan Overview, Clan Statistics and War History. The Clan Overview is updated on a real time basis and includes Last Login, Last Attack, Turns, Logins Per Day (LPD), Attacks Per Day (APD), Points Per Day (PPD). The Clan Statistics are updated every 6 hours and displays the province with most/least of the following: attacks made, attacks suffered, missiles sent, kills, times killed, clan points, aid sent, land, networth, units, buildings. The War History provides information about the clan's previous wars.

Spy Reports (Platinum Clans only)

All clan members have access to this page. The Spy Report page is separated into clans and clanless provinces. Only the CL, CO and CT's are able to delete the reports.

Clan Wars

All members have access to this area. This page displays a list of the clans that yours has currently declared war against; as well as the clans that have currently declared war against yours. This page also displays all clans you have declared peace on in the last 10 days.

Declare War/Peace

Only the CL, CO and CT's may access this page. They can declare war against another clan by entering the Clan ID of the clan they want to go to war with (must be in Networth Range of entire Clan Networth). If your clan has declared war against another clan more than 24 hours ago, your clan's CL, CO or CT can declare peace with the other clan by typing in the other Clan's ID in the text box provided.

Clan Message

Only the CL, CO and CT may access this page. They can post Clan Messages, which appear in the main page when a clan member logs in to NukeZone. If you have a gold clan, the CL, CO or CT can preview the message before posting it to check for errors. This is a great way to say something important and assure it reaches all clan members immediately. You can use certain G-Codes in the clan message - gold clans have additional G-Codes that they can use. G-Codes are explained further in section 7.2.

Clan Poll (Gold/Platinum Clans only)

Only the CL, CO and/or a CT's can access this page. They are able to create or edit the clan polls from

here. Only one clan poll can be created within a 24 hour period.

Clan Poll Archive (Gold/Platinum Clans only)

All members can access this page. This is where the archive of previous clan polls is stored.

Clan Forum Management (Gold/Platinum Clans only)

Only the CL and CO can access this area. This allows the CL or CO to change the clan forum settings and create new clan forums. The CL and CO of a Platinum Clan can give CT's the ability to access this area.

Domain Management (Platinum Clans only)

Only the CL or CO has access to this area. Here the CL or CO can request a custom NukeZone domain (tag.nukezone.info – where 'tag' is the clan's existing tag) and sub-domains for their clan homepage.

Receive Clan Bonus

All members can click on this to receive the Clan Bonus after the clan has reached 5,000, 10,000 and further multiples of 10,000 Clan Points. This link is enabled within 30 minutes after your clan has reached the Clan Bonus. You will receive a local event when this page has been enabled. If you do not go to this page to receive the bonus within 3 days of it being enabled you will automatically receive it. If you are in vacation mode at the time your clan receives a bonus then you will not receive a share of it. You need to be in the clan for 72 or more hours to be able to receive the bonus.

Clan Recruiting

Only the CL, CO and CT's have access to this area. This is where a clan can look for new members and specify the criteria which potential members must meet.

Find New Clan

Everyone has access to this area. This is where members can look for a new clan and specify the criteria which a potential new clan must meet.

Change Clan Leader

Only the CL may access this page. If a CL wants to give up the leadership, he can appoint a new leader of the clan. The old CL will then take over the new CL's old position.

Leave Clan

All members may access this page. If a member of a clan chooses to leave the clan, they can leave the clan immediately. However, The amount of time that provinces must wait after leaving a clan before joining another now increases based on how many clans they have already joined during that round. For 1-3 clans it remains at 24h and 4-5 clans is now 48h; then for 6+ clans the amount of time will increase at regular intervals.

Delete Clan

Only the CL may access this page. If the CL chooses to delete the clan, he may do so by clicking on Delete Clan.

6.7 - Clan Invitations

The CL, CO and CTs can view a complete list of pending clan invitations. They may also cancel any of these invitations; however invitations automatically expire after 7 days.

6.8 - Extended Military Information

Members of Gold Clans can choose to share their Extended Military Information, giving their clan mates the opportunity to view additional information about their province.

6.9 - Clan Status

Clans have a Status rating of: Brave, Fearless, Neutral, Fearful or Cowardly depending on the size of the clan they are declaring on. The larger the clan they declare war on, the more their status will rise to the positive end of the scale. Adversely, the smaller the clan that is declared upon, the more their status will fall to the negative end of the scale. This system is not in effect when you declare back on a clan. However, it will have a small positive affect, hence declaring back is a brave action. The clan status will affect the points you gain in a clan war: Brave (+20%), Fearless (+10%), Neutral (0%), Fearful (-10%) and Cowardly (-20%). War declarations during the first 10 days of a round do not have an effect on clan status, only declarations after that time will cause the clan status to change.

7.1 – Medals and Clan Awards

At the end of each round, 11 different medals are given out to the leaders of each area.

Medal of Honor - Most clan points gained by a province
 Medal of Growth - Highest network
 Medal of Death - Killed most provinces during clan wars
 Medal of Earth - Highest Land Area
 Medal of Courage - Performed most attacks
 Medal of Thievery - Most money stolen
 Medal of Knowledge - Quickest to research all sciences
 Medal of Mass Destruction - Most total NW damage made using missiles (excluding Tomahawk Missiles)
 Medal of Superiority - Province who first reaches 2500 clan points, counting from the beginning of the round and based on Clan Points Gained (total).
 Medal of Development - Province who first reaches \$2,500,000 network and keeps it for 48 hours.
 Medal of Accomplishment - Province who wins both the Medal of Honor and Medal of Superiority in the same round.

United Boundaries - Clan with the highest amount of land overall
 United Arms - Clan with the most attacks made during clan wars
 Golden Shotgun - First clan to reach 10000 points.
 Points Champion - Awarded to the first 3 clans in the points toplist (Gold, Silver and bronze)
 Network Champion - Awarded to the first 3 clans in the Network toplist (Gold, Silver and Bronze)
 Combo Champion - Awarded for the first 3 clans in the Combo toplist (Gold, Silver and Bronze) **

***Combo list: Combo points will be awarded to the top 100 clan rankings for points and for network. Clans will gain 1-100 points (rank #1 giving 100 points and rank #100 giving 1 point - anything beyond the rank of #100 receives zero points). Points are awarded daily as of midnight CET (server time), if the clan is in both top lists they will receive an additional 10% more points. So the maximum combo points a clan can obtain each day is 220 Combo points (100 for being number 1 in the Points-toplist, and 100 for being number 1 in the NW toplist + the 10% they get for being in both toplist = 20).*

7.2 - G-Code and Auto-Linking

The following G-Codes can be used in private messages, clan messages and on the forums. Please note that all G-Codes are case sensitive, except the G-Codes used in Clan Messages. If auto-linking is enabled all your entered URLs will automatically be transformed into clickable hyperlinks. Easy and simple link creation, simply enter the URL! However your URL must start with one of the following: http://, https://, ftp:// or www.

Available Tags in Private Messages:

Tag	Output
[USERPROVINCE]	Inserts the reader's province name. Works in both subject and message body.
[USERID]	Inserts the reader's province id. Works in both subject and message body.
[NAME]	Inserts the reader's name. Works in both subject and message body.
[B] [/B]	Text between these tags is displayed in bold. Works only in message body.
[I] [/I]	Text between these tags is displayed in italic. Works only in message body.
[U] [/U]	Text between these tags is displayed underlined. Works only in message body.

Available Tags in Clan Messages (Only available for Gold/Platinum Clans):

Tag	Output
[B] [/B]	Text between these tags is displayed in bold.
[I] [/I]	Text between these tags is displayed in italic.
[U] [/U]	Text between these tags is displayed underlined.
[S] [/S]	Text between these tags is displayed with a line through the middle the text.
[HR]	Inserts a horizontal line.
[CENTER] [/CENTER]	Text between these tags is displayed center aligned.
[LEFT] [/LEFT]	Text between these tags is displayed left aligned.
[RIGHT] [/RIGHT]	Text between these tags is displayed right aligned.
[COLOR=name] [/COLOR]	Text between these tags is displayed in specific

	color. See below for available font colors.
[FONT=name] [/FONT]	Text between these tags is displayed in specific font. See below for available fonts.
[SIZE=number] [/SIZE]	Text between these tags is displayed in specific size. See below for available font sizes.
[LAST_EDITED]	Example output: October 5th, 2002 01:45 CET
[EDITED_BY]	Name of CT/CL who edited the message.
[CLAN_POINTS]	Inserts total amount of current clan points. *
[NEXT_BONUS]	Inserts amount of points required to reach next bonus. *
[NW_RANK]	Inserts the current Networth rank of your clan. **
[PTS_RANK]	Inserts the current Points rank of your clan. **
[CBO_POINTS]	Inserts the Combo Points of your clan.
[CBO_RANK]	Inserts the current Combo Points rank of your clan.
[24H_CLAN_POINTS]	Inserts clan points gained over 24 hours.
[24H_PTS_RANK]	Inserts ranking over 24 hours in clan points gained.

* Note: With the [CLAN_POINTS] and [NEXT_BONUS] tags, if you wish to have a "p" after the points (e.g. "We have this many clan points: 2500p"), the "p" must be added following the tag [CLAN_POINTS]p. You can enter anything after the tag, not just the "p", so could for example enter "[CLAN_POINTS] points".

** These values are updated once every 6 hours.

Available Tags on the Forums:

Tag	Output
[B] [/B]	Text between these tags is displayed in bold. This tag does not work in the topic name.
[I] [/I]	Text between these tags is displayed in italic. This tag does not work in the topic name.
[U] [/U]	Text between these tags is displayed underlined. This tag does not work in the topic name.

Available Special Tags on the Clan Forums (Only available for Gold/Platinum Clans) *:

Tag	Output
[S] [/S]	Text between these tags is displayed with a line through the middle of text. This tag does not work in the topic name.
[IMG]url[/IMG]	Inserts an image. Specify the image source by entering the full url between these tags.
[COLOR=name] [/COLOR]	Text between these tags is displayed in specific color. (see below for valid colors)
[FONT=name] [/FONT]	Text between these tags is displayed in specific font. (see below for valid names)
[SIZE=number] [/SIZE]	Text between these tags is displayed in specific size. (see below for valid sizes)

* Only available if your CL has enabled it on the Clan Forum Management page.

Available Font Colors:

Aqua, black, blue, fuchsia, gray, green, lime, maroon, navy, olive, pink, purple, red, silver, teal, white, yellow. In addition, you may also enter any hexadecimal color code. Please note that the # sign is required when doing so.

Available Fonts:

Arial, Comic Sans, Courier New, Georgia, Helvetica, Impact, Times New Roman, Verdana

Available Font Sizes:

The number argument can still be any number between 0-6, but you may now also specify any custom size you want by adding "pt" after the number. So 16pt means size 16. The old style 0-6 is translated as follows: size 0=8pt, size 1=10pt, size 2=12pt, size 3=14pt, size 4=16pt, size 5=18pt, size 6=20pt.

7.3 - Extended G-Codes

As a Gold Clan, not only do you have the ability to use the regular G-Codes, you also get an extended

version of it. It can only be used in the clan message and can be used by Gold Clans only. A CL/CT can easily target a province and/or a clan by using these codes. The Extended G-Codes are not case-sensitive. A clan message can contain a maximum of 25 Extended G-Codes.

Available Extended G-Codes in Clan Messages (Only available for Gold/Platinum Clans):

Tag	Output
[P=id]	Creates a link to the specified province..
[C=id]	Creates a link to the specified clan.
[A=id]	Creates a link to the aid page for the specified province
[R=id]	Creates a link to the specified enemy province's spy report.
[CR=id]	Creates a link to all of the specified clan's spy reports.
[PNW=id]	Inserts the specified province's name and network and creates a link to the attack page. The network will be made bold if the enemy is within the viewer's attack range.
[NW=number]	The number must be a valid network value. The network is formatted and will be made bold if the enemy is within the viewers attack range.
[URL=link]text[/URL]	Turns the "text" into a hyperlink to click on. Valid "link" types are http, https, ftp, irc

Using this feature is fairly simple. While typing a message, a CL/CT can target a province by typing: [P=ProvinceID] or [C=ClanID]. By doing so, this converts the ID Number into your target's Province or Clan Name and ID Number as well as creating a clickable link to the province/clan information page.

Example: A CL/CT types in, "...War. Everyone attack this guy, [P=123]!" The G-Code converts this to, "...War. Everyone Attack This Guy, FakeProvince (#123)!", where the "FakeProvince (#123)" part is a clickable link that brings you to this enemies province information page. The same is done with clan targets.

8.1 - Technical Support

If you need technical support please contact our Customer Support by sending an in-game message to *Customer Support* (found in your contact list when you write a message) or simply post a message in the *Technical Support and Bug Reports* forum. Links to the multi report system, the EULAs and other important resources can be found by clicking the *help* link in the top right.

8.2 - Ideas and Suggestions

If you have an idea or a suggestion, please post it in the *Suggestions and Ideas* forum.

8.3 - Bug Reporting

Please report all bugs in the *Technical Support and Bug Reports* forum. Bugs that might affect the security or integrity of NukeZone and the server should NOT be posted in public; please inform the Customer Support directly by using one of the above-mentioned ways.

8.4 - IRC

NukeZone has its own IRC channel on the QuakeNet network. This is the place where the NZ Crew and the most experienced players hang around. Everyone is welcome!

Network: QuakeNet

Server: irc.quakenet.org

Channel: #NukeZone (for general NukeZone chat)

#NZSupport (for any game related problems/questions you might have)

#NZVeteran (must be veteran to join)

A quick IRC guide to get you online can be found here:

<http://www.nukezone.info/ircGuide.aspx>

8.5 - Rules

The Game Rules can be found at: <http://www.nukezone.info/gameRules.aspx>

The Forum Rules can be found at: <http://www.nukezone.info/forumRules.aspx>

8.6 - Credits

The NZ Crew:

1.1 - Overview

NukeZone is a free, strategic text-based online game. The game is optimized for Internet Explorer 5.0 and above with a screen resolution of 800x600 or higher. The game will also work in newer versions of other browsers such as Opera and Netscape Navigator; however, while some features may not operate properly, the game engine functions correctly. It is strongly recommended that you use Internet Explorer 5.0 and above. Please click [here](#) to download the latest Internet Explorer from Microsoft's homepage.

NukeZone is played in rounds lasting approximately 3 months each. Round dates can be found on the login page. At the end of each round, winners in various categories are given medals and all provinces are reset and the game starts over.

If you find any bugs or any other errors in the game, please report them ASAP in the *Technical Support and Bug Reports* forum.

1.2 - Getting Started

You start with 125 turns and \$250,000, then the first time you login for the round you get awarded with an extra 175 turns and \$500,000 (totaling in 300 turns and \$750,000), the extra bonus is only available for provinces created before the start of the round and those created in the first 48 hours of a round. It is up to you to determine what to purchase, while some prefer to use a more offensive strategy, others will choose to adopt a more defensive strategy. Money is required to purchase buildings and units. Turns are required to purchase buildings (jump to *3.1 - Buildings* for more info), increase research (jump to *3.10 - Research* for more info), or attack (jump to *4.1 - General Attack Information* for more info). You need buildings to survive – when all your buildings are destroyed you will die. When you have died you spend 24 hours dead before starting over in nuke protection again – death results in a loss of all units, land, research, money (including in the bank) and turns except for the starting defaults.

There are several ways to get more money although you get a fixed number of turns:

- By default you receive 1 turn every 20th minute and \$2000 each hour. You can research Money Production to increase your income up to a maximum \$26,000/hour.
- Join/create a clan and fight other clans (that your clan is at war with) in order to receive clan bonuses (300 turns and \$25,000,000 for each 10,000 points; the clan bonus money is divided evenly among all clan members).
- Tell your friends about this game (you receive a 10 turn bonus for each friend that signs up and plays for a while). Please note that to receive the bonus your friend must sign up with the same email as the invitation was sent to.

Note: You will not receive any additional turns every 20 minutes if you already have more than 300 turns. However, you can receive the clan bonus during this time. Please use some of your turns in order to start receiving turns every 20 minutes again.

1.3 - Starting Bonus

You can select a starting bonus from the following list, which you must claim while in Nuke Protection.

- **Offensive**
Max morale capacity changes to 110%, plus an additional 45 turns.
- **Defensive**
All buildings get a 15% life boost, plus 2 extra sciences per turn, plus 5,000 m2 land.
- **Finance**
Hourly income increased by 10%, bank capacity is raised by 50% and \$250,000 money.
- **Shipping**
Market and missile orders ship 25% faster, plus ability to choose exact arrival time (up to 12 hours delayed), plus 3,000 m2 land and \$150,000 money.

The starting bonus you receive after you die is based on your networth 72 hours before you were killed. The bonus will increase gradually between \$100 000 and \$1 500 000 reaching a maximum increase of 300% at \$1 500 000. The increase will improve more dramatically at lower networth and decrease slowly as you approach \$1 500 000. The increases will not be in effect if you reset your account.

2.1 - Game

Main - Province info, power status, news, current server time, nuke protection options, starting bonus

Attack - Regular attack, ground attack, air and sea attack, launch missile, send spy/spy plane, send thief, send sniper

Research - Research sciences

Headquarters - View your Headquarters bonuses, manage Headquarters Operations and your army's General

Explore - Explore or Sell additional land.

Market - Buy/sell merchandise

Bank - Deposit/withdraw money

Clan - Join/create clan, clan properties, invite/kick players, manage clan wars, leave/delete clan, recruiting system etc

2.2 - Build

Buildings - Build/demolish buildings

Sea Units - Build sea units

Air Units - Build air units

Vehicles - Build vehicles

Infantries - Train infantries

Missiles - Order missiles, view arrival dates

Satellites - Build/use Satellites

2.3 - Show

Local Events - Shows local events

Global Events - Shows global events, can be filtered by incoming, outgoing or internal.

Attack Events - Shows local outgoing events (Gold Users only).

Search Events - Allows a search of local and global events.

Enemy List - Links to enemy list (Gold Users only).

Status - Information, military info, military settings, history graphs (including Gold User only info) and several province statistics, rank from previous round

All Provinces - Shows all provinces within your attack range

All Clans - Shows all clans

Top List - Top Provinces, Top Clans (Networth), Top Clans (Points)

Search - Search for provinces by province id or province name, search for clans by clan id or clan name/tag

Clan Forum - A direct link to your private clan forum (only visible if you're a member of a clan)

Forum - NukeZone forums

Online Shop - Purchase a Gold user or Gold/Platinum clan

2.4 - NZ Portal

News - Displays current news items

Articles - Displays current articles

Profiles - Displays player profiles

2.5 - Other

Inbox - Display your inbox (private messages that have been sent to you)

New Message - Compose a new message

Preferences - Options, edit profile, change colors, change password, delete province, reset province, create/edit your NZ Portal profile etc

Contact Us - Crew contact information, credits

Logout - Logout from NukeZone

3.1 - Buildings and Walls

Land is nice to have, but without buildings and infrastructure it is of little use. NukeZone offers a variety of buildings to place on your land. Each building has some inherent benefits that allow your province to grow or specialize. It is up to you to determine how to fill your land, and there is no perfect or ideal balance for growth. As well, each building uses a specific amount of power, and power can only be provided by power plants. If you have low power, your defensive buildings, missile silos, research labs, command centres and headquarters buildings won't work, meaning you will be more susceptible to attack, will not be able to launch missiles or be able to perform scientific research. The defense values of your buildings drop by 25% when you are low on power and you will be unable to use spy planes, spies, thieves, snipers and satellites. If you are short on land, either explore for more or attack someone to try and steal some. The amount of unused land improves the defense of your buildings by up to a 40% boost for 25% unused land. It takes 20 m² to build each building with the exception of Headquarters which take 1000 m2.

Available Buildings:

Name	Price	Description
Research Lab	\$2,000	Gives 1 extra science/turn to research for each 50

		research labs. Attack: 0, Life: 200 Power usage: 2000
Missile Silo	\$22,000	Houses 1 missile. Attack: 0, Life: 500 Power usage: 10000
Headquarters	\$250,000 25 turns and 1000 m2 of land	Improves various abilities for your province† Attack: 0, Life: 5000 Power Usage: HQ1: 25,000; HQ2: 50,000; HQ3: 100,000; HQ4: 150,000; HQ5: 250,000
Command Centre	\$2,200	Supports 5 special units††. Attack: 0, Life: 120 Power Usage: 1800
Shipyards	\$1,100	Houses 5 sea units. Attack: 0, Life: 90 Power usage: 700
Airfield	\$900	Houses 5 air units. Attack: 0, Life: 85 Power usage: 600
War Factory	\$1,200	Houses 10 vehicles. Attack: 0, Life: 80 Power usage: 900
Barracks	\$700	Houses 20 infantries. Attack: 0, Life: 60 Power usage: 650
Power Plant	\$450	Produces 4500 power units. Attack: 0, Life: 85
Advanced Power Plant	\$1,400	Produces 15000 power units. Attack: 0, Life: 40
Torpedo launcher	\$1,850	Gives you a sea defense. Attack: 350, Life: 280 Power usage: 700
SAM Site	\$1,400	Gives you an air defense. Attack: 265, Life: 240 Power usage: 600
Missile Turret	\$1,500	Gives you a vehicle defence. Attack: 300, Life: 265 Power usage: 400
Machinegun Turret	\$1,200	Gives you an infantry defence. Attack: 190, Life: 290 Power usage: 275
Anti-Missile System	\$5,000	Gives you a missile defense†††. Attack: 0, Life: 400 Power usage: 1700

† Headquarters Building - You may only own 5 Headquarter buildings at any time and you may only build one per 72 hour period. The Headquarter building cannot be main targeted in an attack, but can be destroyed. The power usage is per building and is cumulative, therefore if you own 2 buildings you will use 25,000 + 50,000 for a total power usage of 75,000. Headquarters abilities are cumulative and in the order listed. For example, when you have three headquarters, you will have ALL of the bonuses provided by numbers 1, 2, and 3.

Headquarters #1

- * 75% chance of tracking origin of missiles
- * 10% attack boost to attacking units
- * 1 additional science per turn when researching

Headquarters #2

- * 25% increase to land exploration
- * Implements the Coastal Defense System (5% increased protection against air and sea attack)
- * 1 additional science per turn when researching
- * Gives an additional \$1000/hour

Headquarters #3

- * 50% increase to land exploration
- * Unlocks the sabotage missions for the Spy unit giving a 50% chance of success.
- * Increases the Coastal Defense System to 10% protection.

- * 1 additional science per turn when researching
- * Gives an additional \$1000/hour
- * Ability to Main Target individual defense buildings.

Headquarters #4

- * Unlocks the Headquarter Operations
- * Unlocks the General unit with 1 life/hour regeneration rate.
- * Missile accuracy improved with 10%
- * Increases the Coastal Defense System to 15% protection.
- * 1 additional science per turn when researching
- * Improves sabotage missions chance of success to 65%
- * Gives an additional \$1000/hour
- * Improved accuracy for Main Targeting by 2x.

Headquarters #5

- * Enables you to own and utilize two satellites simultaneously
- * 1 additional science per turn when researching
- * Improves sabotage missions chance of success to 80%
- * 10% defense boost for defending units when attacked
- * Increases the General unit to 4 life/hour regeneration rate.
- * Gives an additional \$1000/hour
- * 75% land exploration bonus.

Headquarter Operations

Four Headquarter buildings are required to run Headquarter Operations. Headquarter Operations cost 2 turns and two hourly fees to activate, and then cost a fixed fee per hour, automatically taken from your income. A maximum of half your income may be used for HQ Operations. If your fourth Headquarters is destroyed, the operation will cease functioning. HQ Operations auto deactivate if your account remains inactive for more than 5 days(when you stop receiving your hourly income).

- * \$1000/hour: 100% chance of tracking origin of missiles and special units
- * \$2000/hour: Increased defense against incoming sabotage missions by 50%
- * \$3000/hour: Increased defense against incoming EMP attacks by 50%
- * \$4000/hour: 2 additional life per hour for the General unit.
- * \$5500/hour: Defense buildings do 25% additional damage.
- * \$6000/hour: Increased defense against incoming missile attacks by 25%
- * \$10000/hour: 5% additional satellite power per hour

General Unit

Four Headquarter buildings are required to get access to the General unit. The unit arrives 72 hours after the fourth HQ building is constructed and starts with 100 life. It gains 1-6 life per hour depending on number of headquarters and HQ Operations active. The General can be sent in battle and can be killed in action, and a new one then arrives 72 hours later. When the General unit arrives you will choose a name for it from a list and get to choose one of the following enhancements listed below. Whenever you include the General unit with an attack you get the chosen enhancement. The General unit is idle when defending and does not provide enhancements for defending units or buildings.

Enhancements:

- * 10% additional attack
- * 10% additional defense
- * Avoids walls and the Coastal Defense System provided by the Headquarters 2-4.

General Abilities:

- * 10% attack boost (cost: 50 life)
- * 10% defense boost (cost: 50 life)
- * Double money/land gained in combat (cost: 50 life)
- * 50% improved main targeting (cost: 75 life)
- * Spy Report units after-attack information (cost: 100 life)
- * Spy Report buildings after-attack information (cost: 100 life)
- * Double damage in combat (cost: 500 life).
- * Last Stand: Requires at least 200 life, and doubles the attack of your defending units and buildings. It can not be activated during the last 3 days of the round.

†† Special units are; Spy Plane, Spy, Thief and Sniper.

††† Anti-Missile System defense varies based on the amount of used land. Anti-Missile Systems provide a

maximum of 50% protection without HQ Operation. 750 Anti-Missile Systems will provide 50% protection, no matter the amount of used land you have.

Available Walls:

Name	Price	Description
Barbed Wire	\$0	Provides 0% vehicle and infantry defense. Requires: none
Sandbag Wall	\$50,000*	Provides 5% vehicle and infantry defense. Requires: Barbed Wire
Concrete Wall	\$250,000*	Provides 10% vehicle and infantry defense. Requires: Sandbag Wall
Laser Fence	\$500,000*	Provides 15% vehicle and infantry defense. Requires: Concrete Wall

* Lowest price (the price increases with the more land you own). Walls reduce the strength of the attacking force by a certain percentage, based on the type of wall.

3.2 - Sea Units

To build sea units, you need shipyards, which house 5 sea units. Sea units can only be combined with air units in an "Air and Sea Attack".

Available Units:

Name	Price	Description
Submarine	\$2,300	Attack: 180, Life: 170 Can attack: Sea Units Can carry: 2 Tomahawk Missiles
Stealth Boat	\$700	Attack: 50, Life: 70 Can attack: Sea Units, Infantries
Destroyer	\$1,500	Attack: 70, Life: 60 Can attack: Vehicles, Infantries, Buildings
Cruiser	\$2,000	Attack: 85, Life: 105 Can attack: Sea Units, Air Units, Buildings
T-2000 Hovercraft	\$800	Attack: 70, Life: 35 Can attack: Air Units, Buildings

3.3 - Air Units

To build air units, you need airfields, which house 5 air units. Air units can be combined with all other units when attacking.

Available Units:

Name	Price	Description
F-22 Raptor	\$1,075	Attack: 65, Life: 55 Can attack: Sea Units, Air Units
F/A-18 Super Hornet	\$750	Attack: 55, Life: 25 Can attack: Air Units, Buildings
F-35 JSF	\$925	Attack: 55, Life: 45 Can attack: Air Units, Vehicles
B-2 Stealth Bomber	\$1,500	Attack: 130, Life: 55 Can attack: Buildings
RAH-66 Comanche	\$800	Attack: 35, Life: 40 Can attack: Vehicles, Infantries, Buildings
SH-60 Sea Hawk	\$700	Attack: 70, Life: 40 Can attack: Sea Units
Aurora Spy Plane	\$15,000	Spies on enemy buildings. Attack: 0, Life: 200 Can attack: None
CH-46 Sea Knight	\$1,000	Enables you to transport 15 infantry per unit in a Sea and Air attack, while boosting transported infantries attack by 50% and lowering their life by 15%. Attack: 25, Life: 135

		Can attack: Buildings
--	--	-----------------------

3.4 - Vehicles

To build vehicles you need war factories, which house 10 vehicles. Vehicles can be combined with air units and infantries when attacking.

Available Units:

Name	Price	Description
Humvee	\$500	Attack: 60, Life: 20 Can attack: Infantries
Hover Tank	\$600	Attack: 35, Life: 20 Can attack: Sea Units, Infantries, Buildings
Heavy Artillery	\$1,000	Attack: 95, Life: 40 Can attack: Buildings
SAM Tank	\$700	Attack: 60, Life: 30 Can attack: Air Units
M1 Abrams Tank	\$1,250	Attack: 65, Life: 60 Can attack: Vehicles, Buildings

3.5 - Infantries

To train infantries you need barracks, which house 20 infantries. Infantries can be combined with air units and vehicles when attacking.

Available Units:

Name	Price	Description
Thief	\$5,000	Steals money from the enemy base and protects your base from possible enemy thieves. Attack: 0, Life: 5 Can attack: none
Spy	\$3,000	Spies on enemy units, protects your base from possible enemy spies and carries out Sabotage Missions*. Attack: 0, Life: 5 Can attack: none
Sniper	\$5,000	Attack: 125, Life: 65 Can attack: Spies, Thieves, Snipers Note: Snipers have 5 times less defense against other snipers
Navy Seal	\$900	Attack: 45, Life: 25 Can attack: Sea Units, Buildings
Heavy Infantry	\$400	Attack: 20, Life: 15 Can attack: Air Units, Infantries, Buildings
Machine Gunner	\$350	Attack: 25, Life: 15 Can attack: Infantries
Grenade Soldier	\$425	Attack: 35, Life: 10 Can attack: Vehicles

**Sabotage Missions* - Spies have the option to sabotage missiles, power plants, and satellites. The sabotage option is unlocked and has a 50% chance of success with 3 Headquarters, 65% with 4 Headquarters and 80% with 5 Headquarters.

Missiles: Sabotages 1 missile and may be in effect for up to 10 days or until the missile is launched. If the missile is launched within the 10 day period and the sabotage is successful, it will blow up in the enemy's base prior to launch causing 20% damage. The enemy will still be charged full turns and morale for the attempted launch. The maximum amount of missiles that may be sabotaged for any enemy is 5 at any one time.

Power Plants: If the power plant sabotage option is chosen and the spy is successful it will disable 10% of the enemies' power plants for 48 hours. The maximum amount of power plants that may be sabotaged for any enemy is 50% at any one time.

Satellites: If sabotage is successful the enemies' satellite power is reset to 0% for 10 hours before power begins the 10% hourly increase.

3.6 - Special Units

Special units are the spy plane, spy, thief and sniper. In order to own these units you must have

Command Centres. You can have a maximum of 200 Command Centres meaning you are limited to no more than 1000 special units. Special units cannot be used when you have low power. You may only buy or sell 100 special units per day in all market transactions; e.g. buying 50 and selling 50 would be the maximum special unit transactions for that day.

3.7 - Market

The market allows you to buy units without using turns to build them. However, units on the market are more expensive to buy and because they are not built in your province, they take time to arrive. Depending on the research you have and how much you are willing to pay you can get units from the market in between 3 and 12 hours. You can cancel an incoming order, which returns 75% of the regular market price (money spend on accelerated shipping will not be returned after canceling an order).

You can pay extra to reduce the time it takes for your units to be delivered – paying double the price allows your units to arrive in half the time. Accelerated shipping for missiles costs 1.5x the price. You can also research the Shipping Time Science so you get units from the market faster.

The market also allows you to sell your units to recoup some of their cost if you no longer want them.

3.8 - Missiles

To build missiles you need missile silos, which house 1 missile. A missile is an expensive but very powerful attack option. The chance of hitting the enemy base depends on two things: your missile accuracy and your enemy's missile defense. Missiles cost 5 turns to build and 4 turns to launch. They make use of their own Missile Power (5% received per half hour) and do not use morale. 100% Missile Power is required to launch missiles. Accelerated Shipping mode for missiles cost 1.5 times the standard price.

Tomahawk Missiles do not require a missile silo to build or to launch. Submarines are required to both house and launch the Tomahawk Missiles. As such you must send them with an air and sea attack with the appropriate amount of submarines. Tomahawks are not affected by your missile accuracy although 50% is needed before you may build them but they can be shot down. A submarine can hold 2 Tomahawk Missiles. 3 Tomahawks may be built for every turn and take 6 hours to build. You can send 4 Tomahawk missiles for every \$10,000 Network worth you send in the attack.

Anti-Missile Systems, SAM Sites, SAM Tanks and Cruisers can defend against Tomahawk Missiles. Sam Tanks and Cruisers provide equal protection against Tomahawks while SAM Sites provide 3 times the protection of SAM Tanks and Cruisers, and Anti-Missile Systems provide 5 times the protection. The default chance of tracking missiles is 25%, however this is raised to 75% when 1 or more Headquarters Building is owned.

Available Missiles:

Name	Price	Description
Nuclear Missile	\$60,000	Attack: 500,000 Can attack: All Buildings and Units
Chemical Missile	\$35,000	Attack: 250,000 Can attack: Sea Units, Air Units, Vehicles
Biochemical Missile	\$30,000	Attack: 165,000 Can attack: Infantry
EMP Missile*	\$20,000	The EMP Missile initially disables 20% of the enemy's power supply decreasing 5% per hour over a 4 hour period. You do not receive clan points for using this missile.
Tomahawk 250C Missile	\$4,000	Attack: 5000 Can attack: Buildings
Tomahawk 500C Missile	\$8,000	Attack: 8000 Can attack: Buildings and Vehicles

* EMP damage is removed from the target province by 5% each hour. 2 EMP missiles will disable 40% of the targets power if they hit and the effect on the province will then reduce by 5% each hour. It would therefore take 8 hours before all EMP damage was removed.

3.9 - Satellites

There are 6 different satellites available for you to build. All satellites require 50% in *Satellite Technology* before they can be built. Each satellite costs 20 turns and takes 48 hours to construct. After you have built the satellite, you must launch it into space. It takes 1 hour for a satellite to reach earth's orbit, and it can then stay up for 14 days until it crashes down and burns up in earth's atmosphere. You can increase the time your satellite stays in orbit by continuing to research satellite technology over 50%. You get an extra

days orbit for every additional 10% research. A satellite will stay in orbit for the period researched at the time of launch, research while in orbit will not effect that satellite.

Your satellite power increases by 10% each hour and all satellites cost 5 turns to use. Satellites are not operational when you have low power although a previously launched Stealth Satellite will continue to function if it was activated while you had power. You can own any two satellites concurrently, even two of the same kind providing you have all 5 Headquarters. However, you may only have one satellite from each group (offensive and defensive*) in orbit at any one time. If you need to launch another satellite and your current satellite(s) have not yet crashed, you can demolish your satellite(s) for 20% of its/their original cost.

Available Satellites:

Name	Price	Description
EMP Satellite**	\$600,000	The EMP Satellite disables X% of the enemy's power supply over X amount of hours. Requires at least 25% satellite power, 100% satellite power = max effect damage (the more power, the more damage). Max effect: 30%, 6 hours
Laser Beam Satellite	\$1,000,000	Requires at least 25% satellite power, 100% satellite power = max attack damage (the more power, the more damage). 95% hit rate. Max Attack: 9000 Can attack: Buildings
Orbital Research Laboratory	\$350,000	Gives you 5 additional sciences per turn when researching. The 5 additional sciences are given in addition to the current number of sciences per turn you may be receiving from your research labs.
Spy Satellite	\$500,000	Spies on the enemy base. Requires 100% satellite power. You will receive this information: - Approximate number of enemy buildings and units. - Unused enemy land and power status.
Stealth Satellite	\$450,000	When activated, your base will be hidden from enemy spies, thieves, snipers, laser beam satellites and EMP satellites. It hides your base for 7 hours. Requires 100% satellite power.
Anti-Missile Satellite	\$700,000	Gives you instant 100% protection. Each time it shoots down a missile 50% satellite power is used. If you don't have enough satellite power, the satellite will not be able to shoot down any missiles until you get more satellite power.

*

Offensive Satellites:

Laser Beam Satellite
EMP Satellite
Spy Satellite

Defensive Satellites:

Orbital Research Laboratory
Stealth Satellite
Anti-Missile Satellite

**EMP damage is removed from the target province by 5% each hour. 1 hit at full power with the EMP satellite will disable 30% of the targets power and the effect on the province will then reduce by 5% each hour. It would therefore take 6 hours before all EMP damage was removed.

3.10 - Research

There are 10 different sciences available for you to research. Researching sciences requires turns. The number of turns needed is based on your amount of *Research Labs and HQs*, and the more you own, the more sciences per turn you get when researching. You will be able to research between 1 and 20 sciences per turn, depending on how many *Research Labs* and HQs you own. You can get up to 25 sciences per turn by getting an Orbital Research Laboratory.

Available Research:

Bank Management increases the amount of money you can deposit into the bank up to a total of \$5,000,000. Also, for every 10% of research the basic interest rate increases by 0.1%. When 50% of this research is completed the option to withdraw money after 24 hours with no interest and a 25% fee is enabled; when it is 100% complete the 25% fee is removed (2000 sciences). At 100% researched the fee

of 1/4 the money is removed when sending aid.

Engineer Effectiveness increases the amount of buildings you can build per turn. The maximum limit is 15 buildings per turn (2500 sciences); default is 5 buildings per turn.

Market Shipping Time reduces the time taken for items ordered from the market to arrive. The maximum limit is 50% (1800 sciences).

Market Discount gives you discount on all market merchandise. The maximum limit is 30% (1200 sciences).

Missile Accuracy gives your missiles a better chance to hit the target. The maximum limit is 80% (800 sciences); default is 10% accuracy.

Money Production increases your income per hour. The maximum limit is \$26,000 per hour (3000 sciences), default is \$2000 per hour.

Power Plant Efficiency increases the amount of power each power plant produces and also increases their defense/life. The maximum limit is 50% above normal (1000 sciences).

Satellite Technology gives you the knowledge to construct satellites. 50% satellite technology is needed in order to construct any satellites. Additional research over 50% extends the maximum orbit time of the satellite with up to 5 days (making it a total of 19 days in orbit). The maximum limit is 100% (3000 sciences). Once the Satellite Technology research is 100% complete the construction cost of each satellite will be reduced by 20% and each use of a satellite will cost 4 turns instead of 5.

Security System improves your security. This makes enemy thieves steal less money from you. It will not protect you from enemy thieves in any other way. The maximum limit is 100% (2000 sciences).

Thief Education teaches your thieves to steal more money and also to be stealthier. The maximum limit is 300% (3000 sciences).

4.1 - General Attack Information

Each attack is unique in some way and all attacks cost a different amount of turns. Launch Missile costs 4 turns. Regular Attack, Ground Attack and Air Attack cost 3 turns. Send Spy/Spy Plane costs 1 turn and Send Thief and Send Sniper costs 2 turns and 5% morale. The maximum amount of morale your army can have is 100%, and each attack uses a different amount of morale. An attack may "cost" as low as 20% of your morale and as high as 35%. When you attack an enemy that is smaller than yourself, you will lose 5% more morale. You will lose additional 10% of morale if you use an aggressive attack type. However, your morale increases by 5% every 15 minutes. Missiles have their own Missile Power (5% received per half hour) and does not use morale.

Target ID is the target province id.

Attack Method is the option on how you want to attack your enemy.

Main Target specifies the target your troops will focus on. You may also main target individual defence buildings providing you own HQ #3.

Attack Type specifies how the attack should be made; normal or aggressive.

4.2 - Regular Attack

Regular attack can consist of air units, vehicles and infantries. This attack method costs 3 turns.

4.3 - Ground Attack

Ground attack can only consist of ground units. Using this method makes the vehicles and infantries slightly more powerful than a Regular attack. This attack method costs 3 turns.

4.4 - Air and Sea Attack

Air and Sea attack can only consist of air units and sea units. You may load certain sea units with Tomahawk missiles, which will then be launched during the attack. Using this method makes these units slightly more powerful than a Regular attack. This attack method costs 3 turns.

4.5 - Launch Missile

Use this option to send your missiles to enemy targets. This attack method costs 4 turns, and uses 100% Missile Power. This does not include Tomahawks.

4.6 - Send Spy/Spy Plane (intelligence)

When you send out your spy, his job is to spy on your enemy's army or base. You can choose between an infantry spy for army intelligence or a spy plane to gather info on your enemies buildings. However, there is no guarantee either will succeed. You may send up to 5 Spies at once for the same amount of turns, for up to 5x the details of your results (chance of being caught increases by up to 10x). Opposing snipers and spies can kill infantry spies. If he does fail, your enemy is informed that you sent the spy. If your spy is successful, it is hard to count to an exact number of units or buildings in such a short period of time, so your spy works with special codenames. Below are the translations of those codenames. This attack method costs 1 turn.

Spy Codenames: The numbers on the table below are based on the sending of 1 Spy, and can be made more detailed depending on how many Spies are sent up to a total of 5.

Codename	Amount of Units
Few	0-99
Several	100-249
Pack	250-499
Lots of	500-1,499
Many	1,500-4,999
Crowd	5,000-9,999
Legion	10,000-19,999
Super Legion	20,000+

Spy Plane Codenames:

Codename	Amount of Buildings
Few	0-49
Several	50-124
Pack	125-249
Lots of	250-499
Many	500-999
Crowd	1,000-2,499
Legion	2,500-4,999
Super Legion	5,000+

4.7 - Send Spy (sabotage)

Spies have the option to sabotage missiles, power plants, and satellites. This attack method costs 5 turns and 100% morale.

4.8 - Send Thief

When you send out your thief, his job is to steal money from the selected enemy. However, there is no guarantee that your thief will succeed. If he does fail, your enemy is informed that you sent the thief. This attack method costs 2 turns and 5% morale.

You can send up to 10 thieves at once for the same turns and morale as one. This allows you to get up to 5 times the return but the chance of being caught increases by up to 10 times – times 1 extra for each additional thief. Therefore an attack with 5 thieves could get you up to 2.5 times as much money but you would be 5 times as likely to be caught. If caught you lose all attacking thieves.

4.9 - Sniper

A sniper can both attack and defend. They can attack spies, thieves and snipers. They can defend against spies, thieves, and snipers. They are five times better at defending than spies and thieves are. However, snipers have 5 times less defense against other snipers. This attack method costs 2 turns and 5% morale.

You can send up to 10 snipers at once for the same turns and morale as one. This allows you to do up to 5 times the damage but the chance of being caught increases by up to 10 times – times 1 extra for each additional sniper. Therefore an attack with 5 snipers could inflict up to 2.5 times as much damage but you would be 5 times as likely to be caught. If caught you lose all attacking snipers.

5.1 - Province Status and History

You can get access to a wealth of information about your province and you past performance from the status page. The history page shows statistics for the following items: -

History statistic	Explanation
Attack Success	The number of successful attacks made expressed as a percentage
Defend Success	The number of times successfully defended expressed as a percentage
Highest Networkh	The peak networkh you have achieved in the current round
Highest Land Area	Greatest land area you owned in the current round
Land Gained in Combat	Area of land gained by attacking other provinces
Land Lost in Combat	Area of land lost to other provinces attacking you
Money Gained in Combat	Sum of money gained by attacking other provinces
Money Lost in Combat	Sum of money lost to other provinces attacking you
Money Lost in Thievery	Sum of money you lost to thievery
Most Money Gained in Thievery	Highest amount of money stolen by one thief (GU only)
Kills	Number of provinces you killed
Kills (during clan wars)	Number of provinces you killed during clan wars
Times Killed	Number of times your province has been killed
Missiles Sent	Number of nuclear, chemical and biochemical missiles you have sent
NW Damage Made by Missiles	Cumulative sum of the damage your missiles have dealt this round
Enemy Missiles Received	Count of enemy missiles that have been fired at your province
Enemy Missiles Hit	Enemy missiles that have not missed or been shot down by anti-missile-systems
Enemy Missiles Missed	Enemy missiles that have missed your province
Enemy Missiles Shot Down	Enemy missiles that your anti-missile-systems have shot down
Attacks Made	Total attacks made, not including missiles sent
Attacks Made (during clan wars)	Total attacks made during clan wars, not including missiles sent
Wins	Successful attacks made (percentage in brackets)
Attacks Suffered	Total attacks suffered from other provinces
Defeats	Number of times the enemy successfully penetrated your defenses (percentage in brackets)
Clan Points Gained (current clan)	Total clan points gained in the current clan - every time you successfully attack a province your clan is at war with, you will be awarded clan points depending on the damage
Clan Points Gained (total)	Total clan points gained for the whole round
Aid Sent (current clan)	Amount of aid you have sent in current clan
Aid Received (current clan)	Amount of aid you have received in current clan
Targets Spied	Amount of targets spied in current clan
Time to Complete All Sciences	Total time to complete research on all sciences

Enhanced History: There are more History Statistics but these are Gold Used only.

You can also view graphs plotting the history of your province over the last 14 days in certain key areas:
- *Networkh*

- Land (Gold users only)
- Total Buildings (Gold users only)
- Total Units (Gold users only)

5.2 – Military Info

A full breakdown of your current military force is provided here for quick reference. You can choose to share certain military information with your clan mates from the preferences menu.

Extended Military Information is available to those who are currently in a Gold Clan. This feature allows Gold Clan members to view additional Military Information that is normally hidden. There are 6 sections visible: -

General - allows clan mates to view your status page.

Buildings - this permits clan mates to see what type and volume of buildings you have as well as what type of wall if any and whether or not you have a satellite in orbit.

Research - this lets clan mates look at what research you have done.

If you are Gold User your clan mates can also see the following Info. The dropdown list shows GU's as a darker color

History Graphs – allows clan mates to see you graphs (networth, land, buildings, units, attacks made, attacks received and clan points gained)

Statistic Breakdown – Allows clan mates to see your Networth and Turns Breakdown.

5.3 – Province Preferences

The preferences page allows you to change many options specific to your province including color schemes, province details, account details, account password and many gold user only options. This is also where you go to put your account into vacation mode or reset your account; as well as creating/editing your NZ Portal Profile.

The Profile option allows you to change certain details about your province, including your province name which can be changed if you are dead, if the game is between rounds and during the first 48 hours of a round. You can only change province name once every 2 weeks during the round.

Vacation mode puts your province into nuke protection for a specified period of time while you are away. During this time you cannot login to your province. You cannot go into vacation mode in the last 3 days of a round.

Your preferences page is also where you go to activate any gold users you may have purchased or to transfer them to another province via the Gold User Management section. Gold Memberships that have been used cannot be transferred, even if there are one or more rounds left.

5.4 – Community Score

For information on how the Community Score system works, go to the following page:

http://files.nukezone.info/community_score.htm

6.1 - General Clan Information

Clans are a vital element in NukeZone, and if you're not in a clan, join or create one immediately (see the Find Clan section for help joining a clan). Clans can provide protection to their provinces. A clan can have up to 20 members. There are four different types of clan members: Clan Leader (CL), Co-Leader (CO), Clan Trustee (CT), and Normal Member. The clan leader controls everything, and can select up to 5 clan trustees. These CT's can help the CL to control the clan by declaring war/peace, or by editing the clan message. If the CL gets banned or deleted due to inactivity, the CO will become CL, if there is no CO the first CT will become CL. If no CT is available, the province who has been in the clan the longest will become CL. Once a province leaves or is kicked from their clan, that province will no longer be allowed to return to that clan until the next round unless he left within the first 48 hours of the round. Close to the end of a round you are no longer able to join or create clans - this comes into force in the final 7 days.

Clan Leaders

Clan Leaders are the key to success for all clans. A clan must have an excellent leader to keep control and become unstoppable.

Clan Co-Leaders

Available only in a Platinum clan, the Co-Leader has all the same abilities as the Clan Leader except for: Change Clan Leader, Delete Clan.

Clan Trustees

Clan Trustees are almost like the clan leader. They exist to help the clan leader. In a Platinum Clan, the first CT can use the All Clan Message option to instantly send private messages to all clan members. If you are in a Platinum Clan, the CL and CO can set the rights for each single CT.

6.2 - Clan Points

In NukeZone, a Clan has three goals: Increase network, increase clan points and/or increase combo points. Clan points are only gained by attacking in a clan war. You must be in a clan for your province to earn Clan points. Clan points are awarded based on the damage inflicted on the enemy by an attack. The more damage you do, the more points your clan will receive.

When your clan declares war on another clan, you will receive 1-20 points depending on the damage inflicted for the first 48 hours. Then the maximum points you can gain drops by 2 points and continues to reduce by 2 points every subsequent 24 hours to a minimum of 4 points.

If another clan declares on your clan, you will receive 1-10 points when attacking them, again depending on the damage inflicted. In order to gain 1-20 points by attacking them you must declare back - this is known as a mutual war. Once your clan declares back you will have 48 hours of being able to get 1-20 points before the maximum points you can get begin to drop as described above.

If your clan does not declare back you will always get 1-10 points per attack. Note: different rules apply on the size of provinces you can attack depending on the type of war; mutual or one-sided. See 6.3 - Clan Wars for details.

When you kill a province in a one sided war you receive 25 clan points, when you kill a province in a mutual war you receive 50 clan points. Clan points gained from satellites, including for kills, are based on the amount of satellite power used.

When you kill a province of \$10,000 network or lower you do not gain any clan points. However, you still gain 1 kill on your stats record. Each time a clan achieves a bonus level the clan receives a fixed bonus of 300 turns per province and \$25 000 000. The clan bonus money is divided evenly among all clan members, whether or not the clan members are dead or alive. You must be a member of the clan for at least 72 hours to receive a clan bonus.

After your clan's first 5000 points your clan receives a mini bonus worth half a normal bonus. A super clan bonus is awarded at 50 000 clan points, 150 000 clan points, 250 000 clan points and 350 000 clan points etc. and is 1.5 times the regular bonus. A mega clan Bonus is awarded in replacement for every 2nd Super Clan Bonus at 100,000 clan points, 200,000 clan points, 300 000 clan points etc. and is 2 times the regular bonus. Both the turns and the money are increased with these special bonuses.

6.3 - Clan Wars

In NukeZone, when a clan is mad and wants vengeance over another clan, or the members just simply want to earn clan points, they declare war on the other clan. It can be fun and sometimes even be hard. This is why all clans must be at their prime and be prepared for a war at all times. After a CL or CT has declared war, they cannot declare peace for the next 24 hours. In addition, if one clan declares war against another clan, the network attack restrictions are still in place. However, if both sides declare war on each other, the network attack restrictions are removed. Network restrictions always apply the first 24 hours after joining a new clan and if you are using a thief or sniper, even in a mutual war. Clans may resume a war at any time after declaring peace as long as they don't already have 3 current war declarations against other clans; if they do then they must declare peace with at least 1 clan before they are able to resume the war. Once a war is resumed it must last a minimum of 24 hours before peace can be declared again.

6.4 - Clan Forum

Clan Forums are an excellent form of communication for a clan. You and your clan mates can discuss anything you want in there. You can post things like target provinces, ask for help, etc. It is the only forum not moderated by the Administrators and Moderators. The CL and CTs may edit/lock/delete whichever message they want on the Clan Forum.

Gold clans have the additional benefit of the Forum Management tool. This allows the clan leader to organize the clan forums and to give them custom names. It is possible to make a forum that only clan

trustees can visit or a read-only forum.

6.5 - Clan Tag

Clan tags are used to represent what clan a province is in. This is what it looks like: [TAG]Province.

6.6 - Clan Pages

By clicking the Clan link, you come to a page with several links dealing with your clan. Depending on if you are the CL, CO or a CT, some links might be crossed out. This means you do not have access to these areas. Here is all the information about each Clan Page.

Properties

Only the Clan Leader or CO can adjust the clan properties. In the properties page, the CL or CO can add or edit the clan name, clan tag, clan password and the location of the clan logo. Up to five CT's may also be selected from this page. The CL or CO may also choose to restrict shared military information for all new members for a period of time. Valid settings for this option are: None (no restrictions), 12 hours, 24 hours, 36 hours, 48 hours and 72 hours.

Send Aid

All members of the clan may access this page. Before you can send aid you must specify the receiver and enter the amount of money to send, and then press the Send Aid button. You can only send 1/3 of your available amount of money 3 times a day. Target province networth may not be larger than yours. You cannot send or receive aid when in nuke protection. Sending aid also costs you a 'tax' of 1 turn and 25% of the money sent, unless you have 100% banking research, where the 25% charge is removed.

Invite Player

Only the CL, CO and CT's can invite other provinces to join the clan. The networth of the other province does not matter. Mass inviting is not accepted. A clan can have a limit of 20 players including the CL. The CL or CO can create a short custom message which is included with the invitation sent to a province.

Clan Information

All members of the clan may access this area. On this page you can find a list of all members of the clan and their respective clan points acquired. Everything you see on the clan page is what everyone else sees except the amount of clan points a member has acquired.

Statistics Central (Platinum Clans only)

All clan members can access this page. This displays useful statistics including a Clan Overview, Clan Statistics and War History. The Clan Overview is updated on a real time basis and includes Last Login, Last Attack, Turns, Logins Per Day (LPD), Attacks Per Day (APD), Points Per Day (PPD). The Clan Statistics are updated every 6 hours and displays the province with most/least of the following: attacks made, attacks suffered, missiles sent, kills, times killed, clan points, aid sent, land, networth, units, buildings. The War History provides information about the clan's previous wars.

Spy Reports (Platinum Clans only)

All clan members have access to this page. The Spy Report page is separated into clans and clanless provinces. Only the CL, CO and CT's are able to delete the reports.

Clan Wars

All members have access to this area. This page displays a list of the clans that yours has currently declared war against; as well as the clans that have currently declared war against yours. This page also displays all clans you have declared peace on in the last 10 days.

Declare War/Peace

Only the CL, CO and CT's may access this page. They can declare war against another clan by entering the Clan ID of the clan they want to go to war with (must be in Networth Range of entire Clan Networth). If your clan has declared war against another clan more than 24 hours ago, your clan's CL, CO or CT can declare peace with the other clan by typing in the other Clan's ID in the text box provided.

Clan Message

Only the CL, CO and CT may access this page. They can post Clan Messages, which appear in the main page when a clan member logs in to NukeZone. If you have a gold clan, the CL, CO or CT can preview the message before posting it to check for errors. This is a great way to say something important and assure it reaches all clan members immediately. You can use certain G-Codes in the clan message - gold clans have additional G-Codes that they can use. G-Codes are explained further in section 7.2.

Clan Poll (Gold/Platinum Clans only)

Only the CL, CO and/or a CT's can access this page. They are able to create or edit the clan polls from

here. Only one clan poll can be created within a 24 hour period.

Clan Poll Archive (Gold/Platinum Clans only)

All members can access this page. This is where the archive of previous clan polls is stored.

Clan Forum Management (Gold/Platinum Clans only)

Only the CL and CO can access this area. This allows the CL or CO to change the forum settings and create new clan forums. The CL and CO of a Platinum Clan can give CT's the ability to access this area.

Domain Management (Platinum Clans only)

Only the CL or CO has access to this area. Here the CL or CO can request a custom NukeZone domain (tag.nukezone.info – where 'tag' is the clan's existing tag) and sub-domains for their clan homepage.

Receive Clan Bonus

All members can click on this to receive the Clan Bonus after the clan has reached 5,000, 10,000 and further multiples of 10,000 Clan Points. This link is enabled within 30 minutes after your clan has reached the Clan Bonus. You will receive a local event when this page has been enabled. If you do not go to this page to receive the bonus within 3 days of it being enabled you will automatically receive it. If you are in vacation mode at the time your clan receives a bonus then you will not receive a share of it. You need to be in the clan for 72 or more hours to be able to receive the bonus.

Clan Recruiting

Only the CL, CO and CT's have access to this area. This is where a clan can look for new members and specify the criteria which potential members must meet.

Find New Clan

Everyone has access to this area. This is where members can look for a new clan and specify the criteria which a potential new clan must meet.

Change Clan Leader

Only the CL may access this page. If a CL wants to give up the leadership, he can appoint a new leader of the clan. The old CL will then take over the new CL's old position.

Leave Clan

All members may access this page. If a member of a clan chooses to leave the clan, they can leave the clan immediately. However, The amount of time that provinces must wait after leaving a clan before joining another now increases based on how many clans they have already joined during that round. For 1-3 clans it remains at 24h and 4-5 clans is now 48h; then for 6+ clans the amount of time will increase at regular intervals.

Delete Clan

Only the CL may access this page. If the CL chooses to delete the clan, he may do so by clicking on Delete Clan.

6.7 - Clan Invitations

The CL, CO and CTs can view a complete list of pending clan invitations. They may also cancel any of these invitations; however invitations automatically expire after 7 days.

6.8 - Extended Military Information

Members of Gold Clans can choose to share their Extended Military Information, giving their clan mates the opportunity to view additional information about their province.

6.9 - Clan Status

Clans have a Status rating of: Brave, Fearless, Neutral, Fearful or Cowardly depending on the size of the clan they are declaring on. The larger the clan they declare war on, the more their status will rise to the positive end of the scale. Adversely, the smaller the clan that is declared upon, the more their status will fall to the negative end of the scale. This system is not in effect when you declare back on a clan. However, it will have a small positive affect, hence declaring back is a brave action. The clan status will affect the points you gain in a clan war: Brave (+20%), Fearless (+10%), Neutral (0%), Fearful (-10%) and Cowardly (-20%). War declarations during the first 10 days of a round do not have an effect on clan status, only declarations after that time will cause the clan status to change.

7.1 – Medals and Clan Awards

At the end of each round, 11 different medals are given out to the leaders of each area.

Medal of Honor - Most clan points gained by a province
 Medal of Growth - Highest network
 Medal of Death - Killed most provinces during clan wars
 Medal of Earth - Highest Land Area
 Medal of Courage - Performed most attacks
 Medal of Thievery - Most money stolen
 Medal of Knowledge - Quickest to research all sciences
 Medal of Mass Destruction - Most total NW damage made using missiles (excluding Tomahawk Missiles)
 Medal of Superiority - Province who first reaches 2500 clan points, counting from the beginning of the round and based on Clan Points Gained (total).
 Medal of Development - Province who first reaches \$2,500,000 network and keeps it for 48 hours.
 Medal of Accomplishment - Province who wins both the Medal of Honor and Medal of Superiority in the same round.

United Boundaries – Clan with the highest amount of land overall
 United Arms – Clan with the most attacks made during clan wars
 Golden Shotgun – First clan to reach 10000 points.
 Points Champion – Awarded to the first 3 clans in the points toplist (Gold, Silver and bronze)
 Network Champion – Awarded to the first 3 clans in the Network toplist (Gold, Silver and Bronze)
 Combo Champion – Awarded for the first 3 clans in the Combo toplist (Gold, Silver and Bronze) **

***Combo list: Combo points will be awarded to the top 100 clan rankings for points and for network. Clans will gain 1-100 points (rank #1 giving 100 points and rank #100 giving 1 point - anything beyond the rank of #100 receives zero points). Points are awarded daily as of midnight CET (server time), if the clan is in both top lists they will receive an additional 10% more points. So the maximum combo points a clan can obtain each day is 220 Combo points (100 for being number 1 in the Points-toplist, and 100 for being number 1 in the NW toplist + the 10% they get for being in both toplist = 20).*

7.2 - G-Code and Auto-Linking

The following G-Codes can be used in private messages, clan messages and on the forums. Please note that all G-Codes are case sensitive, except the G-Codes used in Clan Messages. If auto-linking is enabled all your entered URLs will automatically be transformed into clickable hyperlinks. Easy and simple link creation, simply enter the URL! However your URL must start with one of the following: http://, https://, ftp:// or www.

Available Tags in Private Messages:

Tag	Output
[USERPROVINCE]	Inserts the reader's province name. Works in both subject and message body.
[USERID]	Inserts the reader's province id. Works in both subject and message body.
[NAME]	Inserts the reader's name. Works in both subject and message body.
[B] [/B]	Text between these tags is displayed in bold. Works only in message body.
[I] [/I]	Text between these tags is displayed in italic. Works only in message body.
[U] [/U]	Text between these tags is displayed underlined. Works only in message body.

Available Tags in Clan Messages (Only available for Gold/Platinum Clans):

Tag	Output
[B] [/B]	Text between these tags is displayed in bold.
[I] [/I]	Text between these tags is displayed in italic.
[U] [/U]	Text between these tags is displayed underlined.
[S] [/S]	Text between these tags is displayed with a line through the middle the text.
[HR]	Inserts a horizontal line.
[CENTER] [/CENTER]	Text between these tags is displayed center aligned.
[LEFT] [/LEFT]	Text between these tags is displayed left aligned.
[RIGHT] [/RIGHT]	Text between these tags is displayed right aligned.
[COLOR=name] [/COLOR]	Text between these tags is displayed in specific

	color. See below for available font colors.
[FONT=name] [/FONT]	Text between these tags is displayed in specific font. See below for available fonts.
[SIZE=number] [/SIZE]	Text between these tags is displayed in specific size. See below for available font sizes.
[LAST_EDITED]	Example output: October 5th, 2002 01:45 CET
[EDITED_BY]	Name of CT/CL who edited the message.
[CLAN_POINTS]	Inserts total amount of current clan points. *
[NEXT_BONUS]	Inserts amount of points required to reach next bonus. *
[NW_RANK]	Inserts the current Networth rank of your clan. **
[PTS_RANK]	Inserts the current Points rank of your clan. **
[CBO_POINTS]	Inserts the Combo Points of your clan.
[CBO_RANK]	Inserts the current Combo Points rank of your clan.
[24H_CLAN_POINTS]	Inserts clan points gained over 24 hours.
[24H_PTS_RANK]	Inserts ranking over 24 hours in clan points gained.

* Note: With the [CLAN_POINTS] and [NEXT_BONUS] tags, if you wish to have a "p" after the points (e.g. "We have this many clan points: 2500p"), the "p" must be added following the tag [CLAN_POINTS]p. You can enter anything after the tag, not just the "p", so could for example enter "[CLAN_POINTS] points".
** These values are updated once every 6 hours.

Available Tags on the Forums:

Tag	Output
[B] [/B]	Text between these tags is displayed in bold. This tag does not work in the topic name.
[I] [/I]	Text between these tags is displayed in italic. This tag does not work in the topic name.
[U] [/U]	Text between these tags is displayed underlined. This tag does not work in the topic name.

Available Special Tags on the Clan Forums (Only available for Gold/Platinum Clans) *:

Tag	Output
[S] [/S]	Text between these tags is displayed with a line through the middle of text. This tag does not work in the topic name.
[IMG]url[/IMG]	Inserts an image. Specify the image source by entering the full url between these tags.
[COLOR=name] [/COLOR]	Text between these tags is displayed in specific color. (see below for valid colors)
[FONT=name] [/FONT]	Text between these tags is displayed in specific font. (see below for valid names)
[SIZE=number] [/SIZE]	Text between these tags is displayed in specific size. (see below for valid sizes)

* Only available if your CL has enabled it on the Clan Forum Management page.

Available Font Colors:

Aqua, black, blue, fuchsia, gray, green, lime, maroon, navy, olive, pink, purple, red, silver, teal, white, yellow. In addition, you may also enter any hexadecimal color code. Please note that the # sign is required when doing so.

Available Fonts:

Arial, Comic Sans, Courier New, Georgia, Helvetica, Impact, Times New Roman, Verdana

Available Font Sizes:

The number argument can still be any number between 0-6, but you may now also specify any custom size you want by adding "pt" after the number. So 16pt means size 16. The old style 0-6 is translated as follows: size 0=8pt, size 1=10pt, size 2=12pt, size 3=14pt, size 4=16pt, size 5=18pt, size 6=20pt.

7.3 - Extended G-Codes

As a Gold Clan, not only do you have the ability to use the regular G-Codes, you also get an extended

version of it. It can only be used in the clan message and can be used by Gold Clans only. A CL/CT can easily target a province and/or a clan by using these codes. The Extended G-Codes are not case-sensitive. A clan message can contain a maximum of 25 Extended G-Codes.

Available Extended G-Codes in Clan Messages (Only available for Gold/Platinum Clans):

Tag	Output
[P=id]	Creates a link to the specified province..
[C=id]	Creates a link to the specified clan.
[A=id]	Creates a link to the aid page for the specified province
[R=id]	Creates a link to the specified enemy province's spy report.
[CR=id]	Creates a link to all of the specified clan's spy reports.
[PNW=id]	Inserts the specified province's name and network and creates a link to the attack page. The network will be made bold if the enemy is within the viewer's attack range.
[NW=number]	The number must be a valid network value. The network is formatted and will be made bold if the enemy is within the viewers attack range.
[URL=link]text[/URL]	Turns the "text" into a hyperlink to click on. Valid "link" types are http, https, ftp, irc

Using this feature is fairly simple. While typing a message, a CL/CT can target a province by typing: [P=ProvinceID] or [C=ClanID]. By doing so, this converts the ID Number into your target's Province or Clan Name and ID Number as well as creating a clickable link to the province/clan information page.

Example: A CL/CT types in, "...War. Everyone attack this guy, [P=123]!" The G-Code converts this to, "...War. Everyone Attack This Guy, FakeProvince (#123)!", where the "FakeProvince (#123)" part is a clickable link that brings you to this enemies province information page. The same is done with clan targets.

8.1 - Technical Support

If you need technical support please contact our Customer Support by sending an in-game message to *Customer Support* (found in your contact list when you write a message) or simply post a message in the *Technical Support and Bug Reports* forum. Links to the multi report system, the EULAs and other important resources can be found by clicking the *help* link in the top right.

8.2 - Ideas and Suggestions

If you have an idea or a suggestion, please post it in the *Suggestions and Ideas* forum.

8.3 - Bug Reporting

Please report all bugs in the *Technical Support and Bug Reports* forum. Bugs that might affect the security or integrity of NukeZone and the server should NOT be posted in public; please inform the Customer Support directly by using one of the above-mentioned ways.

8.4 - IRC

NukeZone has its own IRC channel on the QuakeNet network. This is the place where the NZ Crew and the most experienced players hang around. Everyone is welcome!

Network: QuakeNet

Server: irc.quakenet.org

Channel: #NukeZone (for general NukeZone chat)

#NZSupport (for any game related problems/questions you might have)

1.1 - Overview

NukeZone is a free, strategic text-based online game. The game is optimized for Internet Explorer 5.0 and above with a screen resolution of 800x600 or higher. The game will also work in newer versions of other browsers such as Opera and Netscape Navigator; however, while some features may not operate properly, the game engine functions correctly. It is strongly recommended that you use Internet Explorer 5.0 and above. Please click [here](#) to download the latest Internet Explorer from Microsoft's homepage.

NukeZone is played in rounds lasting approximately 3 months each. Round dates can be found on the login page. At the end of each round, winners in various categories are given medals and all provinces are reset and the game starts over.

If you find any bugs or any other errors in the game, please report them ASAP in the *Technical Support and Bug Reports* forum.

1.2 - Getting Started

You start with 125 turns and \$250,000, then the first time you login for the round you get awarded with an extra 175 turns and \$500,000 (totaling in 300 turns and \$750,000), the extra bonus is only available for provinces created before the start of the round and those created in the first 48 hours of a round. It is up to you to determine what to purchase, while some prefer to use a more offensive strategy, others will choose to adopt a more defensive strategy. Money is required to purchase buildings and units. Turns are required to purchase buildings (jump to *3.1 - Buildings* for more info), increase research (jump to *3.10 - Research* for more info), or attack (jump to *4.1 - General Attack Information* for more info). You need buildings to survive – when all your buildings are destroyed you will die. When you have died you spend 24 hours dead before starting over in nuke protection again – death results in a loss of all units, land, research, money (including in the bank) and turns except for the starting defaults.

There are several ways to get more money although you get a fixed number of turns:

- By default you receive 1 turn every 20th minute and \$2000 each hour. You can research Money Production to increase your income up to a maximum \$26,000/hour.
- Join/create a clan and fight other clans (that your clan is at war with) in order to receive clan bonuses (300 turns and \$25,000,000 for each 10,000 points; the clan bonus money is divided evenly among all clan members).
- Tell your friends about this game (you receive a 10 turn bonus for each friend that signs up and plays for a while). Please note that to receive the bonus your friend must sign up with the same email as the invitation was sent to.

Note: You will not receive any additional turns every 20 minutes if you already have more than 300 turns. However, you can receive the clan bonus during this time. Please use some of your turns in order to start receiving turns every 20 minutes again.

1.3 - Starting Bonus

You can select a starting bonus from the following list, which you must claim while in Nuke Protection.

- **Offensive**
Max morale capacity changes to 110%, plus an additional 45 turns.
- **Defensive**
All buildings get a 15% life boost, plus 2 extra sciences per turn, plus 5,000 m2 land.
- **Finance**
Hourly income increased by 10%, bank capacity is raised by 50% and \$250,000 money.
- **Shipping**
Market and missile orders ship 25% faster, plus ability to choose exact arrival time (up to 12 hours delayed), plus 3,000 m2 land and \$150,000 money.

The starting bonus you receive after you die is based on your networth 72 hours before you were killed. The bonus will increase gradually between \$100 000 and \$1 500 000 reaching a maximum increase of 300% at \$1 500 000. The increase will improve more dramatically at lower networth and decrease slowly as you approach \$1 500 000. The increases will not be in effect if you reset your account.

2.1 - Game

Main - Province info, power status, news, current server time, nuke protection options, starting bonus

Attack - Regular attack, ground attack, air and sea attack, launch missile, send spy/spy plane, send thief, send sniper

Research - Research sciences

Headquarters - View your Headquarters bonuses, manage Headquarters Operations and your army's General

Explore - Explore or Sell additional land.

Market - Buy/sell merchandise

Bank - Deposit/withdraw money

Clan - Join/create clan, clan properties, invite/kick players, manage clan wars, leave/delete clan, recruiting system etc

2.2 - Build

Buildings - Build/demolish buildings

Sea Units - Build sea units

Air Units - Build air units

Vehicles - Build vehicles

Infantries - Train infantries

Missiles - Order missiles, view arrival dates

Satellites - Build/use Satellites

2.3 - Show

Local Events - Shows local events

Global Events - Shows global events, can be filtered by incoming, outgoing or internal.

Attack Events - Shows local outgoing events (Gold Users only).

Search Events - Allows a search of local and global events.

Enemy List - Links to enemy list (Gold Users only).

Status - Information, military info, military settings, history graphs (including Gold User only info) and several province statistics, rank from previous round

All Provinces - Shows all provinces within your attack range

All Clans - Shows all clans

Top List - Top Provinces, Top Clans (Networth), Top Clans (Points)

Search - Search for provinces by province id or province name, search for clans by clan id or clan name/tag

Clan Forum - A direct link to your private clan forum (only visible if you're a member of a clan)

Forum - NukeZone forums

Online Shop - Purchase a Gold user or Gold/Platinum clan

2.4 - NZ Portal

News - Displays current news items

Articles - Displays current articles

Profiles - Displays player profiles

2.5 - Other

Inbox - Display your inbox (private messages that have been sent to you)

New Message - Compose a new message

Preferences - Options, edit profile, change colors, change password, delete province, reset province, create/edit your NZ Portal profile etc

Contact Us - Crew contact information, credits

Logout - Logout from NukeZone

3.1 - Buildings and Walls

Land is nice to have, but without buildings and infrastructure it is of little use. NukeZone offers a variety of buildings to place on your land. Each building has some inherent benefits that allow your province to grow or specialize. It is up to you to determine how to fill your land, and there is no perfect or ideal balance for growth. As well, each building uses a specific amount of power, and power can only be provided by power plants. If you have low power, your defensive buildings, missile silos, research labs, command centres and headquarters buildings won't work, meaning you will be more susceptible to attack, will not be able to launch missiles or be able to perform scientific research. The defense values of your buildings drop by 25% when you are low on power and you will be unable to use spy planes, spies, thieves, snipers and satellites. If you are short on land, either explore for more or attack someone to try and steal some. The amount of unused land improves the defense of your buildings by up to a 40% boost for 25% unused land. It takes 20 m² to build each building with the exception of Headquarters which take 1000 m².

Available Buildings:

Name	Price	Description
Research Lab	\$2,000	Gives 1 extra science/turn to research for each 50

		research labs. Attack: 0, Life: 200 Power usage: 2000
Missile Silo	\$22,000	Houses 1 missile. Attack: 0, Life: 500 Power usage: 10000
Headquarters	\$250,000 25 turns and 1000 m2 of land	Improves various abilities for your province† Attack: 0, Life: 5000 Power Usage: HQ1: 25,000; HQ2: 50,000; HQ3: 100,000; HQ4: 150,000; HQ5: 250,000
Command Centre	\$2,200	Supports 5 special units††. Attack: 0, Life: 120 Power Usage: 1800
Shipyards	\$1,100	Houses 5 sea units. Attack: 0, Life: 90 Power usage: 700
Airfield	\$900	Houses 5 air units. Attack: 0, Life: 85 Power usage: 600
War Factory	\$1,200	Houses 10 vehicles. Attack: 0, Life: 80 Power usage: 900
Barracks	\$700	Houses 20 infantries. Attack: 0, Life: 60 Power usage: 650
Power Plant	\$450	Produces 4500 power units. Attack: 0, Life: 85
Advanced Power Plant	\$1,400	Produces 15000 power units. Attack: 0, Life: 40
Torpedo launcher	\$1,850	Gives you a sea defense. Attack: 350, Life: 280 Power usage: 700
SAM Site	\$1,400	Gives you an air defense. Attack: 265, Life: 240 Power usage: 600
Missile Turret	\$1,500	Gives you a vehicle defence. Attack: 300, Life: 265 Power usage: 400
Machinegun Turret	\$1,200	Gives you an infantry defence. Attack: 190, Life: 290 Power usage: 275
Anti-Missile System	\$5,000	Gives you a missile defense†††. Attack: 0, Life: 400 Power usage: 1700

† Headquarters Building - You may only own 5 Headquarter buildings at any time and you may only build one per 72 hour period. The Headquarter building cannot be main targeted in an attack, but can be destroyed. The power usage is per building and is cumulative, therefore if you own 2 buildings you will use 25,000 + 50,000 for a total power usage of 75,000. Headquarters abilities are cumulative and in the order listed. For example, when you have three headquarters, you will have ALL of the bonuses provided by numbers 1, 2, and 3.

Headquarters #1

- * 75% chance of tracking origin of missiles
- * 10% attack boost to attacking units
- * 1 additional science per turn when researching

Headquarters #2

- * 25% increase to land exploration
- * Implements the Coastal Defense System (5% increased protection against air and sea attack)
- * 1 additional science per turn when researching
- * Gives an additional \$1000/hour

Headquarters #3

- * 50% increase to land exploration
- * Unlocks the sabotage missions for the Spy unit giving a 50% chance of success.
- * Increases the Coastal Defense System to 10% protection.

- * 1 additional science per turn when researching
- * Gives an additional \$1000/hour
- * Ability to Main Target individual defense buildings.

Headquarters #4

- * Unlocks the Headquarter Operations
- * Unlocks the General unit with 1 life/hour regeneration rate.
- * Missile accuracy improved with 10%
- * Increases the Coastal Defense System to 15% protection.
- * 1 additional science per turn when researching
- * Improves sabotage missions chance of success to 65%
- * Gives an additional \$1000/hour
- * Improved accuracy for Main Targeting by 2x.

Headquarters #5

- * Enables you to own and utilize two satellites simultaneously
- * 1 additional science per turn when researching
- * Improves sabotage missions chance of success to 80%
- * 10% defense boost for defending units when attacked
- * Increases the General unit to 4 life/hour regeneration rate.
- * Gives an additional \$1000/hour
- * 75% land exploration bonus.

Headquarter Operations

Four Headquarter buildings are required to run Headquarter Operations. Headquarter Operations cost 2 turns and two hourly fees to activate, and then cost a fixed fee per hour, automatically taken from your income. A maximum of half your income may be used for HQ Operations. If your fourth Headquarters is destroyed, the operation will cease functioning. HQ Operations auto deactivate if your account remains inactive for more than 5 days(when you stop receiving your hourly income).

- * \$1000/hour: 100% chance of tracking origin of missiles and special units
- * \$2000/hour: Increased defense against incoming sabotage missions by 50%
- * \$3000/hour: Increased defense against incoming EMP attacks by 50%
- * \$4000/hour: 2 additional life per hour for the General unit.
- * \$5500/hour: Defense buildings do 25% additional damage.
- * \$6000/hour: Increased defense against incoming missile attacks by 25%
- * \$10000/hour: 5% additional satellite power per hour

General Unit

Four Headquarter buildings are required to get access to the General unit. The unit arrives 72 hours after the fourth HQ building is constructed and starts with 100 life. It gains 1-6 life per hour depending on number of headquarters and HQ Operations active. The General can be sent in battle and can be killed in action, and a new one then arrives 72 hours later. When the General unit arrives you will choose a name for it from a list and get to choose one of the following enhancements listed below. Whenever you include the General unit with an attack you get the chosen enhancement. The General unit is idle when defending and does not provide enhancements for defending units or buildings.

Enhancements:

- * 10% additional attack
- * 10% additional defense
- * Avoids walls and the Coastal Defense System provided by the Headquarters 2-4.

General Abilities:

- * 10% attack boost (cost: 50 life)
- * 10% defense boost (cost: 50 life)
- * Double money/land gained in combat (cost: 50 life)
- * 50% improved main targeting (cost: 75 life)
- * Spy Report units after-attack information (cost: 100 life)
- * Spy Report buildings after-attack information (cost: 100 life)
- * Double damage in combat (cost: 500 life).
- * Last Stand: Requires at least 200 life, and doubles the attack of your defending units and buildings. It can not be activated during the last 3 days of the round.

†† Special units are; Spy Plane, Spy, Thief and Sniper.

††† Anti-Missile System defense varies based on the amount of used land. Anti-Missile Systems provide a

maximum of 50% protection without HQ Operation. 750 Anti-Missile Systems will provide 50% protection, no matter the amount of used land you have.

Available Walls:

Name	Price	Description
Barbed Wire	\$0	Provides 0% vehicle and infantry defense. Requires: none
Sandbag Wall	\$50,000*	Provides 5% vehicle and infantry defense. Requires: Barbed Wire
Concrete Wall	\$250,000*	Provides 10% vehicle and infantry defense. Requires: Sandbag Wall
Laser Fence	\$500,000*	Provides 15% vehicle and infantry defense. Requires: Concrete Wall

* Lowest price (the price increases with the more land you own). Walls reduce the strength of the attacking force by a certain percentage, based on the type of wall.

3.2 - Sea Units

To build sea units, you need shipyards, which house 5 sea units. Sea units can only be combined with air units in an "Air and Sea Attack".

Available Units:

Name	Price	Description
Submarine	\$2,300	Attack: 180, Life: 170 Can attack: Sea Units Can carry: 2 Tomahawk Missiles
Stealth Boat	\$700	Attack: 50, Life: 70 Can attack: Sea Units, Infantries
Destroyer	\$1,500	Attack: 70, Life: 60 Can attack: Vehicles, Infantries, Buildings
Cruiser	\$2,000	Attack: 85, Life: 105 Can attack: Sea Units, Air Units, Buildings
T-2000 Hovercraft	\$800	Attack: 70, Life: 35 Can attack: Air Units, Buildings

3.3 - Air Units

To build air units, you need airfields, which house 5 air units. Air units can be combined with all other units when attacking.

Available Units:

Name	Price	Description
F-22 Raptor	\$1,075	Attack: 65, Life: 55 Can attack: Sea Units, Air Units
F/A-18 Super Hornet	\$750	Attack: 55, Life: 25 Can attack: Air Units, Buildings
F-35 JSF	\$925	Attack: 55, Life: 45 Can attack: Air Units, Vehicles
B-2 Stealth Bomber	\$1,500	Attack: 130, Life: 55 Can attack: Buildings
RAH-66 Comanche	\$800	Attack: 35, Life: 40 Can attack: Vehicles, Infantries, Buildings
SH-60 Sea Hawk	\$700	Attack: 70, Life: 40 Can attack: Sea Units
Aurora Spy Plane	\$15,000	Spies on enemy buildings. Attack: 0, Life: 200 Can attack: None
CH-46 Sea Knight	\$1,000	Enables you to transport 15 infantry per unit in a Sea and Air attack, while boosting transported infantries attack by 50% and lowering their life by 15%. Attack: 25, Life: 135

		Can attack: Buildings
--	--	-----------------------

3.4 - Vehicles

To build vehicles you need war factories, which house 10 vehicles. Vehicles can be combined with air units and infantries when attacking.

Available Units:

Name	Price	Description
Humvee	\$500	Attack: 60, Life: 20 Can attack: Infantries
Hover Tank	\$600	Attack: 35, Life: 20 Can attack: Sea Units, Infantries, Buildings
Heavy Artillery	\$1,000	Attack: 95, Life: 40 Can attack: Buildings
SAM Tank	\$700	Attack: 60, Life: 30 Can attack: Air Units
M1 Abrams Tank	\$1,250	Attack: 65, Life: 60 Can attack: Vehicles, Buildings

3.5 - Infantries

To train infantries you need barracks, which house 20 infantries. Infantries can be combined with air units and vehicles when attacking.

Available Units:

Name	Price	Description
Thief	\$5,000	Steals money from the enemy base and protects your base from possible enemy thieves. Attack: 0, Life: 5 Can attack: none
Spy	\$3,000	Spies on enemy units, protects your base from possible enemy spies and carries out Sabotage Missions*. Attack: 0, Life: 5 Can attack: none
Sniper	\$5,000	Attack: 125, Life: 65 Can attack: Spies, Thieves, Snipers Note: Snipers have 5 times less defense against other snipers
Navy Seal	\$900	Attack: 45, Life: 25 Can attack: Sea Units, Buildings
Heavy Infantry	\$400	Attack: 20, Life: 15 Can attack: Air Units, Infantries, Buildings
Machine Gunner	\$350	Attack: 25, Life: 15 Can attack: Infantries
Grenade Soldier	\$425	Attack: 35, Life: 10 Can attack: Vehicles

**Sabotage Missions* - Spies have the option to sabotage missiles, power plants, and satellites. The sabotage option is unlocked and has a 50% chance of success with 3 Headquarters, 65% with 4 Headquarters and 80% with 5 Headquarters.

Missiles: Sabotages 1 missile and may be in effect for up to 10 days or until the missile is launched. If the missile is launched within the 10 day period and the sabotage is successful, it will blow up in the enemy's base prior to launch causing 20% damage. The enemy will still be charged full turns and morale for the attempted launch. The maximum amount of missiles that may be sabotaged for any enemy is 5 at any one time.

Power Plants: If the power plant sabotage option is chosen and the spy is successful it will disable 10% of the enemies' power plants for 48 hours. The maximum amount of power plants that may be sabotaged for any enemy is 50% at any one time.

Satellites: If sabotage is successful the enemies' satellite power is reset to 0% for 10 hours before power begins the 10% hourly increase.

3.6 - Special Units

Special units are the spy plane, spy, thief and sniper. In order to own these units you must have

Command Centres. You can have a maximum of 200 Command Centres meaning you are limited to no more than 1000 special units. Special units cannot be used when you have low power. You may only buy or sell 100 special units per day in all market transactions; e.g. buying 50 and selling 50 would be the maximum special unit transactions for that day.

3.7 - Market

The market allows you to buy units without using turns to build them. However, units on the market are more expensive to buy and because they are not built in your province, they take time to arrive. Depending on the research you have and how much you are willing to pay you can get units from the market in between 3 and 12 hours. You can cancel an incoming order, which returns 75% of the regular market price (money spend on accelerated shipping will not be returned after canceling an order).

You can pay extra to reduce the time it takes for your units to be delivered – paying double the price allows your units to arrive in half the time. Accelerated shipping for missiles costs 1.5x the price. You can also research the Shipping Time Science so you get units from the market faster.

The market also allows you to sell your units to recoup some of their cost if you no longer want them.

3.8 - Missiles

To build missiles you need missile silos, which house 1 missile. A missile is an expensive but very powerful attack option. The chance of hitting the enemy base depends on two things: your missile accuracy and your enemy's missile defense. Missiles cost 5 turns to build and 4 turns to launch. They make use of their own Missile Power (5% received per half hour) and do not use morale. 100% Missile Power is required to launch missiles. Accelerated Shipping mode for missiles cost 1.5 times the standard price.

Tomahawk Missiles do not require a missile silo to build or to launch. Submarines are required to both house and launch the Tomahawk Missiles. As such you must send them with an air and sea attack with the appropriate amount of submarines. Tomahawks are not affected by your missile accuracy although 50% is needed before you may build them but they can be shot down. A submarine can hold 2 Tomahawk Missiles. 3 Tomahawks may be built for every turn and take 6 hours to build. You can send 4 Tomahawk missiles for every \$10,000 Network worth you send in the attack.

Anti-Missile Systems, SAM Sites, SAM Tanks and Cruisers can defend against Tomahawk Missiles. Sam Tanks and Cruisers provide equal protection against Tomahawks while SAM Sites provide 3 times the protection of SAM Tanks and Cruisers, and Anti-Missile Systems provide 5 times the protection. The default chance of tracking missiles is 25%, however this is raised to 75% when 1 or more Headquarters Building is owned.

Available Missiles:

Name	Price	Description
Nuclear Missile	\$60,000	Attack: 500,000 Can attack: All Buildings and Units
Chemical Missile	\$35,000	Attack: 250,000 Can attack: Sea Units, Air Units, Vehicles
Biochemical Missile	\$30,000	Attack: 165,000 Can attack: Infantry
EMP Missile*	\$20,000	The EMP Missile initially disables 20% of the enemy's power supply decreasing 5% per hour over a 4 hour period. You do not receive clan points for using this missile.
Tomahawk 250C Missile	\$4,000	Attack: 5000 Can attack: Buildings
Tomahawk 500C Missile	\$8,000	Attack: 8000 Can attack: Buildings and Vehicles

* EMP damage is removed from the target province by 5% each hour. 2 EMP missiles will disable 40% of the targets power if they hit and the effect on the province will then reduce by 5% each hour. It would therefore take 8 hours before all EMP damage was removed.

3.9 - Satellites

There are 6 different satellites available for you to build. All satellites require 50% in *Satellite Technology* before they can be built. Each satellite costs 20 turns and takes 48 hours to construct. After you have built the satellite, you must launch it into space. It takes 1 hour for a satellite to reach earth's orbit, and it can then stay up for 14 days until it crashes down and burns up in earth's atmosphere. You can increase the time your satellite stays in orbit by continuing to research satellite technology over 50%. You get an extra

days orbit for every additional 10% research. A satellite will stay in orbit for the period researched at the time of launch, research while in orbit will not effect that satellite.

Your satellite power increases by 10% each hour and all satellites cost 5 turns to use. Satellites are not operational when you have low power although a previously launched Stealth Satellite will continue to function if it was activated while you had power. You can own any two satellites concurrently, even two of the same kind providing you have all 5 Headquarters. However, you may only have one satellite from each group (offensive and defensive*) in orbit at any one time. If you need to launch another satellite and your current satellite(s) have not yet crashed, you can demolish your satellite(s) for 20% of its/their original cost.

Available Satellites:

Name	Price	Description
EMP Satellite**	\$600,000	The EMP Satellite disables X% of the enemy's power supply over X amount of hours. Requires at least 25% satellite power, 100% satellite power = max effect damage (the more power, the more damage). Max effect: 30%, 6 hours
Laser Beam Satellite	\$1,000,000	Requires at least 25% satellite power, 100% satellite power = max attack damage (the more power, the more damage). 95% hit rate. Max Attack: 9000 Can attack: Buildings
Orbital Research Laboratory	\$350,000	Gives you 5 additional sciences per turn when researching. The 5 additional sciences are given in addition to the current number of sciences per turn you may be receiving from your research labs.
Spy Satellite	\$500,000	Spies on the enemy base. Requires 100% satellite power. You will receive this information: - Approximate number of enemy buildings and units. - Unused enemy land and power status.
Stealth Satellite	\$450,000	When activated, your base will be hidden from enemy spies, thieves, snipers, laser beam satellites and EMP satellites. It hides your base for 7 hours. Requires 100% satellite power.
Anti-Missile Satellite	\$700,000	Gives you instant 100% protection. Each time it shoots down a missile 50% satellite power is used. If you don't have enough satellite power, the satellite will not be able to shoot down any missiles until you get more satellite power.

*

Offensive Satellites:

Laser Beam Satellite
EMP Satellite
Spy Satellite

Defensive Satellites:

Orbital Research Laboratory
Stealth Satellite
Anti-Missile Satellite

**EMP damage is removed from the target province by 5% each hour. 1 hit at full power with the EMP satellite will disable 30% of the targets power and the effect on the province will then reduce by 5% each hour. It would therefore take 6 hours before all EMP damage was removed.

3.10 - Research

There are 10 different sciences available for you to research. Researching sciences requires turns. The number of turns needed is based on your amount of *Research Labs and HQs*, and the more you own, the more sciences per turn you get when researching. You will be able to research between 1 and 20 sciences per turn, depending on how many *Research Labs* and HQs you own. You can get up to 25 sciences per turn by getting an Orbital Research Laboratory.

Available Research:

Bank Management increases the amount of money you can deposit into the bank up to a total of \$5,000,000. Also, for every 10% of research the basic interest rate increases by 0.1%. When 50% of this research is completed the option to withdraw money after 24 hours with no interest and a 25% fee is enabled; when it is 100% complete the 25% fee is removed (2000 sciences). At 100% researched the fee

of 1/4 the money is removed when sending aid.

Engineer Effectiveness increases the amount of buildings you can build per turn. The maximum limit is 15 buildings per turn (2500 sciences); default is 5 buildings per turn.

Market Shipping Time reduces the time taken for items ordered from the market to arrive. The maximum limit is 50% (1800 sciences).

Market Discount gives you discount on all market merchandise. The maximum limit is 30% (1200 sciences).

Missile Accuracy gives your missiles a better chance to hit the target. The maximum limit is 80% (800 sciences); default is 10% accuracy.

Money Production increases your income per hour. The maximum limit is \$26,000 per hour (3000 sciences), default is \$2000 per hour.

Power Plant Efficiency increases the amount of power each power plant produces and also increases their defense/life. The maximum limit is 50% above normal (1000 sciences).

Satellite Technology gives you the knowledge to construct satellites. 50% satellite technology is needed in order to construct any satellites. Additional research over 50% extends the maximum orbit time of the satellite with up to 5 days (making it a total of 19 days in orbit). The maximum limit is 100% (3000 sciences). Once the Satellite Technology research is 100% complete the construction cost of each satellite will be reduced by 20% and each use of a satellite will cost 4 turns instead of 5.

Security System improves your security. This makes enemy thieves steal less money from you. It will not protect you from enemy thieves in any other way. The maximum limit is 100% (2000 sciences).

Thief Education teaches your thieves to steal more money and also to be stealthier. The maximum limit is 300% (3000 sciences).

4.1 - General Attack Information

Each attack is unique in some way and all attacks cost a different amount of turns. Launch Missile costs 4 turns. Regular Attack, Ground Attack and Air Attack cost 3 turns. Send Spy/Spy Plane costs 1 turn and Send Thief and Send Sniper costs 2 turns and 5% morale. The maximum amount of morale your army can have is 100%, and each attack uses a different amount of morale. An attack may "cost" as low as 20% of your morale and as high as 35%. When you attack an enemy that is smaller than yourself, you will lose 5% more morale. You will lose additional 10% of morale if you use an aggressive attack type. However, your morale increases by 5% every 15 minutes. Missiles have their own Missile Power (5% received per half hour) and does not use morale.

Target ID is the target province id.

Attack Method is the option on how you want to attack your enemy.

Main Target specifies the target your troops will focus on. You may also main target individual defence buildings providing you own HQ #3.

Attack Type specifies how the attack should be made; normal or aggressive.

4.2 - Regular Attack

Regular attack can consist of air units, vehicles and infantries. This attack method costs 3 turns.

4.3 - Ground Attack

Ground attack can only consist of ground units. Using this method makes the vehicles and infantries slightly more powerful than a Regular attack. This attack method costs 3 turns.

4.4 - Air and Sea Attack

Air and Sea attack can only consist of air units and sea units. You may load certain sea units with Tomahawk missiles, which will then be launched during the attack. Using this method makes these units slightly more powerful than a Regular attack. This attack method costs 3 turns.

4.5 - Launch Missile

Use this option to send your missiles to enemy targets. This attack method costs 4 turns, and uses 100% Missile Power. This does not include Tomahawks.

4.6 - Send Spy/Spy Plane (intelligence)

When you send out your spy, his job is to spy on your enemy's army or base. You can choose between an infantry spy for army intelligence or a spy plane to gather info on your enemies buildings. However, there is no guarantee either will succeed. You may send up to 5 Spies at once for the same amount of turns, for up to 5x the details of your results (chance of being caught increases by up to 10x). Opposing snipers and spies can kill infantry spies. If he does fail, your enemy is informed that you sent the spy. If your spy is successful, it is hard to count to an exact number of units or buildings in such a short period of time, so your spy works with special codenames. Below are the translations of those codenames. This attack method costs 1 turn.

Spy Codenames: The numbers on the table below are based on the sending of 1 Spy, and can be made more detailed depending on how many Spies are sent up to a total of 5.

Codename	Amount of Units
Few	0-99
Several	100-249
Pack	250-499
Lots of	500-1,499
Many	1,500-4,999
Crowd	5,000-9,999
Legion	10,000-19,999
Super Legion	20,000+

Spy Plane Codenames:

Codename	Amount of Buildings
Few	0-49
Several	50-124
Pack	125-249
Lots of	250-499
Many	500-999
Crowd	1,000-2,499
Legion	2,500-4,999
Super Legion	5,000+

4.7 - Send Spy (sabotage)

Spies have the option to sabotage missiles, power plants, and satellites. This attack method costs 5 turns and 100% morale.

4.8 - Send Thief

When you send out your thief, his job is to steal money from the selected enemy. However, there is no guarantee that your thief will succeed. If he does fail, your enemy is informed that you sent the thief. This attack method costs 2 turns and 5% morale.

You can send up to 10 thieves at once for the same turns and morale as one. This allows you to get up to 5 times the return but the chance of being caught increases by up to 10 times – times 1 extra for each additional thief. Therefore an attack with 5 thieves could get you up to 2.5 times as much money but you would be 5 times as likely to be caught. If caught you lose all attacking thieves.

4.9 - Sniper

A sniper can both attack and defend. They can attack spies, thieves and snipers. They can defend against spies, thieves, and snipers. They are five times better at defending than spies and thieves are. However, snipers have 5 times less defense against other snipers. This attack method costs 2 turns and 5% morale.

You can send up to 10 snipers at once for the same turns and morale as one. This allows you to do up to 5 times the damage but the chance of being caught increases by up to 10 times – times 1 extra for each additional sniper. Therefore an attack with 5 snipers could inflict up to 2.5 times as much damage but you would be 5 times as likely to be caught. If caught you lose all attacking snipers.

5.1 - Province Status and History

You can get access to a wealth of information about your province and you past performance from the status page. The history page shows statistics for the following items: -

History statistic	Explanation
Attack Success	The number of successful attacks made expressed as a percentage
Defend Success	The number of times successfully defended expressed as a percentage
Highest Networkh	The peak networkh you have achieved in the current round
Highest Land Area	Greatest land area you owned in the current round
Land Gained in Combat	Area of land gained by attacking other provinces
Land Lost in Combat	Area of land lost to other provinces attacking you
Money Gained in Combat	Sum of money gained by attacking other provinces
Money Lost in Combat	Sum of money lost to other provinces attacking you
Money Lost in Thievery	Sum of money you lost to thievery
Most Money Gained in Thievery	Highest amount of money stolen by one thief (GU only)
Kills	Number of provinces you killed
Kills (during clan wars)	Number of provinces you killed during clan wars
Times Killed	Number of times your province has been killed
Missiles Sent	Number of nuclear, chemical and biochemical missiles you have sent
NW Damage Made by Missiles	Cumulative sum of the damage your missiles have dealt this round
Enemy Missiles Received	Count of enemy missiles that have been fired at your province
Enemy Missiles Hit	Enemy missiles that have not missed or been shot down by anti-missile-systems
Enemy Missiles Missed	Enemy missiles that have missed your province
Enemy Missiles Shot Down	Enemy missiles that your anti-missile-systems have shot down
Attacks Made	Total attacks made, not including missiles sent
Attacks Made (during clan wars)	Total attacks made during clan wars, not including missiles sent
Wins	Successful attacks made (percentage in brackets)
Attacks Suffered	Total attacks suffered from other provinces
Defeats	Number of times the enemy successfully penetrated your defenses (percentage in brackets)
Clan Points Gained (current clan)	Total clan points gained in the current clan - every time you successfully attack a province your clan is at war with, you will be awarded clan points depending on the damage
Clan Points Gained (total)	Total clan points gained for the whole round
Aid Sent (current clan)	Amount of aid you have sent in current clan
Aid Received (current clan)	Amount of aid you have received in current clan
Targets Spied	Amount of targets spied in current clan
Time to Complete All Sciences	Total time to complete research on all sciences

Enhanced History: There are more History Statistics but these are Gold Used only.

You can also view graphs plotting the history of your province over the last 14 days in certain key areas:
- *Networkh*

- Land (Gold users only)
- Total Buildings (Gold users only)
- Total Units (Gold users only)

5.2 – Military Info

A full breakdown of your current military force is provided here for quick reference. You can choose to share certain military information with your clan mates from the preferences menu.

Extended Military Information is available to those who are currently in a Gold Clan. This feature allows Gold Clan members to view additional Military Information that is normally hidden. There are 6 sections visible: -

General - allows clan mates to view your status page.

Buildings - this permits clan mates to see what type and volume of buildings you have as well as what type of wall if any and whether or not you have a satellite in orbit.

Research - this lets clan mates look at what research you have done.

If you are Gold User your clan mates can also see the following Info. The dropdown list shows GU's as a darker color

History Graphs – allows clan mates to see you graphs (networth, land, buildings, units, attacks made, attacks received and clan points gained)

Statistic Breakdown – Allows clan mates to see your Networth and Turns Breakdown.

5.3 – Province Preferences

The preferences page allows you to change many options specific to your province including color schemes, province details, account details, account password and many gold user only options. This is also where you go to put your account into vacation mode or reset your account; as well as creating/editing your NZ Portal Profile.

The Profile option allows you to change certain details about your province, including your province name which can be changed if you are dead, if the game is between rounds and during the first 48 hours of a round. You can only change province name once every 2 weeks during the round.

Vacation mode puts your province into nuke protection for a specified period of time while you are away. During this time you cannot login to your province. You cannot go into vacation mode in the last 3 days of a round.

Your preferences page is also where you go to activate any gold users you may have purchased or to transfer them to another province via the Gold User Management section. Gold Memberships that have been used cannot be transferred, even if there are one or more rounds left.

5.4 – Community Score

For information on how the Community Score system works, go to the following page:

http://files.nukezone.info/community_score.htm

6.1 - General Clan Information

Clans are a vital element in NukeZone, and if you're not in a clan, join or create one immediately (see the Find Clan section for help joining a clan). Clans can provide protection to their provinces. A clan can have up to 20 members. There are four different types of clan members: Clan Leader (CL), Co-Leader (CO), Clan Trustee (CT), and Normal Member. The clan leader controls everything, and can select up to 5 clan trustees. These CT's can help the CL to control the clan by declaring war/peace, or by editing the clan message. If the CL gets banned or deleted due to inactivity, the CO will become CL, if there is no CO the first CT will become CL. If no CT is available, the province who has been in the clan the longest will become CL. Once a province leaves or is kicked from their clan, that province will no longer be allowed to return to that clan until the next round unless he left within the first 48 hours of the round. Close to the end of a round you are no longer able to join or create clans - this comes into force in the final 7 days.

Clan Leaders

Clan Leaders are the key to success for all clans. A clan must have an excellent leader to keep control and become unstoppable.

Clan Co-Leaders

Available only in a Platinum clan, the Co-Leader has all the same abilities as the Clan Leader except for: Change Clan Leader, Delete Clan.

Clan Trustees

Clan Trustees are almost like the clan leader. They exist to help the clan leader. In a Platinum Clan, the first CT can use the All Clan Message option to instantly send private messages to all clan members. If you are in a Platinum Clan, the CL and CO can set the rights for each single CT.

6.2 - Clan Points

In NukeZone, a Clan has three goals: Increase network, increase clan points and/or increase combo points. Clan points are only gained by attacking in a clan war. You must be in a clan for your province to earn Clan points. Clan points are awarded based on the damage inflicted on the enemy by an attack. The more damage you do, the more points your clan will receive.

When your clan declares war on another clan, you will receive 1-20 points depending on the damage inflicted for the first 48 hours. Then the maximum points you can gain drops by 2 points and continues to reduce by 2 points every subsequent 24 hours to a minimum of 4 points.

If another clan declares on your clan, you will receive 1-10 points when attacking them, again depending on the damage inflicted. In order to gain 1-20 points by attacking them you must declare back - this is known as a mutual war. Once your clan declares back you will have 48 hours of being able to get 1-20 points before the maximum points you can get begin to drop as described above.

If your clan does not declare back you will always get 1-10 points per attack. Note: different rules apply on the size of provinces you can attack depending on the type of war; mutual or one-sided. See 6.3 - Clan Wars for details.

When you kill a province in a one sided war you receive 25 clan points, when you kill a province in a mutual war you receive 50 clan points. Clan points gained from satellites, including for kills, are based on the amount of satellite power used.

When you kill a province of \$10,000 network or lower you do not gain any clan points. However, you still gain 1 kill on your stats record. Each time a clan achieves a bonus level the clan receives a fixed bonus of 300 turns per province and \$25 000 000. The clan bonus money is divided evenly among all clan members, whether or not the clan members are dead or alive. You must be a member of the clan for at least 72 hours to receive a clan bonus.

After your clan's first 5000 points your clan receives a mini bonus worth half a normal bonus. A super clan bonus is awarded at 50 000 clan points, 150 000 clan points, 250 000 clan points and 350 000 clan points etc. and is 1.5 times the regular bonus. A mega clan Bonus is awarded in replacement for every 2nd Super Clan Bonus at 100,000 clan points, 200,000 clan points, 300 000 clan points etc. and is 2 times the regular bonus. Both the turns and the money are increased with these special bonuses.

6.3 - Clan Wars

In NukeZone, when a clan is mad and wants vengeance over another clan, or the members just simply want to earn clan points, they declare war on the other clan. It can be fun and sometimes even be hard. This is why all clans must be at their prime and be prepared for a war at all times. After a CL or CT has declared war, they cannot declare peace for the next 24 hours. In addition, if one clan declares war against another clan, the network attack restrictions are still in place. However, if both sides declare war on each other, the network attack restrictions are removed. Network restrictions always apply the first 24 hours after joining a new clan and if you are using a thief or sniper, even in a mutual war. Clans may resume a war at any time after declaring peace as long as they don't already have 3 current war declarations against other clans; if they do then they must declare peace with at least 1 clan before they are able to resume the war. Once a war is resumed it must last a minimum of 24 hours before peace can be declared again.

6.4 - Clan Forum

Clan Forums are an excellent form of communication for a clan. You and your clan mates can discuss anything you want in there. You can post things like target provinces, ask for help, etc. It is the only forum not moderated by the Administrators and Moderators. The CL and CTs may edit/lock/delete whichever message they want on the Clan Forum.

Gold clans have the additional benefit of the Forum Management tool. This allows the clan leader to organize the clan forums and to give them custom names. It is possible to make a forum that only clan

trustees can visit or a read-only forum.

6.5 - Clan Tag

Clan tags are used to represent what clan a province is in. This is what it looks like: [TAG]Province.

6.6 - Clan Pages

By clicking the Clan link, you come to a page with several links dealing with your clan. Depending on if you are the CL, CO or a CT, some links might be crossed out. This means you do not have access to these areas. Here is all the information about each Clan Page.

Properties

Only the Clan Leader or CO can adjust the clan properties. In the properties page, the CL or CO can add or edit the clan name, clan tag, clan password and the location of the clan logo. Up to five CT's may also be selected from this page. The CL or CO may also choose to restrict shared military information for all new members for a period of time. Valid settings for this option are: None (no restrictions), 12 hours, 24 hours, 36 hours, 48 hours and 72 hours.

Send Aid

All members of the clan may access this page. Before you can send aid you must specify the receiver and enter the amount of money to send, and then press the Send Aid button. You can only send 1/3 of your available amount of money 3 times a day. Target province networth may not be larger than yours. You cannot send or receive aid when in nuke protection. Sending aid also costs you a 'tax' of 1 turn and 25% of the money sent, unless you have 100% banking research, where the 25% charge is removed.

Invite Player

Only the CL, CO and CT's can invite other provinces to join the clan. The networth of the other province does not matter. Mass inviting is not accepted. A clan can have a limit of 20 players including the CL. The CL or CO can create a short custom message which is included with the invitation sent to a province.

Clan Information

All members of the clan may access this area. On this page you can find a list of all members of the clan and their respective clan points acquired. Everything you see on the clan page is what everyone else sees except the amount of clan points a member has acquired.

Statistics Central (Platinum Clans only)

All clan members can access this page. This displays useful statistics including a Clan Overview, Clan Statistics and War History. The Clan Overview is updated on a real time basis and includes Last Login, Last Attack, Turns, Logins Per Day (LPD), Attacks Per Day (APD), Points Per Day (PPD). The Clan Statistics are updated every 6 hours and displays the province with most/least of the following: attacks made, attacks suffered, missiles sent, kills, times killed, clan points, aid sent, land, networth, units, buildings. The War History provides information about the clan's previous wars.

Spy Reports (Platinum Clans only)

All clan members have access to this page. The Spy Report page is separated into clans and clanless provinces. Only the CL, CO and CT's are able to delete the reports.

Clan Wars

All members have access to this area. This page displays a list of the clans that yours has currently declared war against; as well as the clans that have currently declared war against yours. This page also displays all clans you have declared peace on in the last 10 days.

Declare War/Peace

Only the CL, CO and CT's may access this page. They can declare war against another clan by entering the Clan ID of the clan they want to go to war with (must be in Networth Range of entire Clan Networth). If your clan has declared war against another clan more than 24 hours ago, your clan's CL, CO or CT can declare peace with the other clan by typing in the other Clan's ID in the text box provided.

Clan Message

Only the CL, CO and CT may access this page. They can post Clan Messages, which appear in the main page when a clan member logs in to NukeZone. If you have a gold clan, the CL, CO or CT can preview the message before posting it to check for errors. This is a great way to say something important and assure it reaches all clan members immediately. You can use certain G-Codes in the clan message – gold clans have additional G-Codes that they can use. G-Codes are explained further in section 7.2.

Clan Poll (Gold/Platinum Clans only)

Only the CL, CO and/or a CT's can access this page. They are able to create or edit the clan polls from

here. Only one clan poll can be created within a 24 hour period.

Clan Poll Archive (Gold/Platinum Clans only)

All members can access this page. This is where the archive of previous clan polls is stored.

Clan Forum Management (Gold/Platinum Clans only)

Only the CL and CO can access this area. This allows the CL or CO to change the clan forum settings and create new clan forums. The CL and CO of a Platinum Clan can give CT's the ability to access this area.

Domain Management (Platinum Clans only)

Only the CL or CO has access to this area. Here the CL or CO can request a custom NukeZone domain (tag.nukezone.info – where 'tag' is the clan's existing tag) and sub-domains for their clan homepage.

Receive Clan Bonus

All members can click on this to receive the Clan Bonus after the clan has reached 5,000, 10,000 and further multiples of 10,000 Clan Points. This link is enabled within 30 minutes after your clan has reached the Clan Bonus. You will receive a local event when this page has been enabled. If you do not go to this page to receive the bonus within 3 days of it being enabled you will automatically receive it. If you are in vacation mode at the time your clan receives a bonus then you will not receive a share of it. You need to be in the clan for 72 or more hours to be able to receive the bonus.

Clan Recruiting

Only the CL, CO and CT's have access to this area. This is where a clan can look for new members and specify the criteria which potential members must meet.

Find New Clan

Everyone has access to this area. This is where members can look for a new clan and specify the criteria which a potential new clan must meet.

Change Clan Leader

Only the CL may access this page. If a CL wants to give up the leadership, he can appoint a new leader of the clan. The old CL will then take over the new CL's old position.

Leave Clan

All members may access this page. If a member of a clan chooses to leave the clan, they can leave the clan immediately. However, The amount of time that provinces must wait after leaving a clan before joining another now increases based on how many clans they have already joined during that round. For 1-3 clans it remains at 24h and 4-5 clans is now 48h; then for 6+ clans the amount of time will increase at regular intervals.

Delete Clan

Only the CL may access this page. If the CL chooses to delete the clan, he may do so by clicking on Delete Clan.

6.7 - Clan Invitations

The CL, CO and CTs can view a complete list of pending clan invitations. They may also cancel any of these invitations; however invitations automatically expire after 7 days.

6.8 - Extended Military Information

Members of Gold Clans can choose to share their Extended Military Information, giving their clan mates the opportunity to view additional information about their province.

6.9 - Clan Status

Clans have a Status rating of: Brave, Fearless, Neutral, Fearful or Cowardly depending on the size of the clan they are declaring on. The larger the clan they declare war on, the more their status will rise to the positive end of the scale. Adversely, the smaller the clan that is declared upon, the more their status will fall to the negative end of the scale. This system is not in effect when you declare back on a clan. However, it will have a small positive affect, hence declaring back is a brave action. The clan status will affect the points you gain in a clan war: Brave (+20%), Fearless (+10%), Neutral (0%), Fearful (-10%) and Cowardly (-20%). War declarations during the first 10 days of a round do not have an effect on clan status, only declarations after that time will cause the clan status to change.

7.1 – Medals and Clan Awards

At the end of each round, 11 different medals are given out to the leaders of each area.

Medal of Honor - Most clan points gained by a province
 Medal of Growth - Highest networkh
 Medal of Death - Killed most provinces during clan wars
 Medal of Earth - Highest Land Area
 Medal of Courage - Performed most attacks
 Medal of Thievery - Most money stolen
 Medal of Knowledge - Quickest to research all sciences
 Medal of Mass Destruction - Most total NW damage made using missiles (excluding Tomahawk Missiles)
 Medal of Superiority - Province who first reaches 2500 clan points, counting from the beginning of the round and based on Clan Points Gained (total).
 Medal of Development - Province who first reaches \$2,500,000 networkh and keeps it for 48 hours.
 Medal of Accomplishment - Province who wins both the Medal of Honor and Medal of Superiority in the same round.

United Boundaries – Clan with the highest amount of land overall
 United Arms – Clan with the most attacks made during clan wars
 Golden Shotgun – First clan to reach 10000 points.
 Points Champion – Awarded to the first 3 clans in the points toplist (Gold, Silver and bronze)
 Networkh Champion – Awarded to the first 3 clans in the Networkh toplist (Gold, Silver and Bronze)
 Combo Champion – Awarded for the first 3 clans in the Combo toplist (Gold, Silver and Bronze) **

***Combo list: Combo points will be awarded to the top 100 clan rankings for points and for networkh. Clans will gain 1-100 points (rank #1 giving 100 points and rank #100 giving 1 point - anything beyond the rank of #100 receives zero points). Points are awarded daily as of midnight CET (server time), if the clan is in both top lists they will receive an additional 10% more points. So the maximum combo points a clan can obtain each day is 220 Combo points (100 for being number 1 in the Points-toplist, and 100 for being number 1 in the NW toplist + the 10% they get for being in both toplist = 20).*

7.2 - G-Code and Auto-Linking

The following G-Codes can be used in private messages, clan messages and on the forums. Please note that all G-Codes are case sensitive, except the G-Codes used in Clan Messages. If auto-linking is enabled all your entered URLs will automatically be transformed into clickable hyperlinks. Easy and simple link creation, simply enter the URL! However your URL must start with one of the following: http://, https://, ftp:// or www.

Available Tags in Private Messages:

Tag	Output
[USERPROVINCE]	Inserts the reader's province name. Works in both subject and message body.
[USERID]	Inserts the reader's province id. Works in both subject and message body.
[NAME]	Inserts the reader's name. Works in both subject and message body.
[B] [/B]	Text between these tags is displayed in bold. Works only in message body.
[I] [/I]	Text between these tags is displayed in italic. Works only in message body.
[U] [/U]	Text between these tags is displayed underlined. Works only in message body.

Available Tags in Clan Messages (Only available for Gold/Platinum Clans):

Tag	Output
[B] [/B]	Text between these tags is displayed in bold.
[I] [/I]	Text between these tags is displayed in italic.
[U] [/U]	Text between these tags is displayed underlined.
[S] [/S]	Text between these tags is displayed with a line through the middle the text.
[HR]	Inserts a horizontal line.
[CENTER] [/CENTER]	Text between these tags is displayed center aligned.
[LEFT] [/LEFT]	Text between these tags is displayed left aligned.
[RIGHT] [/RIGHT]	Text between these tags is displayed right aligned.
[COLOR=name] [/COLOR]	Text between these tags is displayed in specific

	color. See below for available font colors.
[FONT=name] [/FONT]	Text between these tags is displayed in specific font. See below for available fonts.
[SIZE=number] [/SIZE]	Text between these tags is displayed in specific size. See below for available font sizes.
[LAST_EDITED]	Example output: October 5th, 2002 01:45 CET
[EDITED_BY]	Name of CT/CL who edited the message.
[CLAN_POINTS]	Inserts total amount of current clan points. *
[NEXT_BONUS]	Inserts amount of points required to reach next bonus. *
[NW_RANK]	Inserts the current Networth rank of your clan. **
[PTS_RANK]	Inserts the current Points rank of your clan. **
[CBO_POINTS]	Inserts the Combo Points of your clan.
[CBO_RANK]	Inserts the current Combo Points rank of your clan.
[24H_CLAN_POINTS]	Inserts clan points gained over 24 hours.
[24H_PTS_RANK]	Inserts ranking over 24 hours in clan points gained.

* Note: With the [CLAN_POINTS] and [NEXT_BONUS] tags, if you wish to have a "p" after the points (e.g. "We have this many clan points: 2500p"), the "p" must be added following the tag [CLAN_POINTS]p. You can enter anything after the tag, not just the "p", so could for example enter "[CLAN_POINTS] points".
** These values are updated once every 6 hours.

[U] [/U]	Text between these tags is displayed underlined. This tag does not work in the topic name.

Available Special Tags on the Clan Forums (Only available for Gold/Platinum Clans) *:

Tag	Output
[S] [/S]	Text between these tags is displayed with a line through the middle of text. This tag does not work in the topic name.
[IMG]url[/IMG]	Inserts an image. Specify the image source by entering the full url between these tags.
[COLOR=name] [/COLOR]	Text between these tags is displayed in specific color. (see below for valid colors)
[FONT=name] [/FONT]	Text between these tags is displayed in specific font. (see below for valid names)
[SIZE=number] [/SIZE]	Text between these tags is displayed in specific size. (see below for valid sizes)

* Only available if your CL has enabled it on the Clan Forum Management page.

Available Font Colors:

Aqua, black, blue, fuchsia, gray, green, lime, maroon, navy, olive, pink, purple, red, silver, teal, white, yellow. In addition, you may also enter any hexadecimal color code. Please note that the # sign is required when doing so.

Available Fonts:

Arial, Comic Sans, Courier New, Georgia, Helvetica, Impact, Times New Roman, Verdana

Available Font Sizes:

The number argument can still be any number between 0-6, but you may now also specify any custom size you want by adding "pt" after the number. So 16pt means size 16. The old style 0-6 is translated as follows: size 0=8pt, size 1=10pt, size 2=12pt, size 3=14pt, size 4=16pt, size 5=18pt, size 6=20pt.

7.3 - Extended G-Codes

As a Gold Clan, not only do you have the ability to use the regular G-Codes, you also get an extended

version of it. It can only be used in the clan message and can be used by Gold Clans only. A CL/CT can easily target a province and/or a clan by using these codes. The Extended G-Codes are not case-sensitive. A clan message can contain a maximum of 25 Extended G-Codes.

Available Extended G-Codes in Clan Messages (Only available for Gold/Platinum Clans):

Tag	Output
[P=id]	Creates a link to the specified province..
[C=id]	Creates a link to the specified clan.
[A=id]	Creates a link to the aid page for the specified province
[R=id]	Creates a link to the specified enemy province's spy report.
[CR=id]	Creates a link to all of the specified clan's spy reports.
[PNW=id]	Inserts the specified province's name and network and creates a link to the attack page. The network will be made bold if the enemy is within the viewer's attack range.
[NW=number]	The number must be a valid network value. The network is formatted and will be made bold if the enemy is within the viewers attack range.
[URL=link]text[/URL]	Turns the "text" into a hyperlink to click on. Valid "link" types are http, https, ftp, irc

Using this feature is fairly simple. While typing a message, a CL/CT can target a province by typing: [P=ProvinceID] or [C=ClanID]. By doing so, this converts the ID Number into your target's Province or Clan Name and ID Number as well as creating a clickable link to the province/clan information page.

Example: A CL/CT types in, "...War. Everyone attack this guy, [P=123]!" The G-Code converts this to, "...War. Everyone Attack This Guy, FakeProvince (#123)!", where the "FakeProvince (#123)" part is a clickable link that brings you to this enemies province information page. The same is done with clan targets.

8.1 - Technical Support

If you need technical support please contact our Customer Support by sending an in-game message to *Customer Support* (found in your contact list when you write a message) or simply post a message in the *Technical Support and Bug Reports* forum. Links to the multi report system, the EULAs and other important resources can be found by clicking the *help* link in the top right.

8.2 - Ideas and Suggestions

If you have an idea or a suggestion, please post it in the *Suggestions and Ideas* forum.

8.3 - Bug Reporting

Please report all bugs in the *Technical Support and Bug Reports* forum. Bugs that might affect the security or integrity of NukeZone and the server should NOT be posted in public; please inform the Customer Support directly by using one of the above-mentioned ways.

8.4 - IRC

NukeZone has its own IRC channel on the QuakeNet network. This is the place where the NZ Crew and the most experienced players hang around. Everyone is welcome!

Network: QuakeNet

Server: irc.quakenet.org

Channel: #NukeZone (for general NukeZone chat)

#NZSupport (for any game related problems/questions you might have)

#NZVeteran (must be veteran to join)

A quick IRC guide to get you online can be found here:

<http://www.nukezone.info/ircGuide.aspx>

8.5 - Rules

The Game Rules can be found at: <http://www.nukezone.info/gameRules.aspx>

The Forum Rules can be found at: <http://www.nukezone.info/forumRules.aspx>

8.6 - Credits

The NZ Crew:

Stefan Karlström (aka Guffy) – CEO, Lead Developer, Chief Administrator
Anthony Wiezoreck (aka EhpeX) – Chief of Operations, Administrator
Steve Brown (aka Primal) – Assistant Director of Operations, Administrator

1.1 - Overview

NukeZone is a free, strategic text-based online game. The game is optimized for Internet Explorer 5.0 and above with a screen resolution of 800x600 or higher. The game will also work in newer versions of other browsers such as Opera and Netscape Navigator; however, while some features may not operate properly, the game engine functions correctly. It is strongly recommended that you use Internet Explorer 5.0 and above. Please click [here](#) to download the latest Internet Explorer from Microsoft's homepage.

NukeZone is played in rounds lasting approximately 3 months each. Round dates can be found on the login page. At the end of each round, winners in various categories are given medals and all provinces are reset and the game starts over.

If you find any bugs or any other errors in the game, please report them ASAP in the *Technical Support and Bug Reports* forum.

1.2 - Getting Started

You start with 125 turns and \$250,000, then the first time you login for the round you get awarded with an extra 175 turns and \$500,000 (totaling in 300 turns and \$750,000), the extra bonus is only available for provinces created before the start of the round and those created in the first 48 hours of a round. It is up to you to determine what to purchase, while some prefer to use a more offensive strategy, others will choose to adopt a more defensive strategy. Money is required to purchase buildings and units. Turns are required to purchase buildings (jump to *3.1 - Buildings* for more info), increase research (jump to *3.10 - Research* for more info), or attack (jump to *4.1 - General Attack Information* for more info). You need buildings to survive – when all your buildings are destroyed you will die. When you have died you spend 24 hours dead before starting over in nuke protection again – death results in a loss of all units, land, research, money (including in the bank) and turns except for the starting defaults.

There are several ways to get more money although you get a fixed number of turns:

- By default you receive 1 turn every 20th minute and \$2000 each hour. You can research Money Production to increase your income up to a maximum \$26,000/hour.
- Join/create a clan and fight other clans (that your clan is at war with) in order to receive clan bonuses (300 turns and \$25,000,000 for each 10,000 points; the clan bonus money is divided evenly among all clan members).
- Tell your friends about this game (you receive a 10 turn bonus for each friend that signs up and plays for a while). Please note that to receive the bonus your friend must sign up with the same email as the invitation was sent to.

Note: You will not receive any additional turns every 20 minutes if you already have more than 300 turns. However, you can receive the clan bonus during this time. Please use some of your turns in order to start receiving turns every 20 minutes again.

1.3 - Starting Bonus

You can select a starting bonus from the following list, which you must claim while in Nuke Protection.

- **Offensive**
Max morale capacity changes to 110%, plus an additional 45 turns.
- **Defensive**
All buildings get a 15% life boost, plus 2 extra sciences per turn, plus 5,000 m2 land.
- **Finance**
Hourly income increased by 10%, bank capacity is raised by 50% and \$250,000 money.
- **Shipping**
Market and missile orders ship 25% faster, plus ability to choose exact arrival time (up to 12 hours delayed), plus 3,000 m2 land and \$150,000 money.

The starting bonus you receive after you die is based on your networth 72 hours before you were killed. The bonus will increase gradually between \$100 000 and \$1 500 000 reaching a maximum increase of 300% at \$1 500 000. The increase will improve more dramatically at lower networth and decrease slowly as you approach \$1 500 000. The increases will not be in effect if you reset your account.

2.1 - Game

Main - Province info, power status, news, current server time, nuke protection options, starting bonus

Attack - Regular attack, ground attack, air and sea attack, launch missile, send spy/spy plane, send thief, send sniper

Research - Research sciences

Headquarters - View your Headquarters bonuses, manage Headquarters Operations and your army's General

Explore - Explore or Sell additional land.

Market - Buy/sell merchandise

Bank - Deposit/withdraw money

Clan - Join/create clan, clan properties, invite/kick players, manage clan wars, leave/delete clan, recruiting system etc

2.2 - Build

Buildings - Build/demolish buildings

Sea Units - Build sea units

Air Units - Build air units

Vehicles - Build vehicles

Infantries - Train infantries

Missiles - Order missiles, view arrival dates

Satellites - Build/use Satellites

2.3 - Show

Local Events - Shows local events

Global Events - Shows global events, can be filtered by incoming, outgoing or internal.

Attack Events - Shows local outgoing events (Gold Users only).

Search Events - Allows a search of local and global events.

Enemy List - Links to enemy list (Gold Users only).

Status - Information, military info, military settings, history graphs (including Gold User only info) and several province statistics, rank from previous round

All Provinces - Shows all provinces within your attack range

All Clans - Shows all clans

Top List - Top Provinces, Top Clans (Networth), Top Clans (Points)

Search - Search for provinces by province id or province name, search for clans by clan id or clan name/tag

Clan Forum - A direct link to your private clan forum (only visible if you're a member of a clan)

Forum - NukeZone forums

Online Shop - Purchase a Gold user or Gold/Platinum clan

2.4 - NZ Portal

News - Displays current news items

Articles - Displays current articles

Profiles - Displays player profiles

2.5 - Other

Inbox - Display your inbox (private messages that have been sent to you)

New Message - Compose a new message

Preferences - Options, edit profile, change colors, change password, delete province, reset province, create/edit your NZ Portal profile etc

Contact Us - Crew contact information, credits

Logout - Logout from NukeZone

3.1 - Buildings and Walls

Land is nice to have, but without buildings and infrastructure it is of little use. NukeZone offers a variety of buildings to place on your land. Each building has some inherent benefits that allow your province to grow or specialize. It is up to you to determine how to fill your land, and there is no perfect or ideal balance for growth. As well, each building uses a specific amount of power, and power can only be provided by power plants. If you have low power, your defensive buildings, missile silos, research labs, command centres and headquarters buildings won't work, meaning you will be more susceptible to attack, will not be able to launch missiles or be able to perform scientific research. The defense values of your buildings drop by 25% when you are low on power and you will be unable to use spy planes, spies, thieves, snipers and satellites. If you are short on land, either explore for more or attack someone to try and steal some. The amount of unused land improves the defense of your buildings by up to a 40% boost for 25% unused land. It takes 20 m² to build each building with the exception of Headquarters which take 1000 m2.

Available Buildings:

Name	Price	Description
Research Lab	\$2,000	Gives 1 extra science/turn to research for each 50

		research labs. Attack: 0, Life: 200 Power usage: 2000
Missile Silo	\$22,000	Houses 1 missile. Attack: 0, Life: 500 Power usage: 10000
Headquarters	\$250,000 25 turns and 1000 m2 of land	Improves various abilities for your province† Attack: 0, Life: 5000 Power Usage: HQ1: 25,000; HQ2: 50,000; HQ3: 100,000; HQ4: 150,000; HQ5: 250,000
Command Centre	\$2,200	Supports 5 special units††. Attack: 0, Life: 120 Power Usage: 1800
Shipyard	\$1,100	Houses 5 sea units. Attack: 0, Life: 90 Power usage: 700
Airfield	\$900	Houses 5 air units. Attack: 0, Life: 85 Power usage: 600
War Factory	\$1,200	Houses 10 vehicles. Attack: 0, Life: 80 Power usage: 900
Barracks	\$700	Houses 20 infantries. Attack: 0, Life: 60 Power usage: 650
Power Plant	\$450	Produces 4500 power units. Attack: 0, Life: 85
Advanced Power Plant	\$1,400	Produces 15000 power units. Attack: 0, Life: 40
Torpedo launcher	\$1,850	Gives you a sea defense. Attack: 350, Life: 280 Power usage: 700
SAM Site	\$1,400	Gives you an air defense. Attack: 265, Life: 240 Power usage: 600
Missile Turret	\$1,500	Gives you a vehicle defence. Attack: 300, Life: 265 Power usage: 400
Machinegun Turret	\$1,200	Gives you an infantry defence. Attack: 190, Life: 290 Power usage: 275
Anti-Missile System	\$5,000	Gives you a missile defense†††. Attack: 0, Life: 400 Power usage: 1700

† Headquarters Building - You may only own 5 Headquarter buildings at any time and you may only build one per 72 hour period. The Headquarter building cannot be main targeted in an attack, but can be destroyed. The power usage is per building and is cumulative, therefore if you own 2 buildings you will use 25,000 + 50,000 for a total power usage of 75,000. Headquarters abilities are cumulative and in the order listed. For example, when you have three headquarters, you will have ALL of the bonuses provided by numbers 1, 2, and 3.

Headquarters #1

- * 75% chance of tracking origin of missiles
- * 10% attack boost to attacking units
- * 1 additional science per turn when researching

Headquarters #2

- * 25% increase to land exploration
- * Implements the Coastal Defense System (5% increased protection against air and sea attack)
- * 1 additional science per turn when researching
- * Gives an additional \$1000/hour

Headquarters #3

- * 50% increase to land exploration
- * Unlocks the sabotage missions for the Spy unit giving a 50% chance of success.
- * Increases the Coastal Defense System to 10% protection.

- * 1 additional science per turn when researching
- * Gives an additional \$1000/hour
- * Ability to Main Target individual defense buildings.

Headquarters #4

- * Unlocks the Headquarter Operations
- * Unlocks the General unit with 1 life/hour regeneration rate.
- * Missile accuracy improved with 10%
- * Increases the Coastal Defense System to 15% protection.
- * 1 additional science per turn when researching
- * Improves sabotage missions chance of success to 65%
- * Gives an additional \$1000/hour
- * Improved accuracy for Main Targeting by 2x.

Headquarters #5

- * Enables you to own and utilize two satellites simultaneously
- * 1 additional science per turn when researching
- * Improves sabotage missions chance of success to 80%
- * 10% defense boost for defending units when attacked
- * Increases the General unit to 4 life/hour regeneration rate.
- * Gives an additional \$1000/hour
- * 75% land exploration bonus.

Headquarter Operations

Four Headquarter buildings are required to run Headquarter Operations. Headquarter Operations cost 2 turns and two hourly fees to activate, and then cost a fixed fee per hour, automatically taken from your income. A maximum of half your income may be used for HQ Operations. If your fourth Headquarters is destroyed, the operation will cease functioning. HQ Operations auto deactivate if your account remains inactive for more than 5 days(when you stop receiving your hourly income).

- * \$1000/hour: 100% chance of tracking origin of missiles and special units
- * \$2000/hour: Increased defense against incoming sabotage missions by 50%
- * \$3000/hour: Increased defense against incoming EMP attacks by 50%
- * \$4000/hour: 2 additional life per hour for the General unit.
- * \$5500/hour: Defense buildings do 25% additional damage.
- * \$6000/hour: Increased defense against incoming missile attacks by 25%
- * \$10000/hour: 5% additional satellite power per hour

General Unit

Four Headquarter buildings are required to get access to the General unit. The unit arrives 72 hours after the fourth HQ building is constructed and starts with 100 life. It gains 1-6 life per hour depending on number of headquarters and HQ Operations active. The General can be sent in battle and can be killed in action, and a new one then arrives 72 hours later. When the General unit arrives you will choose a name for it from a list and get to choose one of the following enhancements listed below. Whenever you include the General unit with an attack you get the chosen enhancement. The General unit is idle when defending and does not provide enhancements for defending units or buildings.

Enhancements:

- * 10% additional attack
- * 10% additional defense
- * Avoids walls and the Coastal Defense System provided by the Headquarters 2-4.

General Abilities:

- * 10% attack boost (cost: 50 life)
- * 10% defense boost (cost: 50 life)
- * Double money/land gained in combat (cost: 50 life)
- * 50% improved main targeting (cost: 75 life)
- * Spy Report units after-attack information (cost: 100 life)
- * Spy Report buildings after-attack information (cost: 100 life)
- * Double damage in combat (cost: 500 life).
- * Last Stand: Requires at least 200 life, and doubles the attack of your defending units and buildings. It can not be activated during the last 3 days of the round.

†† Special units are; Spy Plane, Spy, Thief and Sniper.

††† Anti-Missile System defense varies based on the amount of used land. Anti-Missile Systems provide a

maximum of 50% protection without HQ Operation. 750 Anti-Missile Systems will provide 50% protection, no matter the amount of used land you have.

Available Walls:

Name	Price	Description
Barbed Wire	\$0	Provides 0% vehicle and infantry defense. Requires: none
Sandbag Wall	\$50,000*	Provides 5% vehicle and infantry defense. Requires: Barbed Wire
Concrete Wall	\$250,000*	Provides 10% vehicle and infantry defense. Requires: Sandbag Wall
Laser Fence	\$500,000*	Provides 15% vehicle and infantry defense. Requires: Concrete Wall

* Lowest price (the price increases with the more land you own). Walls reduce the strength of the attacking force by a certain percentage, based on the type of wall.

3.2 - Sea Units

To build sea units, you need shipyards, which house 5 sea units. Sea units can only be combined with air units in an "Air and Sea Attack".

Available Units:

Name	Price	Description
Submarine	\$2,300	Attack: 180, Life: 170 Can attack: Sea Units Can carry: 2 Tomahawk Missiles
Stealth Boat	\$700	Attack: 50, Life: 70 Can attack: Sea Units, Infantries
Destroyer	\$1,500	Attack: 70, Life: 60 Can attack: Vehicles, Infantries, Buildings
Cruiser	\$2,000	Attack: 85, Life: 105 Can attack: Sea Units, Air Units, Buildings
T-2000 Hovercraft	\$800	Attack: 70, Life: 35 Can attack: Air Units, Buildings

3.3 - Air Units

To build air units, you need airfields, which house 5 air units. Air units can be combined with all other units when attacking.

Available Units:

Name	Price	Description
F-22 Raptor	\$1,075	Attack: 65, Life: 55 Can attack: Sea Units, Air Units
F/A-18 Super Hornet	\$750	Attack: 55, Life: 25 Can attack: Air Units, Buildings
F-35 JSF	\$925	Attack: 55, Life: 45 Can attack: Air Units, Vehicles
B-2 Stealth Bomber	\$1,500	Attack: 130, Life: 55 Can attack: Buildings
RAH-66 Comanche	\$800	Attack: 35, Life: 40 Can attack: Vehicles, Infantries, Buildings
SH-60 Sea Hawk	\$700	Attack: 70, Life: 40 Can attack: Sea Units
Aurora Spy Plane	\$15,000	Spies on enemy buildings. Attack: 0, Life: 200 Can attack: None
CH-46 Sea Knight	\$1,000	Enables you to transport 15 infantry per unit in a Sea and Air attack, while boosting transported infantries attack by 50% and lowering their life by 15%. Attack: 25, Life: 135

		Can attack: Buildings
--	--	-----------------------

3.4 - Vehicles

To build vehicles you need war factories, which house 10 vehicles. Vehicles can be combined with air units and infantries when attacking.

Available Units:

Name	Price	Description
Humvee	\$500	Attack: 60, Life: 20 Can attack: Infantries
Hover Tank	\$600	Attack: 35, Life: 20 Can attack: Sea Units, Infantries, Buildings
Heavy Artillery	\$1,000	Attack: 95, Life: 40 Can attack: Buildings
SAM Tank	\$700	Attack: 60, Life: 30 Can attack: Air Units
M1 Abrams Tank	\$1,250	Attack: 65, Life: 60 Can attack: Vehicles, Buildings

3.5 - Infantries

To train infantries you need barracks, which house 20 infantries. Infantries can be combined with air units and vehicles when attacking.

Available Units:

Name	Price	Description
Thief	\$5,000	Steals money from the enemy base and protects your base from possible enemy thieves. Attack: 0, Life: 5 Can attack: none
Spy	\$3,000	Spies on enemy units, protects your base from possible enemy spies and carries out Sabotage Missions*. Attack: 0, Life: 5 Can attack: none
Sniper	\$5,000	Attack: 125, Life: 65 Can attack: Spies, Thieves, Snipers Note: Snipers have 5 times less defense against other snipers
Navy Seal	\$900	Attack: 45, Life: 25 Can attack: Sea Units, Buildings
Heavy Infantry	\$400	Attack: 20, Life: 15 Can attack: Air Units, Infantries, Buildings
Machine Gunner	\$350	Attack: 25, Life: 15 Can attack: Infantries
Grenade Soldier	\$425	Attack: 35, Life: 10 Can attack: Vehicles

**Sabotage Missions* - Spies have the option to sabotage missiles, power plants, and satellites. The sabotage option is unlocked and has a 50% chance of success with 3 Headquarters, 65% with 4 Headquarters and 80% with 5 Headquarters.

Missiles: Sabotages 1 missile and may be in effect for up to 10 days or until the missile is launched. If the missile is launched within the 10 day period and the sabotage is successful, it will blow up in the enemy's base prior to launch causing 20% damage. The enemy will still be charged full turns and morale for the attempted launch. The maximum amount of missiles that may be sabotaged for any enemy is 5 at any one time.

Power Plants: If the power plant sabotage option is chosen and the spy is successful it will disable 10% of the enemies' power plants for 48 hours. The maximum amount of power plants that may be sabotaged for any enemy is 50% at any one time.

Satellites: If sabotage is successful the enemies' satellite power is reset to 0% for 10 hours before power begins the 10% hourly increase.

3.6 - Special Units

Special units are the spy plane, spy, thief and sniper. In order to own these units you must have

Command Centres. You can have a maximum of 200 Command Centres meaning you are limited to no more than 1000 special units. Special units cannot be used when you have low power. You may only buy or sell 100 special units per day in all market transactions; e.g. buying 50 and selling 50 would be the maximum special unit transactions for that day.

3.7 - Market

The market allows you to buy units without using turns to build them. However, units on the market are more expensive to buy and because they are not built in your province, they take time to arrive. Depending on the research you have and how much you are willing to pay you can get units from the market in between 3 and 12 hours. You can cancel an incoming order, which returns 75% of the regular market price (money spend on accelerated shipping will not be returned after canceling an order).

You can pay extra to reduce the time it takes for your units to be delivered – paying double the price allows your units to arrive in half the time. Accelerated shipping for missiles costs 1.5x the price. You can also research the Shipping Time Science so you get units from the market faster.

The market also allows you to sell your units to recoup some of their cost if you no longer want them.

3.8 - Missiles

To build missiles you need missile silos, which house 1 missile. A missile is an expensive but very powerful attack option. The chance of hitting the enemy base depends on two things: your missile accuracy and your enemy's missile defense. Missiles cost 5 turns to build and 4 turns to launch. They make use of their own Missile Power (5% received per half hour) and do not use morale. 100% Missile Power is required to launch missiles. Accelerated Shipping mode for missiles cost 1.5 times the standard price.

Tomahawk Missiles do not require a missile silo to build or to launch. Submarines are required to both house and launch the Tomahawk Missiles. As such you must send them with an air and sea attack with the appropriate amount of submarines. Tomahawks are not affected by your missile accuracy although 50% is needed before you may build them but they can be shot down. A submarine can hold 2 Tomahawk Missiles. 3 Tomahawks may be built for every turn and take 6 hours to build. You can send 4 Tomahawk missiles for every \$10,000 Network worth you send in the attack.

Anti-Missile Systems, SAM Sites, SAM Tanks and Cruisers can defend against Tomahawk Missiles. Sam Tanks and Cruisers provide equal protection against Tomahawks while SAM Sites provide 3 times the protection of SAM Tanks and Cruisers, and Anti-Missile Systems provide 5 times the protection. The default chance of tracking missiles is 25%, however this is raised to 75% when 1 or more Headquarters Building is owned.

Available Missiles:

Name	Price	Description
Nuclear Missile	\$60,000	Attack: 500,000 Can attack: All Buildings and Units
Chemical Missile	\$35,000	Attack: 250,000 Can attack: Sea Units, Air Units, Vehicles
Biochemical Missile	\$30,000	Attack: 165,000 Can attack: Infantry
EMP Missile*	\$20,000	The EMP Missile initially disables 20% of the enemy's power supply decreasing 5% per hour over a 4 hour period. You do not receive clan points for using this missile.
Tomahawk 250C Missile	\$4,000	Attack: 5000 Can attack: Buildings
Tomahawk 500C Missile	\$8,000	Attack: 8000 Can attack: Buildings and Vehicles

* EMP damage is removed from the target province by 5% each hour. 2 EMP missiles will disable 40% of the targets power if they hit and the effect on the province will then reduce by 5% each hour. It would therefore take 8 hours before all EMP damage was removed.

3.9 - Satellites

There are 6 different satellites available for you to build. All satellites require 50% in *Satellite Technology* before they can be built. Each satellite costs 20 turns and takes 48 hours to construct. After you have built the satellite, you must launch it into space. It takes 1 hour for a satellite to reach earth's orbit, and it can then stay up for 14 days until it crashes down and burns up in earth's atmosphere. You can increase the time your satellite stays in orbit by continuing to research satellite technology over 50%. You get an extra

days orbit for every additional 10% research. A satellite will stay in orbit for the period researched at the time of launch, research while in orbit will not effect that satellite.

Your satellite power increases by 10% each hour and all satellites cost 5 turns to use. Satellites are not operational when you have low power although a previously launched Stealth Satellite will continue to function if it was activated while you had power. You can own any two satellites concurrently, even two of the same kind providing you have all 5 Headquarters. However, you may only have one satellite from each group (offensive and defensive*) in orbit at any one time. If you need to launch another satellite and your current satellite(s) have not yet crashed, you can demolish your satellite(s) for 20% of its/their original cost.

Available Satellites:

Name	Price	Description
EMP Satellite**	\$600,000	The EMP Satellite disables X% of the enemy's power supply over X amount of hours. Requires at least 25% satellite power, 100% satellite power = max effect damage (the more power, the more damage). Max effect: 30%, 6 hours
Laser Beam Satellite	\$1,000,000	Requires at least 25% satellite power, 100% satellite power = max attack damage (the more power, the more damage). 95% hit rate. Max Attack: 9000 Can attack: Buildings
Orbital Research Laboratory	\$350,000	Gives you 5 additional sciences per turn when researching. The 5 additional sciences are given in addition to the current number of sciences per turn you may be receiving from your research labs.
Spy Satellite	\$500,000	Spies on the enemy base. Requires 100% satellite power. You will receive this information: - Approximate number of enemy buildings and units. - Unused enemy land and power status.
Stealth Satellite	\$450,000	When activated, your base will be hidden from enemy spies, thieves, snipers, laser beam satellites and EMP satellites. It hides your base for 7 hours. Requires 100% satellite power.
Anti-Missile Satellite	\$700,000	Gives you instant 100% protection. Each time it shoots down a missile 50% satellite power is used. If you don't have enough satellite power, the satellite will not be able to shoot down any missiles until you get more satellite power.

*

Offensive Satellites:

Laser Beam Satellite
EMP Satellite
Spy Satellite

Defensive Satellites:

Orbital Research Laboratory
Stealth Satellite
Anti-Missile Satellite

**EMP damage is removed from the target province by 5% each hour. 1 hit at full power with the EMP satellite will disable 30% of the targets power and the effect on the province will then reduce by 5% each hour. It would therefore take 6 hours before all EMP damage was removed.

3.10 - Research

There are 10 different sciences available for you to research. Researching sciences requires turns. The number of turns needed is based on your amount of *Research Labs and HQs*, and the more you own, the more sciences per turn you get when researching. You will be able to research between 1 and 20 sciences per turn, depending on how many *Research Labs* and HQs you own. You can get up to 25 sciences per turn by getting an Orbital Research Laboratory.

Available Research:

Bank Management increases the amount of money you can deposit into the bank up to a total of \$5,000,000. Also, for every 10% of research the basic interest rate increases by 0.1%. When 50% of this research is completed the option to withdraw money after 24 hours with no interest and a 25% fee is enabled; when it is 100% complete the 25% fee is removed (2000 sciences). At 100% researched the fee

of 1/4 the money is removed when sending aid.

Engineer Effectiveness increases the amount of buildings you can build per turn. The maximum limit is 15 buildings per turn (2500 sciences); default is 5 buildings per turn.

Market Shipping Time reduces the time taken for items ordered from the market to arrive. The maximum limit is 50% (1800 sciences).

Market Discount gives you discount on all market merchandise. The maximum limit is 30% (1200 sciences).

Missile Accuracy gives your missiles a better chance to hit the target. The maximum limit is 80% (800 sciences); default is 10% accuracy.

Money Production increases your income per hour. The maximum limit is \$26,000 per hour (3000 sciences), default is \$2000 per hour.

Power Plant Efficiency increases the amount of power each power plant produces and also increases their defense/life. The maximum limit is 50% above normal (1000 sciences).

Satellite Technology gives you the knowledge to construct satellites. 50% satellite technology is needed in order to construct any satellites. Additional research over 50% extends the maximum orbit time of the satellite with up to 5 days (making it a total of 19 days in orbit). The maximum limit is 100% (3000 sciences). Once the Satellite Technology research is 100% complete the construction cost of each satellite will be reduced by 20% and each use of a satellite will cost 4 turns instead of 5.

Security System improves your security. This makes enemy thieves steal less money from you. It will not protect you from enemy thieves in any other way. The maximum limit is 100% (2000 sciences).

Thief Education teaches your thieves to steal more money and also to be stealthier. The maximum limit is 300% (3000 sciences).

4.1 - General Attack Information

Each attack is unique in some way and all attacks cost a different amount of turns. Launch Missile costs 4 turns. Regular Attack, Ground Attack and Air Attack cost 3 turns. Send Spy/Spy Plane costs 1 turn and Send Thief and Send Sniper costs 2 turns and 5% morale. The maximum amount of morale your army can have is 100%, and each attack uses a different amount of morale. An attack may "cost" as low as 20% of your morale and as high as 35%. When you attack an enemy that is smaller than yourself, you will lose 5% more morale. You will lose additional 10% of morale if you use an aggressive attack type. However, your morale increases by 5% every 15 minutes. Missiles have their own Missile Power (5% received per half hour) and does not use morale.

Target ID is the target province id.

Attack Method is the option on how you want to attack your enemy.

Main Target specifies the target your troops will focus on. You may also main target individual defence buildings providing you own HQ #3.

Attack Type specifies how the attack should be made; normal or aggressive.

4.2 - Regular Attack

Regular attack can consist of air units, vehicles and infantries. This attack method costs 3 turns.

4.3 - Ground Attack

Ground attack can only consist of ground units. Using this method makes the vehicles and infantries slightly more powerful than a Regular attack. This attack method costs 3 turns.

4.4 - Air and Sea Attack

Air and Sea attack can only consist of air units and sea units. You may load certain sea units with Tomahawk missiles, which will then be launched during the attack. Using this method makes these units slightly more powerful than a Regular attack. This attack method costs 3 turns.

4.5 - Launch Missile

Use this option to send your missiles to enemy targets. This attack method costs 4 turns, and uses 100% Missile Power. This does not include Tomahawks.

4.6 - Send Spy/Spy Plane (intelligence)

When you send out your spy, his job is to spy on your enemy's army or base. You can choose between an infantry spy for army intelligence or a spy plane to gather info on your enemies buildings. However, there is no guarantee either will succeed. You may send up to 5 Spies at once for the same amount of turns, for up to 5x the details of your results (chance of being caught increases by up to 10x). Opposing snipers and spies can kill infantry spies. If he does fail, your enemy is informed that you sent the spy. If your spy is successful, it is hard to count to an exact number of units or buildings in such a short period of time, so your spy works with special codenames. Below are the translations of those codenames. This attack method costs 1 turn.

Spy Codenames: The numbers on the table below are based on the sending of 1 Spy, and can be made more detailed depending on how many Spies are sent up to a total of 5.

Codename	Amount of Units
Few	0-99
Several	100-249
Pack	250-499
Lots of	500-1,499
Many	1,500-4,999
Crowd	5,000-9,999
Legion	10,000-19,999
Super Legion	20,000+

Spy Plane Codenames:

Codename	Amount of Buildings
Few	0-49
Several	50-124
Pack	125-249
Lots of	250-499
Many	500-999
Crowd	1,000-2,499
Legion	2,500-4,999
Super Legion	5,000+

4.7 - Send Spy (sabotage)

Spies have the option to sabotage missiles, power plants, and satellites. This attack method costs 5 turns and 100% morale.

4.8 - Send Thief

When you send out your thief, his job is to steal money from the selected enemy. However, there is no guarantee that your thief will succeed. If he does fail, your enemy is informed that you sent the thief. This attack method costs 2 turns and 5% morale.

You can send up to 10 thieves at once for the same turns and morale as one. This allows you to get up to 5 times the return but the chance of being caught increases by up to 10 times – times 1 extra for each additional thief. Therefore an attack with 5 thieves could get you up to 2.5 times as much money but you would be 5 times as likely to be caught. If caught you lose all attacking thieves.

4.9 - Sniper

A sniper can both attack and defend. They can attack spies, thieves and snipers. They can defend against spies, thieves, and snipers. They are five times better at defending than spies and thieves are. However, snipers have 5 times less defense against other snipers. This attack method costs 2 turns and 5% morale.

You can send up to 10 snipers at once for the same turns and morale as one. This allows you to do up to 5 times the damage but the chance of being caught increases by up to 10 times – times 1 extra for each additional sniper. Therefore an attack with 5 snipers could inflict up to 2.5 times as much damage but you would be 5 times as likely to be caught. If caught you lose all attacking snipers.

5.1 - Province Status and History

You can get access to a wealth of information about your province and you past performance from the status page. The history page shows statistics for the following items: -

History statistic	Explanation
Attack Success	The number of successful attacks made expressed as a percentage
Defend Success	The number of times successfully defended expressed as a percentage
Highest Networkh	The peak networkh you have achieved in the current round
Highest Land Area	Greatest land area you owned in the current round
Land Gained in Combat	Area of land gained by attacking other provinces
Land Lost in Combat	Area of land lost to other provinces attacking you
Money Gained in Combat	Sum of money gained by attacking other provinces
Money Lost in Combat	Sum of money lost to other provinces attacking you
Money Lost in Thievery	Sum of money you lost to thievery
Most Money Gained in Thievery	Highest amount of money stolen by one thief (GU only)
Kills	Number of provinces you killed
Kills (during clan wars)	Number of provinces you killed during clan wars
Times Killed	Number of times your province has been killed
Missiles Sent	Number of nuclear, chemical and biochemical missiles you have sent
NW Damage Made by Missiles	Cumulative sum of the damage your missiles have dealt this round
Enemy Missiles Received	Count of enemy missiles that have been fired at your province
Enemy Missiles Hit	Enemy missiles that have not missed or been shot down by anti-missile-systems
Enemy Missiles Missed	Enemy missiles that have missed your province
Enemy Missiles Shot Down	Enemy missiles that your anti-missile-systems have shot down
Attacks Made	Total attacks made, not including missiles sent
Attacks Made (during clan wars)	Total attacks made during clan wars, not including missiles sent
Wins	Successful attacks made (percentage in brackets)
Attacks Suffered	Total attacks suffered from other provinces
Defeats	Number of times the enemy successfully penetrated your defenses (percentage in brackets)
Clan Points Gained (current clan)	Total clan points gained in the current clan - every time you successfully attack a province your clan is at war with, you will be awarded clan points depending on the damage
Clan Points Gained (total)	Total clan points gained for the whole round
Aid Sent (current clan)	Amount of aid you have sent in current clan
Aid Received (current clan)	Amount of aid you have received in current clan
Targets Spied	Amount of targets spied in current clan
Time to Complete All Sciences	Total time to complete research on all sciences

Enhanced History: There are more History Statistics but these are Gold Used only.

You can also view graphs plotting the history of your province over the last 14 days in certain key areas:
- *Networkh*

- Land (Gold users only)
- Total Buildings (Gold users only)
- Total Units (Gold users only)

5.2 – Military Info

A full breakdown of your current military force is provided here for quick reference. You can choose to share certain military information with your clan mates from the preferences menu.

Extended Military Information is available to those who are currently in a Gold Clan. This feature allows Gold Clan members to view additional Military Information that is normally hidden. There are 6 sections visible: -

General - allows clan mates to view your status page.

Buildings - this permits clan mates to see what type and volume of buildings you have as well as what type of wall if any and whether or not you have a satellite in orbit.

Research - this lets clan mates look at what research you have done.

If you are Gold User your clan mates can also see the following Info. The dropdown list shows GU's as a darker color

History Graphs – allows clan mates to see you graphs (networth, land, buildings, units, attacks made, attacks received and clan points gained)

Statistic Breakdown – Allows clan mates to see your Networth and Turns Breakdown.

5.3 – Province Preferences

The preferences page allows you to change many options specific to your province including color schemes, province details, account details, account password and many gold user only options. This is also where you go to put your account into vacation mode or reset your account; as well as creating/editing your NZ Portal Profile.

The Profile option allows you to change certain details about your province, including your province name which can be changed if you are dead, if the game is between rounds and during the first 48 hours of a round. You can only change province name once every 2 weeks during the round.

Vacation mode puts your province into nuke protection for a specified period of time while you are away. During this time you cannot login to your province. You cannot go into vacation mode in the last 3 days of a round.

Your preferences page is also where you go to activate any gold users you may have purchased or to transfer them to another province via the Gold User Management section. Gold Memberships that have been used cannot be transferred, even if there are one or more rounds left.

5.4 – Community Score

For information on how the Community Score system works, go to the following page:

http://files.nukezone.info/community_score.htm

6.1 - General Clan Information

Clans are a vital element in NukeZone, and if you're not in a clan, join or create one immediately (see the Find Clan section for help joining a clan). Clans can provide protection to their provinces. A clan can have up to 20 members. There are four different types of clan members: Clan Leader (CL), Co-Leader (CO), Clan Trustee (CT), and Normal Member. The clan leader controls everything, and can select up to 5 clan trustees. These CT's can help the CL to control the clan by declaring war/peace, or by editing the clan message. If the CL gets banned or deleted due to inactivity, the CO will become CL, if there is no CO the first CT will become CL. If no CT is available, the province who has been in the clan the longest will become CL. Once a province leaves or is kicked from their clan, that province will no longer be allowed to return to that clan until the next round unless he left within the first 48 hours of the round. Close to the end of a round you are no longer able to join or create clans - this comes into force in the final 7 days.

Clan Leaders

Clan Leaders are the key to success for all clans. A clan must have an excellent leader to keep control and become unstoppable.

Clan Co-Leaders

Available only in a Platinum clan, the Co-Leader has all the same abilities as the Clan Leader except for: Change Clan Leader, Delete Clan.

Clan Trustees

Clan Trustees are almost like the clan leader. They exist to help the clan leader. In a Platinum Clan, the first CT can use the All Clan Message option to instantly send private messages to all clan members. If you are in a Platinum Clan, the CL and CO can set the rights for each single CT.

6.2 - Clan Points

In NukeZone, a Clan has three goals: Increase network, increase clan points and/or increase combo points. Clan points are only gained by attacking in a clan war. You must be in a clan for your province to earn Clan points. Clan points are awarded based on the damage inflicted on the enemy by an attack. The more damage you do, the more points your clan will receive.

When your clan declares war on another clan, you will receive 1-20 points depending on the damage inflicted for the first 48 hours. Then the maximum points you can gain drops by 2 points and continues to reduce by 2 points every subsequent 24 hours to a minimum of 4 points.

If another clan declares on your clan, you will receive 1-10 points when attacking them, again depending on the damage inflicted. In order to gain 1-20 points by attacking them you must declare back - this is known as a mutual war. Once your clan declares back you will have 48 hours of being able to get 1-20 points before the maximum points you can get begin to drop as described above.

If your clan does not declare back you will always get 1-10 points per attack. Note: different rules apply on the size of provinces you can attack depending on the type of war; mutual or one-sided. See 6.3 - Clan Wars for details.

When you kill a province in a one sided war you receive 25 clan points, when you kill a province in a mutual war you receive 50 clan points. Clan points gained from satellites, including for kills, are based on the amount of satellite power used.

When you kill a province of \$10,000 network or lower you do not gain any clan points. However, you still gain 1 kill on your stats record. Each time a clan achieves a bonus level the clan receives a fixed bonus of 300 turns per province and \$25 000 000. The clan bonus money is divided evenly among all clan members, whether or not the clan members are dead or alive. You must be a member of the clan for at least 72 hours to receive a clan bonus.

After your clan's first 5000 points your clan receives a mini bonus worth half a normal bonus. A super clan bonus is awarded at 50 000 clan points, 150 000 clan points, 250 000 clan points and 350 000 clan points etc. and is 1.5 times the regular bonus. A mega clan Bonus is awarded in replacement for every 2nd Super Clan Bonus at 100,000 clan points, 200,000 clan points, 300 000 clan points etc. and is 2 times the regular bonus. Both the turns and the money are increased with these special bonuses.

6.3 - Clan Wars

In NukeZone, when a clan is mad and wants vengeance over another clan, or the members just simply want to earn clan points, they declare war on the other clan. It can be fun and sometimes even be hard. This is why all clans must be at their prime and be prepared for a war at all times. After a CL or CT has declared war, they cannot declare peace for the next 24 hours. In addition, if one clan declares war against another clan, the network attack restrictions are still in place. However, if both sides declare war on each other, the network attack restrictions are removed. Network restrictions always apply the first 24 hours after joining a new clan and if you are using a thief or sniper, even in a mutual war. Clans may resume a war at any time after declaring peace as long as they don't already have 3 current war declarations against other clans; if they do then they must declare peace with at least 1 clan before they are able to resume the war. Once a war is resumed it must last a minimum of 24 hours before peace can be declared again.

6.4 - Clan Forum

Clan Forums are an excellent form of communication for a clan. You and your clan mates can discuss anything you want in there. You can post things like target provinces, ask for help, etc. It is the only forum not moderated by the Administrators and Moderators. The CL and CTs may edit/lock/delete whichever message they want on the Clan Forum.

Gold clans have the additional benefit of the Forum Management tool. This allows the clan leader to organize the clan forums and to give them custom names. It is possible to make a forum that only clan

trustees can visit or a read-only forum.

6.5 - Clan Tag

Clan tags are used to represent what clan a province is in. This is what it looks like: [TAG]Province.

6.6 - Clan Pages

By clicking the Clan link, you come to a page with several links dealing with your clan. Depending on if you are the CL, CO or a CT, some links might be crossed out. This means you do not have access to these areas. Here is all the information about each Clan Page.

Properties

Only the Clan Leader or CO can adjust the clan properties. In the properties page, the CL or CO can add or edit the clan name, clan tag, clan password and the location of the clan logo. Up to five CT's may also be selected from this page. The CL or CO may also choose to restrict shared military information for all new members for a period of time. Valid settings for this option are: None (no restrictions), 12 hours, 24 hours, 36 hours, 48 hours and 72 hours.

Send Aid

All members of the clan may access this page. Before you can send aid you must specify the receiver and enter the amount of money to send, and then press the Send Aid button. You can only send 1/3 of your available amount of money 3 times a day. Target province networth may not be larger than yours. You cannot send or receive aid when in nuke protection. Sending aid also costs you a 'tax' of 1 turn and 25% of the money sent, unless you have 100% banking research, where the 25% charge is removed.

Invite Player

Only the CL, CO and CT's can invite other provinces to join the clan. The networth of the other province does not matter. Mass inviting is not accepted. A clan can have a limit of 20 players including the CL. The CL or CO can create a short custom message which is included with the invitation sent to a province.

Clan Information

All members of the clan may access this area. On this page you can find a list of all members of the clan and their respective clan points acquired. Everything you see on the clan page is what everyone else sees except the amount of clan points a member has acquired.

Statistics Central (Platinum Clans only)

All clan members can access this page. This displays useful statistics including a Clan Overview, Clan Statistics and War History. The Clan Overview is updated on a real time basis and includes Last Login, Last Attack, Turns, Logins Per Day (LPD), Attacks Per Day (APD), Points Per Day (PPD). The Clan Statistics are updated every 6 hours and displays the province with most/least of the following: attacks made, attacks suffered, missiles sent, kills, times killed, clan points, aid sent, land, networth, units, buildings. The War History provides information about the clan's previous wars.

Spy Reports (Platinum Clans only)

All clan members have access to this page. The Spy Report page is separated into clans and clanless provinces. Only the CL, CO and CT's are able to delete the reports.

Clan Wars

All members have access to this area. This page displays a list of the clans that yours has currently declared war against; as well as the clans that have currently declared war against yours. This page also displays all clans you have declared peace on in the last 10 days.

Declare War/Peace

Only the CL, CO and CT's may access this page. They can declare war against another clan by entering the Clan ID of the clan they want to go to war with (must be in Networth Range of entire Clan Networth). If your clan has declared war against another clan more than 24 hours ago, your clan's CL, CO or CT can declare peace with the other clan by typing in the other Clan's ID in the text box provided.

Clan Message

Only the CL, CO and CT may access this page. They can post Clan Messages, which appear in the main page when a clan member logs in to NukeZone. If you have a gold clan, the CL, CO or CT can preview the message before posting it to check for errors. This is a great way to say something important and assure it reaches all clan members immediately. You can use certain G-Codes in the clan message – gold clans have additional G-Codes that they can use. G-Codes are explained further in section 7.2.

Clan Poll (Gold/Platinum Clans only)

Only the CL, CO and/or a CT's can access this page. They are able to create or edit the clan polls from

here. Only one clan poll can be created within a 24 hour period.

Clan Poll Archive (Gold/Platinum Clans only)

All members can access this page. This is where the archive of previous clan polls is stored.

Clan Forum Management (Gold/Platinum Clans only)

Only the CL and CO can access this area. This allows the CL or CO to change the clan forum settings and create new clan forums. The CL and CO of a Platinum Clan can give CT's the ability to access this area.

Domain Management (Platinum Clans only)

Only the CL or CO has access to this area. Here the CL or CO can request a custom NukeZone domain (tag.nukezone.info – where 'tag' is the clan's existing tag) and sub-domains for their clan homepage.

Receive Clan Bonus

All members can click on this to receive the Clan Bonus after the clan has reached 5,000, 10,000 and further multiples of 10,000 Clan Points. This link is enabled within 30 minutes after your clan has reached the Clan Bonus. You will receive a local event when this page has been enabled. If you do not go to this page to receive the bonus within 3 days of it being enabled you will automatically receive it. If you are in vacation mode at the time your clan receives a bonus then you will not receive a share of it. You need to be in the clan for 72 or more hours to be able to receive the bonus.

Clan Recruiting

Only the CL, CO and CT's have access to this area. This is where a clan can look for new members and specify the criteria which potential members must meet.

Find New Clan

Everyone has access to this area. This is where members can look for a new clan and specify the criteria which a potential new clan must meet.

Change Clan Leader

Only the CL may access this page. If a CL wants to give up the leadership, he can appoint a new leader of the clan. The old CL will then take over the new CL's old position.

Leave Clan

All members may access this page. If a member of a clan chooses to leave the clan, they can leave the clan immediately. However, The amount of time that provinces must wait after leaving a clan before joining another now increases based on how many clans they have already joined during that round. For 1-3 clans it remains at 24h and 4-5 clans is now 48h; then for 6+ clans the amount of time will increase at regular intervals.

Delete Clan

Only the CL may access this page. If the CL chooses to delete the clan, he may do so by clicking on Delete Clan.

6.7 - Clan Invitations

The CL, CO and CTs can view a complete list of pending clan invitations. They may also cancel any of these invitations; however invitations automatically expire after 7 days.

6.8 - Extended Military Information

Members of Gold Clans can choose to share their Extended Military Information, giving their clan mates the opportunity to view additional information about their province.

6.9 - Clan Status

Clans have a Status rating of: Brave, Fearless, Neutral, Fearful or Cowardly depending on the size of the clan they are declaring on. The larger the clan they declare war on, the more their status will rise to the positive end of the scale. Adversely, the smaller the clan that is declared upon, the more their status will fall to the negative end of the scale. This system is not in effect when you declare back on a clan. However, it will have a small positive affect, hence declaring back is a brave action. The clan status will affect the points you gain in a clan war: Brave (+20%), Fearless (+10%), Neutral (0%), Fearful (-10%) and Cowardly (-20%). War declarations during the first 10 days of a round do not have an effect on clan status, only declarations after that time will cause the clan status to change.

7.1 – Medals and Clan Awards

At the end of each round, 11 different medals are given out to the leaders of each area.

Medal of Honor - Most clan points gained by a province
 Medal of Growth - Highest network
 Medal of Death - Killed most provinces during clan wars
 Medal of Earth - Highest Land Area
 Medal of Courage - Performed most attacks
 Medal of Thievery - Most money stolen
 Medal of Knowledge - Quickest to research all sciences
 Medal of Mass Destruction - Most total NW damage made using missiles (excluding Tomahawk Missiles)
 Medal of Superiority - Province who first reaches 2500 clan points, counting from the beginning of the round and based on Clan Points Gained (total).
 Medal of Development - Province who first reaches \$2,500,000 network and keeps it for 48 hours.
 Medal of Accomplishment - Province who wins both the Medal of Honor and Medal of Superiority in the same round.

United Boundaries – Clan with the highest amount of land overall
 United Arms – Clan with the most attacks made during clan wars
 Golden Shotgun – First clan to reach 10000 points.
 Points Champion – Awarded to the first 3 clans in the points toplist (Gold, Silver and bronze)
 Network Champion – Awarded to the first 3 clans in the Network toplist (Gold, Silver and Bronze)
 Combo Champion – Awarded for the first 3 clans in the Combo toplist (Gold, Silver and Bronze) **

***Combo list: Combo points will be awarded to the top 100 clan rankings for points and for network. Clans will gain 1-100 points (rank #1 giving 100 points and rank #100 giving 1 point - anything beyond the rank of #100 receives zero points). Points are awarded daily as of midnight CET (server time), if the clan is in both top lists they will receive an additional 10% more points. So the maximum combo points a clan can obtain each day is 220 Combo points (100 for being number 1 in the Points-toplist, and 100 for being number 1 in the NW toplist + the 10% they get for being in both toplist = 20).*

7.2 - G-Code and Auto-Linking

The following G-Codes can be used in private messages, clan messages and on the forums. Please note that all G-Codes are case sensitive, except the G-Codes used in Clan Messages. If auto-linking is enabled all your entered URLs will automatically be transformed into clickable hyperlinks. Easy and simple link creation, simply enter the URL! However your URL must start with one of the following: http://, https://, ftp:// or www.

Available Tags in Private Messages:

Tag	Output
[USERPROVINCE]	Inserts the reader's province name. Works in both subject and message body.
[USERID]	Inserts the reader's province id. Works in both subject and message body.
[NAME]	Inserts the reader's name. Works in both subject and message body.
[B] [/B]	Text between these tags is displayed in bold. Works only in message body.
[I] [/I]	Text between these tags is displayed in italic. Works only in message body.
[U] [/U]	Text between these tags is displayed underlined. Works only in message body.

Available Tags in Clan Messages (Only available for Gold/Platinum Clans):

Tag	Output
[B] [/B]	Text between these tags is displayed in bold.
[I] [/I]	Text between these tags is displayed in italic.
[U] [/U]	Text between these tags is displayed underlined.
[S] [/S]	Text between these tags is displayed with a line through the middle the text.
[HR]	Inserts a horizontal line.
[CENTER] [/CENTER]	Text between these tags is displayed center aligned.
[LEFT] [/LEFT]	Text between these tags is displayed left aligned.
[RIGHT] [/RIGHT]	Text between these tags is displayed right aligned.
[COLOR=name] [/COLOR]	Text between these tags is displayed in specific

	color. See below for available font colors.
[FONT=name] [/FONT]	Text between these tags is displayed in specific font. See below for available fonts.
[SIZE=number] [/SIZE]	Text between these tags is displayed in specific size. See below for available font sizes.
[LAST_EDITED]	Example output: October 5th, 2002 01:45 CET
[EDITED_BY]	Name of CT/CL who edited the message.
[CLAN_POINTS]	Inserts total amount of current clan points. *
[NEXT_BONUS]	Inserts amount of points required to reach next bonus. *
[NW_RANK]	Inserts the current Networth rank of your clan. **
[PTS_RANK]	Inserts the current Points rank of your clan. **
[CBO_POINTS]	Inserts the Combo Points of your clan.
[CBO_RANK]	Inserts the current Combo Points rank of your clan.
[24H_CLAN_POINTS]	Inserts clan points gained over 24 hours.
[24H_PTS_RANK]	Inserts ranking over 24 hours in clan points gained.

* Note: With the [CLAN_POINTS] and [NEXT_BONUS] tags, if you wish to have a "p" after the points (e.g. "We have this many clan points: 2500p"), the "p" must be added following the tag [CLAN_POINTS]p. You can enter anything after the tag, not just the "p", so could for example enter "[CLAN_POINTS] points".
** These values are updated once every 6 hours.

Available Tags on the Forums:

Tag	Output
[B] [/B]	Text between these tags is displayed in bold. This tag does not work in the topic name.
[I] [/I]	Text between these tags is displayed in italic. This tag does not work in the topic name.
[U] [/U]	Text between these tags is displayed underlined. This tag does not work in the topic name.

Available Special Tags on the Clan Forums (Only available for Gold/Platinum Clans) *:

Tag	Output
[S] [/S]	Text between these tags is displayed with a line through the middle of text. This tag does not work in the topic name.
[IMG]url[/IMG]	Inserts an image. Specify the image source by entering the full url between these tags.
[COLOR=name] [/COLOR]	Text between these tags is displayed in specific color. (see below for valid colors)
[FONT=name] [/FONT]	Text between these tags is displayed in specific font. (see below for valid names)
[SIZE=number] [/SIZE]	Text between these tags is displayed in specific size. (see below for valid sizes)

* Only available if your CL has enabled it on the Clan Forum Management page.

Available Font Colors:

Aqua, black, blue, fuchsia, gray, green, lime, maroon, navy, olive, pink, purple, red, silver, teal, white, yellow. In addition, you may also enter any hexadecimal color code. Please note that the # sign is required when doing so.

Available Fonts:

Arial, Comic Sans, Courier New, Georgia, Helvetica, Impact, Times New Roman, Verdana

Available Font Sizes:

The number argument can still be any number between 0-6, but you may now also specify any custom size you want by adding "pt" after the number. So 16pt means size 16. The old style 0-6 is translated as follows: size 0=8pt, size 1=10pt, size 2=12pt, size 3=14pt, size 4=16pt, size 5=18pt, size 6=20pt.

7.3 - Extended G-Codes

As a Gold Clan, not only do you have the ability to use the regular G-Codes, you also get an extended

version of it. It can only be used in the clan message and can be used by Gold Clans only. A CL/CT can easily target a province and/or a clan by using these codes. The Extended G-Codes are not case-sensitive. A clan message can contain a maximum of 25 Extended G-Codes.

Available Extended G-Codes in Clan Messages (Only available for Gold/Platinum Clans):

Tag	Output
[P=id]	Creates a link to the specified province..
[C=id]	Creates a link to the specified clan.
[A=id]	Creates a link to the aid page for the specified province
[R=id]	Creates a link to the specified enemy province's spy report.
[CR=id]	Creates a link to all of the specified clan's spy reports.
[PNW=id]	Inserts the specified province's name and network and creates a link to the attack page. The network will be made bold if the enemy is within the viewer's attack range.
[NW=number]	The number must be a valid network value. The network is formatted and will be made bold if the enemy is within the viewers attack range.
[URL=link]text[/URL]	Turns the "text" into a hyperlink to click on. Valid "link" types are http, https, ftp, irc

Using this feature is fairly simple. While typing a message, a CL/CT can target a province by typing: [P=ProvinceID] or [C=ClanID]. By doing so, this converts the ID Number into your target's Province or Clan Name and ID Number as well as creating a clickable link to the province/clan information page.

Example: A CL/CT types in, "...War. Everyone attack this guy, [P=123]!" The G-Code converts this to, "...War. Everyone Attack This Guy, FakeProvince (#123)!", where the "FakeProvince (#123)" part is a clickable link that brings you to this enemies province information page. The same is done with clan targets.

8.1 - Technical Support

If you need technical support please contact our Customer Support by sending an in-game message to *Customer Support* (found in your contact list when you write a message) or simply post a message in the *Technical Support and Bug Reports* forum. Links to the multi report system, the EULAs and other important resources can be found by clicking the *help* link in the top right.

8.2 - Ideas and Suggestions

If you have an idea or a suggestion, please post it in the *Suggestions and Ideas* forum.

8.3 - Bug Reporting

Please report all bugs in the *Technical Support and Bug Reports* forum. Bugs that might affect the security or integrity of NukeZone and the server should NOT be posted in public; please inform the Customer Support directly by using one of the above-mentioned ways.

8.4 - IRC

NukeZone has its own IRC channel on the QuakeNet network. This is the place where the NZ Crew and the most experienced players hang around. Everyone is welcome!

Network: QuakeNet

Server: irc.quakenet.org

Channel: #NukeZone (for general NukeZone chat)

#NZSupport (for any game related problems/questions you might have)

#NZVeteran (must be veteran to join)

A quick IRC guide to get you online can be found here:

<http://www.nukezone.info/ircGuide.aspx>

8.5 - Rules

The Game Rules can be found at: <http://www.nukezone.info/gameRules.aspx>

The Forum Rules can be found at: <http://www.nukezone.info/forumRules.aspx>

8.6 - Credits

The NZ Crew:

Stefan Karlström (aka Guffy) – CEO, Lead Developer, Chief Administrator
Anthony Wiezoreck (aka EhpeX) – Chief of Operations, Administrator
Steve Brown (aka Primal) – Assistant Director of Operations, Administrator
Christian Anderstedt (aka glamDring) – Administrator
Chris Twine (aka Aqua) – Game Moderator+
Chris Norton (aka FireHawk) – Director of Community Development, Game Moderator
Keith Hodge (aka Pappahodge) – Director of Customer Relations, Game Moderator
Tim Bos (aka Bosje) – Chief of Information, Game Moderator
Paul Siddall (aka Dakeyras) – Game Moderator
Clayton Nash (aka Kombu) – Forum Moderator
Wim Wauters (aka GranDaddy) – Forum Moderator
Tom Henderson (aka Tommy) – Forum Moderator
Danny Groenen (aka The Hero) – Forum Moderator, Assistant Chief of Information
Lars Haglund (aka Zuckuss) – Forum Moderator
Duane Waldman (aka Waldo) – Forum Moderator
Jarrad Franco (aka DoC) – Forum Moderator
Jonaton Desmyter (aka Jupke) – Forum Moderator
Steve Jacks (aka Ambius) – Forum Moderator
Donald MacLean (aka Donald) – Forum Moderator

Special Thanks To:

Rob Parker (aka Ethiaa) – Ex Administrator

1.1 - Overview

NukeZone is a free, strategic text-based online game. The game is optimized for Internet Explorer 5.0 and above with a screen resolution of 800x600 or higher. The game will also work in newer versions of other browsers such as Opera and Netscape Navigator; however, while some features may not operate properly, the game engine functions correctly. It is strongly recommended that you use Internet Explorer 5.0 and above. Please click [here](#) to download the latest Internet Explorer from Microsoft's homepage.

NukeZone is played in rounds lasting approximately 3 months each. Round dates can be found on the login page. At the end of each round, winners in various categories are given medals and all provinces are reset and the game starts over.

If you find any bugs or any other errors in the game, please report them ASAP in the *Technical Support and Bug Reports* forum.

1.2 - Getting Started

You start with 125 turns and \$250,000, then the first time you login for the round you get awarded with an extra 175 turns and \$500,000 (totaling in 300 turns and \$750,000), the extra bonus is only available for provinces created before the start of the round and those created in the first 48 hours of a round. It is up to you to determine what to purchase, while some prefer to use a more offensive strategy, others will choose to adopt a more defensive strategy. Money is required to purchase buildings and units. Turns are required to purchase buildings (jump to *3.1 - Buildings* for more info), increase research (jump to *3.10 - Research* for more info), or attack (jump to *4.1 - General Attack Information* for more info). You need buildings to survive – when all your buildings are destroyed you will die. When you have died you spend 24 hours dead before starting over in nuke protection again – death results in a loss of all units, land, research, money (including in the bank) and turns except for the starting defaults.

There are several ways to get more money although you get a fixed number of turns:

- By default you receive 1 turn every 20th minute and \$2000 each hour. You can research Money Production to increase your income up to a maximum \$26,000/hour.
- Join/create a clan and fight other clans (that your clan is at war with) in order to receive clan bonuses (300 turns and \$25,000,000 for each 10,000 points; the clan bonus money is divided evenly among all clan members).
- Tell your friends about this game (you receive a 10 turn bonus for each friend that signs up and plays for a while). Please note that to receive the bonus your friend must sign up with the same email as the invitation was sent to.

Note: You will not receive any additional turns every 20 minutes if you already have more than 300 turns. However, you can receive the clan bonus during this time. Please use some of your turns in order to start receiving turns every 20 minutes again.

1.3 - Starting Bonus

You can select a starting bonus from the following list, which you must claim while in Nuke Protection.

- **Offensive**
Max morale capacity changes to 110%, plus an additional 45 turns.
- **Defensive**
All buildings get a 15% life boost, plus 2 extra sciences per turn, plus 5,000 m2 land.
- **Finance**
Hourly income increased by 10%, bank capacity is raised by 50% and \$250,000 money.
- **Shipping**
Market and missile orders ship 25% faster, plus ability to choose exact arrival time (up to 12 hours delayed), plus 3,000 m2 land and \$150,000 money.

The starting bonus you receive after you die is based on your networth 72 hours before you were killed. The bonus will increase gradually between \$100 000 and \$1 500 000 reaching a maximum increase of 300% at \$1 500 000. The increase will improve more dramatically at lower networth and decrease slowly as you approach \$1 500 000. The increases will not be in effect if you reset your account.

2.1 - Game

Main - Province info, power status, news, current server time, nuke protection options, starting bonus

Attack - Regular attack, ground attack, air and sea attack, launch missile, send spy/spy plane, send thief, send sniper

Research - Research sciences

Headquarters - View your Headquarters bonuses, manage Headquarters Operations and your army's General

Explore - Explore or Sell additional land.

Market - Buy/sell merchandise

Bank - Deposit/withdraw money

Clan - Join/create clan, clan properties, invite/kick players, manage clan wars, leave/delete clan, recruiting system etc

2.2 - Build

Buildings - Build/demolish buildings

Sea Units - Build sea units

Air Units - Build air units

Vehicles - Build vehicles

Infantries - Train infantries

Missiles - Order missiles, view arrival dates

Satellites - Build/use Satellites

2.3 - Show

Local Events - Shows local events

Global Events - Shows global events, can be filtered by incoming, outgoing or internal.

Attack Events - Shows local outgoing events (Gold Users only).

Search Events - Allows a search of local and global events.

Enemy List - Links to enemy list (Gold Users only).

Status - Information, military info, military settings, history graphs (including Gold User only info) and several province statistics, rank from previous round

All Provinces - Shows all provinces within your attack range

All Clans - Shows all clans

Top List - Top Provinces, Top Clans (Networth), Top Clans (Points)

Search - Search for provinces by province id or province name, search for clans by clan id or clan name/tag

Clan Forum - A direct link to your private clan forum (only visible if you're a member of a clan)

Forum - NukeZone forums

Online Shop - Purchase a Gold user or Gold/Platinum clan

2.4 - NZ Portal

News - Displays current news items

Articles - Displays current articles

Profiles - Displays player profiles

2.5 - Other

Inbox - Display your inbox (private messages that have been sent to you)

New Message - Compose a new message

Preferences - Options, edit profile, change colors, change password, delete province, reset province, create/edit your NZ Portal profile etc

Contact Us - Crew contact information, credits

Logout - Logout from NukeZone

3.1 - Buildings and Walls

Land is nice to have, but without buildings and infrastructure it is of little use. NukeZone offers a variety of buildings to place on your land. Each building has some inherent benefits that allow your province to grow or specialize. It is up to you to determine how to fill your land, and there is no perfect or ideal balance for growth. As well, each building uses a specific amount of power, and power can only be provided by power plants. If you have low power, your defensive buildings, missile silos, research labs, command centres and headquarters buildings won't work, meaning you will be more susceptible to attack, will not be able to launch missiles or be able to perform scientific research. The defense values of your buildings drop by 25% when you are low on power and you will be unable to use spy planes, spies, thieves, snipers and satellites. If you are short on land, either explore for more or attack someone to try and steal some. The amount of unused land improves the defense of your buildings by up to a 40% boost for 25% unused land. It takes 20 m² to build each building with the exception of Headquarters which take 1000 m².

Available Buildings:

Name	Price	Description
Research Lab	\$2,000	Gives 1 extra science/turn to research for each 50

		research labs. Attack: 0, Life: 200 Power usage: 2000
Missile Silo	\$22,000	Houses 1 missile. Attack: 0, Life: 500 Power usage: 10000
Headquarters	\$250,000 25 turns and 1000 m2 of land	Improves various abilities for your province† Attack: 0, Life: 5000 Power Usage: HQ1: 25,000; HQ2: 50,000; HQ3: 100,000; HQ4: 150,000; HQ5: 250,000
Command Centre	\$2,200	Supports 5 special units††. Attack: 0, Life: 120 Power Usage: 1800
Shipyards	\$1,100	Houses 5 sea units. Attack: 0, Life: 90 Power usage: 700
Airfield	\$900	Houses 5 air units. Attack: 0, Life: 85 Power usage: 600
War Factory	\$1,200	Houses 10 vehicles. Attack: 0, Life: 80 Power usage: 900
Barracks	\$700	Houses 20 infantries. Attack: 0, Life: 60 Power usage: 650
Power Plant	\$450	Produces 4500 power units. Attack: 0, Life: 85
Advanced Power Plant	\$1,400	Produces 15000 power units. Attack: 0, Life: 40
Torpedo launcher	\$1,850	Gives you a sea defense. Attack: 350, Life: 280 Power usage: 600
SAM Site	\$1,400	Gives you an air defense. Attack: 265, Life: 240 Power usage: 475
Missile Turret	\$1,500	Gives you a vehicle defence. Attack: 300, Life: 265 Power usage: 275
Machinegun Turret	\$1,200	Gives you an infantry defence. Attack: 190, Life: 290 Power usage: 225
Anti-Missile System	\$5,000	Gives you a missile defense†††. Attack: 0, Life: 400 Power usage: 1700

† Headquarters Building - You may only own 5 Headquarter buildings at any time and you may only build one per 72 hour period. The Headquarter building cannot be main targeted in an attack, but can be destroyed. The power usage is per building and is cumulative, therefore if you own 2 buildings you will use 25,000 + 50,000 for a total power usage of 75,000. Headquarters abilities are cumulative and in the order listed. For example, when you have three headquarters, you will have ALL of the bonuses provided by numbers 1, 2, and 3.

Headquarters #1

- * 75% chance of tracking origin of missiles
- * 10% attack boost to attacking units
- * 1 additional science per turn when researching

Headquarters #2

- * 25% increase to land exploration
- * Implements the Coastal Defense System (5% increased protection against air and sea attack)
- * 1 additional science per turn when researching
- * Gives an additional \$1000/hour

Headquarters #3

- * 50% increase to land exploration
- * Unlocks the sabotage missions for the Spy unit giving a 50% chance of success.
- * Increases the Coastal Defense System to 10% protection.

- * 1 additional science per turn when researching
- * Gives an additional \$1000/hour
- * Ability to Main Target individual defense buildings.

Headquarters #4

- * Unlocks the Headquarter Operations
- * Unlocks the General unit with 1 life/hour regeneration rate.
- * Missile accuracy improved with 10%
- * Increases the Coastal Defense System to 15% protection.
- * 1 additional science per turn when researching
- * Improves sabotage missions chance of success to 65%
- * Gives an additional \$1000/hour
- * Improved accuracy for Main Targeting by 2x.

Headquarters #5

- * Enables you to own and utilize two satellites simultaneously
- * 1 additional science per turn when researching
- * Improves sabotage missions chance of success to 80%
- * 10% defense boost for defending units when attacked
- * Increases the General unit to 4 life/hour regeneration rate.
- * Gives an additional \$1000/hour
- * 75% land exploration bonus.

Headquarter Operations

Four Headquarter buildings are required to run Headquarter Operations. Headquarter Operations cost 2 turns and two hourly fees to activate, and then cost a fixed fee per hour, automatically taken from your income. A maximum of half your income may be used for HQ Operations. If your fourth Headquarters is destroyed, the operation will cease functioning. HQ Operations auto deactivate if your account remains inactive for more than 5 days(when you stop receiving your hourly income).

- * \$1000/hour: 100% chance of tracking origin of missiles and special units
- * \$2000/hour: Increased defense against incoming sabotage missions by 50%
- * \$3000/hour: Increased defense against incoming EMP attacks by 50%
- * \$4000/hour: 2 additional life per hour for the General unit.
- * \$5500/hour: Defense buildings do 25% additional damage.
- * \$6000/hour: Increased defense against incoming missile attacks by 25%
- * \$10000/hour: 5% additional satellite power per hour

General Unit

Four Headquarter buildings are required to get access to the General unit. The unit arrives 72 hours after the fourth HQ building is constructed and starts with 100 life. It gains 1-6 life per hour depending on number of headquarters and HQ Operations active. The General can be sent in battle and can be killed in action, and a new one then arrives 72 hours later. When the General unit arrives you will choose a name for it from a list and get to choose one of the following enhancements listed below. Whenever you include the General unit with an attack you get the chosen enhancement. The General unit is idle when defending and does not provide enhancements for defending units or buildings.

Enhancements:

- * 10% additional attack
- * 10% additional defense
- * Avoids walls and the Coastal Defense System provided by the Headquarters 2-4.

General Abilities:

- * 10% attack boost (cost: 50 life)
- * 10% defense boost (cost: 50 life)
- * Double money/land gained in combat (cost: 50 life)
- * 50% improved main targeting (cost: 75 life)
- * Spy Report units after-attack information (cost: 100 life)
- * Spy Report buildings after-attack information (cost: 100 life)
- * Double damage in combat (cost: 500 life).
- * Last Stand: Requires at least 200 life, and doubles the attack of your defending units and buildings. It can not be activated during the last 3 days of the round.

†† Special units are; Spy Plane, Spy, Thief and Sniper.

††† Anti-Missile System defense varies based on the amount of used land. Anti-Missile Systems provide a

maximum of 50% protection without HQ Operation. 750 Anti-Missile Systems will provide 50% protection, no matter the amount of used land you have.

Available Walls:

Name	Price	Description
Barbed Wire	\$0	Provides 0% vehicle and infantry defense. Requires: none
Sandbag Wall	\$50,000*	Provides 5% vehicle and infantry defense. Requires: Barbed Wire
Concrete Wall	\$250,000*	Provides 10% vehicle and infantry defense. Requires: Sandbag Wall
Laser Fence	\$500,000*	Provides 15% vehicle and infantry defense. Requires: Concrete Wall

* Lowest price (the price increases with the more land you own). Walls reduce the strength of the attacking force by a certain percentage, based on the type of wall.

3.2 - Sea Units

To build sea units, you need shipyards, which house 5 sea units. Sea units can only be combined with air units in an "Air and Sea Attack".

Available Units:

Name	Price	Description
Submarine	\$2,300	Attack: 180, Life: 170 Can attack: Sea Units Can carry: 2 Tomahawk Missiles
Stealth Boat	\$700	Attack: 50, Life: 70 Can attack: Sea Units, Infantries
Destroyer	\$1,500	Attack: 70, Life: 60 Can attack: Vehicles, Infantries, Buildings
Cruiser	\$2,000	Attack: 85, Life: 105 Can attack: Sea Units, Air Units, Buildings
T-2000 Hovercraft	\$800	Attack: 70, Life: 35 Can attack: Air Units, Buildings

3.3 - Air Units

To build air units, you need airfields, which house 5 air units. Air units can be combined with all other units when attacking.

Available Units:

Name	Price	Description
F-22 Raptor	\$1,075	Attack: 65, Life: 55 Can attack: Sea Units, Air Units
F/A-18 Super Hornet	\$750	Attack: 55, Life: 25 Can attack: Air Units, Buildings
F-35 JSF	\$925	Attack: 55, Life: 45 Can attack: Air Units, Vehicles
B-2 Stealth Bomber	\$1,500	Attack: 130, Life: 55 Can attack: Buildings
RAH-66 Comanche	\$800	Attack: 35, Life: 40 Can attack: Vehicles, Infantries, Buildings
SH-60 Sea Hawk	\$700	Attack: 70, Life: 40 Can attack: Sea Units
Aurora Spy Plane	\$15,000	Spies on enemy buildings. Attack: 0, Life: 200 Can attack: None
CH-46 Sea Knight	\$1,000	Enables you to transport 15 infantry per unit in a Sea and Air attack, while boosting transported infantries attack by 50% and lowering their life by 15%. Attack: 25, Life: 135

		Can attack: Buildings
--	--	-----------------------

3.4 - Vehicles

To build vehicles you need war factories, which house 10 vehicles. Vehicles can be combined with air units and infantries when attacking.

Available Units:

Name	Price	Description
Humvee	\$500	Attack: 60, Life: 20 Can attack: Infantries
Hover Tank	\$600	Attack: 35, Life: 20 Can attack: Sea Units, Infantries, Buildings
Heavy Artillery	\$1,000	Attack: 95, Life: 40 Can attack: Buildings
SAM Tank	\$700	Attack: 60, Life: 30 Can attack: Air Units
M1 Abrams Tank	\$1,250	Attack: 65, Life: 60 Can attack: Vehicles, Buildings

3.5 - Infantries

To train infantries you need barracks, which house 20 infantries. Infantries can be combined with air units and vehicles when attacking.

Available Units:

Name	Price	Description
Thief	\$5,000	Steals money from the enemy base and protects your base from possible enemy thieves. Attack: 0, Life: 5 Can attack: none
Spy	\$3,000	Spies on enemy units, protects your base from possible enemy spies and carries out Sabotage Missions*. Attack: 0, Life: 5 Can attack: none
Sniper	\$5,000	Attack: 125, Life: 65 Can attack: Spies, Thieves, Snipers Note: Snipers have 5 times less defense against other snipers
Navy Seal	\$900	Attack: 45, Life: 25 Can attack: Sea Units, Buildings
Heavy Infantry	\$400	Attack: 20, Life: 15 Can attack: Air Units, Infantries, Buildings
Machine Gunner	\$350	Attack: 25, Life: 15 Can attack: Infantries
Grenade Soldier	\$425	Attack: 35, Life: 10 Can attack: Vehicles

**Sabotage Missions* - Spies have the option to sabotage missiles, power plants, and satellites. The sabotage option is unlocked and has a 50% chance of success with 3 Headquarters, 65% with 4 Headquarters and 80% with 5 Headquarters.

Missiles: Sabotages 1 missile and may be in effect for up to 10 days or until the missile is launched. If the missile is launched within the 10 day period and the sabotage is successful, it will blow up in the enemy's base prior to launch causing 20% damage. The enemy will still be charged full turns and morale for the attempted launch. The maximum amount of missiles that may be sabotaged for any enemy is 5 at any one time.

Power Plants: If the power plant sabotage option is chosen and the spy is successful it will disable 10% of the enemies' power plants for 48 hours. The maximum amount of power plants that may be sabotaged for any enemy is 50% at any one time.

Satellites: If sabotage is successful the enemies' satellite power is reset to 0% for 10 hours before power begins the 10% hourly increase.

3.6 - Special Units

Special units are the spy plane, spy, thief and sniper. In order to own these units you must have

Command Centres. You can have a maximum of 200 Command Centres meaning you are limited to no more than 1000 special units. Special units cannot be used when you have low power. You may only buy or sell 100 special units per day in all market transactions; e.g. buying 50 and selling 50 would be the maximum special unit transactions for that day.

3.7 - Market

The market allows you to buy units without using turns to build them. However, units on the market are more expensive to buy and because they are not built in your province, they take time to arrive. Depending on the research you have and how much you are willing to pay you can get units from the market in between 3 and 12 hours. You can cancel an incoming order, which returns 75% of the regular market price (money spend on accelerated shipping will not be returned after canceling an order).

You can pay extra to reduce the time it takes for your units to be delivered – paying double the price allows your units to arrive in half the time. Accelerated shipping for missiles costs 1.5x the price. You can also research the Shipping Time Science so you get units from the market faster.

The market also allows you to sell your units to recoup some of their cost if you no longer want them.

3.8 - Missiles

To build missiles you need missile silos, which house 1 missile. A missile is an expensive but very powerful attack option. The chance of hitting the enemy base depends on two things: your missile accuracy and your enemy's missile defense. Missiles cost 5 turns to build and 4 turns to launch. They make use of their own Missile Power (5% received per half hour) and do not use morale. 100% Missile Power is required to launch missiles. Accelerated Shipping mode for missiles cost 1.5 times the standard price.

Tomahawk Missiles do not require a missile silo to build or to launch. Submarines are required to both house and launch the Tomahawk Missiles. As such you must send them with an air and sea attack with the appropriate amount of submarines. Tomahawks are not affected by your missile accuracy although 50% is needed before you may build them but they can be shot down. A submarine can hold 2 Tomahawk Missiles. 3 Tomahawks may be built for every turn and take 6 hours to build. You can send 4 Tomahawk missiles for every \$10,000 Network worth you send in the attack.

Anti-Missile Systems, SAM Sites, SAM Tanks, F-22 Raptors and Cruisers can defend against Tomahawk Missiles. SAM Tanks, F-22 Raptors and Cruisers provide equal protection against Tomahawks while SAM Sites provide 3 times the protection of SAM Tanks, F-22 Raptors and Cruisers; Anti-Missile Systems provide 5 times the protection. The default chance of tracking missiles is 25%, however this is raised to 75% when 1 or more Headquarters Building is owned.

Available Missiles:

Name	Price	Description
Nuclear Missile	\$60,000	Attack: 500,000 Can attack: All Buildings and Units
Chemical Missile	\$35,000	Attack: 250,000 Can attack: Sea Units, Air Units, Vehicles
Biochemical Missile	\$30,000	Attack: 165,000 Can attack: Infantry
EMP Missile*	\$20,000	The EMP Missile initially disables 20% of the enemy's power supply decreasing 5% per hour over a 4 hour period. You do not receive clan points for using this missile.
Tomahawk 250C Missile	\$4,000	Attack: 5000 Can attack: Buildings
Tomahawk 500C Missile	\$8,000	Attack: 8000 Can attack: Buildings and Vehicles

* EMP damage is removed from the target province by 5% each hour. 2 EMP missiles will disable 40% of the targets power if they hit and the effect on the province will then reduce by 5% each hour. It would therefore take 8 hours before all EMP damage was removed.

3.9 - Satellites

There are 6 different satellites available for you to build. All satellites require 50% in *Satellite Technology* before they can be built. Each satellite costs 20 turns and takes 48 hours to construct. After you have built the satellite, you must launch it into space. It takes 1 hour for a satellite to reach earth's orbit, and it can then stay up for 14 days until it crashes down and burns up in earth's atmosphere. You can increase the time your satellite stays in orbit by continuing to research satellite technology over 50%. You get an extra

days orbit for every additional 10% research. A satellite will stay in orbit for the period researched at the time of launch, research while in orbit will not effect that satellite.

Your satellite power increases by 10% each hour and all satellites cost 5 turns to use. Satellites are not operational when you have low power although a previously launched Stealth Satellite will continue to function if it was activated while you had power. You can own any two satellites concurrently, even two of the same kind providing you have all 5 Headquarters. However, you may only have one satellite from each group (offensive and defensive*) in orbit at any one time. If you need to launch another satellite and your current satellite(s) have not yet crashed, you can demolish your satellite(s) for 20% of its/their original cost.

Available Satellites:

Name	Price	Description
EMP Satellite**	\$600,000	The EMP Satellite disables X% of the enemy's power supply over X amount of hours. Requires at least 25% satellite power, 100% satellite power = max effect damage (the more power, the more damage). Max effect: 30%, 6 hours
Laser Beam Satellite	\$1,000,000	Requires at least 25% satellite power, 100% satellite power = max attack damage (the more power, the more damage). 95% hit rate. Max Attack: 9000 Can attack: Buildings
Orbital Research Laboratory	\$350,000	Gives you 5 additional sciences per turn when researching. The 5 additional sciences are given in addition to the current number of sciences per turn you may be receiving from your research labs.
Spy Satellite	\$500,000	Spies on the enemy base. Requires 100% satellite power. You will receive this information: - Approximate number of enemy buildings and units. - Unused enemy land and power status.
Stealth Satellite	\$450,000	When activated, your base will be hidden from enemy spies, thieves, snipers, laser beam satellites and EMP satellites. It hides your base for 7 hours. Requires 100% satellite power.
Anti-Missile Satellite	\$700,000	Gives you instant 100% protection. Each time it shoots down a missile 50% satellite power is used. If you don't have enough satellite power, the satellite will not be able to shoot down any missiles until you get more satellite power.

*

Offensive Satellites:

Laser Beam Satellite
EMP Satellite
Spy Satellite

Defensive Satellites:

Orbital Research Laboratory
Stealth Satellite
Anti-Missile Satellite

**EMP damage is removed from the target province by 5% each hour. 1 hit at full power with the EMP satellite will disable 30% of the targets power and the effect on the province will then reduce by 5% each hour. It would therefore take 6 hours before all EMP damage was removed.

3.10 - Research

There are 10 different sciences available for you to research. Researching sciences requires turns. The number of turns needed is based on your amount of *Research Labs and HQs*, and the more you own, the more sciences per turn you get when researching. You will be able to research between 1 and 20 sciences per turn, depending on how many *Research Labs* and HQs you own. You can get up to 25 sciences per turn by getting an Orbital Research Laboratory.

Available Research:

Bank Management increases the amount of money you can deposit into the bank up to a total of \$5,000,000. Also, for every 10% of research the basic interest rate increases by 0.1%. When 50% of this research is completed the option to withdraw money after 24 hours with no interest and a 25% fee is enabled; when it is 100% complete the 25% fee is removed (2000 sciences). At 100% researched the fee

of 1/4 the money is removed when sending aid.

Engineer Effectiveness increases the amount of buildings you can build per turn. The maximum limit is 15 buildings per turn (2500 sciences); default is 5 buildings per turn.

Market Shipping Time reduces the time taken for items ordered from the market to arrive. The maximum limit is 50% (1800 sciences).

Market Discount gives you discount on all market merchandise. The maximum limit is 30% (1200 sciences).

Missile Accuracy gives your missiles a better chance to hit the target. The maximum limit is 80% (800 sciences); default is 10% accuracy.

Money Production increases your income per hour. The maximum limit is \$26,000 per hour (3000 sciences), default is \$2000 per hour.

Power Plant Efficiency increases the amount of power each power plant produces and also increases their defense/life. The maximum limit is 50% above normal (1000 sciences).

Satellite Technology gives you the knowledge to construct satellites. 50% satellite technology is needed in order to construct any satellites. Additional research over 50% extends the maximum orbit time of the satellite with up to 5 days (making it a total of 19 days in orbit). The maximum limit is 100% (3000 sciences). Once the Satellite Technology research is 100% complete the construction cost of each satellite will be reduced by 20% and each use of a satellite will cost 4 turns instead of 5.

Security System improves your security. This makes enemy thieves steal less money from you. It will not protect you from enemy thieves in any other way. The maximum limit is 100% (2000 sciences).

Thief Education teaches your thieves to steal more money and also to be stealthier. The maximum limit is 300% (3000 sciences).

4.1 - General Attack Information

Each attack is unique in some way and all attacks cost a different amount of turns. Launch Missile costs 4 turns. Regular Attack, Ground Attack and Air Attack cost 3 turns. Send Spy/Spy Plane costs 1 turn and Send Thief and Send Sniper costs 2 turns and 5% morale. The maximum amount of morale your army can have is 100%, and each attack uses a different amount of morale. An attack may "cost" as low as 20% of your morale and as high as 35%. When you attack an enemy that is smaller than yourself, you will lose 5% more morale. You will lose additional 10% of morale if you use an aggressive attack type. However, your morale increases by 5% every 15 minutes. Missiles have their own Missile Power (5% received per half hour) and does not use morale.

Target ID is the target province id.

Attack Method is the option on how you want to attack your enemy.

Main Target specifies the target your troops will focus on. You may also main target individual defence buildings providing you own HQ #3.

Attack Type specifies how the attack should be made; normal or aggressive.

4.2 - Regular Attack

Regular attack can consist of air units, vehicles and infantries. This attack method costs 3 turns.

4.3 - Ground Attack

Ground attack can only consist of ground units. Using this method makes the vehicles and infantries slightly more powerful than a Regular attack. This attack method costs 3 turns.

4.4 - Air and Sea Attack

Air and Sea attack can only consist of air units and sea units. You may load certain sea units with Tomahawk missiles, which will then be launched during the attack. Using this method makes these units slightly more powerful than a Regular attack. This attack method costs 3 turns.

4.5 - Launch Missile

Use this option to send your missiles to enemy targets. This attack method costs 4 turns, and uses 100% Missile Power. This does not include Tomahawks.

4.6 - Send Spy/Spy Plane (intelligence)

When you send out your spy, his job is to spy on your enemy's army or base. You can choose between an infantry spy for army intelligence or a spy plane to gather info on your enemies buildings. However, there is no guarantee either will succeed. You may send up to 5 Spies at once for the same amount of turns, for up to 5x the details of your results (chance of being caught increases by up to 10x). Opposing snipers and spies can kill infantry spies. If he does fail, your enemy is informed that you sent the spy. If your spy is successful, it is hard to count to an exact number of units or buildings in such a short period of time, so your spy works with special codenames. Below are the translations of those codenames. This attack method costs 1 turn.

Spy Codenames: The numbers on the table below are based on the sending of 1 Spy, and can be made more detailed depending on how many Spies are sent up to a total of 5.

Codename	Amount of Units
Few	0-99
Several	100-249
Pack	250-499
Lots of	500-1,499
Many	1,500-4,999
Crowd	5,000-9,999
Legion	10,000-19,999
Super Legion	20,000+

Spy Plane Codenames:

Codename	Amount of Buildings
Few	0-49
Several	50-124
Pack	125-249
Lots of	250-499
Many	500-999
Crowd	1,000-2,499
Legion	2,500-4,999
Super Legion	5,000+

4.7 - Send Spy (sabotage)

Spies have the option to sabotage missiles, power plants, and satellites. This attack method costs 5 turns and 100% morale.

4.8 - Send Thief

When you send out your thief, his job is to steal money from the selected enemy. However, there is no guarantee that your thief will succeed. If he does fail, your enemy is informed that you sent the thief. This attack method costs 2 turns and 5% morale.

You can send up to 10 thieves at once for the same turns and morale as one. This allows you to get up to 5 times the return but the chance of being caught increases by up to 10 times – times 1 extra for each additional thief. Therefore an attack with 5 thieves could get you up to 2.5 times as much money but you would be 5 times as likely to be caught. If caught you lose all attacking thieves.

4.9 - Sniper

A sniper can both attack and defend. They can attack spies, thieves and snipers. They can defend against spies, thieves, and snipers. They are five times better at defending than spies and thieves are. However, snipers have 5 times less defense against other snipers. This attack method costs 2 turns and 5% morale.

You can send up to 10 snipers at once for the same turns and morale as one. This allows you to do up to 5 times the damage but the chance of being caught increases by up to 10 times – times 1 extra for each additional sniper. Therefore an attack with 5 snipers could inflict up to 2.5 times as much damage but you would be 5 times as likely to be caught. If caught you lose all attacking snipers.

5.1 - Province Status and History

You can get access to a wealth of information about your province and you past performance from the status page. The history page shows statistics for the following items: -

History statistic	Explanation
Attack Success	The number of successful attacks made expressed as a percentage
Defend Success	The number of times successfully defended expressed as a percentage
Highest Networkh	The peak networkh you have achieved in the current round
Highest Land Area	Greatest land area you owned in the current round
Land Gained in Combat	Area of land gained by attacking other provinces
Land Lost in Combat	Area of land lost to other provinces attacking you
Money Gained in Combat	Sum of money gained by attacking other provinces
Money Lost in Combat	Sum of money lost to other provinces attacking you
Money Lost in Thievery	Sum of money you lost to thievery
Most Money Gained in Thievery	Highest amount of money stolen by one thief (GU only)
Kills	Number of provinces you killed
Kills (during clan wars)	Number of provinces you killed during clan wars
Times Killed	Number of times your province has been killed
Missiles Sent	Number of nuclear, chemical and biochemical missiles you have sent
NW Damage Made by Missiles	Cumulative sum of the damage your missiles have dealt this round
Enemy Missiles Received	Count of enemy missiles that have been fired at your province
Enemy Missiles Hit	Enemy missiles that have not missed or been shot down by anti-missile-systems
Enemy Missiles Missed	Enemy missiles that have missed your province
Enemy Missiles Shot Down	Enemy missiles that your anti-missile-systems have shot down
Attacks Made	Total attacks made, not including missiles sent
Attacks Made (during clan wars)	Total attacks made during clan wars, not including missiles sent
Wins	Successful attacks made (percentage in brackets)
Attacks Suffered	Total attacks suffered from other provinces
Defeats	Number of times the enemy successfully penetrated your defenses (percentage in brackets)
Clan Points Gained (current clan)	Total clan points gained in the current clan - every time you successfully attack a province your clan is at war with, you will be awarded clan points depending on the damage
Clan Points Gained (total)	Total clan points gained for the whole round
Aid Sent (current clan)	Amount of aid you have sent in current clan
Aid Received (current clan)	Amount of aid you have received in current clan
Targets Spied	Amount of targets spied in current clan
Time to Complete All Sciences	Total time to complete research on all sciences

Enhanced History: There are more History Statistics but these are Gold Used only.

You can also view graphs plotting the history of your province over the last 14 days in certain key areas:
- *Networkh*

- Land (Gold users only)
- Total Buildings (Gold users only)
- Total Units (Gold users only)

5.2 – Military Info

A full breakdown of your current military force is provided here for quick reference. You can choose to share certain military information with your clan mates from the preferences menu.

Extended Military Information is available to those who are currently in a Gold Clan. This feature allows Gold Clan members to view additional Military Information that is normally hidden. There are 6 sections visible: -

General - allows clan mates to view your status page.

Buildings - this permits clan mates to see what type and volume of buildings you have as well as what type of wall if any and whether or not you have a satellite in orbit.

Research - this lets clan mates look at what research you have done.

If you are Gold User your clan mates can also see the following Info. The dropdown list shows GU's as a darker color

History Graphs – allows clan mates to see you graphs (networth, land, buildings, units, attacks made, attacks received and clan points gained)

Statistic Breakdown – Allows clan mates to see your Networth and Turns Breakdown.

5.3 – Province Preferences

The preferences page allows you to change many options specific to your province including color schemes, province details, account details, account password and many gold user only options. This is also where you go to put your account into vacation mode or reset your account; as well as creating/editing your NZ Portal Profile.

The Profile option allows you to change certain details about your province, including your province name which can be changed if you are dead, if the game is between rounds and during the first 48 hours of a round. You can only change province name once every 2 weeks during the round.

Vacation mode puts your province into nuke protection for a specified period of time while you are away. During this time you cannot login to your province. You cannot go into vacation mode in the last 3 days of a round.

Your preferences page is also where you go to activate any gold users you may have purchased or to transfer them to another province via the Gold User Management section. Gold Memberships that have been used cannot be transferred, even if there are one or more rounds left.

5.4 – Community Score

For information on how the Community Score system works, go to the following page:

http://files.nukezone.info/community_score.htm

6.1 - General Clan Information

Clans are a vital element in NukeZone, and if you're not in a clan, join or create one immediately (see the Find Clan section for help joining a clan). Clans can provide protection to their provinces. A clan can have up to 20 members. There are four different types of clan members: Clan Leader (CL), Co-Leader (CO), Clan Trustee (CT), and Normal Member. The clan leader controls everything, and can select up to 5 clan trustees. These CT's can help the CL to control the clan by declaring war/peace, or by editing the clan message. If the CL gets banned or deleted due to inactivity, the CO will become CL, if there is no CO the first CT will become CL. If no CT is available, the province who has been in the clan the longest will become CL. Once a province leaves or is kicked from their clan, that province will no longer be allowed to return to that clan until the next round unless he left within the first 48 hours of the round. Close to the end of a round you are no longer able to join or create clans - this comes into force in the final 7 days.

Clan Leaders

Clan Leaders are the key to success for all clans. A clan must have an excellent leader to keep control and become unstoppable.

Clan Co-Leaders

Available only in a Platinum clan, the Co-Leader has all the same abilities as the Clan Leader except for: Change Clan Leader, Delete Clan.

Clan Trustees

Clan Trustees are almost like the clan leader. They exist to help the clan leader. In a Platinum Clan, the first CT can use the All Clan Message option to instantly send private messages to all clan members. If you are in a Platinum Clan, the CL and CO can set the rights for each single CT.

6.2 - Clan Points

In NukeZone, a Clan has three goals: Increase network, increase clan points and/or increase combo points. Clan points are only gained by attacking in a clan war. You must be in a clan for your province to earn Clan points. Clan points are awarded based on the damage inflicted on the enemy by an attack. The more damage you do, the more points your clan will receive.

When your clan declares war on another clan, you will receive 1-20 points depending on the damage inflicted for the first 48 hours. Then the maximum points you can gain drops by 2 points and continues to reduce by 2 points every subsequent 24 hours to a minimum of 4 points.

If another clan declares on your clan, you will receive 1-10 points when attacking them, again depending on the damage inflicted. In order to gain 1-20 points by attacking them you must declare back - this is known as a mutual war. Once your clan declares back you will have 48 hours of being able to get 1-20 points before the maximum points you can get begin to drop as described above.

If your clan does not declare back you will always get 1-10 points per attack. Note: different rules apply on the size of provinces you can attack depending on the type of war; mutual or one-sided. See 6.3 - Clan Wars for details.

When you kill a province in a one sided war you receive 25 clan points, when you kill a province in a mutual war you receive 50 clan points. Clan points gained from satellites, including for kills, are based on the amount of satellite power used.

When you kill a province of \$10,000 network or lower you do not gain any clan points. However, you still gain 1 kill on your stats record. Each time a clan achieves a bonus level the clan receives a fixed bonus of 300 turns per province and \$25 000 000. The clan bonus money is divided evenly among all clan members, whether or not the clan members are dead or alive. You must be a member of the clan for at least 72 hours to receive a clan bonus.

After your clan's first 5000 points your clan receives a mini bonus worth half a normal bonus. A super clan bonus is awarded at 50 000 clan points, 150 000 clan points, 250 000 clan points and 350 000 clan points etc. and is 1.5 times the regular bonus. A mega clan Bonus is awarded in replacement for every 2nd Super Clan Bonus at 100,000 clan points, 200,000 clan points, 300 000 clan points etc. and is 2 times the regular bonus. Both the turns and the money are increased with these special bonuses.

6.3 - Clan Wars

In NukeZone, when a clan is mad and wants vengeance over another clan, or the members just simply want to earn clan points, they declare war on the other clan. It can be fun and sometimes even be hard. This is why all clans must be at their prime and be prepared for a war at all times. After a CL or CT has declared war, they cannot declare peace for the next 24 hours. In addition, if one clan declares war against another clan, the network attack restrictions are still in place. However, if both sides declare war on each other, the network attack restrictions are removed. Network restrictions always apply the first 24 hours after joining a new clan and if you are using a thief or sniper, even in a mutual war. Clans may resume a war at any time after declaring peace as long as they don't already have 3 current war declarations against other clans; if they do then they must declare peace with at least 1 clan before they are able to resume the war. Once a war is resumed it must last a minimum of 24 hours before peace can be declared again.

6.4 - Clan Forum

Clan Forums are an excellent form of communication for a clan. You and your clan mates can discuss anything you want in there. You can post things like target provinces, ask for help, etc. It is the only forum not moderated by the Administrators and Moderators. The CL and CTs may edit/lock/delete whichever message they want on the Clan Forum.

Gold clans have the additional benefit of the Forum Management tool. This allows the clan leader to organize the clan forums and to give them custom names. It is possible to make a forum that only clan

trustees can visit or a read-only forum.

6.5 - Clan Tag

Clan tags are used to represent what clan a province is in. This is what it looks like: [TAG]Province.

6.6 - Clan Pages

By clicking the Clan link, you come to a page with several links dealing with your clan. Depending on if you are the CL, CO or a CT, some links might be crossed out. This means you do not have access to these areas. Here is all the information about each Clan Page.

Properties

Only the Clan Leader or CO can adjust the clan properties. In the properties page, the CL or CO can add or edit the clan name, clan tag, clan password and the location of the clan logo. Up to five CT's may also be selected from this page. The CL or CO may also choose to restrict shared military information for all new members for a period of time. Valid settings for this option are: None (no restrictions), 12 hours, 24 hours, 36 hours, 48 hours and 72 hours.

Send Aid

All members of the clan may access this page. Before you can send aid you must specify the receiver and enter the amount of money to send, and then press the Send Aid button. You can only send 1/3 of your available amount of money 3 times a day. Target province networth may not be larger than yours. You cannot send or receive aid when in nuke protection. Sending aid also costs you a 'tax' of 1 turn and 25% of the money sent, unless you have 100% banking research, where the 25% charge is removed.

Invite Player

Only the CL, CO and CT's can invite other provinces to join the clan. The networth of the other province does not matter. Mass inviting is not accepted. A clan can have a limit of 20 players including the CL. The CL or CO can create a short custom message which is included with the invitation sent to a province.

Clan Information

All members of the clan may access this area. On this page you can find a list of all members of the clan and their respective clan points acquired. Everything you see on the clan page is what everyone else sees except the amount of clan points a member has acquired.

Statistics Central (Platinum Clans only)

All clan members can access this page. This displays useful statistics including a Clan Overview, Clan Statistics and War History. The Clan Overview is updated on a real time basis and includes Last Login, Last Attack, Turns, Logins Per Day (LPD), Attacks Per Day (APD), Points Per Day (PPD). The Clan Statistics are updated every 6 hours and displays the province with most/least of the following: attacks made, attacks suffered, missiles sent, kills, times killed, clan points, aid sent, land, networth, units, buildings. The War History provides information about the clan's previous wars.

Spy Reports (Platinum Clans only)

All clan members have access to this page. The Spy Report page is separated into clans and clanless provinces. Only the CL, CO and CT's are able to delete the reports.

Clan Wars

All members have access to this area. This page displays a list of the clans that yours has currently declared war against; as well as the clans that have currently declared war against yours. This page also displays all clans you have declared peace on in the last 10 days.

Declare War/Peace

Only the CL, CO and CT's may access this page. They can declare war against another clan by entering the Clan ID of the clan they want to go to war with (must be in Networth Range of entire Clan Networth). If your clan has declared war against another clan more than 24 hours ago, your clan's CL, CO or CT can declare peace with the other clan by typing in the other Clan's ID in the text box provided.

Clan Message

Only the CL, CO and CT may access this page. They can post Clan Messages, which appear in the main page when a clan member logs in to NukeZone. If you have a gold clan, the CL, CO or CT can preview the message before posting it to check for errors. This is a great way to say something important and assure it reaches all clan members immediately. You can use certain G-Codes in the clan message - gold clans have additional G-Codes that they can use. G-Codes are explained further in section 7.2.

Clan Poll (Gold/Platinum Clans only)

Only the CL, CO and/or a CT's can access this page. They are able to create or edit the clan polls from

here. Only one clan poll can be created within a 24 hour period.

Clan Poll Archive (Gold/Platinum Clans only)

All members can access this page. This is where the archive of previous clan polls is stored.

Clan Forum Management (Gold/Platinum Clans only)

Only the CL and CO can access this area. This allows the CL or CO to change the clan forum settings and create new clan forums. The CL and CO of a Platinum Clan can give CT's the ability to access this area.

Domain Management (Platinum Clans only)

Only the CL or CO has access to this area. Here the CL or CO can request a custom NukeZone domain (tag.nukezone.info – where 'tag' is the clan's existing tag) and sub-domains for their clan homepage.

Receive Clan Bonus

All members can click on this to receive the Clan Bonus after the clan has reached 5,000, 10,000 and further multiples of 10,000 Clan Points. This link is enabled within 30 minutes after your clan has reached the Clan Bonus. You will receive a local event when this page has been enabled. If you do not go to this page to receive the bonus within 3 days of it being enabled you will automatically receive it. If you are in vacation mode at the time your clan receives a bonus then you will not receive a share of it. You need to be in the clan for 72 or more hours to be able to receive the bonus.

Clan Recruiting

Only the CL, CO and CT's have access to this area. This is where a clan can look for new members and specify the criteria which potential members must meet.

Find New Clan

Everyone has access to this area. This is where members can look for a new clan and specify the criteria which a potential new clan must meet.

Change Clan Leader

Only the CL may access this page. If a CL wants to give up the leadership, he can appoint a new leader of the clan. The old CL will then take over the new CL's old position.

Leave Clan

All members may access this page. If a member of a clan chooses to leave the clan, they can leave the clan immediately. However, The amount of time that provinces must wait after leaving a clan before joining another now increases based on how many clans they have already joined during that round. For 1-3 clans it remains at 24h and 4-5 clans is now 48h; then for 6+ clans the amount of time will increase at regular intervals.

Delete Clan

Only the CL may access this page. If the CL chooses to delete the clan, he may do so by clicking on Delete Clan.

6.7 - Clan Invitations

The CL, CO and CTs can view a complete list of pending clan invitations. They may also cancel any of these invitations; however invitations automatically expire after 7 days.

6.8 - Extended Military Information

Members of Gold Clans can choose to share their Extended Military Information, giving their clan mates the opportunity to view additional information about their province.

6.9 - Clan Status

Clans have a Status rating of: Brave, Fearless, Neutral, Fearful or Cowardly depending on the size of the clan they are declaring on. The larger the clan they declare war on, the more their status will rise to the positive end of the scale. Adversely, the smaller the clan that is declared upon, the more their status will fall to the negative end of the scale. This system is not in effect when you declare back on a clan. However, it will have a small positive affect, hence declaring back is a brave action. The clan status will affect the points you gain in a clan war: Brave (+20%), Fearless (+10%), Neutral (0%), Fearful (-10%) and Cowardly (-20%). War declarations during the first 10 days of a round do not have an effect on clan status, only declarations after that time will cause the clan status to change.

7.1 – Medals and Clan Awards

At the end of each round, 11 different medals are given out to the leaders of each area.

Medal of Honor - Most clan points gained by a province
 Medal of Growth - Highest network
 Medal of Death - Killed most provinces during clan wars
 Medal of Earth - Highest Land Area
 Medal of Courage - Performed most attacks
 Medal of Thievery - Most money stolen
 Medal of Knowledge - Quickest to research all sciences
 Medal of Mass Destruction - Most total NW damage made using missiles (excluding Tomahawk Missiles)
 Medal of Superiority - Province who first reaches 2500 clan points, counting from the beginning of the round and based on Clan Points Gained (total).
 Medal of Development - Province who first reaches \$2,500,000 network and keeps it for 48 hours.
 Medal of Accomplishment - Province who wins both the Medal of Honor and Medal of Superiority in the same round.

United Boundaries – Clan with the highest amount of land overall
 United Arms – Clan with the most attacks made during clan wars
 Golden Shotgun – First clan to reach 10000 points.
 Points Champion – Awarded to the first 3 clans in the points toplist (Gold, Silver and bronze)
 Network Champion – Awarded to the first 3 clans in the Network toplist (Gold, Silver and Bronze)
 Combo Champion – Awarded for the first 3 clans in the Combo toplist (Gold, Silver and Bronze) **

***Combo list: Combo points will be awarded to the top 100 clan rankings for points and for network. Clans will gain 1-100 points (rank #1 giving 100 points and rank #100 giving 1 point - anything beyond the rank of #100 receives zero points). Points are awarded daily as of midnight CET (server time), if the clan is in both top lists they will receive an additional 10% more points. So the maximum combo points a clan can obtain each day is 220 Combo points (100 for being number 1 in the Points-toplist, and 100 for being number 1 in the NW toplist + the 10% they get for being in both toplist = 20).*

7.2 - G-Code and Auto-Linking

The following G-Codes can be used in private messages, clan messages and on the forums. Please note that all G-Codes are case sensitive, except the G-Codes used in Clan Messages. If auto-linking is enabled all your entered URLs will automatically be transformed into clickable hyperlinks. Easy and simple link creation, simply enter the URL! However your URL must start with one of the following: http://, https://, ftp:// or www.

Available Tags in Private Messages:

Tag	Output
[USERPROVINCE]	Inserts the reader's province name. Works in both subject and message body.
[USERID]	Inserts the reader's province id. Works in both subject and message body.
[NAME]	Inserts the reader's name. Works in both subject and message body.
[B] [/B]	Text between these tags is displayed in bold. Works only in message body.
[I] [/I]	Text between these tags is displayed in italic. Works only in message body.
[U] [/U]	Text between these tags is displayed underlined. Works only in message body.

Available Tags in Clan Messages (Only available for Gold/Platinum Clans):

Tag	Output
[B] [/B]	Text between these tags is displayed in bold.
[I] [/I]	Text between these tags is displayed in italic.
[U] [/U]	Text between these tags is displayed underlined.
[S] [/S]	Text between these tags is displayed with a line through the middle the text.
[HR]	Inserts a horizontal line.
[CENTER] [/CENTER]	Text between these tags is displayed center aligned.
[LEFT] [/LEFT]	Text between these tags is displayed left aligned.
[RIGHT] [/RIGHT]	Text between these tags is displayed right aligned.
[COLOR=name] [/COLOR]	Text between these tags is displayed in specific

	color. See below for available font colors.
[FONT=name] [/FONT]	Text between these tags is displayed in specific font. See below for available fonts.
[SIZE=number] [/SIZE]	Text between these tags is displayed in specific size. See below for available font sizes.
[LAST_EDITED]	Example output: October 5th, 2002 01:45 CET
[EDITED_BY]	Name of CT/CL who edited the message.
[CLAN_POINTS]	Inserts total amount of current clan points. *
[NEXT_BONUS]	Inserts amount of points required to reach next bonus. *
[NW_RANK]	Inserts the current Networth rank of your clan. **
[PTS_RANK]	Inserts the current Points rank of your clan. **
[CBO_POINTS]	Inserts the Combo Points of your clan.
[CBO_RANK]	Inserts the current Combo Points rank of your clan.
[24H_CLAN_POINTS]	Inserts clan points gained over 24 hours.
[24H_PTS_RANK]	Inserts ranking over 24 hours in clan points gained.

* Note: With the [CLAN_POINTS] and [NEXT_BONUS] tags, if you wish to have a "p" after the points (e.g. "We have this many clan points: 2500p"), the "p" must be added following the tag [CLAN_POINTS]p. You can enter anything after the tag, not just the "p", so could for example enter "[CLAN_POINTS] points".
** These values are updated once every 6 hours.

Available Tags on the Forums:

Tag	Output
[B] [/B]	Text between these tags is displayed in bold. This tag does not work in the topic name.
[I] [/I]	Text between these tags is displayed in italic. This tag does not work in the topic name.
[U] [/U]	Text between these tags is displayed underlined. This tag does not work in the topic name.

Available Special Tags on the Clan Forums (Only available for Gold/Platinum Clans) *:

Tag	Output
[S] [/S]	Text between these tags is displayed with a line through the middle of text. This tag does not work in the topic name.
[IMG]url[/IMG]	Inserts an image. Specify the image source by entering the full url between these tags.
[COLOR=name] [/COLOR]	Text between these tags is displayed in specific color. (see below for valid colors)
[FONT=name] [/FONT]	Text between these tags is displayed in specific font. (see below for valid names)
[SIZE=number] [/SIZE]	Text between these tags is displayed in specific size. (see below for valid sizes)

* Only available if your CL has enabled it on the Clan Forum Management page.

Available Font Colors:

Aqua, black, blue, fuchsia, gray, green, lime, maroon, navy, olive, pink, purple, red, silver, teal, white, yellow. In addition, you may also enter any hexadecimal color code. Please note that the # sign is required when doing so.

Available Fonts:

Arial, Comic Sans, Courier New, Georgia, Helvetica, Impact, Times New Roman, Verdana

Available Font Sizes:

The number argument can still be any number between 0-6, but you may now also specify any custom size you want by adding "pt" after the number. So 16pt means size 16. The old style 0-6 is translated as follows: size 0=8pt, size 1=10pt, size 2=12pt, size 3=14pt, size 4=16pt, size 5=18pt, size 6=20pt.

7.3 - Extended G-Codes

As a Gold Clan, not only do you have the ability to use the regular G-Codes, you also get an extended

version of it. It can only be used in the clan message and can be used by Gold Clans only. A CL/CT can easily target a province and/or a clan by using these codes. The Extended G-Codes are not case-sensitive. A clan message can contain a maximum of 25 Extended G-Codes.

Available Extended G-Codes in Clan Messages (Only available for Gold/Platinum Clans):

Tag	Output
[P=id]	Creates a link to the specified province..
[C=id]	Creates a link to the specified clan.
[A=id]	Creates a link to the aid page for the specified province
[R=id]	Creates a link to the specified enemy province's spy report.
[CR=id]	Creates a link to all of the specified clan's spy reports.
[PNW=id]	Inserts the specified province's name and network and creates a link to the attack page. The network will be made bold if the enemy is within the viewer's attack range.
[NW=number]	The number must be a valid network value. The network is formatted and will be made bold if the enemy is within the viewers attack range.
[URL=link]text[/URL]	Turns the "text" into a hyperlink to click on. Valid "link" types are http, https, ftp, irc

Using this feature is fairly simple. While typing a message, a CL/CT can target a province by typing: [P=ProvinceID] or [C=ClanID]. By doing so, this converts the ID Number into your target's Province or Clan Name and ID Number as well as creating a clickable link to the province/clan information page.

Example: A CL/CT types in, "...War. Everyone attack this guy, [P=123]!" The G-Code converts this to, "...War. Everyone Attack This Guy, FakeProvince (#123)!", where the "FakeProvince (#123)" part is a clickable link that brings you to this enemies province information page. The same is done with clan targets.

8.1 - Technical Support

If you need technical support please contact our Customer Support by sending an in-game message to *Customer Support* (found in your contact list when you write a message) or simply post a message in the *Technical Support and Bug Reports* forum. Links to the multi report system, the EULAs and other important resources can be found by clicking the *help* link in the top right.

8.2 - Ideas and Suggestions

If you have an idea or a suggestion, please post it in the *Suggestions and Ideas* forum.

8.3 - Bug Reporting

Please report all bugs in the *Technical Support and Bug Reports* forum. Bugs that might affect the security or integrity of NukeZone and the server should NOT be posted in public; please inform the Customer Support directly by using one of the above-mentioned ways.

8.4 - IRC

NukeZone has its own IRC channel on the QuakeNet network. This is the place where the NZ Crew and the most experienced players hang around. Everyone is welcome!

Network: QuakeNet

Server: irc.quakenet.org

Channel: #NukeZone (for general NukeZone chat)

#NZSupport (for any game related problems/questions you might have)

#NZVeteran (must be veteran to join)

A quick IRC guide to get you online can be found here:

<http://www.nukezone.info/ircGuide.aspx>

8.5 - Rules

The Game Rules can be found at: <http://www.nukezone.info/gameRules.aspx>

The Forum Rules can be found at: <http://www.nukezone.info/forumRules.aspx>

8.6 - Credits

The NZ Crew:

Stefan Karlström (aka Guffy) – CEO, Lead Developer, Chief Administrator
Anthony Wiezoreck (aka EhpeX) – Chief of Operations, Administrator

1.1 - Overview

NukeZone is a free, strategic text-based online game. The game is optimized for Internet Explorer 5.0 and above with a screen resolution of 800x600 or higher. The game will also work in newer versions of other browsers such as Opera and Netscape Navigator; however, while some features may not operate properly, the game engine functions correctly. It is strongly recommended that you use Internet Explorer 5.0 and above. Please click [here](#) to download the latest Internet Explorer from Microsoft's homepage.

NukeZone is played in rounds lasting approximately 3 months each. Round dates can be found on the login page. At the end of each round, winners in various categories are given medals and all provinces are reset and the game starts over.

If you find any bugs or any other errors in the game, please report them ASAP in the *Technical Support and Bug Reports* forum.

1.2 - Getting Started

You start with 125 turns and \$250,000, then the first time you login for the round you get awarded with an extra 175 turns and \$500,000 (totaling in 300 turns and \$750,000), the extra bonus is only available for provinces created before the start of the round and those created in the first 48 hours of a round. It is up to you to determine what to purchase, while some prefer to use a more offensive strategy, others will choose to adopt a more defensive strategy. Money is required to purchase buildings and units. Turns are required to purchase buildings (jump to *3.1 - Buildings* for more info), increase research (jump to *3.10 - Research* for more info), or attack (jump to *4.1 - General Attack Information* for more info). You need buildings to survive – when all your buildings are destroyed you will die. When you have died you spend 24 hours dead before starting over in nuke protection again – death results in a loss of all units, land, research, money (including in the bank) and turns except for the starting defaults.

There are several ways to get more money although you get a fixed number of turns:

- By default you receive 1 turn every 20th minute and \$2000 each hour. You can research Money Production to increase your income up to a maximum \$26,000/hour.
- Join/create a clan and fight other clans (that your clan is at war with) in order to receive clan bonuses (300 turns and \$25,000,000 for each 10,000 points; the clan bonus money is divided evenly among all clan members).
- Tell your friends about this game (you receive a 10 turn bonus for each friend that signs up and plays for a while). Please note that to receive the bonus your friend must sign up with the same email as the invitation was sent to.

Note: You will not receive any additional turns every 20 minutes if you already have more than 300 turns. However, you can receive the clan bonus during this time. Please use some of your turns in order to start receiving turns every 20 minutes again.

1.3 - Starting Bonus

You can select a starting bonus from the following list, which you must claim while in Nuke Protection.

- **Offensive**
Max morale capacity changes to 110%, plus an additional 45 turns.
- **Defensive**
All buildings get a 15% life boost, plus 2 extra sciences per turn, plus 5,000 m2 land.
- **Finance**
Hourly income increased by 10%, bank capacity is raised by 50% and \$250,000 money.
- **Shipping**
Market and missile orders ship 25% faster, plus ability to choose exact arrival time (up to 12 hours delayed), plus 3,000 m2 land and \$150,000 money.

The starting bonus you receive after you die is based on your networth 72 hours before you were killed. The bonus will increase gradually between \$100 000 and \$1 500 000 reaching a maximum increase of 300% at \$1 500 000. The increase will improve more dramatically at lower networth and decrease slowly as you approach \$1 500 000. The increases will not be in effect if you reset your account.

2.1 - Game

Main - Province info, power status, news, current server time, nuke protection options, starting bonus

Attack - Regular attack, ground attack, air and sea attack, launch missile, send spy/spy plane, send thief, send sniper

Research - Research sciences

Headquarters - View your Headquarters bonuses, manage Headquarters Operations and your army's General

Explore - Explore or Sell additional land.

Market - Buy/sell merchandise

Bank - Deposit/withdraw money. All deposited money is automatically withdrawn at the start of the second to last day.

Clan - Join/create clan, clan properties, invite/kick players, manage clan wars, leave/delete clan, recruiting system etc

2.2 - Build

Buildings - Build/demolish buildings

Sea Units - Build sea units

Air Units - Build air units

Vehicles - Build vehicles

Infantries - Train infantries

Missiles - Order missiles, view arrival dates

Satellites - Build/use Satellites

2.3 - Show

Local Events - Shows local events

Global Events - Shows global events, can be filtered by incoming, outgoing or internal.

Attack Events - Shows local outgoing events (Gold Users only).

Search Events - Allows a search of local and global events.

Enemy List - Links to enemy list (Gold Users only).

Status - Information, military info, military settings, history graphs (including Gold User only info) and several province statistics, rank from previous round

All Provinces - Shows all provinces within your attack range

All Clans - Shows all clans

Top List - Top Provinces, Top Clans (Networth), Top Clans (Points)

Search - Search for provinces by province id or province name, search for clans by clan id or clan name/tag

Clan Forum - A direct link to your private clan forum (only visible if you're a member of a clan)

Forum - NukeZone forums

Online Shop - Purchase a Gold user or Gold/Platinum clan

2.4 - NZ Portal

News - Displays current news items

Articles - Displays current articles

Profiles - Displays player profiles

2.5 - Other

Inbox - Display your inbox (private messages that have been sent to you)

New Message - Compose a new message

Preferences - Options, edit profile, change colors, change password, delete province, reset province, create/edit your NZ Portal profile etc

Contact Us - Crew contact information, credits

Logout - Logout from NukeZone

3.1 - Buildings and Walls

Land is nice to have, but without buildings and infrastructure it is of little use. NukeZone offers a variety of buildings to place on your land. Each building has some inherent benefits that allow your province to grow or specialize. It is up to you to determine how to fill your land, and there is no perfect or ideal balance for growth. As well, each building uses a specific amount of power, and power can only be provided by power plants. If you have low power, your defensive buildings, missile silos, research labs, command centres and headquarters buildings won't work, meaning you will be more susceptible to attack, will not be able to launch missiles or be able to perform scientific research. The defense values of your buildings drop by 25% when you are low on power and you will be unable to use spy planes, spies, thieves, snipers and satellites. If you are short on land, either explore for more or attack someone to try and steal some. The amount of unused land improves the defense of your buildings by up to a 40% boost for 25% unused land. It takes 20 m² to build each building with the exception of Headquarters which take 1000 m².

Available Buildings:

Name	Price	Description
------	-------	-------------

Research Lab	\$2,000	Gives 1 extra science/turn to research for each 50 research labs. Attack: 0, Life: 200 Power usage: 2000
Missile Silo	\$22,000	Houses 1 missile. Attack: 0, Life: 500 Power usage: 10000
Headquarters	\$250,000 25 turns and 1000 m2 of land	Improves various abilities for your province† Attack: 0, Life: 5000 Power Usage: HQ1: 25,000; HQ2: 50,000; HQ3: 100,000; HQ4: 150,000; HQ5: 250,000
Command Centre	\$2,200	Supports 5 special units††. Attack: 0, Life: 120 Power Usage: 1800
Shipyards	\$1,100	Houses 5 sea units. Attack: 0, Life: 90 Power usage: 700
Airfield	\$900	Houses 5 air units. Attack: 0, Life: 85 Power usage: 600
War Factory	\$1,200	Houses 10 vehicles. Attack: 0, Life: 80 Power usage: 900
Barracks	\$700	Houses 20 infantries. Attack: 0, Life: 60 Power usage: 650
Power Plant	\$450	Produces 4500 power units. Attack: 0, Life: 85
Advanced Power Plant	\$1,400	Produces 15000 power units. Attack: 0, Life: 40
Torpedo launcher	\$1,850	Gives you a sea defense. Attack: 350, Life: 280 Power usage: 600
SAM Site	\$1,400	Gives you an air defense. Attack: 265, Life: 240 Power usage: 475
Missile Turret	\$1,500	Gives you a vehicle defence. Attack: 300, Life: 265 Power usage: 275
Machinegun Turret	\$1,200	Gives you an infantry defence. Attack: 190, Life: 290 Power usage: 225
Anti-Missile System	\$5,000	Gives you a missile defense†††. Attack: 0, Life: 400 Power usage: 1700

† Headquarters Building - You may only own 5 Headquarter buildings at any time and you may only build one per 72 hour period. The Headquarter building cannot be main targeted in an attack, but can be destroyed. The power usage is per building and is cumulative, therefore if you own 2 buildings you will use 25,000 + 50,000 for a total power usage of 75,000. Headquarters abilities are cumulative and in the order listed. For example, when you have three headquarters, you will have ALL of the bonuses provided by numbers 1, 2, and 3.

Headquarters #1

- * 75% chance of tracking origin of missiles
- * 10% attack boost to attacking units
- * 1 additional science per turn when researching

Headquarters #2

- * 25% increase to land exploration
- * Implements the Coastal Defense System (5% increased protection against air and sea attack)
- * 1 additional science per turn when researching
- * Gives an additional \$1000/hour

Headquarters #3

- * 50% increase to land exploration
- * Unlocks the sabotage missions for the Spy unit giving a 50% chance of success.

- * Increases the Coastal Defense System to 10% protection.
- * 1 additional science per turn when researching
- * Gives an additional \$1000/hour
- * Ability to Main Target individual defense buildings.

Headquarters #4

- * Unlocks the Headquarter Operations
- * Unlocks the General unit with 1 life/hour regeneration rate.
- * Missile accuracy improved with 10%
- * Increases the Coastal Defense System to 15% protection.
- * 1 additional science per turn when researching
- * Improves sabotage missions chance of success to 65%
- * Gives an additional \$1000/hour
- * Improved accuracy for Main Targeting by 2x.

Headquarters #5

- * Enables you to own and utilize two satellites simultaneously
- * 1 additional science per turn when researching
- * Improves sabotage missions chance of success to 80%
- * 10% defense boost for defending units when attacked
- * Increases the General unit to 4 life/hour regeneration rate.
- * Gives an additional \$1000/hour
- * 75% land exploration bonus.

Headquarter Operations

Four Headquarter buildings are required to run Headquarter Operations. Headquarter Operations cost 2 turns and two hourly fees to activate, and then cost a fixed fee per hour, automatically taken from your income. A maximum of half your income may be used for HQ Operations. If your fourth Headquarters is destroyed, the operation will cease functioning. HQ Operations auto deactivate if your account remains inactive for more than 5 days(when you stop receiving your hourly income).

- * \$1000/hour: 100% chance of tracking origin of missiles and special units
- * \$2000/hour: Increased defense against incoming sabotage missions by 50%
- * \$3000/hour: Increased defense against incoming EMP attacks by 50%
- * \$4000/hour: 2 additional life per hour for the General unit.
- * \$5500/hour: Defense buildings do 25% additional damage.
- * \$6000/hour: Increased defense against incoming missile attacks by 25%
- * \$10000/hour: 5% additional satellite power per hour

General Unit

Four Headquarter buildings are required to get access to the General unit. The unit arrives 72 hours after the fourth HQ building is constructed and starts with 100 life. It gains 1-6 life per hour depending on number of headquarters and HQ Operations active. The General can be sent in battle and can be killed in action, and a new one then arrives 72 hours later. When the General unit arrives you will choose a name for it from a list and get to choose one of the following enhancements listed below. Whenever you include the General unit with an attack you get the chosen enhancement. The General unit is idle when defending and does not provide enhancements for defending units or buildings.

Enhancements:

- * 10% additional attack
- * 10% additional defense
- * Avoids walls and the Coastal Defense System provided by the Headquarters 2-4.

General Abilities:

- * 10% attack boost (cost: 50 life)
- * 10% defense boost (cost: 50 life)
- * Double money/land gained in combat (cost: 50 life)
- * 50% improved main targeting (cost: 75 life)
- * Spy Report units after-attack information (cost: 100 life)
- * Spy Report buildings after-attack information (cost: 100 life)
- * Double damage in combat (cost: 500 life).
- * Last Stand: Requires at least 200 life, and doubles the attack of your defending units and buildings. It can not be activated during the last 3 days of the round.

†† Special units are; Spy Plane, Spy, Thief and Sniper.

+++ Anti-Missile System defense varies based on the amount of used land. Anti-Missile Systems provide a maximum of 50% protection without HQ Operation. 750 Anti-Missile Systems will provide 50% protection, no matter the amount of used land you have.

Available Walls:

Name	Price	Description
Barbed Wire	\$0	Provides 0% vehicle and infantry defense. Requires: none
Sandbag Wall	\$50,000*	Provides 5% vehicle and infantry defense. Requires: Barbed Wire
Concrete Wall	\$250,000*	Provides 10% vehicle and infantry defense. Requires: Sandbag Wall
Laser Fence	\$500,000*	Provides 15% vehicle and infantry defense. Requires: Concrete Wall

* Lowest price (the price increases with the more land you own). Walls reduce the strength of the attacking force by a certain percentage, based on the type of wall.

3.2 - Sea Units

To build sea units, you need shipyards, which house 5 sea units. Sea units can only be combined with air units in an "Air and Sea Attack".

Available Units:

Name	Price	Description
Submarine	\$2,300	Attack: 180, Life: 170 Can attack: Sea Units Can carry: 2 Tomahawk Missiles
Stealth Boat	\$700	Attack: 50, Life: 65 Can attack: Sea Units, Infantry
Destroyer	\$1,500	Attack: 70, Life: 60 Can attack: Vehicles, Infantry, Buildings
Cruiser	\$2,000	Attack: 85, Life: 105 Can attack: Sea Units, Air Units, Buildings
T-2000 Hovercraft	\$800	Attack: 70, Life: 35 Can attack: Air Units, Buildings

3.3 - Air Units

To build air units, you need airfields, which house 5 air units. Air units can be combined with all other units when attacking.

Available Units:

Name	Price	Description
F-22 Raptor	\$1,075	Attack: 65, Life: 55 Can attack: Sea Units, Air Units
F/A-18 Super Hornet	\$750	Attack: 55, Life: 25 Can attack: Air Units, Buildings
F-35 JSF	\$925	Attack: 55, Life: 45 Can attack: Air Units, Vehicles
B-2 Stealth Bomber	\$1,500	Attack: 130, Life: 55 Can attack: Buildings
RAH-66 Comanche	\$800	Attack: 35, Life: 40 Can attack: Vehicles, Infantry, Buildings
SH-60 Sea Hawk	\$700	Attack: 70, Life: 40 Can attack: Sea Units
Aurora Spy Plane	\$15,000	Spies on enemy buildings. Attack: 0, Life: 200 Can attack: None
CH-46 Sea Knight	\$1,000	Enables you to transport 15 infantry per unit in a Sea and Air attack, while boosting transported infantry attack by 50% and lowering their life by 15%.

		Attack: 25, Life: 135 Can attack: Buildings
--	--	--

3.4 - Vehicles

To build vehicles you need war factories, which house 10 vehicles. Vehicles can be combined with air units and infantries when attacking.

Available Units:

Name	Price	Description
Humvee	\$500	Attack: 60, Life: 20 Can attack: Infantries
Hover Tank	\$600	Attack: 35, Life: 20 Can attack: Sea Units, Infantries, Buildings
Heavy Artillery	\$1,000	Attack: 95, Life: 40 Can attack: Buildings
SAM Tank	\$700	Attack: 60, Life: 30 Can attack: Air Units
M1 Abrams Tank	\$1,250	Attack: 65, Life: 60 Can attack: Vehicles, Buildings

3.5 - Infantries

To train infantries you need barracks, which house 20 infantries. Infantries can be combined with air units and vehicles when attacking.

Available Units:

Name	Price	Description
Thief	\$5,000	Steals money from the enemy base and protects your base from possible enemy thieves. Attack: 0, Life: 5 Can attack: none
Spy	\$3,000	Spies on enemy units, protects your base from possible enemy spies and carries out Sabotage Missions*. Attack: 0, Life: 5 Can attack: none
Sniper	\$5,000	Attack: 125, Life: 65 Can attack: Spies, Thieves, Snipers Note: Snipers have 5 times less defense against other snipers
Navy Seal	\$900	Attack: 45, Life: 25 Can attack: Sea Units, Buildings
Heavy Infantry	\$400	Attack: 20, Life: 15 Can attack: Air Units, Infantries, Buildings
Machine Gunner	\$350	Attack: 25, Life: 15 Can attack: Infantries
Grenade Soldier	\$425	Attack: 35, Life: 10 Can attack: Vehicles

*Sabotage Missions - Spies have the option to sabotage missiles, power plants, and satellites. The sabotage option is unlocked and has a 50% chance of success with 3 Headquarters, 65% with 4 Headquarters and 80% with 5 Headquarters.

Missiles: Sabotages 1 missile and may be in effect for up to 10 days or until the missile is launched. If the missile is launched within the 10 day period and the sabotage is successful, it will blow up in the enemy's base prior to launch causing 20% damage. The enemy will still be charged full turns and morale for the attempted launch. The maximum amount of missiles that may be sabotaged for any enemy is 5 at any one time.

Power Plants: If the power plant sabotage option is chosen and the spy is successful it will disable 10% of the enemies' power plants for 48 hours. The maximum amount of power plants that may be sabotaged for any enemy is 50% at any one time.

Satellites: If sabotage is successful the enemies' satellite power is reset to 0% for 10 hours before power begins the 10% hourly increase.

3.6 - Special Units

Special units are the spy plane, spy, thief and sniper. In order to own these units you must have Command Centres. You can have a maximum of 200 Command Centres meaning you are limited to no more than 1000 special units. Special units cannot be used when you have low power. You may only buy or sell 100 special units per day in all market transactions; e.g. buying 50 and selling 50 would be the maximum special unit transactions for that day.

3.7 - Market

The market allows you to buy units without using turns to build them. However, units on the market are more expensive to buy and because they are not built in your province, they take time to arrive.

Depending on the research you have and how much you are willing to pay you can get units from the market in between 3 and 12 hours. You can cancel an incoming order, which returns 75% of the regular market price (money spend on accelerated shipping will not be returned after canceling an order).

You can pay extra to reduce the time it takes for your units to be delivered – paying double the price allows your units to arrive in half the time. Accelerated shipping for missiles costs 1.5x the price. You can also research the Shipping Time Science so you get units from the market faster.

The market also allows you to sell your units to recoup some of their cost if you no longer want them.

3.8 - Missiles

To build missiles you need missile silos, which house 1 missile. A missile is an expensive but very powerful attack option. The chance of hitting the enemy base depends on two things: your missile accuracy and your enemy's missile defense. Missiles cost 5 turns to build and 4 turns to launch. They make use of their own Missile Power (5% received per half hour) and do not use morale. 100% Missile Power is required to launch missiles. Accelerated Shipping mode for missiles cost 1.5 times the standard price.

Tomahawk Missiles do not require a missile silo to build or to launch. Submarines are required to both house and launch the Tomahawk Missiles. As such you must send them with an air and sea attack with the appropriate amount of submarines. Tomahawks are not affected by your missile accuracy although 50% is needed before you may build them but they can be shot down. A submarine can hold 2 Tomahawk Missiles. 3 Tomahawks may be built for every turn and take 6 hours to build. You can send 4 Tomahawk missiles for every \$10,000 Networth you send in the attack.

Anti-Missile Systems, SAM Sites, SAM Tanks, F-22 Raptors and Cruisers can defend against Tomahawk Missiles. Sam Tanks, F-22 Raptors and Cruisers provide equal protection against Tomahawks while SAM Sites provide 3 times the protection of SAM Tanks, F-22 Raptors and Cruisers; Anti-Missile Systems provide 5 times the protection. The default chance of tracking missiles is 25%, however this is raised to 75% when 1 or more Headquarters Building is owned.

Available Missiles:

Name	Price	Description
Nuclear Missile	\$60,000	Attack: 500,000 Can attack: All Buildings and Units
Chemical Missile	\$35,000	Attack: 250,000 Can attack: Sea Units, Air Units, Vehicles
Biochemical Missile	\$30,000	Attack: 165,000 Can attack: Infantries
EMP Missile*	\$20,000	The EMP Missile initially disables 20% of the enemy's power supply decreasing 5% per hour over a 4 hour period. You do not receive clan points for using this missile.
Tomahawk 250C Missile	\$4,000	Attack: 5000 Can attack: Buildings
Tomahawk 500C Missile	\$8,000	Attack: 8000 Can attack: Buildings and Vehicles

* EMP damage is removed from the target province by 5% each hour. 2 EMP missiles will disable 40% of the targets power if they hit and the effect on the province will then reduce by 5% each hour. It would therefore take 8 hours before all EMP damage was removed.

3.9 - Satellites

There are 6 different satellites available for you to build. All satellites require 50% in *Satellite Technology* before they can be built. Each satellite costs 20 turns and takes 48 hours to construct. After you have built the satellite, you must launch it into space. It takes 1 hour for a satellite to reach earth's orbit, and it can then stay up for 14 days until it crashes down and burns up in earth's atmosphere. You can increase the

time your satellite stays in orbit by continuing to research satellite technology over 50%. You get an extra days orbit for every additional 10% research. A satellite will stay in orbit for the period researched at the time of launch, research while in orbit will not effect that satellite.

Your satellite power increases by 10% each hour and all satellites cost 5 turns to use. Satellites are not operational when you have low power although a previously launched Stealth Satellite will continue to function if it was activated while you had power. You can own any two satellites concurrently, even two of the same kind providing you have all 5 Headquarters. However, you may only have one satellite from each group (offensive and defensive*) in orbit at any one time. If you need to launch another satellite and your current satellite(s) have not yet crashed, you can demolish your satellite(s) for 20% of its/their original cost.

Available Satellites:

Name	Price	Description
EMP Satellite**	\$600,000	The EMP Satellite disables X% of the enemy's power supply over X amount of hours. Requires at least 25% satellite power, 100% satellite power = max effect damage (the more power, the more damage). Max effect: 30%, 6 hours
Laser Beam Satellite	\$1,000,000	Requires at least 25% satellite power, 100% satellite power = max attack damage (the more power, the more damage). 95% hit rate. Max Attack: 9000 Can attack: Buildings
Orbital Research Laboratory	\$350,000	Gives you 5 additional sciences per turn when researching. The 5 additional sciences are given in addition to the current number of sciences per turn you may be receiving from your research labs.
Spy Satellite	\$500,000	Spies on the enemy base. Requires 100% satellite power. You will receive this information: - Approximate number of enemy buildings and units. - Unused enemy land and power status.
Stealth Satellite	\$450,000	When activated, your base will be hidden from enemy spies (except sabotage missions), thieves, snipers, laser beam satellites and EMP satellites. It hides your base for 7 hours. Requires 100% satellite power.
Anti-Missile Satellite	\$700,000	Gives you instant 100% protection. Each time it shoots down a missile 50% satellite power is used. If you don't have enough satellite power, the satellite will not be able to shoot down any missiles until you get more satellite power.

*

Offensive Satellites:

Laser Beam Satellite

EMP Satellite

Spy Satellite

Defensive Satellites:

Orbital Research Laboratory

Stealth Satellite

Anti-Missile Satellite

**EMP damage is removed from the target province by 5% each hour. 1 hit at full power with the EMP satellite will disable 30% of the targets power and the effect on the province will then reduce by 5% each hour. It would therefore take 6 hours before all EMP damage was removed.

3.10 - Research

There are 10 different sciences available for you to research. Researching sciences requires turns. The number of turns needed is based on your amount of *Research Labs and HQs*, and the more you own, the more sciences per turn you get when researching. You will be able to research between 1 and 20 sciences per turn, depending on how many *Research Labs* and HQs you own. You can get up to 25 sciences per turn by getting an Orbital Research Laboratory.

Available Research:

Bank Management increases the amount of money you can deposit into the bank up to a total of \$5,000,000. Also, for every 10% of research the basic interest rate increases by 0.1%. When 50% of this research is completed the option to withdraw money after 24 hours with no interest and a 25% fee is

enabled; when it is 100% complete the 25% fee is removed (1500 sciences). At 100% researched the fee of 1/4 the money is removed when sending aid.

Engineer Effectiveness increases the amount of buildings you can build per turn. The maximum limit is 15 buildings per turn (2000 sciences); default is 5 buildings per turn.

Market Shipping Time reduces the time taken for items ordered from the market to arrive. The maximum limit is 50% (1400 sciences).

Market Discount gives you discount on all market merchandise. The maximum limit is 30% (900 sciences).

Missile Accuracy gives your missiles a better chance to hit the target. The maximum limit is 80% (700 sciences); default is 10% accuracy.

Money Production increases your income per hour. The maximum limit is \$26,000 per hour (2400 sciences), default is \$2000 per hour.

Power Plant Efficiency increases the amount of power each power plant produces and also increases their defense/life. The maximum limit is 50% above normal (700 sciences).

Satellite Technology gives you the knowledge to construct satellites. 50% satellite technology is needed in order to construct any satellites. Additional research over 50% extends the maximum orbit time of the satellite with up to 5 days (making it a total of 19 days in orbit). The maximum limit is 100% (2000 sciences). Once the Satellite Technology research is 100% complete the construction cost of each satellite will be reduced by 20% and each use of a satellite will cost 4 turns instead of 5.

Security System improves your security. This makes enemy thieves steal less money from you. It will not protect you from enemy thieves in any other way. The maximum limit is 100% (1500 sciences).

Thief Education teaches your thieves to steal more money and also to be stealthier. The maximum limit is 300% (2000 sciences).

4.1 - General Attack Information

Each attack is unique in some way and all attacks cost a different amount of turns. Launch Missile costs 4 turns. Regular Attack, Ground Attack and Air Attack cost 3 turns. Send Spy/Spy Plane costs 1 turn and Send Thief and Send Sniper costs 2 turns and 5% morale. The maximum amount of morale your army can have is 100%, and each attack uses a different amount of morale. An attack may "cost" as low as 20% of your morale and as high as 35%. When you attack an enemy that is smaller than yourself, you will lose 5% more morale. You will lose additional 10% of morale if you use an aggressive attack type. However, your morale increases by 5% every 15 minutes. Missiles have their own Missile Power (5% received per half hour) and does not use morale.

Target ID is the target province id.

Attack Method is the option on how you want to attack your enemy.

Main Target specifies the target your troops will focus on. You may also main target individual defence buildings providing you own HQ #3.

Attack Type specifies how the attack should be made; normal or aggressive.

4.2 - Regular Attack

Regular attack can consist of air units, vehicles and infantries. This attack method costs 3 turns.

4.3 - Ground Attack

Ground attack can only consist of ground units. Using this method makes the vehicles and infantries slightly more powerful than a Regular attack. This attack method costs 3 turns.

4.4 - Air and Sea Attack

Air and Sea attack can only consist of air units and sea units. You may load certain sea units with Tomahawk missiles, which will then be launched during the attack. Using this method makes these units slightly more powerful than a Regular attack. This attack method costs 3 turns.

4.5 - Launch Missile

Use this option to send your missiles to enemy targets. This attack method costs 4 turns, and uses 100% Missile Power. This does not include Tomahawks.

4.6 - Send Spy/Spy Plane (intelligence)

When you send out your spy, his job is to spy on your enemy's army or base. You can choose between an infantry spy for army intelligence or a spy plane to gather info on your enemies buildings. However, there is no guarantee either will succeed. You may send up to 5 Spies at once for the same amount of turns, for up to 5x the details of your results (chance of being caught increases by up to 10x). Opposing snipers and spies can kill infantry spies. If he does fail, your enemy is informed that you sent the spy. If your spy is successful, it is hard to count to an exact number of units or buildings in such a short period of time, so your spy works with special codenames. Below are the translations of those codenames. This attack method costs 1 turn.

Spy Codenames: The numbers on the table below are based on the sending of 1 Spy, and can be made more detailed depending on how many Spies are sent up to a total of 5.

Codename	Amount of Units
Few	0-99
Several	100-249
Pack	250-499
Lots of	500-1,499
Many	1,500-4,999
Crowd	5,000-9,999
Legion	10,000-19,999
Super Legion	20,000+

Spy Plane Codenames:

Codename	Amount of Buildings
Few	0-49
Several	50-124
Pack	125-249
Lots of	250-499
Many	500-999
Crowd	1,000-2,499
Legion	2,500-4,999
Super Legion	5,000+

4.7 - Send Spy (sabotage)

Spies have the option to sabotage missiles, power plants, and satellites. This attack method costs 5 turns and 100% morale.

4.8 - Send Thief

When you send out your thief, his job is to steal money from the selected enemy. However, there is no guarantee that your thief will succeed. If he does fail, your enemy is informed that you sent the thief. This attack method costs 2 turns and 5% morale.

You can send up to 10 thieves at once for the same turns and morale as one. This allows you to get up to 5 times the return but the chance of being caught increases by up to 10 times – times 1 extra for each additional thief. Therefore an attack with 5 thieves could get you up to 2.5 times as much money but you would be 5 times as likely to be caught. If caught you lose all attacking thieves.

4.9 - Sniper

A sniper can both attack and defend. They can attack spies, thieves and snipers. They can defend against spies, thieves, and snipers. They are five times better at defending than spies and thieves are. However, snipers have 5 times less defense against other snipers. This attack method costs 2 turns and 5% morale.

You can send up to 10 snipers at once for the same turns and morale as one. This allows you to do up to 5 times the damage but the chance of being caught increases by up to 10 times – times 1 extra for each additional sniper. Therefore an attack with 5 snipers could inflict up to 2.5 times as much damage but you would be 5 times as likely to be caught. If caught you lose all attacking snipers.

5.1 - Province Status and History

You can get access to a wealth of information about your province and you past performance from the status page. The history page shows statistics for the following items: -

History statistic	Explanation
Attack Success	The number of successful attacks made expressed as a percentage
Defend Success	The number of times successfully defended expressed as a percentage
Highest Networkh	The peak networkh you have achieved in the current round
Highest Land Area	Greatest land area you owned in the current round
Land Gained in Combat	Area of land gained by attacking other provinces
Land Lost in Combat	Area of land lost to other provinces attacking you
Money Gained in Combat	Sum of money gained by attacking other provinces
Money Lost in Combat	Sum of money lost to other provinces attacking you
Money Lost in Thievery	Sum of money you lost to thievery
Most Money Gained in Thievery	Highest amount of money stolen by one thief (GU only)
Kills	Number of provinces you killed
Kills (during clan wars)	Number of provinces you killed during clan wars
Times Killed	Number of times your province has been killed
Missiles Sent	Number of nuclear, chemical and biochemical missiles you have sent
NW Damage Made by Missiles	Cumulative sum of the damage your missiles have dealt this round
Enemy Missiles Received	Count of enemy missiles that have been fired at your province
Enemy Missiles Hit	Enemy missiles that have not missed or been shot down by anti-missile-systems
Enemy Missiles Missed	Enemy missiles that have missed your province
Enemy Missiles Shot Down	Enemy missiles that your anti-missile-systems have shot down
Attacks Made	Total attacks made, not including missiles sent
Attacks Made (during clan wars)	Total attacks made during clan wars, not including missiles sent
Wins	Successful attacks made (percentage in brackets)
Attacks Suffered	Total attacks suffered from other provinces
Defeats	Number of times the enemy successfully penetrated your defenses (percentage in brackets)
Clan Points Gained (current clan)	Total clan points gained in the current clan - every time you successfully attack a province your clan is at war with, you will be awarded clan points depending on the damage
Clan Points Gained (total)	Total clan points gained for the whole round
Aid Sent (current clan)	Amount of aid you have sent in current clan
Aid Received (current clan)	Amount of aid you have received in current clan
Targets Spied	Amount of targets spied in current clan
Time to Complete All Sciences	Total time to complete research on all sciences

Enhanced History: There are more History Statistics but these are Gold Used only.

You can also view graphs plotting the history of your province over the last 14 days in certain key areas:
- *Networkh*

- Land (Gold users only)
- Total Buildings (Gold users only)
- Total Units (Gold users only)

5.2 – Military Info

A full breakdown of your current military force is provided here for quick reference. You can choose to share certain military information with your clan mates from the preferences menu.

Extended Military Information is available to those who are currently in a Gold Clan. This feature allows Gold Clan members to view additional Military Information that is normally hidden. There are 6 sections visible: -

General - allows clan mates to view your status page.

Buildings - this permits clan mates to see what type and volume of buildings you have as well as what type of wall if any and whether or not you have a satellite in orbit.

Research - this lets clan mates look at what research you have done.

If you are Gold User your clan mates can also see the following Info. The dropdown list shows GU's as a darker color

History Graphs – allows clan mates to see you graphs (networth, land, buildings, units, attacks made, attacks received and clan points gained)

Statistic Breakdown – Allows clan mates to see your Networth and Turns Breakdown.

5.3 – Province Preferences

The preferences page allows you to change many options specific to your province including color schemes, province details, account details, account password and many gold user only options. This is also where you go to put your account into vacation mode or reset your account; as well as creating/editing your NZ Portal Profile.

The Profile option allows you to change certain details about your province, including your province name which can be changed if you are dead, if the game is between rounds and during the first 48 hours of a round. You can only change province name once every 2 weeks during the round.

Vacation mode puts your province into nuke protection for a specified period of time while you are away. During this time you cannot login to your province. You cannot go into vacation mode in the last 3 days of a round.

Your preferences page is also where you go to activate any gold users you may have purchased or to transfer them to another province via the Gold User Management section. Gold Memberships that have been used cannot be transferred, even if there are one or more rounds left.

5.4 – Community Score

For information on how the Community Score system works, go to the following page:

http://files.nukezone.info/community_score.htm

6.1 - General Clan Information

Clans are a vital element in NukeZone, and if you're not in a clan, join or create one immediately (see the Find Clan section for help joining a clan). Clans can provide protection to their provinces. A clan can have up to 20 members. There are four different types of clan members: Clan Leader (CL), Co-Leader (CO), Clan Trustee (CT), and Normal Member. The clan leader controls everything, and can select up to 5 clan trustees. These CT's can help the CL to control the clan by declaring war/peace, or by editing the clan message. If the CL gets banned or deleted due to inactivity, the CO will become CL, if there is no CO the first CT will become CL. If no CT is available, the province who has been in the clan the longest will become CL. Once a province leaves or is kicked from their clan, that province will no longer be allowed to return to that clan until the next round unless he left within the first 48 hours of the round. Close to the end of a round you are no longer able to join or create clans - this comes into force in the final 7 days.

Clan Leaders

Clan Leaders are the key to success for all clans. A clan must have an excellent leader to keep control and become unstoppable.

Clan Co-Leaders

Available only in a Platinum clan, the Co-Leader has all the same abilities as the Clan Leader except for: Change Clan Leader, Delete Clan.

Clan Trustees

Clan Trustees are almost like the clan leader. They exist to help the clan leader. In a Platinum Clan, the first CT can use the All Clan Message option to instantly send private messages to all clan members. If you are in a Platinum Clan, the CL and CO can set the rights for each single CT.

6.2 - Clan Points

In NukeZone, a Clan has three goals: Increase network, increase clan points and/or increase combo points. Clan points are only gained by attacking in a clan war. You must be in a clan for your province to earn Clan points. Clan points are awarded based on the damage inflicted on the enemy by an attack. The more damage you do, the more points your clan will receive.

When your clan declares war on another clan, you will receive 1-20 points depending on the damage inflicted for the first 48 hours. Then the maximum points you can gain drops by 2 points and continues to reduce by 2 points every subsequent 24 hours to a minimum of 4 points.

If another clan declares on your clan, you will receive 1-10 points when attacking them, again depending on the damage inflicted. In order to gain 1-20 points by attacking them you must declare back - this is known as a mutual war. Once your clan declares back you will have 48 hours of being able to get 1-20 points before the maximum points you can get begin to drop as described above.

If your clan does not declare back you will always get 1-10 points per attack. Note: different rules apply on the size of provinces you can attack depending on the type of war; mutual or one-sided. See 6.3 - Clan Wars for details.

When you kill a province in a one sided war you receive 25 clan points, when you kill a province in a mutual war you receive 50 clan points. Clan points gained from satellites, including for kills, are based on the amount of satellite power used.

When you kill a province of \$10,000 network or lower you do not gain any clan points. However, you still gain 1 kill on your stats record. Each time a clan achieves a bonus level the clan receives a fixed bonus of 300 turns per province and \$25 000 000. The clan bonus money is divided evenly among all clan members, whether or not the clan members are dead or alive. You must be a member of the clan for at least 72 hours to receive a clan bonus.

After your clan's first 5000 points your clan receives a mini bonus worth half a normal bonus. A super clan bonus is awarded at 50 000 clan points, 150 000 clan points, 250 000 clan points and 350 000 clan points etc. and is 1.5 times the regular bonus. A mega clan Bonus is awarded in replacement for every 2nd Super Clan Bonus at 100,000 clan points, 200,000 clan points, 300 000 clan points etc. and is 2 times the regular bonus. Both the turns and the money are increased with these special bonuses.

6.3 - Clan Wars

In NukeZone, when a clan is mad and wants vengeance over another clan, or the members just simply want to earn clan points, they declare war on the other clan. It can be fun and sometimes even be hard. This is why all clans must be at their prime and be prepared for a war at all times. After a CL or CT has declared war, they cannot declare peace for the next 24 hours. In addition, if one clan declares war against another clan, the network attack restrictions are still in place. However, if both sides declare war on each other, the network attack restrictions are removed. Network restrictions always apply the first 24 hours after joining a new clan and if you are using a thief or sniper, even in a mutual war. Clans may resume a war at any time after declaring peace as long as they don't already have 3 current war declarations against other clans; if they do then they must declare peace with at least 1 clan before they are able to resume the war. Once a war is resumed it must last a minimum of 24 hours before peace can be declared again.

6.4 - Clan Forum

Clan Forums are an excellent form of communication for a clan. You and your clan mates can discuss anything you want in there. You can post things like target provinces, ask for help, etc. It is the only forum not moderated by the Administrators and Moderators. The CL and CTs may edit/lock/delete whichever message they want on the Clan Forum.

Gold clans have the additional benefit of the Forum Management tool. This allows the clan leader to organize the clan forums and to give them custom names. It is possible to make a forum that only clan

trustees can visit or a read-only forum.

6.5 - Clan Tag

Clan tags are used to represent what clan a province is in. This is what it looks like: [TAG]Province.

6.6 - Clan Pages

By clicking the Clan link, you come to a page with several links dealing with your clan. Depending on if you are the CL, CO or a CT, some links might be crossed out. This means you do not have access to these areas. Here is all the information about each Clan Page.

Properties

Only the Clan Leader or CO can adjust the clan properties. In the properties page, the CL or CO can add or edit the clan name, clan tag, clan password and the location of the clan logo. Up to five CT's may also be selected from this page. The CL or CO may also choose to restrict shared military information for all new members for a period of time. Valid settings for this option are: None (no restrictions), 12 hours, 24 hours, 36 hours, 48 hours and 72 hours.

Send Aid

All members of the clan may access this page. Before you can send aid you must specify the receiver and enter the amount of money to send, and then press the Send Aid button. You can only send 1/3 of your available amount of money 3 times a day. Target province networth may not be larger than yours. You cannot send or receive aid when in nuke protection. Sending aid also costs you a 'tax' of 1 turn and 25% of the money sent, unless you have 100% banking research, where the 25% charge is removed.

Invite Player

Only the CL, CO and CT's can invite other provinces to join the clan. The networth of the other province does not matter. Mass inviting is not accepted. A clan can have a limit of 20 players including the CL. The CL or CO can create a short custom message which is included with the invitation sent to a province.

Clan Information

All members of the clan may access this area. On this page you can find a list of all members of the clan and their respective clan points acquired. Everything you see on the clan page is what everyone else sees except the amount of clan points a member has acquired.

Statistics Central (Platinum Clans only)

All clan members can access this page. This displays useful statistics including a Clan Overview, Clan Statistics and War History. The Clan Overview is updated on a real time basis and includes Last Login, Last Attack, Turns, Logins Per Day (LPD), Attacks Per Day (APD), Points Per Day (PPD). The Clan Statistics are updated every 6 hours and displays the province with most/least of the following: attacks made, attacks suffered, missiles sent, kills, times killed, clan points, aid sent, land, networth, units, buildings. The War History provides information about the clan's previous wars.

Spy Reports (Platinum Clans only)

All clan members have access to this page. The Spy Report page is separated into clans and clanless provinces. Only the CL, CO and CT's are able to delete the reports.

Clan Wars

All members have access to this area. This page displays a list of the clans that yours has currently declared war against; as well as the clans that have currently declared war against yours. This page also displays all clans you have declared peace on in the last 10 days.

Declare War/Peace

Only the CL, CO and CT's may access this page. They can declare war against another clan by entering the Clan ID of the clan they want to go to war with (must be in Networth Range of entire Clan Networth). If your clan has declared war against another clan more than 24 hours ago, your clan's CL, CO or CT can declare peace with the other clan by typing in the other Clan's ID in the text box provided.

Clan Message

Only the CL, CO and CT may access this page. They can post Clan Messages, which appear in the main page when a clan member logs in to NukeZone. If you have a gold clan, the CL, CO or CT can preview the message before posting it to check for errors. This is a great way to say something important and assure it reaches all clan members immediately. You can use certain G-Codes in the clan message – gold clans have additional G-Codes that they can use. G-Codes are explained further in section 7.2.

Clan Poll (Gold/Platinum Clans only)

Only the CL, CO and/or a CT's can access this page. They are able to create or edit the clan polls from

here. Only one clan poll can be created within a 24 hour period.

Clan Poll Archive (Gold/Platinum Clans only)

All members can access this page. This is where the archive of previous clan polls is stored.

Clan Forum Management (Gold/Platinum Clans only)

Only the CL and CO can access this area. This allows the CL or CO to change the forum settings and create new clan forums. The CL and CO of a Platinum Clan can give CT's the ability to access this area.

Domain Management (Platinum Clans only)

Only the CL or CO has access to this area. Here the CL or CO can request a custom NukeZone domain (tag.nukezone.info – where 'tag' is the clan's existing tag) and sub-domains for their clan homepage.

Receive Clan Bonus

All members can click on this to receive the Clan Bonus after the clan has reached 5,000, 10,000 and further multiples of 10,000 Clan Points. This link is enabled within 30 minutes after your clan has reached the Clan Bonus. You will receive a local event when this page has been enabled. If you do not go to this page to receive the bonus within 3 days of it being enabled you will automatically receive it. If you are in vacation mode at the time your clan receives a bonus then you will not receive a share of it. You need to be in the clan for 72 or more hours to be able to receive the bonus.

Clan Recruiting

Only the CL, CO and CT's have access to this area. This is where a clan can look for new members and specify the criteria which potential members must meet.

Find New Clan

Everyone has access to this area. This is where members can look for a new clan and specify the criteria which a potential new clan must meet.

Change Clan Leader

Only the CL may access this page. If a CL wants to give up the leadership, he can appoint a new leader of the clan. The old CL will then take over the new CL's old position.

Leave Clan

All members may access this page. If a member of a clan chooses to leave the clan, they can leave the clan immediately. However, The amount of time that provinces must wait after leaving a clan before joining another now increases based on how many clans they have already joined during that round. For 1-3 clans it remains at 24h and 4-5 clans is now 48h; then for 6+ clans the amount of time will increase at regular intervals.

Delete Clan

Only the CL may access this page. If the CL chooses to delete the clan, he may do so by clicking on Delete Clan.

6.7 - Clan Invitations

The CL, CO and CTs can view a complete list of pending clan invitations. They may also cancel any of these invitations; however invitations automatically expire after 7 days.

6.8 - Extended Military Information

Members of Gold Clans can choose to share their Extended Military Information, giving their clan mates the opportunity to view additional information about their province.

6.9 - Clan Status

Clans have a Status rating of: Brave, Fearless, Neutral, Fearful or Cowardly depending on the size of the clan they are declaring on. The larger the clan they declare war on, the more their status will rise to the positive end of the scale. Adversely, the smaller the clan that is declared upon, the more their status will fall to the negative end of the scale. This system is not in effect when you declare back on a clan. However, it will have a small positive affect, hence declaring back is a brave action. The clan status will affect the points you gain in a clan war: Brave (+20%), Fearless (+10%), Neutral (0%), Fearful (-10%) and Cowardly (-20%). War declarations during the first 10 days of a round do not have an effect on clan status, only declarations after that time will cause the clan status to change.

7.1 – Medals and Clan Awards

At the end of each round, 11 different medals are given out to the leaders of each area.

Medal of Honor - Most clan points gained by a province
 Medal of Growth - Highest network
 Medal of Death - Killed most provinces during clan wars
 Medal of Earth - Highest Land Area
 Medal of Courage - Performed most attacks
 Medal of Thievery - Most money stolen
 Medal of Knowledge - Quickest to research all sciences
 Medal of Mass Destruction - Most total NW damage made using missiles (excluding Tomahawk Missiles)
 Medal of Superiority - Province who first reaches 2500 clan points, counting from the beginning of the round and based on Clan Points Gained (total).
 Medal of Development - Province who first reaches \$2,500,000 network and keeps it for 48 hours.
 Medal of Accomplishment - Province who wins both the Medal of Honor and Medal of Superiority in the same round.

United Boundaries – Clan with the highest amount of land overall
 United Arms – Clan with the most attacks made during clan wars
 Golden Shotgun – First clan to reach 10000 points.
 Points Champion – Awarded to the first 3 clans in the points toplist (Gold, Silver and bronze)
 Network Champion – Awarded to the first 3 clans in the Network toplist (Gold, Silver and Bronze)
 Combo Champion – Awarded for the first 3 clans in the Combo toplist (Gold, Silver and Bronze) **

***Combo list: Combo points will be awarded to the top 100 clan rankings for points and for network. Clans will gain 1-100 points (rank #1 giving 100 points and rank #100 giving 1 point - anything beyond the rank of #100 receives zero points). Points are awarded daily as of midnight CET (server time), if the clan is in both top lists they will receive an additional 10% more points. So the maximum combo points a clan can obtain each day is 220 Combo points (100 for being number 1 in the Points-toplist, and 100 for being number 1 in the NW toplist + the 10% they get for being in both toplist = 20).*

7.2 - G-Code and Auto-Linking

The following G-Codes can be used in private messages, clan messages and on the forums. Please note that all G-Codes are case sensitive, except the G-Codes used in Clan Messages. If auto-linking is enabled all your entered URLs will automatically be transformed into clickable hyperlinks. Easy and simple link creation, simply enter the URL! However your URL must start with one of the following: http://, https://, ftp:// or www.

Available Tags in Private Messages:

Tag	Output
[USERPROVINCE]	Inserts the reader's province name. Works in both subject and message body.
[USERID]	Inserts the reader's province id. Works in both subject and message body.
[NAME]	Inserts the reader's name. Works in both subject and message body.
[B] [/B]	Text between these tags is displayed in bold. Works only in message body.
[I] [/I]	Text between these tags is displayed in italic. Works only in message body.
[U] [/U]	Text between these tags is displayed underlined. Works only in message body.

Available Tags in Clan Messages (Only available for Gold/Platinum Clans):

Tag	Output
[B] [/B]	Text between these tags is displayed in bold.
[I] [/I]	Text between these tags is displayed in italic.
[U] [/U]	Text between these tags is displayed underlined.
[S] [/S]	Text between these tags is displayed with a line through the middle the text.
[HR]	Inserts a horizontal line.
[CENTER] [/CENTER]	Text between these tags is displayed center aligned.
[LEFT] [/LEFT]	Text between these tags is displayed left aligned.
[RIGHT] [/RIGHT]	Text between these tags is displayed right aligned.
[COLOR=name] [/COLOR]	Text between these tags is displayed in specific

	color. See below for available font colors.
[FONT=name] [/FONT]	Text between these tags is displayed in specific font. See below for available fonts.
[SIZE=number] [/SIZE]	Text between these tags is displayed in specific size. See below for available font sizes.
[LAST_EDITED]	Example output: October 5th, 2002 01:45 CET
[EDITED_BY]	Name of CT/CL who edited the message.
[CLAN_POINTS]	Inserts total amount of current clan points. *
[NEXT_BONUS]	Inserts amount of points required to reach next bonus. *
[NW_RANK]	Inserts the current Networth rank of your clan. **
[PTS_RANK]	Inserts the current Points rank of your clan. **
[CBO_POINTS]	Inserts the Combo Points of your clan.
[CBO_RANK]	Inserts the current Combo Points rank of your clan.
[24H_CLAN_POINTS]	Inserts clan points gained over 24 hours.
[24H_PTS_RANK]	Inserts ranking over 24 hours in clan points gained.

* Note: With the [CLAN_POINTS] and [NEXT_BONUS] tags, if you wish to have a "p" after the points (e.g. "We have this many clan points: 2500p"), the "p" must be added following the tag [CLAN_POINTS]p. You can enter anything after the tag, not just the "p", so could for example enter "[CLAN_POINTS] points".
** These values are updated once every 6 hours.

Available Tags on the Forums:

Tag	Output
[B] [/B]	Text between these tags is displayed in bold. This tag does not work in the topic name.
[I] [/I]	Text between these tags is displayed in italic. This tag does not work in the topic name.
[U] [/U]	Text between these tags is displayed underlined. This tag does not work in the topic name.

Available Special Tags on the Clan Forums (Only available for Gold/Platinum Clans) *:

Tag	Output
[S] [/S]	Text between these tags is displayed with a line through the middle of text. This tag does not work in the topic name.
[IMG]url[/IMG]	Inserts an image. Specify the image source by entering the full url between these tags.
[COLOR=name] [/COLOR]	Text between these tags is displayed in specific color. (see below for valid colors)
[FONT=name] [/FONT]	Text between these tags is displayed in specific font. (see below for valid names)
[SIZE=number] [/SIZE]	Text between these tags is displayed in specific size. (see below for valid sizes)

* Only available if your CL has enabled it on the Clan Forum Management page.

Available Font Colors:

Aqua, black, blue, fuchsia, gray, green, lime, maroon, navy, olive, pink, purple, red, silver, teal, white, yellow. In addition, you may also enter any hexadecimal color code. Please note that the # sign is required when doing so.

Available Fonts:

Arial, Comic Sans, Courier New, Georgia, Helvetica, Impact, Times New Roman, Verdana

Available Font Sizes:

The number argument can still be any number between 0-6, but you may now also specify any custom size you want by adding "pt" after the number. So 16pt means size 16. The old style 0-6 is translated as follows: size 0=8pt, size 1=10pt, size 2=12pt, size 3=14pt, size 4=16pt, size 5=18pt, size 6=20pt.

7.3 - Extended G-Codes

As a Gold Clan, not only do you have the ability to use the regular G-Codes, you also get an extended

version of it. It can only be used in the clan message and can be used by Gold Clans only. A CL/CT can easily target a province and/or a clan by using these codes. The Extended G-Codes are not case-sensitive. A clan message can contain a maximum of 25 Extended G-Codes.

Available Extended G-Codes in Clan Messages (Only available for Gold/Platinum Clans):

Tag	Output
[P=id]	Creates a link to the specified province..
[C=id]	Creates a link to the specified clan.
[A=id]	Creates a link to the aid page for the specified province
[R=id]	Creates a link to the specified enemy province's spy report.
[CR=id]	Creates a link to all of the specified clan's spy reports.
[PNW=id]	Inserts the specified province's name and network and creates a link to the attack page. The network will be made bold if the enemy is within the viewer's attack range.
[NW=number]	The number must be a valid network value. The network is formatted and will be made bold if the enemy is within the viewers attack range.
[URL=link]text[/URL]	Turns the "text" into a hyperlink to click on. Valid "link" types are http, https, ftp, irc
[TIMER=YYYY-MM-DD hh:mm]	Turns the time into a countdown timer.

Using this feature is fairly simple. While typing a message, a CL/CT can target a province by typing: [P=ProvinceID] or [C=ClanID]. By doing so, this converts the ID Number into your target's Province or Clan Name and ID Number as well as creating a clickable link to the province/clan information page.

Example: A CL/CT types in, "...War. Everyone attack this guy, [P=123]!" The G-Code converts this to, "...War. Everyone Attack This Guy, FakeProvince (#123)!", where the "FakeProvince (#123)" part is a clickable link that brings you to this enemies province information page. The same is done with clan targets.

8.1 - Technical Support

If you need technical support please contact our Customer Support by sending an in-game message to *Customer Support* (found in your contact list when you write a message) or simply post a message in the *Technical Support and Bug Reports* forum. Links to the multi report system, the EULAs and other important resources can be found by clicking the *help* link in the top right.

8.2 - Ideas and Suggestions

If you have an idea or a suggestion, please post it in the *Suggestions and Ideas* forum.

8.3 - Bug Reporting

Please report all bugs in the *Technical Support and Bug Reports* forum. Bugs that might affect the security or integrity of NukeZone and the server should NOT be posted in public; please inform the Customer Support directly by using one of the above-mentioned ways.

8.4 - IRC

NukeZone has its own IRC channel on the QuakeNet network. This is the place where the NZ Crew and the most experienced players hang around. Everyone is welcome!

Network: QuakeNet

Server: irc.quakenet.org

Channel: #NukeZone (for general NukeZone chat)

#NZSupport (for any game related problems/questions you might have)

#NZVeteran (must be veteran to join)

A quick IRC guide to get you online can be found here:

<http://www.nukezone.info/ircGuide.aspx>

8.5 - Rules

The Game Rules can be found at: <http://www.nukezone.info/gameRules.aspx>
The Forum Rules can be found at: <http://www.nukezone.info/forumRules.aspx>

8.6 - Credits

The NZ Crew:

Stefan Karlström (aka Guffy) – CEO, Lead Developer, Chief Administrator
Anthony Wiezoreck (aka EhpeX) – Chief of Operations, Administrator
Steve Brown (aka Primal) – Assistant Director of Operations, Administrator
Christian Anderstedt (aka glamDring) – Administrator
Chris Twine (aka Aqua) – Game Moderator+
Chris Norton (aka FireHawk) – Director of Community Development, Game Moderator
Keith Hodge (aka Pappahodge) – Director of Customer Relations, Game Moderator
Tim Bos (aka Bosje) – Chief of Information, Game Moderator
